cent compound interest. It is understood, though, that I will not be liable for a greater amount than above stated. Above guarantee to be good on all shipments of trees and plants made after December 1, 1914. This should be a strong guarantee to my customers that I am doing everything possible to send out stock true to name.

DISCLAIMER OF SHIPMENTS OF SEEDS.

While I exercise the greatest diligence and care to have all my seeds true to label and of best quality, I wish it understood that I give no warranty, express or implied, as to the description, quality or productiveness of any seeds I send out, and will not in any way be responsible for the crop. If the purchaser does not accept the goods on these terms they are to be at once returned. Subject to the above conditions, I make sales at the very moderate prices at which I sell my goods. This disclaimer is used by all reputable seed houses.

REMITTANCES should be made by Postal or Express Money Order, Bank Draft, Registered Letter, or I will take your personal check, if you prefer. Postal stamps in small amounts can be sent if necessary, 5 or 10c stamps preferred.

CLUB ORDERS. If a number of neighbors order together, I will tie each order separate with the purchaser's name attached, then pack all together in one box and I will pay freight on same, providing all orders together amount to \$10.00 or more for trees and plants. I will give the person sending me a Club Order 10 per cent of the total amount of such orders in trees and plants. You must state, though, just what you wish for the amount, as otherwise you may get something you do not need, or do not care to plant. Please do not overlook this.

CLAIMS. All claims for errors, shortage or anything else pertaining to your shipment, must be made promptly after receipt of goods. In writing to me about your shipment, please remember to give your order number and full particulars. Human help is not infallible, and shipments, as well as mail matter, will miscarry, but please understand this: "The complete satisfaction of my customers is my first wish, and I gladly rectify any and all errors on my part."

RAILROADS. I can ship from Beatrice direct over the Burlington (C. B. & Q. and B. and M.), the Union Pacific and the Rock Island Systems. Also have splendid connections over all other lines at nearby terminals and connecting points.

PACKING. My packing house is 160x140 feet, giving me plenty of room. We drive direct from the nursery into the packing house, so trees and plants are not exposed while being stored or packed. Freight orders are almost always packed in paper-lined boxes, smaller orders in bales, which are also paper-lined to keep the moisture. I ship trees with good success to South America, New Zealand, Japan, China and Alaska.

GUARANTEED DELIVERY. I guarantee the safe arrival of all my shipments at destination. I will replace free of charge, any shipment lost or spoiled in transit, no matter whether goods go by freight, express or parcel post. **You are not taking any risks.** Trees and plants go by fast freight, and we seldom have any trouble, although we ship thousands of boxes as far east as New York and west to the Pacific States.

NO TRAVELING AGENTS. Some of my customers have written me that unscrupulous agents pretend that I was in partnership with the nursery they are selling for. These are simply lies. I am not interested in any other nursery than my own here at Beatrice. **I do not send out traveling salesmen anywhere.** In a very few localities I have a local agent who is taking orders for me from his neighbors, who are personally acquainted with him. At the prices I make in my catalog it would be impossible to send out traveling salesmen. I would lose money, as such a salesman costs about 50 per cent of the selling price.

To My Friends and Patrons

I take pleasure in presenting you with this, my Thirty-eighth Annual Catalog. It has grown from an eight page circular to this book of 128 pages.

Forty-eight years ago, then a boy of 19, I came from Switzerland, my old home, and located here in Nebraska on a farm, and 10 years later started a little nursery 10 miles from any railroad. I have been in the same business ever since, and for almost a lifetime I have been engaged in growing trees and seeds "that grow," and with the help of five of my sons, who were born here and grew up in the nursery and seed business, I still personally look after the growing and shipping of my products. You may therefore rest assured you get well grown, clean, upland Nebraska grown nursery stock and fresh tested seeds when you order from me.

I was one of the first to offer trees and plants direct to my customers and without the medium of agents. Cutting out the usual 50 per cent paid to agents enabled me to make much lower prices, and in the many years that I have been in the business I have saved my customers thousands and thousands of dollars. My aim has always been to furnish first-class stock at lowest possible prices by eliminating all unnecessary expense in growing and marketing same.

PRICES OF SEEDS are normal again; some items are very low. The quality will be very good.

PRICES OF TREES AND PLANTS. I have made these as low as possible. I know that all farm products are too low in price, as I am a farmer myself. It is necessary for all of us to buy as cheap as possible. Quality should always be considered though. Under present circumstances I cannot see how well grown trees can get cheaper, even in the next few years. You will find my trees extra well rooted.

One of my customers writes the following about my catalog: "How much better is your catalog to buy from than an agent. With your descriptive price list, I sit at my leisure and convenience and select what I want, while an agent would try to get me to buy what he wants to sell and has most of, simply because it would make him more money."

I thank you kindly for the most liberal patronage of the last season, and I assure you, one and all, that I appreciate it very much. Soliciting a continuance of same, I am

Yours for good fruit and plenty of it,

CARL SONDEREGGER.

REFERENCES: My old customers all know me. I refer all those who have never dealt with me to Union State Bank, or Beatrice National Bank, of this place, also Dun & Co., and Bradstreet reports of the Sonderegger Nurseries & Seed House.

WHAT I AGREE TO DO.

MY TREES ARE GUARANTEED TRUE TO NAME. I take all proper precaution to have my trees true to label, both in the propagating and packing department, knowing how provoking it is to find that trees are not true to name when they come to bearing. Should any tree, though, from any fault of ours, prove not true to label, I will, on proper proof, either replace double the number or refund the price paid for such trees and 6 per

TREES AND PLANTS FREE FROM INSECTS. My nurseries have been inspected by our State Entomologist, and are again inspected by an expert before shipping. You will get clean trees, free from any disease. There never has been any Yellow or San Jose Scale in our county; and I take every precaution possible to safeguard my customers. I also aim to comply with the laws regulating the traffic in trees and plants of all states, so my customers will have no trouble in getting the trees. Should any inspector, though, condemn any of my trees or plants, I will replace them free of charge, as soon as I am notified. A copy of the State Entomologist's Certificate of Inspection is attached to every shipment I make. Below I give a copy of the Certificate of Inspection by our State Entomologist:

This is to certify that on the 6th day of July, 1923, the growing stock and premises of the Sonderegger Nurseries, Carl Sonderegger, President, of Beatrice, Nebraska, was inspected, and no San Jose Scale was found, nor any indication that it had ever been present in the nursery or its vicinity. The stock is apparently in a healthy condition and free from other dangerous insect pests and fungus diseases.

Myron H. Swenk, State Entomologist, Lincoln, Nebr.

QUALITY OF STOCK. My trees and plants are well and carefully raised, and grafting and budding are done by experienced workmen. I dig with the most modern tree diggers, and you get practically all the roots there are on the tree. Nothing is left undone to insure well developed, straight trees, with good, even tops and without forks. You will find my trees graded to the size given in this catalog, and you will get just what you ordered. Our soil is especially adapted to the raising of first-class nursery stock, and our rather severe climate insures vigorous, hardy stock, that can stand the raw, cold winters and the hot, dry summers, if necessary. I can point to good orchards from my nursery, in the Dakotas, as well as in California, Missouri and New York. You make no mistake in purchasing your trees from me.

I pay freight charges on all orders for trees and plants (not seeds) amounting to \$10.00 or more, but only when the full amount of the order is sent to me before I ship same.

PHOTOGRAPHS. I like to have photographs of trees, shrubs, fruits or vegetables that came from my nursery. I offer \$5.00 in cash for the best picture; \$3.00 for the second, \$2.00 for the third best and \$1.00 each for the next five. Here is something for girls and boys with their cameras. Prizes will be paid Oct. 1, 1924. Having received quite a large number of good photographs this year, I paid prizes as listed below:

PREMIUMS I PAID FOR BEST PHOTOGRAPHS, OCTOBER, 1923.	
C. F. Schmid, Perry, Okla.	\$5.00
F. Rahn, Altura, Minn.	3.00
A. Duis, Odell, Nebr.	2.00
J. A. Uridel, Bruno, Nebr.	2.00
Miss Evelyn Gausmann, Hampton, Nebr.	2.00
William Bernauer, North Platte, Nebr.	2.00
J. S. Dell, Beatrice, Nebr.	2.00
Mr. Chas. D. Weller, Conway, Ia.	2.00
H. H. Linke, Eustis, Nebr.	2.00
Mrs. Anna Diedrichs, Fayette City, Pa.	2.00
H. L. Hurtzell, Wakefield, Kans.	2.00
P. J. Keating, Atkinson, Nebr.	2.00
Rev. Carl Mueller, Yankton, So. Dak.	2.00
Wes J. Sekal, Hanover, Kans.	1.50
Mrs. John M. Jones, Hennessey, Okla.	1.50
Martin Hurm, Owenton, Ky.	1.50
Anthony L Preska, Evansville, Ill.	1.50

Mrs. M. E. Hoover, St. Mary's Kans.	Due Bill
Joseph Rott, Cuba, Kans.	Due Bill
Mrs. John Meyer, Seattle, Wash.	Due Bill
Mrs H. C. Hoch, Yuma, Colo.	Due Bill
Mrs. F. B. Dalrymple, Barnes, Kans.	Due Bill

PREPAYING FREIGHT. I prepay freight to any railroad station in the United States and on all foreign shipments to the United States border, on all orders for trees and plants (not seeds) amounting to \$10.00 or more, provided the full amount of the order is in my hands before I make shipment. If you prefer to get your trees by express, I will pay as much toward the express charges as the freight would amount to. The difference in express and freight is not near as much as formerly. You will have less annoyance and trouble if I pay freight in advance. Should a shipment which I am to prepay, not be prepaid when it reaches you, please pay the freight and send me the receipt and I will remit the amount to you promptly. On seeds in bulk, also on all farm seeds, I do not prepay the freight unless by special agreement.

EXPRESS. I can ship trees, plants and seeds to any point by express. Small orders always go cheaper by express than by freight.

PARCEL POST. Parcel Post service is getting better. I can now send packages of 50 lbs. weight to any postoffice. On a distance of 300 miles, Parcel Post is cheaper than express, while on the long distances express is rather a little lower.

On pages 68, 69, 70 and 71, I give prices of all trees and plants that can go by parcel post, and at these prices I pay all postage. Please figure those prices when stock is wanted by parcel post, and do not order any other trees or other sizes not given on pages 68, 69, 70 and 71, to go by parcel post.

The difference in the prices by freight or express and by mail is a little more than just the postage, as it costs me a great deal more to put up trees for mail than in bales or boxes.

Prices are given at the rate of one, ten, one hundred and one thousand. Five trees go at the rate I make per 10; 50 trees at the rate per 100; and 500 trees at the rate per 1000. This means that you can take 50 apple trees of as many varieties as you wish and figure them at the 100 rate.

NEVADA CUSTOMERS. On orders for trees and plants amounting to \$10.00 or more, where I pay freight charges, I make an additional charge of 10 per cent for freight charges, as freight charges to Nevada points are much higher than to any other state.

INDEX. For quick reference see Index on page 128.
CATALOGS I PUBLISH. GENERAL NURSERY AND SEED CATALOG, of which this is a copy. MARKET GARDENER'S WHOLESALE CATALOG, for gardeners and large truck farmers. FALL CATALOG, being an illustrated price list of Bulbs and Seeds for Fall planting.

When setting out trees, plants or shrubs always make holes somewhat deeper than they ought to be, then fill in to proper depth with good, rich top soil. Work fine dirt in around the roots, pack soil and fill hole to within three or four inches of top, give tree a good soaking, then fill last few inches with loose dirt. Keep this well pulverized, it will serve as a mulch.

Testimonials and Photos from Satisfied Customers

Two-year-old Compass Cherry Plum Tree.
Rev. Carl Mueller, Yankton, So. Dak.

Dorothy Perkins Pink Rose.
C. F. Schmid, (See Testimonial)

Dear Sir: I received my trees yesterday and have them set out and they sure are fine trees. My wife also received the ferns which you so gladly sent to replace the first order which, perished in transit. We are more than pleased with the service we get from your firm and you will always get our future orders as we certainly like your goods and service.

C. Sukow, Otis, Colo., R. F. D. B, Box 14.

I had splendid success with all your seed I tried last year. Extra good with your White Wonder Cucumber. Took first prize on cucumbers at Dundey County Fair, September, 1922, held at Benkelman, Nebraska. I want some more prizes for 1923 if I am successful as last year.

Mrs. George Cathey, St. Frances, Kans.

Dear Sir:

The bale of trees and grape vines purchased from you arrived in perfect condition and this package sent by express surely was packed properly and with the best system of any small package ever received by me. I also have examined the trees and note they are No. 1 stock and look good and healthy. I appreciate and wish to thank you also for forwarding my order before, I remitted my check, which I am now enclosing, \$10.

Denton Gebbart, Hart, Mich.

Bruno, Nebr., July 17, 1922.

Gentlemen:

Wish to acknowledge receipt of your kind letter advising me the name of the plum samples mailed you for which accept thanks.

I am enclosing pictures of a spirea and a catalpa. These were received from you in the spring of 1921. All the shrubs and trees are doing nicely. This is not to be wondered at as they came from the best nursery in the Middle West, viz: the Sonderegger Nurseries of Beatrice.

Yours truly,
J. A. Uridil, Bruno, Nebraska.

Perry Okla., Nov. 10, 1922.

Dear Sir: I see in your catalog that you would like to receive some pictures taken from some of your stock. I have two here which I think are pretty good. One is a 2-year-old Champion peach tree, it had 533 perfect peaches on this last summer. I have several more just as good. I have a fine orchard here now. Every place I set a tree, I first dig a hole about 6 feet square and about that deep. I throw all kinds of old things in the bottom, then some dirt till the hole is full again. It's hard work, but it pays. Some trees make growth 4 feet in one summer. The other is a picture of a Rambler rose that you sent me five years ago as a present with my order of trees. I don't know its name, the roses are pink. That bush sure was beautiful last summer. Just one bower of roses. The children are my two girls and boy with their big doll.

Yours truly,

Mrs. C. F. Schmid, Perry, Okla., Route 8.

J. A. Uridil. (See Testimonial)

Sonderegger's Wonderful Golden Winesap Apple.

Introduced by "The Fruit Grower" of St. Joseph, Mo., from whom I got my first trees. So you will be absolutely sure of getting the genuine Golden Winesap.

Imagine the combination—the juicy tartness of the Jonathan, the satisfying meatiness of the old Winesap, all the beauty of the Winter Banana, that deep gold color of the Grimes, with a rich, deep red blush, then add the keeping quality of the good old money making Ben Davis—and you have a vivid picture of the new apple—Golden Winesap.

In my nursery I find that the tree is a very strong grower, healthy and vigorous. Personally I prefer the Golden Winesap to Delicious in flavor. It is also a better keeper and will not get mealy like the Delicious. In my opinion, it is a better apple than Delicious and will become just as popular. I prefer Golden Winesap to Jonathan. As the Golden Winesap originated in Utah, it should be hardy most anywhere. I have a few trees that went through four Nebraska winters in fine shape.

Rather large in size, from 3½ to 4 inches in diameter. The tree is a fine, healthy grower and an early bearer. If you could just see Golden Winesap and then taste it, you would plant this variety at once. We sent sample apples to a number of the best authorities in America. The verdict was unanimous in favor of Golden Winesap.

In my garden the Golden Winesap does well. Had a few apples on last year (when 3 years old) and a good crop this year. They are very young bearers.

Price Golden Winesap (See other varieties, page 5):	Per 1	10	100
2-3 feet, 1 year tops, 2 year roots.....	\$0.50	\$4.50	\$40.00
3-4 feet, partly branched, 2 year.....	.75	7.00	65.00
4-5 feet, well branched, 2 year.....	1.00	9.50	90.00
5-6 feet, well branched, 2 year.....	1.20	11.00	100.00

Coffeyville, Kans.,
Sept. 4, 1923.
Sonderegger Nurseries & Seed
House, Beatrice, Nebr.

I have 75 Golden Winesap Apple trees and they are 3, 4 and 5 years old. They score high as an apple of distinctive quality and value. It's a most wonderful bearer and bears young and annually.

The fruit is big, round and flat shaped, golden when ripe, good to look at, better still to bite into. It keeps right through the winter until spring and holds its color and flavor. Fine for cooking, baking, eating out of hand or marketing. Children are no fools, mine are always found around the Golden Winesap trees. Birds also peck holes into them, which goes to show that birds and children know what is good.

I think it's an all-purpose apple with us by far most popular.

S. HAHN,
R 1 Coffeyville, Kans.
P. S.—I won 1st and 2nd cash prize at our County Fair on Golden Winesaps.

FRUIT DEPARTMENT.

APPLES.

The most important fruit we have especially in the middle and northern states. Like oranges, we can have them almost all the time. A good, healthy fruit, with considerable food value. Every farmer and city lot owner should raise a good supply of apples. Plenty of apples will keep your family in good health and will help solve the high cost of living. Apples are usually planted 25x25 or 30x30 feet. When planting 30x30 feet, it is well to plant other fruit trees as fillers. Good trees for this purpose are **Dwarf pear, Cherries or Peach.**

Most varieties of Apple do not bear in payable quantities until 6-7 years after transplanting. By planting so-called fillers, one gets an income in a very few years from the Orchard. By the time the apple trees get too large, the fillers will mostly be dead and can be removed. Most large Commercial Orchard Companies plant in this way.

I give below the best varieties in cultivation for home use and market. The descriptions are as near right as I could make them, as the most varieties I have grown myself in years gone by. The date given under every variety is the date the apples are getting ripe. Most apples I offer are grafted. None of the apples I offer are over three years from graft or bud, are thrifty, well rooted and of good caliber. Taking everything into consideration, you will find my prices very reasonable, much lower than you can buy of an agent.

Price of all apples, except **Golden Winesap**, see page 4:

	1	10	100
2-3 feet, 2 year roots, 1 year tops.....	\$0.25	\$2.30	\$22.00
3-4 feet, 2 year roots, 2 year tops, branched.....	.35	2.60	24.00
4-5 feet, 2 year roots, 2 year tops, branched.....	.50	4.80	45.00
5-6 feet, 2 year roots, 2 year tops, branched.....	.75	7.00	65.00

WINTER VARIETIES.

THE "TRUE DELICIOUS" APPLE. Fruit is large, with the surface almost covered with a most beautiful brilliant dark red, blending to golden yellow at the blossom end. In quality it is unsurpassed, in flavor sweet, slightly touched with acid, but only enough so as to make it all the more pleasing, with an aroma delightfully fragrant. The flesh is fine-grained, crisp, juicy, melting and withal delicious, and always brings fancy prices in the market. In keeping quality it ranks with the best, coming out of storage in March and April in good condition. Tree is very hardy. Delicious originated twenty years ago at Peru, Madison County, Iowa, by the late Jesse Hiatt, and on his farm the original tree still flourishes, bearing annual crops of beautiful fruit. I advise all my customers in the Middle West to plant Delicious. You will never regret it. No better apple exists, except probably the Golden Winesap. Is no more an untried novelty, but has been largely planted in the Middle West and Pacific States. Commercial orchardists plant them by the thousand. I know of some orchards of Delicious in this vicinity that have stood our Nebraska climate very well, but they do not bear as regular as Golden Winesap or Jonathan. Second week in October.

ARKANSAS BLACK. The rich, dark color attracts much attention, whenever this variety is exhibited. It takes a long season to develop its fruit, and should therefore, be planted in more southern latitudes like Oklahoma, Arkansas, Kansas and the southern half of Nebraska. Fruit medium to large, orange yellow, nearly covered with dark red, sometimes almost black. It is very hard at picking time and is one of the best keepers, with ordinary care in handling. Last August I bought some Arkansas Black apples at a fruit stand and they were in perfect condition, hard and crisp. A fine market variety. Middle of October.

BALDWIN. Large, bright red; crisp, juicy, rich. Very productive. Good Eastern variety. I do not recommend Baldwin for the Middle West; have never seen it do well in Nebraska. Middle of October.

BEN DAVIS. A well known, long keeping, winter apple. Considered by a good many of rather inferior quality. It is one of the best for baking or cook-

ing. It is today one of the best paying apples in the commercial orchards of eastern Nebraska. The apple is large, roundish conical, yellow streaked with crimson, often almost red and sells well in the markets. I still recommend this apple for Nebraska and Kansas. Middle of October.

BLACK BEN DAVIS. Claimed to be a great improvement of the old Ben Davis. I find it of better color, but not much better in quality. It keeps well till summer and brings fancy prices then, same as the Arkansas Black. Very hardy and good bearer and its color is very attractive. Middle of October.

BANANA. The tree is hardy, having been originated in Michigan. It is wonderfully productive and a young bearer. The fruit has a rich flavor; spicy and aromatic. Flesh yellow, firm and juicy. Color a golden yellow; very attractive and a good keeper. Tree is a very strong grower, and will grow to be of immense size, suitable for lawn or shade tree; the leaves being nearly double the size of other varieties. A fine apple for the Middle West, but should not be planted north of here. First October.

FRANTZ. A new apple from Europe. The tree is entirely hardy, has stood the test of the severe winters of 1898 and 1899 in Minnesota without being damaged in any way whatever, and has borne a crop of apples every year. It is a strong, vigorous grower, of symmetrical form, has smooth bark, which never cracks or is injured in any way by frost or heat. The apples hang tightly on the tree, and it is seldom that one is blown off by the wind. The trees commenced to bear three years after transplanting and have since borne a crop every year. When six years old most of them bore over a bushel of sound apples. The fruit is medium to large in size, greenish with red, with white and tender meat, very thick skin, and ripens in Minnesota from the 20th to the end of September. It is a long keeper. I have kept Frantz Apple in my cellar till July in good shape. Customers write, does extra well in New Mexico. Frantz apple can only be bought of me.

GANO. Improved Ben Davis. More even red, better flavor, hardy. Good for market. Some of my customers, though, still prefer the old Ben Davis as it seems to be a better bearer than Gano. First two weeks in October.

APPLES.—(Continued.) WINTER VARIETIES—See Prices Page 5

GRIMES GOLDEN. Probably the nearest to a perfect apple of any variety now in general cultivation. It combines the rich, aromatic flavor, relished by the great majority of persons and an excellent culinary quality, with an attractive golden yellow color and a long season of usefulness. It does not keep as well as most winter apples. In cold storage the Grimes will keep till May and in an ordinary cellar till January, if carefully wrapped and stored in boxes; has been propagated since 1804. The tree is healthy, good grower, steady bearer, needs considerable pruning, as it is inclined to grow bushy. A good ripe Grimes is hard to beat. Do not plant north of the middle of Nebraska. This apple has been grown for over a century and is still one of the best. Latter part of September.

INGRAM. Medium size, yellow covered with red. Very similar to the old Janet or Genaton, but much better. Fruit does not rot on the tree like Janet. Keeps well till spring in ordinary cellar. Should be in every family orchard. A large orchardist in Kansas claims that the Ingram is his most profitable variety. Ripens with Janet.

Yellow Transparent.

Delicious.

JANET. (Genaton.) Medium size, juicy, fine flavor after the holidays, a very good keeper; tree blooms 2 weeks later than other varieties. I prefer the Ingram, though, which is very much like the Janet, without its bad qualities, the Janet some years rotting badly on the tree. Middle to end of October.

JONATHAN. Still one of the very best apples we have. I am not willing to admit that it is inferior to the celebrated Delicious, in regard to flavor, quality and richness of color (dark red), and productiveness. The only weak point being the keeping qualities—It will not keep much longer than the holidays without cold storage. I recommend the Jonathan anywhere south of the middle of Nebraska. Not hardy in the northern states. End of September.

KING DAVID. A very productive variety that brings high prices in the markets; a good shipper, western orchardists often shipping them to Australia. Fruit of medium size, ripens with Jonathan, but not quite as good quality as Jonathan. Tree hardy, strong grower and comes to bearing very young. It blooms late and so often escapes spring frosts. Better colored and more productive than Jonathan. Should be extensively planted. Fore part of October.

MAMMOTH BLACK TWIG. (Paragon) One of the very best for the Middle West. Fruit large, dark red, firm, sub-acid and juicy. I find that this apple keeps as long as any apple in a common cellar. In fact, you can hardly eat it before January, when it begins to get good. A profitable variety in southeastern Nebraska. 20th of October.

MISSOURI PIPPIN. While this apple is not of the best quality, it is a good, constant bearer and is one of the few that really does well in western Nebraska, western Kansas, and eastern Colorado, where I recommend planting it. Beats no apples all to pieces. Middle of October.

MCINTOSH RED. I have never fruited this apple myself, but according to my customers in Montana, Wyoming and Idaho, it does well there and is also largely planted in the Eastern States. Apple large, red all over, flesh white, tender, sub-acid and mild. Sells well in the market and is very hardy. Good keeper. Middle of October.

NORTHERN SPY. Large, bright red and very hardy. Comes into bearing very late. Not a success in Kansas and Nebraska, but largely planted in Michigan and the East. October 1st to 15th.

NORTHWESTERN GREENING. Extremely hardy and vigorous grower. Fruit large, greenish yellow when ripe. Good and a long keeper. One of the very best apples for baking. Restaurants pay big prices for it. Especially recommended for Northern States. 20th of October.

THE "SWITZERLAND" APPLE.

This new Swiss apple has been brought over from Switzerland by an old German, who planted the tree below San Antonio, Texas, where the first tree fruited the second year after transplanting in 1899. Since first bearing, it matured a fine crop of apples annually. The apples are greenish with red stripes, making a fine market variety; of a fine flavor and good keeping qualities; the tree is rather dwarf with very large green leaves, and is hardy. It will bear in the extreme South where other varieties are not a success.

I advise especially my southern customers to try this apple. Should also do well as far north as the middle of Nebraska.

SPITZENBERG. (Esopus.) Large, oblong, nearly covered with red. An old variety, good bearer, very hardy and has long been a standard winter apple. In the Rocky Mountain districts and New Mexico, this tree is a success, while I cannot especially recommend it for Nebraska or Kansas. Middle of Oct.

ROME BEAUTY. Not hardy in Nebraska, but a fine apple for the Southwest and Pacific countries. Also largely planted in the eastern states, especially Ohio and Indiana. Fruit large, yellow with red. Good quality, a long keeper and largely planted for commercial orchards. Blooms late and ripens in October.

STAYMAN'S WINESAP. Originated by Dr. J. Stayman at Leavenworth, Kan. Largely planted from New Jersey to Kansas, the Ozarks, the Rocky Mountains and the Pacific Coast. A seedling of the old winesap. If properly grown, the fruit is large, often of solid, deep crimson color. Quality excellent for dessert and good for cooking. The maximum quality is developed in December and January. Keeps well. October.

TALMAN SWEET. Of medium size, pale yellow, slightly tinged with red; firm, rich, sweet. The most valuable apple for baking and otherwise fine. Keeps well till April.

WINESAP. Another old and tried variety of a beautiful red color, rather thick skin, good quality and a long keeper. The apple is medium size and especially from older trees, it is hard to get them to grade No. 1. For the home orchard I still recommend it especially for the Middle Western States. Middle of October.

APPLES.—(Continued)

WINTER VARIETIES—See Prices Page 5

WAGENER. Large with dark red on the sunny side. Flesh is very juicy, firm, not acid and of extra good flavor. Bears when young and is very productive. Mostly planted in Montana, Idaho and California and New Mexico. Very fine apple for the market. Ripens fore part of October.

YORK IMPERIAL. I cannot understand why so few York Imperial are planted. It is a fine, large, red apple, tender and juicy, and is perfectly hardy in Nebraska and bears well here. Try them. October.

YELLOW BELLFLOWER. Large oblong; yellow, sometimes with a blush in the sun; flesh firm, crisp, juicy, sub-acid; one of the standard varieties in California and should be extensively planted; tree a good grower, very productive; largely planted in the East. October.

FALL VARIETIES.—See Prices Page 5

AUTUMN STRAWBERRY. Good size and color, fair quality for table and market. A very hardy and profuse bearer. Ripens in September.

FAMEUSE. (Snow.) Fine dessert apple. Deep crimson, snowy white flesh. Hardy, but does not bear as young as some other varieties.

MAIDEN BLUSH. Good size, fine flavor, beautiful blushed, good bearer, a fine apple for home and market. September.

WEALTHY. This apple does well almost anywhere and is especially adapted for Minnesota and the Dakotas, as it is perfectly hardy. In those states it can almost be called a winter apple, keeping well there till Christmas. It bears well here in Nebraska. A good eating and cooking apple, and very good for drying. Fruit is large, mostly covered with red, fine grained, juicy, but a little sour. I have seen Wealthy trees covered with fine apples in eastern Montana. Should be planted everywhere. September.

RAMSDALL SWEET. Rather large, dark red, productive, best sweet fall apple. September.

WOLF RIVER. A Wisconsin apple, handsome, light yellow and red, of only fair quality but very large. If you wish to get the premium at the fair for the largest apple, the Wolf River will get it for you.

SUMMER VARIETIES.—See Prices Page 5

All early varieties bear well, but apples do not keep long. It is therefore not best to plant too many of these early trees.

DUCHESS OF OLDENBURG. From Russia, extremely hardy, medium size, yellow with red stripes. Somewhat sour, fine for cooking. A couple of these trees should be in every orchard. Will not keep long when fully ripe.

EARLY HARVEST. Fruit medium size, greenish yellow, tender and juicy. First to ripen in July.

LIVELAND RASPBERRY. Fruit good sized, clear waxen, white striped and marbled crimson; flesh snow white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight resistant, bears early, makes a good filler. August.

RED JUNE. A little later than Early Harvest. Medium size, yellow and red stripes, very good quality. good bearer. The best early apple. July to August.

RED ASTRACHAN. Fruit large, beautiful deep crimson, crisp, juicy and of good quality. A hardy Russian variety. Splendid market sort. August.

YELLOW TRANSPARENT. One of the earliest apples. Fruit is medium large, smooth, transparent. Skin is clear white, turning pale yellow when ripe. Flesh white, fine grained, aromatic, and of splendid quality. Tree is vigorous, good bearer. Two-year-old trees frequently produce fruit. Does well most anywhere. Is perfectly hardy. I have seen young trees full of fruit near Billings, Montana. It is one of the best paying trees in that country. Fore part of Aug.

CRAB APPLES.

Perfectly hardy everywhere. Good annual bearers. Excellent for cider, preserves and canning.

Per 1000, write for market prices.

WHITNEY. A good sized crab, with smooth, glossy, green skin, striped with red. Flesh firm, juicy and pleasant flavor. A good eating apple, raw or cooked. I like it fully as well as any of the early varieties of apples and it is very hardy, doing well yet in the Dakotas, a few trees should be in every orchard. Ripens with us in August and keeps better for short time than Early Harvest or Red June, also stands shipping much better.

HYSLOR. A very pretty little crab of deep red color with blue blush, similar to a plum. Very fine quality for preserving; has long stems, bears immense crops. Is not hardy, though, much north of here. I have seen it freeze back badly, even here in southern Nebraska. A fine crab, though, for Missouri, Oklahoma and southern Kansas.

GENERAL GRANT. Fruit large, round; cream yellow ground, nearly covered with red stripes; flesh white, tender, mild, sub-acid. A good market sort and in great demand for culinary purposes. Tree a vigorous, upright grower and good bearer. Ripens in Oct.

FLORENCE. Originated in Minnesota. The hardiest of all. An early and profuse bearer. When in full bloom or fruit, one of the prettiest ornamental trees grown. Fruit larger and better than Transcendant. Ripens in September.

TRANSCENDANT. Fruit medium, brownish red and handsome. Excellent for jelly and preserves. Good grower and immense bearer. September.

YELLOW SIBERIAN. Fruit is very small; comes in bunches and is very acid. Used a good deal for canning with the stems on. Tree vigorous; hardy and a very good bearer.

MARTHA. A new crab raised from the seed of the Duchess of Oldenburg by P. M. Gideon of Minnesota, who has this to say of it: "A rapid, stiff grower. A perfect pyramid in tree. A great bearer of the most beautiful fruit we ever saw. A bright glossy yellow, shaded with light, bright red. A mild clear tart, surpassing all other crabs we ever grew for culinary purposes, and fair to eat from hand. Do not hesitate to plant this crab. Season, October."

DOLGO CRAB

A NEW RED-JELLIED SIBERIAN CRAB

Professor Hanson of the State Agricultural Farm, Brookings, So. Dak., writes as follows: "At the annual exhibits of this Department at the South Dakota State Fair, many have asked about the remarkably long, conical, intensely bright red crabs we used for making letters. This is one I brought over from my second trip to Russia in 1897. A vigorous productive tree and so far free from blight. Fruit full of juice, jells easily, makes a rich ruby red jelly of beautiful color and excellent flavor."

The one-year-old trees in nursery are of strong growth with wide spreading forks and strongly shouldered limbs, indicating that they will not split down easily. I tried and fruited this crab. It is really fine, especially for jelly.

West Albany, N. Y.

Wealthy, Reduced Size.

PEARS - Standard

All Budded on French
Pear Seedlings

One of the very best fruits we have, and for which we always find a good market with high prices. Years ago it was generally believed that pear could not be grown in Nebraska. The trouble was, we planted the wrong varieties and in the wrong way. The tendency of the pear roots is to grow straight down, therefore, the holes should be dug deep, or better yet, shoot them with dynamite. If you will do this and plant the varieties I find are the best for the Middle West, you will have no trouble in raising pear and in some localities they even do better than apple. It is well to shorten the long shoots about half in August, as then the wood will ripen up better till fall and the tree is also less apt to blight. Pear, I find, will grow on most any soil. Best varieties for the Middle West are: Duchess, Clapp's Favorite, Keiffer, Flemish Beauty and Anjou. Do not forget to order some pear. They will pay well, as they always bring a good price in the market. My son, Ernest, planted 10 Duchess pear in his garden about 6 years ago. These are now large, nice trees and bore 10 bushels of large, fine pears last fall. See photo on this page. This shows that good pears can be raised in Nebraska and also in Kansas.

Prices of all varieties of Pear except Rossney:

	Per 1	10	100
2-3 ft., 2 yr. roots, 1 yr. tops.....	\$0.50	\$4.80	\$42.00
3-4 ft., 3 yr. roots, 2 yr. tops.....	.65	6.30	57.00
4-5 ft., 3 yr. roots, 2 yr. tops, well branched80	7.30	72.00
5-6 ft., 3 yr. roots, 2 yr. tops, well branched	1.00	9.70	92.00

ANJOU. (Beurre d'Anjou.) A large, greenish pear, shaded with russet crimson. The fruit is highly flavored, rich, vinous, and of excellent quality. Very productive. I have a 2-year-old dwarf Anjou in my garden, which bore many full-sized fruits last summer. Keeps well until the holidays and always brings a good price. I recommend it for Nebraska and the Middle West. Ripens in Oct.

BARTLETT. Fruit large, skin very thin, clear lemon yellow, with soft blush on sunny side. Flesh white, buttery, very juicy, and highly flavored. The best summer pear in existence. Tree a fine grower and young bearer. Must be sprayed against pear blight. Probably more Bartlett have been planted, especially in the Pacific States than any other variety. I do not recommend the Bartlett for Nebraska and Kansas, although some customers sent me nice Bartlett pears from Kansas. I would not advise planting them in large quantities in Nebraska and Kansas, but it is well enough to try a few trees. Ripens end of August.

CLAPP'S FAVORITE. Tree a vigorous, upright, spreading grower, very hardy and productive. Fruit large, pale yellow, flesh fine grained, juicy, melting and sweet. I find this to be the best early pear for the Middle West, much surer than Bartlett—seems to stand our climate better. Ripens end of August.

DUCHESS ANGOULEME. Very large, fine quality and juicy, and keeps well into winter. Probably the very best pear for Nebraska, and almost blight proof. A farmer near Beatrice raised over 100 bu. and sold them in less than three days at a good price. Ripens in October. None better as a dwarf.

KEIFFER. Profitable market variety. Very large, of fine appearance. Good for canning. Quality fair to good. Does well in Kansas, Oklahoma and Texas. With Keiffer another variety of pears should be planted, as they do not fertilize well when planted alone. Ripens in October.

GARBER. Fruit large, yellow with red. Tree very hardy and bears young. One of the Japan Hybrids, same as the Keiffer, and valuable as a market variety. Is largely planted in Oklahoma and Texas. Ripens early.

FLEMISH BEAUTY. Large, handsome, sweet and melting, pale yellow, covered with russet. Hardy, vigorous and good bearer. Near Yankton, South Dakota, there are Flemish Beauty pear trees that bear well, so they should also grow well in northern Nebraska. Does well here. I advise my customers in the northern states to make a trial with them. Ripens in September.

Keiffer Pear.

Duchess Pear. Grown by my son Ernest.

PEARS.—STANDARD. (Continued.)

SECKEL. (Sugar Pear.) Small but of highest flavor. Tree slow grower, but healthy, hardy and very productive. This is my favorite pear, and it does well in my garden. Should be sprayed during summer. Ripens in September.

WILDER. Small to medium, yellow, shaded carmine, fine grained, tender, sub-acid. Vigorous grower, early and annual bearer, very productive, good quality. Early August.

ROSSNEY PEAR. Ripens at a time when good pears are in demand; two weeks after Bartlett. Possesses a delicious flavor, tender, sweet, juicy, and is very large and handsome. Creamy skin with crimson blush. Tree is a vigorous grower. (equal to Keiffer), hardy, both in wood and fruit bud and very productive. Combines excellent quality with large size, fine form and superior shipping qualities. Originated near Salt Lake, Utah. I recommend this pear very highly. It is one of the best and prettiest pears on the market.

Price of Rossney Pear:	Per 1	10	100
2-3 feet, budded	\$0.65	\$6.20	\$60.00
3-4 feet, budded, well branched	.90	8.50	80.00
4-5 feet, budded, well branched	1.10	10.00

DWARF PEARS.

Price of all varieties of Dwarf Pear:

	Per 1	10	100
2-3 feet, mostly 1 year from bud, whips	\$0.45	\$4.30	\$40.00
3-4 feet, mostly 2 years from bud, branched	.65	6.20	58.00
4-5 feet, 2 years from bud, well branched	.80	7.50	70.00

Dwarf pear of Rossney, 20c per tree more.

Dwarf Pear are budded on Quince stock. They never grow large and therefore can be planted 10x10 or 12x12 feet. This makes them especially suitable for gardens and town lots. There are empty places in most back yards that can be profitably planted to dwarf pear or dwarf apple; and then you do not have to wait 5 to 7 years to get fruit. Dwarf trees bear very young, generally the second or third year after transplanting. I grow them in my garden with good success and raise vegetables between the rows. North of here I recommend some protection to the roots, either by spreading manure around the tree, say 6 inches deep, or by drawing dirt around the tree to the same depth. Quince roots are not as hardy as pear roots. I do not protect the roots here in my garden nor in the Nursery and never lost any Dwarf pear trees by freezing. I find the following varieties best suited on Quince, description of which please find under "Standard Pear." **Duchess, Clapp's Favorite, Seckel, Anjou, Bartlett, Flemish Beauty, Rossney.**

QUINCES.

In Quinces we have a very desirable fruit. It is used a great deal for preserves and canning, especially with other fruits. A small part of quince will impart the Quince flavor to three or four times as

Seckel Dwarf Pear.

many apples. Quince syrup is very delicious, even excelling the finest maple syrup. The tree is easily transplanted and does well on any good soil on which corn grows well. Should have good, deep soil, kept clean and mellow. This insures large, profitable crops. Plant about 12x12 feet.

I must confess that I never succeeded in raising Quince here. While they grow well for a year or two, a hard and especially dry Nebraska winter generally gets them. This could probably be avoided if trees were watered well before it freezes up. In a well protected location and with special care they might grow, but I cannot recommend them to my Nebraska customers. Should do well, though, as far north as the middle of Kansas, and fine Quinces are raised in most of the eastern states.

Prices of Quinces:	Per 1	10	100
2-3 feet, 2 years	\$0.75	\$7.20	\$68.00
3-4 feet, 2 years	1.00	9.50	88.00
4-5 feet, 2 years	1.25	11.00

CHAMPION. Fruit large, oval, rich aromatic, fine quality, long keeper.

ORANGE. Very large, yellow, rich aromatic, excellent flavor, long keeper. Always sells well.

VAN DEMAN. Fruit of good size and excellent quality. Very productive.

Dwarf Duchess Pear 4-5 feet, set out spring 1923. Four large pears fall 1923.

Girl's name is Mary.

Mrs. J. Sekal,
Hanover, Kans.

Little Miss Mary.

Quince.

CHERRIES.

A good healthy fruit liked by everybody. They will thrive most anywhere, except on very wet land. A side hill even if very steep will do, and on such the cherry will probably bring better returns than any other crop. I prefer upland to bottoms. Plant in rows 19 feet each way.

There is always a good market for Cherry, never have I seen any overproduction and prices are as a rule very profitable for the grower. Seldom the cherry has a crop failure—it is a sure bearer two or three years after transplanting. Plant a few Russian Mulberry (See page 16) near your cherry trees and you will have no trouble by birds picking your cherries—they prefer the Mulberries. Sour cherries are perfectly hardy in the Middle West, while for sweet cherries our climate does not seem to be favorable. I have never seen a good crop of sweet or heart cherries in Nebraska, while they bear abundantly in the Eastern and Pacific states, also New Mexico and Arizona. The cherry makes a good filler in an apple orchard planted between the apple trees, thus producing an income until the apples begin to get large and bear well. All our cherries are budded on Mahaleb stock, which does not sprout or rootsucker.

Do not buy cherries on common cherry roots, as they all rootsucker badly.

Some of my customers seem to have trouble in transplanting cherries. Dig a good, deep hole. Put the tree in the ground so the bend above the roots, being the place where the tree is budded, is even with the ground. Too shallow planting will not do. Pack dirt firmly around roots, fill hole within four inches of the top, give at least a pail of water, let it soak away over night and fill hole next day with loose dirt. This is the way all trees should be planted.

Mahaleb cherry seedlings, on which we bud our cherries, as they do not rootsucker, and which are imported from France, are still very high. Cherries are rather scarce. This is the reason I cannot lower the prices on cherries.

SOUR VARIETIES.

Prices of Sour Varieties:	Per 1	10	100
2-3 feet, 2 year roots, 1 year tops.....	\$0.55	\$5.00	\$45.00
3-4 feet, 3 year roots, 2 year tops, branched75	7.30	70.00
4-5 feet, 3 year roots, 2 year tops, well branched95	9.30	88.00
5-6 feet, 3 year roots, 2 year tops, well branched	1.20	11.00	100.00

EARLY RICHMOND. (May Cherry.) The common light red cherry, mostly planted and found in the markets. Very hardy and productive. Good size and largely used for canning. Ripens here in June. A good tree for Nebraska, Kansas and Iowa.

ENGLISH MORELLO. Fruit large, very dark red, nearly black; tender, juicy, acid, rich, of good quality. Owing to its rich, red color, looks much better when canned than Early Richmond. Tree dwarf, slender and spreading, bears young. I would not advise planting this variety further north than the middle of Nebraska. Ripens in July.

MONTMORENCY. Large, red, rich and acid. Very hardy and productive. It belongs to the Richmond class and besides ripening ten days to two weeks later, there is little difference between the two. Seems to do better than any other variety in western Nebraska and western Kansas. Blooms some later than the Early Richmond. I sold thousands of Montmorency to my customers in Eastern Colorado last spring.

Black Tartarian.

MAY DUKE. An old, well-known, excellent variety. One of the best and most dependable of the Duke class. Fruit large, dark red, juicy and rich; almost sweet. The tree is rather dwarf in habit, Vigorous and productive. Ripens in June.

OSTHEIMER. Large, heart-shaped, nearly black when ripe, juicy and rich. Fine for dessert and cooking. Unsurpassed for market. Trees bloom late and bear fruit when quite young. One of the most productive of all cherries. Ripens middle of July.

WRAGG. Originated in Iowa and has become very popular in the Northwest and Western states. Fruit is medium to large, dark red and of fine quality. Tree is very hardy, vigorous and productive and is of dwarfish growth, with spreading round head, not subject to disease. This is one of the few cherries of good commercial quality that is perfectly hardy. Seems to do especially well in Colorado. Ripens July.

HEART OR SWEET VARIETIES.

Price of Heart or Sweet Cherries:

	Per 1	10	100
3-4 ft., 2 year roots, 1 year tops.....	\$0.75	\$7.20	\$68.00
4-5 ft., 3 year roots, 2 year tops.....	1.00	9.50	90.00
5-6 ft., 3 year roots, 2 year tops.....	1.25	11.50

BLACK TARTARIAN. Very large, fruit of purplish black color, flesh is mild, sweet, of superb quality. Tree is vigorous, upright grower, immense bearer. A popular cherry and a fine market sort. If you wish to try a sweet cherry of the heart type in Kansas or Nebraska, this variety will be most apt to succeed.

BING. Very large, dark brown, almost black, flesh firm, sweet, rich and delicious. On the Pacific coast, where this variety originated, it is considered one of the most profitable sorts.

LAMBERT. This very promising cherry is of the largest size, bright, rich, dark purplish-red color, turning almost jet black when ripe. Surface smooth, glossy, covered with minute russet dots. Flesh reddish with white veins; very firm, of unsurpassed quality. Stands well in the lead as a shipping variety; tree healthy, rugged, strong grower, immense bearer. Ripens 10 days later than Napoleon Bigarreau.

NAPOLEON BIGARREAU. (Royal Ann.) Magnificent cherry of largest size; pale yellow, amber in the shade, richly dotted deep red. Very firm, juicy and sweet. Rapid grower and immense bearer. Most popular for canning, preserving and shipping. Is hardiest and best yellow sweet sort. Immense market for the fresh fruit at top prices. Ripens end of June.

SCHMIDT BIGARREAU. Immense size, deep black, flesh dark red, tender, very juicy and of fine flavor; very productive. One of the very best of the sweet cherries.

SONDEREGGER'S SWEET CHERRY.

I found this cherry in south eastern Nebraska. The appearance of the tree is a good deal like Black Tartarian, but the fruit seems more of the Morello type. It is almost black when fully ripe, large, very meaty, juicy and sweet, although it is not the same as a heart cherry. The tree is perfectly hardy here, bears well, is of vigorous upright growth, with large leaves. The dark color of this cherry makes it especially attractive for canning. Ripens after Early Richmond.

Regular Heart or Sweet cherries can not be grown in Nebraska and Kansas, with profit—trees will not stand our climate, so Sonderegger's Sweet should take their place. Of this variety I have only one year trees, 2-3 feet, none larger.

Price of Sonderegger's Sweet: 2-3 ft., \$1 each; 10 for \$9.00. As my stock of this variety is limited, I cannot sell more than 10 trees to any one customer.

COMPASS CHERRY-PLUM.

The demand for Compass Cherry Plum was again unusually large last season, which shows how well this fruit is liked wherever known. Please compare my prices with those of the tree agents. I have made prices very reasonable and besides, you will be sure to get the true Compass.

Absolutely hardy everywhere. The cherry was originated at Springfield, Minn. It is a cross between the Sand Cherry and the Minor Plum. Fruit nearly an inch in diameter, a bright red, sweet and juicy, and of very fine flavor. When young and green, the fruits have more the appearance of undeveloped plums, but as they mature they become round like a cherry. The pit is somewhat elongated. The color of the fruit is bright red, when fully ripe a dark wine shade. It looks more like a plum than a cherry.

I think it should have been called a plum.—I recommend this cherry wherever it is hard to raise fruit of any kind, as some places in Texas, eastern Colorado, western Kansas and western Nebraska and the Dakotas. They will bear good fruit when other trees fail. I received an order for 1,000 Compass from California. This customer I advised not to plant them, as he could raise sweet cherries just as well and they would pay him better and I lost the order. I have two trees in my own garden and we all like the fruit fresh or cooked, but for the market here I would prefer to plant Early Richmond or English Morello, although in smaller quantities they sell well in the Beatrice market, ripening after all cherries are gone. It is a good fruit, fresh or canned, and few people will be disappointed with it. The original tree bore fruit the third year from seed and has borne every year since. **The tree is a regular and heavy bearer and produces fruit the next year after setting out.** Its early bearing is truly wonderful. I have received large numbers of letters from customers that were well satisfied with the Compass.

Price of Compass Cherry-Plum:			
	Per 1	10	100
2-3 feet, 2 year roots, 1 year tops.....	\$0.35	\$3.00	\$25.00
3-4 feet, 2 year roots, 1 year tops.....	.45	4.20	40.00
4-5 feet, 2 year roots, 2 year tops, well branched60	5.50	52.00
5-6 feet, 3 year roots, 2 year tops, well branched75	7.00	65.00

CHOKE CHERRY.

(Prunus Dennissa.) A bush, sometimes a small tree up to 30 feet tall. Leaves more rounded than Prunus Virginica. Flowers come in dense racemes in spring with the leaves. Fruit dark red or purple-black, of good size and edible when fully ripe. Can be used as an ornamental shrub as bush and flowers are very attractive. **Price:** 3-4 feet, 50c each; 10 for \$4.00.

ROCKY MOUNTAIN CHERRY.

A native cherry of dwarfish habit, perfectly hardy everywhere in the Northwest and stands coldest winters without protection. Fruit about as large as Early Richmond, color dark brown to black. Somewhat astringent to eat from the hand, but cooks well and makes fine preserves and jellies. Very early and an abundant bearer. Can be planted about as close as currants. Very desirable in the Northwest, where better cherries cannot be grown. Ripens in July, after other cherries are gone. Bush (it is not really a tree) is very ornamental and deserves a place in every yard.

Price of Rocky Mountain Cherry:

	Per 1	10	100
1-2 ft. trees	\$0.15	\$1.30	\$12.00
2-3 ft. trees20	1.80	16.00

Rocky Mountain Cherry.

Dear Sir:

I have been buying trees from you for nine years. I live fifteen miles south of North Platte in the sand hills. I also have cherry trees from you, Early Richmond, Montmorency, May Duke and Wragg, which have done fine. I am sending you a picture of me and my great nephews, taken in my cherry orchard, just as we were starting to pick the Wragg cherries.

Yours respectfully,

William Bernauer, North Platte, Nebr.

March 5, 1923.

Opata Plum.

PLUMS AND PRUNES.

A good tree to plant for **quick results**. Japanese and Native varieties generally bear in 3-4 years, while the Hansen varieties bring some fruit at least the second year after transplanting, often the first year. European varieties about 4 or 5 years after transplanting, but then they bear very freely. Plant in rows 16 feet each way.

Plums are a good fruit fresh, but especially so for canning, almost always keeping well. The Fellenberg and German Prunes can be dried, large quantities come to market dried.

THE HANSEN VARIETIES.

These were all introduced by Prof. Hansen of the South Dakota Experimental Station at Brookings. All are hybrids of Dakota native plums and therefore very hardy and especially suited for northern states. **They all bear the next year after transplanting.** Often bear some already in the nursery. The quality of all Hansen varieties is better than that of the common natives. Remember the Hansen varieties do not grow very tall, also is the tree inclined to grow somewhat crooked when young, but straightens out as it gets older. The best fruit for quick results. All Hansen and other American varieties of plum will bear much better if 3 or more varieties are set together. The blossoms fertilize better. Hansen plums will do better if grown very low, more in bush form than as a tree. The trees will bear better and will live longer, besides it is much easier to pick the fruit.

Price of all Hansen Plums, excepting Waneta, which are 10c higher per tree in all sizes:

	Per 1	10	100
2-3 feet, 2 year roots, 1 year tops....	\$0.45	\$4.00	\$35.00
3-4 feet, 2 year roots, 1 year tops....	.55	5.00	45.00
4-5 feet, 2 year roots, 2 year tops....	.70	6.50	60.00
5-6 feet, 1 year roots, 2 year tops....	.95	9.00	85.00

SAPA. See inside cover. Very fine, perfectly hardy, new plum. Prof. Hansen's description: "The female parent is one of our selected seedlings of the Western Sand Cherry (*Prunus Besseyi*), favorite fruit of the Sioux Indians. The male parent a large, purple-fleshed Japanese plum originated by Luther Burbank, and by him named the Sultan. Sultan is one of the Satsuma type and is perhaps a cross with some other species. One-year trees in nursery have many fruit buds; the glossy, dark purple skin, and the rich dark purple-red flesh of its Japanese sire." I have raised Sapa on my farm and they were fine.

WANETA. See inside cover. Prof. Hansen describes it thus: "It is probably the largest of over 10,000 seedlings here about 2 inches in diameter; weight 2 ounces. Good red color skin free from acidity and with delicious flavor. Has borne the past four successive years in South Dakota." I find this tree a very strong grower and an early bearer, often fruiting in the nursery when 2 years old. The plum is large, very red and of fine quality. One of the very best of Prof. Hansen's new plums. I have two Waneta in my garden. They bore a wonderful crop of large, nice red plums; so full were the trees that I had to prop up all the limbs. They are really of fine quality. A good many of my customers sent me samples of Waneta plum. I think they bore well all over the Middle West. Price of Waneta 10c higher per tree in all sizes.

HANSKA. See inside cover page. Bright red, heavy blue bloom, firm flesh, good quality, rich fragrance, bears early in abundance. When cooked flavor of Apricot. Fruit is better than 1½ inches in diameter

and of best quality. A cross between the wild American plum and the firm fleshed fragrant Apricot plum so popular in California. In my garden this tree bears well most every year. It does not come into bearing quite as early as those that are crossed with the Sand Cherry, but as a rule 3 or 4 year old trees bear well. In shape the tree resembles its parent, the Apricot. It has somewhat tropical looking foliage and the fruit is very fragrant, is very firm and can be shipped long distances.

KAHINTA. See inside cover. Fruit 1½ inches in diameter, dark red, roundish, slightly oval and very heavy. Flesh firm, yellow and sweet. Introduced in 1912.

OPATA. Sioux Indian for "bouquet." First to ripen. At blooming time it is a gigantic bouquet of white flowers of most exquisite fragrance. Blooming just a little later than the American plum, in this way escaping frost dangers. Again when the fruit is ripe combine the large leathery foliage and the dark purplish red fruit, with blue bloom, it is indeed a bouquet at that time. The Opata is a cross from the Dakota Sand Cherry and the Gold Plum, originated by Luther Burbank, and for which \$3,000 was paid when first introduced. Tree is vigorous in growth, heading very low and of quite spreading habits, and we recommend that you allow it to grow rather in this form than in the regular high trunked, trimmed, tree form. It forms fruit buds freely at one year old and bears without exception the next year. Color of flesh green, flavor very pleasant, combining the spicy acid of the Sand Cherry with the rich sweetness of the Gold Plum. Ripens with us about July 10, and will hang on the trees in good condition for about two weeks.

NATIVE VARIETIES.

These are most all very hardy. Are of the Native type, found growing wild along creeks and streams in the Middle West, but of course, greatly improved. Plant these varieties in groups, using at least two or more sorts. They will fertilize and bear better. For the northern states I furnish trees budded on native plum roots; further south on Myrabolan Plum or Peach roots, which do not rootsucker.

Price of Native Varieties of Plum:

	Per 1	10	100
2-3 feet, 1 year from bud, mostly whips	\$0.40	\$3.50	\$30.00
3-4 feet, 1 year from bud, partly branched50	4.50	40.00
4-5 ft., 2 years from bud, branched70	6.50	60.00

I am not growing as many varieties of native plum as formerly, as the Hansen varieties are so much better. Here are three of the best known varieties, especially is the Gold a very fine plum.

GOLD. A fine golden yellow plum, of the native class, sweet and of very good quality. Does exceptionally well in Nebraska and the middle western states.

WILD GOOSE. An old well-known variety. Fruit good size, clear red, with blue bloom, sweet and very juicy; not hardy in the north. Ripens end of July.

WYANT. Widely and favorably known as one of our very best native plums. Generally bears a good crop and comes into bearing very young. Fruit of good size and best quality. Ripens Sept. 1st.

PLUMS AND PRUNES EUROPEAN VARIETIES.

These are all very fine plums, very different from any of the American sorts. They do well in all the eastern states, the Southwest and in the Pacific Coast states. In the middle western states Lombard, Bradshaw, and Damson do well and bear well, while the Prune varieties do not. They are considered to be a better plum than the natives and their hybrids where they can be grown. Generally European varieties are budded on imported Myrabolan plum seedlings. These were so scarce, though, in France, that few came to this country the last few years. About all that are offered now are budded on peach seedlings, which are alright. I mention this so my customers know what they will get.

Prices of European Plums and Prunes:		Per 1	10	100
3-4 feet trees	\$0.70	\$6.80	\$64.00
4-5 feet trees90	8.80	82.00
5-6 feet trees	1.15	10.50	96.00

BRADSHAW. Very large, dark violet red. Flesh yellow, juicy, good quality. Ripens in August.

LOMBARD. Medium size, oval, violet red, flesh yellow, juicy, pleasant. A great bearer and peculiarly adapted to light soils. Tree vigorous and hardy, succeeds where most other varieties fail. The most popular and profitable plum under general cultivation. One of the best for Nebraska and Kansas. Ripens last of August.

MONARCH. Fruit dark purple, covered with a thin bloom; large size specimens measuring six inches in circumference, flesh pale greenish yellow, parting freely from the stone, juicy, with a pleasant flavor. A leading market sort. The tree is a vigorous grower. Ripens in September.

SHROPSHIRE DAMSON. Medium size, dark purple flesh amber colored and rich. Very productive and fine for canning. Hardy. Ripens middle September.

IMPERIAL GAGE. Fruit very juicy, melting, sweet and of fine flavor. About as fine a plum as is offered in the market. Plums are large oval and of a greenish color. Tree a strong, vigorous grower and an abundant bearer. Ripens second half of September. A customer from Kansas sent me a very nice plum of this variety.

PRUNES: (Prices Same as European Plum.)

GERMAN PRUNE. A valuable plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long-oval, purple with a thick blue bloom, flesh firm, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. Ripens in September.

ITALIAN PRUNE. (Fellenberg.) A fine, late plum. Fruit large, handsome, of oval shape and purple color. Flesh thick, greenish yellow, juicy and delicious; parts freely from stone. Excellent for drying and preserving. Very productive. Very extensively used in Oregon and Washington for drying purposes. The tree is hardy. Was originated in Switzerland. Ripens in September.

JAPANESE VARIETIES.

This type of plum is a strong grower, bears very young, from 2 to 3 years after transplanting. Is very productive, and the tree as a rule is very ornamental. They are not so hardy, though, as the Native or European varieties. Here in Nebraska they seem to be about as hardy, or a little more so, than the peach. All the varieties I offer are Luther Burbank's productions. These varieties must not be planted in northern states.

Price of Japanese Varieties:		Per 1	10	100
2-3 feet, 2 year roots, 1 year tops	\$0.40	\$3.70	\$35.00
3-4 feet, 2 year roots, 1 year tops60	5.50	52.00
4-5 feet, 2 year roots, 1 year tops, branched80	7.70	75.00
5-6 feet, 3 year roots, 2 year tops, branched	1.00	9.50	92.00

ABUNDANCE. One of the oldest and best of the Japanese varieties. Fruit large, lemon yellow with heavy bloom. Very good quality. Can be planted successfully in Kansas and South half of Nebraska.

BURBANK. When properly thinned, the fruit of this plum is very large—5 to 6 inches in circumference—nearly round, bright cherry red, making it very tempting in appearance. Its deep yellow flesh is sweet, meaty and quite firm, keeping and shipping finely. Tree vigorous and spreading. I find that herein Nebraska the Burbank is the very best of the Japanese varieties. Bears well here and generally comes through the winter unhurt. This would probably also be the case in Kansas. Ripens late in August.

WICKSON. Cross-bred plum by Luther Burbank, which he sent me in the spring of 1895. Mr. Burbank says: "Among the many Japanese Plums which I have fruited, this one so far stands pre-eminent in its rare combination of good qualities. The tree grows in vase form, sturdy and upright, yet as gracefully branching as could be desired, and is productive to a fault. The fruit is evenly distributed all over the tree, and from the time it is half grown until a few days before ripening, is of a pearly white color; but all at once soft pink shadows creep over it, and in a few days it has changed to a glowing carmine, with heavy white bloom; the stone is small and the flesh is of fine texture, firm, sugary and delicious, and will keep two weeks or more after ripening, or can be picked when hard and white, and will color and ripen almost as well as if left on the tree. Ripens in September.

RED JUNE. The great early market variety. Medium to large, deep red, with beautiful bloom. Flesh lemon yellow, firm and of delightful quality. Ripens early August. A prize winner.

SATSUMA. A delicious plum for canning and a grand market sort. Fruit very large with deep red skin and flesh. Keeps two weeks after picking. A good bearer. Ripens in September.

Sapa. Plum.

(See testimonial below.)

Dear Sir:

I am enclosing a photograph of a Sapa Plum, bearing so much that it nearly broke the tree down.

Yours truly,

Geo. E. Capwell,
Cottonwood Falls, Kans.

Must tell you what a success everything has been. All small fruit would have given us abundant crop last summer if it had not been for the hail the 2nd of July. As it was, we had some Cherries, Gooseberries, Currants and three kinds of Plums, Mulberries and just a few crab apples, pears and apricots and peaches were left so we saw what they would have been if they had had a chance. We have been greatly pleased with everything we have bought from the Sonderegger Nursery.

Respectfully,

C. W. Park, Grenville, N. M.
Mt. View Ranch.

DWARF PLUM.

I offer the following varieties of Dwarf Plum: Waneta, Sapa, Hanska, Opata, Wild Goose, Wyant and Burbank. Budded on Rocky Mountain Cherry. They will not sprout from the roots.

Prices of all varieties of Dwarf Plum:		Per 1	10	100
2-3 feet trees	\$0.55	\$5.00
3-4 feet trees85	6.00
4-5 feet trees80	7.50

Elberta Peach.

BUDDED PEACHES.

I give below a list of the hardiest and choicest varieties, covering the season from July to the middle of October. Budded peaches always bring a good price, as they are much larger and finer in appearance and quality. They will bear just as often, yield as many bushels to the tree, live as long and stand as much cold as seedling peaches, while the fruit is much more valuable. Do not waste your labor and land by planting seedling trees. It does not pay and you will surely be disappointed.

Plant about 16x16 or 18x18 feet, in moderate rich soil. Before planting cut all limbs back to one inch, the main leader about half. Your peach trees will start to grow quicker and surer and will form a nice top. Keep the ground well cultivated. Peach trees are apt to make too much of a growth and get top heavy. To avoid this prune them every year. Cut all dry wood out and shorten long leading branches.

I give the time of ripening here in Nebraska. South of here they would ripen earlier. For Nebraska I recommend Alexander, Champion, Mayflower, Krummel and Fitzgerald. These are the hardiest peaches I know. I have fruited them here. No use trying any other variety if these cannot stand your climate.

Wherever peach can be grown, they should be planted freely. Peach orchards all through the country are getting scarcer every year and fruit is very high in price. One hundred peach trees will bring a big amount of fruit in 2 or 3 years and will pay the planter big returns. My prices are just about half lower than 3 years ago. You can plant in large quantities now.

Price of all varieties of Peach:

	Per 1	10	100	1000
2-3 feet, budded, mostly whips	\$0.25	\$2.30	\$20.00	\$180.00
3-4 feet, budded, partly branched35	3.20	30.00	260.00
4-5 feet, budded, branched42	4.00	38.00	350.00
5-6 feet, budded, well branched55	5.00	45.00	420.00

ALEXANDER EARLY. Clingstone. Medium size, almost red. Flesh white, tender, juicy, very hardy Middle of July.

BELLE OF GEORGIA. Very large, white with red cheek; flesh white firm and of excellent flavor. Tree a rapid grower and very prolific. Is perfectly hardy anywhere south of Kansas. If any of my customers try them farther north, I would like very much to get the results, as I have never tried it in Nebraska. Largely planted in the South.

CARMAN. Freestone. Very large, resembling Elberta in shape, creamy white, with deep blush. Fine flavor, hardy and productive. August to September.

CHAMPION. Fruit large, beautiful in appearance, flavor delicious, sweet, rich and juicy; skin creamy white with red cheeks; freestone. The peculiarity of this acquisition is its hardness. It stood a temperature of 18 degrees below zero and produced an abundant crop the following season, and again in

1890 produced a full crop when the peach crop was a universal failure. One of the best bearers in Nebraska. If the Champion does not stand your winters, there is hardly any use in trying other varieties. August.

CRAWFORD'S EARLY. Free stone. Highly esteemed for market. Fruit very large, oblong, yellow with showy red cheeks. Flesh yellow, juicy and sweet. A good bearer. August.

ELBERTA. Freestone. Originated in Georgia and is being planted most freely in the South, where it is regarded as the best market variety. Fruit large, yellow with red cheek; flesh yellow, firm, juicy, fine quality. Tree very hardy and exceedingly productive. It is equally valuable in the North, and is one of the best general sorts for all sections. Ripens with Crawford's Early. This variety has become very popular in Michigan, Oklahoma, Alabama, Ohio and in all peach growing sections. Exceptionally large and fine. August to September.

EARLY ELBERTA. A money maker for the orchardist, as it ripens early, at a time when there are no yellow flesh, freestone peaches on the market. The peach is of fine flavor, somewhat larger than the ordinary Elberta of the same color, but ripens 8 to 10 days earlier and keeps longer. It is more hardy and can be planted a little farther north. This is probably the most profitable peach on the market now. I recommend it strongly.

FITZGERALD. Freestone. One of the best for the northern peach belt. Fruit large, brilliant color, yellow flesh. One of the hardier varieties for Kansas and Nebraska. August.

J. H. HALE. A new peach. This is a chance seedling discovered by Mr. Hale, a large peach grower in the East. The fruit is larger than the Elberta, a perfect freestone, somewhat roundish, resembling the Reeve's Favorite in shape; is of a rich golden yellow, covered with carmine. Skin thick and entirely without fuzz. The flesh is dark yellow, fine grained and firm, parting as easily from the pit as any Elberta. The flavor is excellent, absolutely of the best. The tree is hardy, fully as hardy as Elberta or Hill's Chili; bears young and profusely, probably the best bearer known. One of the best for family use and especially for the market. It will bring a better price than any other variety. I recommend this peach to all my customers in the peach growing sections.

WONDERFUL. Freestone. Large to very large. Uniform in size and shape. Color rich golden yellow, largely overspread with vivid carmine, with marbling of crimson. Flesh yellow, rich, highly flavored and delicious; very firm. Fore part of October.

HEATH CLING. Clingstone. Large and round; white with black spots, juicy and fine quality. Best peach for pickles; reasonably hardy here. I think this is the most juicy peach on the market. On my former farm I used to raise large quantities of this variety and always got a good price for them. October.

PEACHES.—(Continued.)

THE MAYFLOWER PEACH. Clingstone. The Mayflower is the earliest peach in the market. A week earlier than Alexander or Sneed. It is of good size and fine color, being absolutely red all over, even before it is ripe enough to ship, thus making a very handsome attractive peach. The earliness and rich color of the Mayflower make it so valuable for the market. In quality it is fully as good as Sneed or Alexander. The tree is a strong and thrifty grower, has large blossoms that come out after all other peaches have bloomed. Thus the tree often escapes a late frost and bears well, while the fruits of other varieties are killed. It is a young bearer, often bringing a few fruits the first year after transplanting. It is apt to set too many fruits and should be thinned out to secure the best results. The fruit keeps well for an early peach, is a good shipper, and always brings the highest price on the market. I advise all my customers in peach growing sections to try the Mayflower, being sure that it will pay better than any other peach on the market. At Rulo, Nebraska, they ripened June 18th in 1915.

KRUMMEL. Free stone. This is a large, round peach, rich golden yellow, blushed with carmine. Flesh yellow, tinted red at the pit, firm, rich melting and sub-acid. Of good quality, a good keeper and shipper. Is largely planted in the East and South and on the Pacific Coast and should be given a trial in the Middle West. Ripens late, at the Ohio Experimental Station about Oct. 5th. Hardy and productive and a money maker.

PEACH SEEDLINGS. These are simply raised from seed. Peach seeds do not come true to varieties, so I cannot guarantee the fruit, as to size, or quality. Price: 1½ to 2½ feet, 8c each; 10 for 70c; 100 for \$6.00.

APRICOTS.

A most delicious fruit of the plum species. Is of a distinct flavor and one of our best and most profitable market fruits. The tree bears very young and most profusely. Ripening as it does between the cherries and peaches, the apricot is a most welcome fruit. In very sunny localities, it is apt to bloom too early in the spring and get caught by the frost. The tree is slender in form, has beautiful, dark green foliage, pretty pink blossoms, and will give very satisfactory results as an ornamental tree in any garden or house lot. To avoid being caught by late spring frosts, spread long, strawy manure about one foot thick around the tree in the winter after the ground has frozen hard and deep. The manure will keep the frost in the ground two weeks longer in the spring, and the tree will not bloom so early. Russian varieties have stood 30 degrees below zero without injury, and are therefore very desirable for the Northwestern states and exposed localities. No use planting American varieties in Nebraska or Kansas. Russians only.

Price of all varieties of Apricots:

	Per 1	10	100
2-3 feet, 2 year roots, 1 year tops....	\$0.40	\$3.50	\$30.00
3-4 feet, 3 year roots, 2 year tops....	.50	4.70	42.00
4-5 feet, 3 year roots, 2 year tops....	.70	6.70	62.00
5-6 feet, 3 year roots, 2 year tops....	.95	9.20

RUSSIAN VARIETIES.

Hardy as far as South Dakota.

ALEXANDER. Good size, oblong, yellow with red, sweet and delicate. Tree very hardy. Ripens middle of July.

BUDD. Large, yellow, with red cheek, rich and slightly acid. Tree hardy and very prolific. Ripens July 1st to 10th.

SUPERB. (See inside cover page.) A new variety from Kansas, very hardy, of the Russian type. The best flavored, most productive apricot yet produced. Medium size, light salmon color and excellent quality.

AMERICAN VARIETIES.

These varieties grow well in the more southern states, also the Pacific coast. Should be hardy in southern Illinois and Indiana, Oklahoma, Texas, New Mexico and southern Colorado.

ROYAL. French origin. Medium size, dull yellow with red cheek. Flesh pale orange, with rich vinous flavor. Not hardy in Nebraska. Ripens in June.

MOORPARK. Very large, yellowish green with red on sunny side. Flesh bright orange and free-stone. Fine for canning and drying. Not hardy in Nebraska. Largely planted on Pacific coast. Ripens late in June.

WILSON. Resembles Moorpark, ripens somewhat earlier and is of better flavor and quality. Fruit is large, yellowish green, with red cheek. Hardy and a vigorous grower.

RUSSIAN APRICOT SEEDLINGS.

These are grown from the seed of the Russian varieties of Apricots. You will find them very hardy, bearing fine flavored fruit, although not large, as far north as the middle of South Dakota. Will make a fine looking ornamental tree in any garden or grounds, grows erect, very dense and has pretty, well shaped, dark glossy leaves with pink blossoms. There are few better trees for a windbreak and in this case should be planted about 8 feet apart in the row.

Price:	Per 1	10	100
1½-2 feet seedlings	\$0.20	\$1.80	\$16.00
2-3 feet seedlings30	2.80	25.00

Dear Sir: I am writing you to let you know I received my order of J. H. Hale Peach trees. They are the finest trees I have ever seen in this country. The inspector said: "You sure have a fine bunch of trees." We will do a lot of advertising for you in this locality.

Walter R. Grover, Modesta, Calif.

I received today my first order, your No. 20868, which arrived in fine condition. If you send me as good stuff in this order, I will be well pleased.
H. Klatt, 2977 So. Delaware, Denver, Colo.

J. H. Hale Peach. See Page 14.

Paw-Paw. See page 16.

NECTARINES.

The Nectarine is almost identical with the peach. Most batonists consider them the same species, the difference between the two being in the skin, the nectarine having a smooth and the peach a downy surface. The fruit, however, is rather smaller and scarcely so rich in flavor as the best peaches, but they have a very sprightly and delicious quality, and their exquisite wax-like appearance makes them highly popular as a dessert fruit. One of my customers near Beatrice brought me a small branch with about 20 nice nectarines. This shows that they will bear in southern Nebraska. Nectarines require the same culture as the peach and are about as hardy as the peach.

NEW WHITE. Large, skin greenish white, flesh white, tender, juicy, stone small and free, one of the best varieties for drying. July and August.

RED ROMAN. Very large, nearly round, of a greenish yellow color, with red on the sunny side. Flesh golden yellow and of very good flavor.

Price of Nectarines: 3 to 5 feet, 75c each; 10 for \$7.00; 100 for \$65.00.

FIGS

These can be planted in the open in the southern states. Should do well in most places in New Mexico, Texas, and southern Oklahoma. In the northern states it is best to plant them in tubs. In my garden I have succeeded in wintering them by laying the trees down and covering them with dirt and strawy manure.

CELESTE. Small to medium, pear-shaped, ribbed; violet-colored, sometimes shading to purplish brown, covered with bloom about half-way up from the neck; stem short, stout. Flesh whitish, shading to a rose color at center; flesh firm, juicy, sweet, excellent quality. One of the hardiest varieties of figs and can be grown far outside of the usual limits of culture; very desirable for canning and preserving.

Price: 2-3 feet trees, 90c each; 10 for \$8.50.

PAW-PAW.

(*Asimonia*.) A small tree, or rather a shrub with purple or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Near Sabetha, Kans., I have seen it grow wild along the creeks. Generally well-known. In transplanting give plenty of water.

Price: 2-3 feet, 50c each; 10 for \$4.50.

Figs.

Nectarines.

PERSIMMON.

A native of the Southern states, but will thrive and ripen its fruit as far north as the Great Lakes. The tree reaches a height of 20 to 30 feet. The fruit is not large, 1/2 to 1 inch in diameter, and must be fully ripe to become edible. A valuable ornamental tree. Will thrive on the poorest soil. A great change is wrought in the fruit of the tree by the early frosts. Under their influence it becomes sweet, high-flavored, rich and racy. Long after the leaves have fallen the branches are so heavily laden with plum-like fruits that the tree seems all aglow with the saffron pink tint of the fruit that is very ornamental. Can hardly recommend to plant Persimmons north of Kansas.

Price of Persimmons:	Per 1	10	100
12-18 inch, seedlings	\$0.10	\$0.80	\$ 7.00
18-24 inch, seedlings17	1.50	12.00
2-3 feet, 2 year seedlings.....	.25	2.30	20.00

RUSSIAN MULBERRY.

Introduced here by the Russian Mennonites. Tree very hardy, stood 30 degrees below zero and bore a crop of berries the next season. An annual and abundant bearer. The fruit is from white to pink and some black in color, from sweet to quite tart in taste. Canned with gooseberries, cherries, or rhubarb, they make a good sauce, relished by most everybody. Poultry raisers should plant largely of this tree near the poultry house or yard, as they will make a nice shade tree for the chickens, and the berries are much relished by the fowls, and are very healthful. Try it and you will be pleased, and your fowls more so. It is also advisable to plant a few mulberry near your cherry orchard. Birds prefer the mulberry and will not take your cherries. The wood is very valuable for fence posts, lasting for 20 years in the ground. They also make a very pretty hedge if planted about 10 inches to one foot apart, and kept well pruned the first few years. I have a large supply of very nice Mulberry seedlings and I have lowered my price very much.

Price of Russian Mulberry:	Per 1	10	100	1000
4- 8 inches, 1 year seedlings.....	\$0.30	\$2.50	
8-12 inches, 1 year seedlings.....50	4.50	
12-18 inches, 1 year seedlings.....	\$0.20	1.00	8.00
18-24 inches, 1 year seedlings.....30	1.75	15.00
2-3 feet, 2 year seedlings.....	.05	.40	2.50	20.00
3-4 feet, nice once transplanted trees12	1.10	9.00
4-5 feet, nice once transplanted trees20	1.80	16.00
5-6 feet, nice once transplanted trees35	3.00	26.00
6-8 feet, nice once transplanted trees55	5.20	45.00

AMERICAN MULBERRY.

The native varieties are not quite as hardy as the Russian kinds, but the fruit is larger, very juicy and of better quality. Should not be planted as far north as Nebraska. I have never succeeded in raising berries from an American Mulberry here, while Russian Mulberry bear well here.

DOWNING'S EVERBEARING. One of the most prolific varieties. Fruit very large, black, rich and sweet in flavor. Its long bearing season has made it a universal favorite. Ripens fruit during six to eight weeks.

ABUNDANCE. I believe this is the best of the large fruited Mulberries. Fruit is long, glossy black and of excellent quality. Tree very productive, strong, upright grower, is harder than the American varieties and can be grown farther north.

HICKS. Tree very vigorous and productive; surpassed by none. Continues in bearing a long time. Fruit 1 1/4 inches long and nearly half an inch in diameter. Color, maroon or an intense blue-black at maturity; flesh juicy, rich sugary. Ripens from the middle of June up to the middle of September.

Price of above 3 varieties: 3-4 feet trees, 60c each; 10 for \$5.50.

I received the trees and am well pleased with them.

Tom Ellis,
645 Main St., Rockport, Ind.

Pecan.

English Filberts.

NUT TREES.

The past few years have witnessed a remarkable development in the planting of nut-bearing trees. Probably no branch of tree cultivation pays larger profits or is as well assured of a profitable market. The returns from established nut-bearing orchards, as well as numerous experiments, show plainly how successful nut culture may be made in America. Most farms contain land that would pay better planted in nut-bearing trees than anything else; the nuts in many cases, paying better than farm crops or fruits, while the trees are growing into valuable timber.

BLACK WALNUT. A native of Nebraska. Of large size and majestic form, with beautiful foliage. Grows best on low ground, bears very freely. The most valuable of all trees for timber, which enters largely into the manufacture of furniture and cabinet work and brings the very highest price in the market. Tree is a fairly rapid grower, and also makes a fine shade tree. The large, oily nuts are of fine flavor and marketable at a fair price.

Black Walnuts are getting very scarce. Our government has bought up thousands of walnut logs, using them for gun stocks and in the manufacture of aeroplanes. The price of walnut logs is very high now.

On a large number of farms along creeks and rivers, there are small pieces of land (a bend in a creek) on which Black Walnuts would do exceptionally well, and in time would bring a nice sum of money. The cost of the seedlings and the care of them the first two or three years would amount to very little.

Price of Black Walnut:	Per 1	10	100	1000
8-12 inch seedlings, 1 year.....	\$0.03	\$0.20	\$1.25	\$10.00
12-18 inch seedlings, 1 year.....	.05	.30	2.00	15.00
18-24 inch seedlings, 2 year.....	.07	.40	2.50	20.00
2-3 feet seedlings, 2 year.....	.12	.60	4.00	35.00
3-4 ft seedl'gs, well branched.....	.35	3.20	30.00
4-5 ft., nice trees, well rooted.....	.55	5.00	48.00
5-6 ft., nice trees, well rooted.....	.75	7.00	65.00
6-8 ft., nice trees, well rooted.....	1.00	9.00

ENGLISH OR PERSIAN WALNUT. A fine, lofty growing tree, with handsome spreading head; produces large crops of thin shelled, delicious nuts that are always in demand at good prices. The fruit in green state is highly esteemed for pickling. The orchards of California and the South are yielding handsome profits and still the nuts are imported in great quantities. Not hardy enough for general culture in North. **Price:** 18-24 inch seedlings, raised from the best selected nuts, each, 75c; 10 for \$7.00; 100 for \$65.00.

FRANQUETTE OR PARIS WALNUT. Largely planted in California and Washington. It is quite large, of an elongated oval, and very attractive, kernel full-fleshed and sweet. It buds out late in the

spring. Best thin-shelled nut, raised from seed. Hardier than the English Walnut, withstanding the cold winters of Eastern France, where it originated.

Price: 18-24 inch seedlings from selected nuts, 80c each; 10 for \$7.50; 100 for \$70.00.

BUTTERNUT OR WHITE WALNUT. The nuts are large, long, oily and nutritious. The lofty, spreading tree is one of our finest natives, valued for its tropical appearance and beautiful wood as well as for its nuts. Does well in Nebraska and as far north as Dakota. **Price:** Per 1 10 100

8-12 inch seedlings.....	\$0.60	\$4.00
12-18 inch seedlings.....	.10	.70	5.00
4-5 feet trees.....	1.25	11.00

JAPAN WALNUT. (Sieboldi.) If it produced no nuts it would be well worth cultivating for an ornamental tree. Grows with great vigor, surpassing all other nut trees, assuming a handsome form; needs no pruning; leaves of large size and charming shade of green. Nuts are borne in clusters of 12 or 15 each at tips of previous season's branches; they have a smooth shell, thicker than the English, but not so thick as the Black Walnut. Meat is sweet, of good quality, flavor like Butternut, but less oily. Tree commences bearing young, trees three to four years from nut in nursery row frequently producing nuts. Perfectly hardy and worthy of extensive planting anywhere south of Nebraska. One of the finest ornamental trees. **Price:** Per 1 10 100

12-18 in., seedlings, 1 year.....	\$0.35	\$3.00	\$25.00
18-24 in., seedlings, 1 year.....	.45	4.30	40.00
2-3 feet, transplanted.....	.55	5.20	48.00
4-5 feet, nice trees.....	1.00	9.00

AMERICAN SWEET CHESTNUT. The nuts of this tree form quite an item in our commerce. They are sweet and deliciously flavored. This chestnut is also a grand timber and ornamental shade tree, spreading in mid-summer, billowy masses of creamy, fragrant catkins above its large, deep green leaves making a most beautiful specimen on the lawn. I know of American Sweet Chestnut trees near Beatrice that are doing well and bear fairly good crops, while I have seen lots of the same kind of trees freeze out here. I cannot say that it is hardy here in southern Nebraska, but probably it is perfectly hardy 100 miles farther south. Chestnuts do well on medium thin and sandy land, requiring no pruning and little or no cultivation. The timber is very durable and possesses a fine grain for oil finish. Easy to transplant. **Price:** Per 1 10 100

12 to 18 inch seedlings.....	\$0.20	\$1.80	\$16.00
4-5 feet, nice trees.....	1.00	9.50

PECAN. The tree grows fast and bears well, producing large crops of thin-shelled nuts that are fullkerneled and delicately flavored. In southern states pecans yield handsome profits. Not hardy here. **Price:** 18-24 inch seedlings, raised from best nuts, 55c each; 10 for \$5.00; 100 for \$48.00.

STUART PECAN, Grafted. This is a large, thin-shelled nut, of fine flavor, and the hardiest variety grown. Can be planted farther north than the common pecans. As these are all grafted, they will all come true to name, while with seedlings this is not always the case. Not hardy here, but probably hardy in southern Missouri and Oklahoma. I am told that these grow well in southern Indiana and southern Illinois. 1½-2 ft. trees, \$1.25 each; 10 for \$11.00; 100 for \$90.00. 4-5 ft. nice trees, \$1.75 each; 10 for \$16.

ENGLISH FILBERTS OR HAZELNUTS. Of easiest culture, growing 6 to 8 feet high, entirely hardy, and one of the most profitable and satisfactory nuts to grow, succeeding on almost all soils, bearing early and abundantly; nuts nearly round, rich and of excellent flavor, admired for dessert. 3-4 feet, 75c each; 10 for \$7.00; 100 for \$65.00.

COMMON HAZELNUT. This is the American variety that is hardy everywhere, but nuts are smaller, although of good quality and bear well every year. **Price:** 2-3 ft., 35c each; 10 for \$3.00.

Butternut.

GRAPE VINES.

One of the best, healthiest and longest cultivated fruits we have. Easy to grow, in most any kind of soil that is not too wet, even a stony hill brings good results. Where there is little room, plant them along the fence or on the side of a building. They make a splendid screen for unsightly buildings, walls or fences. Can be grown in almost any state in the Union if the right varieties are selected, and in northern states if given a little winter protection.

On most of our Nebraska soil, grapes make an excessive amount of canes or vines and must therefore be pruned thoroughly every year. In pruning never forget that the grapes grow only on last year's shoots.

Deleware. See Page 20.

In the Middle West there is more money in growing grapes for the market than in any other fruit and the crop is sure almost every year. I give below the best and hardiest varieties. There should be grapes on every farm and in every garden. With a little care you can raise plenty of good, healthy fruit and can help solve the food problem. I have a large stock of 2 year and 1 year old vines on hand and can furnish them in any quantity. All my vines are exceptionally well rooted and my prices are very low, considering the quality of my vines.

CACO GRAPE—A Grand Novelty.

The most delicious of all grapes, whether hardy or exotic. A perfectly hardy grape that has been pronounced by America's most expert grower of hothouse grapes, to **equal in high quality and melting texture** the finest varieties grown under glass. When one considers the price of the greenhouse product and realizes that the wonderful Caco can be grown in the back yard, almost without attention, the force of the above statement is apparent. In appearance, the most beautiful of hardy grapes; berry large, very light wine red, with abundant bloom. Bunch of good size, compact and of good form. Ripens ten days to two weeks in advance of Concord; so rich in sugar, it is excellent in flavor two weeks in advance of being fully ripe. Vine a very strong, vigorous grower, healthy and prolific. Fruit for past two year sold in open market by the crate at more than double the price of any other variety. Highly commended by prominent fruit growers throughout the country, by clergymen, attorneys and laymen. Was awarded a medal by the American Institute of New York, the highest honor ever conferred on a variety of fruit by this time honored institution. I cannot recommend the Caco too highly. It shows up well in my garden. I find the grapes as described above. A good many of my customers from Nebraska sent me nice Caco grapes last fall. **Price:** 2 year No. 1 plants, 65c each; 10 for \$6.00; 100 for \$50.00.

CONCORD. Black. The well known, fine old variety, planted everywhere. Bunches and berries of good size, black, covered with a rich blue bloom. Skin tender but firm, juicy sweet when fully ripe; hardy and productive.

Brighton. See Page 19.

I think this variety, especially here in Nebraska, will bring more fruit from year to year than any other kind, the Niagara coming closest to it. There are varieties of better quality and flavor, especially for table use, but few better bearers. It is used largely by the eastern makers of grape juice, in fact, almost all the grape juice in the market is made from Concord grapes. I advise covering the vines in the fall, north of the middle half of Nebraska. Please notice my low prices. There should be at least 50 Concord grape vines on every farm. Few fruits bring as quick and bountiful returns as the Concord. **Price:** 2 year No. 1 plants, as good as can be grown anywhere, 15c each; 10 for \$1.40; 100 for \$12.00; 1000 for \$100.00. 1 year No. 1 plants, well rooted, 12c each; 10 for \$1.00; 100 for \$8.00; 1000 for \$65.00.

AGAWAM. Red or maroon. Bushes usually loose, berries large with thick, fleshy skin; flesh pulpy, meaty, juicy, of a rich, peculiar, aromatic flavor. A fine table grape. Ripens with Concord. Bears very well in Nebraska and generally comes through the winter all right without protection. 2 year No. 1 vines, 25c each; \$2.20 for 10; \$20.00 per 100.

GRAPE VINES.—(Continued.)

BRIGHTON. Red. Bunches and berries large, fine, rich flavor, juicy and sweet, with very few seeds. I find that this is one of the best of finer dessert grapes for Nebraska and Kansas. In my garden one of the very best dessert grapes and very productive and hardy. **2-yr.-old No. 1 plants:** Each 35c; 10 for \$3.20; 100 for \$25.00.

CAMPBELL'S EARLY. Black. A new variety that cannot be too highly recommended. Of strong, vigorous growth, very hardy, foliage perfectly healthy, very early, abundant bearer. The berries are large, nearly round, dark blue, skin thick and tough, making it a good shipper; flesh sweet, with slight aroma. The bunches are always large and beautiful; will keep on or off the vines for several weeks after fully ripened. An excellent dessert grape, one of the best early market varieties. I do not know of a better grape for Nebraska if properly taken care of. Should be covered over winter here. **2-year-old No. 1 plants:** Each 35c; 10 for \$3.20; 100 for \$30.00.

CATAWBA. Red. Well-known wine grape. Bunches and berries large, of coppery-red color, turning to purple when fully ripe. Best quality, a good bearer and very profitable. **2-year-old No. 1 Plants:** Each 25c; 10 for \$2.20; 100 for \$20.00.

THREE ABSOLUTELY HARDY GRAPES FOR THE NORTH

People living in the northern states need not go without home grown grapes any more. I offer herewith 3 varieties of absolutely hardy grapes of which **Beta** and **Dakota** will grow and bear fruit without any cover over winter whatever, even in North Dakota and Minnesota and even in Canada. The **Hungarian** is perfectly safe in South Dakota and southern half of Minnesota.

BETA. A small to medium sized black grape, quite acid, but of good quality and fine flavor. Very early, prolific and healthy. It is valuable chiefly for its hardiness. It is hardy without protection far into Minnesota and on this account it is especially valuable for arbors where the large varieties are a little too tender. My son has an arbor; six vines cover same perfectly and last fall he had 3 bushels of grapes from the six vines. They are fine for jelly, better than other varieties and make excellent grape juice. The **Beta** and **Dakota** grapes are really the best plants to cover arbors or trellises. **Price:** 2-yr. No. 1 plants, 50c each; 10 for \$4.50; 100 for \$40.00.

DAKOTA. Originated in Minnesota by Louis Suelter, the grape specialist. An improved American Wild Grape. Very hardy, even in Minnesota and the Dakotas, where after the first winter they need no covering whatever. I grow this in my garden as a cover over some rustic seats. I find the berries of good size, fair quality, prolific and ripens early. While in quality not as good as some tender varieties, they are a great improvement on the wild grape, still retaining the latter's hardiness. The best vine to cover trellises, old walls, arbors and any unsightly place in the garden. I have a large arbor which this grape covered entirely in 2 years and producing many grapes at the same time. **Price:** 2 year No. 1 vines, 50c each; 10 for \$4.50; 100 for \$40.00.

HUNGARIAN. Another grape that has evidence of wild grape blood in its composition. Vigorous luxuriant grower, and in most parts of Minnesota is successfully wintered without covering. Has proven itself sufficiently to recommend it strongly to all planters in this latitude. Fruit larger than **Beta**, and therefore superior wherever it will winter without cover. Preserves wild flavor which has always made Janesville and like varieties popular. I strongly advise at least half a dozen vines of **Hungarian**, especially in Nebraska, South Dakota, Minnesota and Wisconsin. **1 year No. 1 strong vines:** 50c each; 10 for \$4.50.

One each of the three above varieties, \$ 1.30.
Ten each of the three above varieties, \$12.00.

CLINTON. Black. Bunches and berries small and compact. Berries juicy and quite acid. A good grape for dark red grape juice. Vine vigorous grower, productive and hardy. Very desirable as an arbor grape, but not fully hardy here and should be covered over winter. Our Nebraska soil seems to be too rich for this grape, as here it grows an unusual amount of wood. I recommend this grape on very light soil. **2-year-old No. 1 plants:** Each, 25c; 10 for \$2.20; 100 for \$20.00.

ELVIRA. White. Bunches medium size, very compact. Berries small and sweet when fully ripe. Splendid for grape juice. Hardy, vigorous grower and productive. September. **Two-year-old No. 1 plants:** Each 25c; 10 for \$2.20; 100 for \$20.00.

Moore's Early. See Page 20.

Lucile. See Page 20.

GRAPE VINES.—(Continued.)

DELEWARE. Red. One of the finest table grapes. Bunches not large, compact and well shouldered. Berries rather small, juicy and sweet, without any hard pulp; spicy flavor. Probably the best American grape, all things considered. My customers in Nebraska and Kansas can plant this grape with perfect assurance of success. In the northern half of Nebraska, covering the vine over winter is advisable. Ripens early. **Two-year-old No. 1 plants:** Each, 40c; 10 for \$3.50; 100 for \$30.00.

IVES. Black. Bunches and berries medium size. Sweet, pulpy, somewhat foxy. Colors early, but does not fully mature until several weeks later. Highly esteemed for red wine and a good market variety. Hardy, vigorous and healthy. Ripens medium late. **Two-year-old No. 1 plants:** Each 25c; 10 for \$2.30; 100 for \$20.00.

GREEN MOUNTAIN WINCHEL. White. Originated in Vermont at an altitude of 1,400 feet, where it ripens its fruit perfectly. Vine strong, vigorous and healthy, very hardy and a good bearer. Bunches long, compact and well shouldered. Skin thin, very tender, sweet, with few seeds and excellent quality. Three weeks earlier than Concord. Is highly recommended as a sweet, fine table grape. Very hardy and does not need covering over winter here. **Two-year-old No. 1 plants:** Each, 55c; 10 for \$5.00; 100 for \$45.00.

THE LUCILE GRAPE. The coming red market grape. The Lucile yields as much or more than Concord, Niagara or any other well known market grape. Hardy and healthy as any grape, and much more so than Niagara. A strong, robust grower, and ripens its wood to the tip under a load of fruit under which Niagara would not ripen one-half. The Lucile is sweet, and in quality compares favorably with that of Wyoming Red, which it resembles in color. But its crowning glory is in its size and compactness of its clusters, which resemble those of Diamond and Pocklington, but even larger. While it is an excellent market grape anywhere, it is indispensable at the extreme North, where only early and extra hardy varieties succeed. The Lucile is a good shipper and never drops its berries, but where the season is long enough it gradually dries up into raisins on the vines. Does well yet in South Dakota. **Price:** 2 year old No. 1 plants: Each 50c; 10 for \$4.50; 100 for \$40.00.

MOORE'S EARLY. Black with heavy blue bloom. Bunches of medium size, rarely shouldered. Berries large, round, of excellent quality; desirable for market on account of its earliness. Berries larger than Concord, very much like it in flavor, and of same good quality. Vine a moderate grower, very healthy and hardy; foliage thick and leathery. Ripens so early as to be nearly out of the market before Concord is ripe. Well suited to northern portions of the United States by its hardiness; succeeds admirably in the South also. Ripens early and bears well. **Two-year-old No. 1 plants:** Each 25c; 10 for \$2.30; 100 for \$20.00; 1000 for \$160.00. **One-year No. 1 plants, strong, well rooted:** 17c each; 10 for \$1.50; 100 for \$14.00; 1000 for \$120.00.

MOORE'S DIAMOND. White. A seedling of Concord, partaking of all its good qualities. Of a beautiful greenish white color, without any of the yellow spots so common on white grapes. Berries are large, sweet, and of as good quality as some of the more delicate varieties. It is as hardy as the Concord, a profuse bearer and in all one of the best of the newer sorts. Ripens early, a few days before Concord. Very hardy. I recommend this grape for Nebraska and Kansas. **Two-year-old No. 1 plants:** Each 25c; 10 for \$2.20; 100 for \$20.00.

NIAGARA. White. Home and market growers seem to agree that this is the most valuable of all white grapes. Its clusters are large and handsome, compactly filled with large berries having thin but tough skin. When fully ripe, they are a pale yellow with a thin white bloom. The flesh is slightly pulpy, tender, sweet and delightful, with a flavor and aroma peculiarly its own, and agreeable to most tastes. Vine is remarkably vigorous and productive. Foliage thick and leathery. Succeeds well both North and South, and is largely planted by vinyardists and for home use. Ripens with Concord. If left on the vines till fully ripe, they are delicious. **Two-year-old No. 1 plants:** Each 25c; 10 for \$2.00; 100 for \$18.00. **One-year-old No. 1 plants:** Each 17c; 10 for \$1.50; 100 for \$12.00.

POCKLINGTON. Golden yellow. Bunch large, very compact. Berries very large, juicy, sweet, with very little pulp. Vine very hardy, even more so than Concord and produces crops of fine quality. When fully ripe, it is probably the sweetest of the white grapes. It succeeds very well here. **Two-year-old No. 1 plants:** Each 35c; 10 for \$3.20; 100 for \$30.00.

SALEM. Red. Bunches large and compact. Berries large, round, copper red; firm, sweet, tender, with rich, aromatic flavor. A splendid keeper and shipper, and best quality for both table and grape juice. Should be planted freely. **Two-year-old No. 1 plants:** Each 35c; 10 for \$3.20; 100 for \$28.00.

WORDEN. Black. A strain of the Concord, but a better yielder of grapes, larger than the Concord and of finer flavor. It ripens about a week or ten days earlier than Concord. A good market variety and is extensively planted. Very hardy. Next to Concord and Niagara, there are probably more Worden planted than most any other kind. Most winters it needs no protection in Nebraska. **2 yr. old No. 1 plants:** Each 25c; 10 for \$2.30; 100 for \$20.00. **1 yr. No. 1 plants:** 15c each; 10 for \$1.30; 100 for \$11.00.

GRAPES FOR HOUSE CULTURE OR THE SOUTH

This class of grapes can be planted outdoors in California, Arizona, Texas and southern New Mexico. In the northern states they can be raised in tubs or pots, or conservatories and green houses.

THOMPSON'S SEEDLESS. (Sultana Blanche.) Identical with the Seedless Sultanas of Asia Minor. Vine an enormous bearer and very rapid grower; bunches very large; berries greenish-yellow, firm, oval, seedless; skin thin; much larger than the Sultana. This variety is attracting much attention, and it is preferred to the Sultana, having qualities superior to it. The raisins are of a very superior quality, and are in good demand; a very early shipping grape, ripening in August. As a sherry grape much can be said in its favor. It is largely grown in California for a raisin grape. In the northern states this grape can be grown in pots or tubs and will bear well. During winter keep in cool cellar. Grow and bear well in New Mexico, the South and Southwest. **Price:** Strong vines, well rooted, 25c each; 10 for \$2.00; 100 for \$18.00.

MALAGA. Vine a strong grower and immensely productive, thriving in almost any soil; bunches very large, often weighing ten pounds; compact, shouldered; berry very large, oval, yellowish green, skin thick, fleshy. One of the best shipping grapes, commanding a good price in the eastern markets every season; make a second quality raisin. **Price:** 25c each; 10 for \$2.00; 100 for \$18.00.

FLAME TOKAY. Large, pale red, covered with bloom; flesh firm, sweet. Commands a good price in eastern markets. September. **Price:** 25c each; 10 for \$2.00; 100 for \$18.00.

Enclosed you will find photo of Grape vines bought of you two years ago and of myself and wife. The Grapes were splendid and we are well satisfied.

Anthony L. Preske,
215 E. Oregon St., Evansville, Ind.

Above Photo. and Testimonial Sent in by Anthony L. Preske.

Please send by return mail as it is time to plant. I have had very good success with plants and seeds ordered from you.

Mrs. J. A. Hodges, Holden, Mo.

Downing Gooseberry.

GOOSEBERRIES.

Should be planted in good, rich soil, and well manured once a year. Prune regularly and thoroughly, cutting out all dead wood and all surplus branches. Do not let the bushes grow too thick; the fruit will be larger and more plentiful. Plant in rows 4 to 6 feet apart and 4 feet apart in rows. I give below the varieties I find to be most profitable.

I used to import large, hairy gooseberries from England and Neuwied, and tree gooseberries from Holland or Germany. But now our government has forbidden all importations of gooseberries and currants from Europe. I can ship gooseberries and currants all over the United States again, while two years ago it was forbidden to ship such to the Pacific States. No nursery situated east of the Missouri is allowed to ship gooseberries and currants west, while from Nebraska we can ship anywhere except to Washington, which quarantines against all states. These regulations were put into effect to prevent the spread of the White Pine Blister to which currants and gooseberries are also subject, and as there are no White Pine forests in Nebraska, we naturally would not have the disease here.

Oregon Champion Gooseberry. Dell's Farm, near Beatrice. \$2.30; 100 for \$20.00.

OREGON CHAMPION. I believe this is one of the very best of the American varieties of gooseberries we have. The bush grows very strong, is healthy and vigorous, not so very thorny, and a prolific, constant bearer. The berries are of medium size, brownish-red, sweet; fine for table use or pies. My customers should plant this variety freely—it will pay them. In one of my son's garden a few Oregon Champion bushes were loaded with good size berries, more so than I have ever seen on any gooseberry bush before.

Price: 1-year No. 1 plants, 25c each; 10 for \$2.30; 100 for \$20.00.

VICTORIA. New. The best gooseberry in England and the champion bearer for the London market. Strong grower, making shoots 3 feet, 9 inches in a season. Berries larger than Crown Bob or Lancashire Lad, pale red, of excellent flavor. A late blooming and a sure cropper; hardy. A 3-year-old bush bearing 28½ pounds of fine, large fruit was shown in 1900. All around, it seems well suited for market purposes here.

Price: Two-year-old No. 1 plants: 30c each; 10 for \$2.80; 100 for \$25.00.

DOWNING. A well-known American sort, which has given the best results everywhere. Large and handsome, pale green berry; of splendid quality for dessert and cooking. Bush vigorous, a strong and upright grower and exceedingly productive. An excellent sort for family use and suitable for market. This variety is seldom affected by mildew.

Price: Two-year-old plants, 28c each; 10 for \$2.50; 100 for \$23.00.

PEARL. A very desirable American variety. Very hardy, entirely free from mildew, superior in size and quality, and more productive than Downing. I take pleasure in recommending it for small or extensive planting as one of the best berries of recent introduction. The large berries are pale green and of the finest quality, and valuable for home or market.

Price: 2-year-old plants, 30c each; 10 for \$2.50; 100 for \$23.00.

HOUGHTON: An enormously productive and always reliable old variety. Of vigorous growth, slender and spreading, not subject to mildew. Fruit rather small, smooth, pale red, tender and of good quality. Will do well almost anywhere.

Price: 2-year-old plants, 12c each; 10 for \$1.00; 100 for \$8.00.

CARRIE. A marvel of productiveness and a good gooseberry in every way. When fully ripe, it is maroon in color and of good quality. It is a strong grower and holds its foliage until late in summer. If the berries were a little larger in size, it would be one of the very best of the red varieties. Originated in Minnesota and is absolutely hardy. I advise planting it where other varieties will not stand the winters.

Price: 2 year No. 1 plants, 20c each; 10 for \$1.50; 100 for \$12.00.

RED JACKET. (Josselyn.) This American seedling has been widely planted in recent years and is highly recommended by all growers. Bush is very hardy, clean, healthy foliage and entirely free from mildew. Fruit large, smooth, pale red and of first class flavor and quality. It is considered the best fruited gooseberry in cultivation. While this does well in Illinois, Indiana and the eastern states, it does not seem to stand the Nebraska weather as well as the other varieties.

Price: Two-year-old plants, 25c each 10 for \$2.30; 100 for \$20.00.

CURRENTS.

Hardy, easily cultivated, standing neglect well, and liberally responding to cultivation and generous treatment; indispensable for table use, jellies, etc. No garden is complete without them and large quantities are required for market. Set four feet apart in rich ground; cultivate well or mulch heavily; prune out old wood so that each remaining shoot will have room to grow. If the currant worm appears, dust with hellebore or spray with Sulphate of Nicotine, or our Bordeaux Mixture. These are also good remedies against bugs and worms on gooseberry bushes. All plants are well rooted and strong. In regard to shipping currants, it is the same as with gooseberries, I can ship them anywhere. (See under gooseberry.)

PERFECTION. This grand new variety was originated by Charles G. Hooker of New York by crossing the Fay's Prolific with the White Grape, with the view of combining the large size and color of the Fay with the good quality and productiveness of the White Grape. The color is a bright red; size as large or larger than Fay, the clusters averaging longer. The Perfection has a long stem, making it easy to pick without crushing any of the berries. It is a great bearer. The berries are of rich, mild flavor, sub-acid, plenty of pulp, with few seeds. Less acid and of better quality than any other currant in cultivation. In my garden the Perfection is the best bearer, with largest berries, the sweetest currant I ever tasted and easiest to pick. Anybody can pick a basket of Perfection as fast or faster than cherries. If I should plant ten acres of currants for profit I would plant Perfection only. My plants are true Perfection.

Price, well rooted, strong plants: 30c each; 10 for \$2.50; 100 for \$22.00.

WILDER. One of the strongest growers and exceedingly productive. Clusters and berries very large; of attractive bright red color even when dead ripe. Quality excellent, with mild, sub-acid flavor. Ripens early and remains bright and firm until quite late. Very profitable market sort. Bush grows upright and vigorous. Few varieties equal the Wilder in productiveness and vigor. Some growers in Kansas claim that Wilder is the best currant for that state, and they prefer it to Fay's.

Price, well rooted, strong plants: 2 year old plants, 25c each; 10 for \$2.30; 100 for \$20.00.

Perfection Currant.

Fay's Prolific.

FAY'S PROLIFIC. Has fully sustained all the claims that were made for it by the originator when first introduced. It has been

widely planted and has given general satisfaction; fruit very large, bright red and of excellent flavor, less acid than Cherry. It has a long stem which admits rapid picking and is enormously productive. One of the most valuable fruits of recent introduction. Comes into bearing early. One of the best market sorts, and equally valuable for home use. In my garden the Perfection gives better results. I prefer the Perfection. **Price, 2-year-old No. 1 plants:** 25c each; 10 for \$2.30; 100 for \$20.00.

LONDON MARKET. A very vigorous, rather upright grower, strong in wood and foliage. Berries are of medium size, dark red, fine flavor and not very sour. Exceedingly prolific.

Price: 20c each; 10 for \$1.80; 100 for \$16.00.

WHITE GRAPE. While white currants are not as attractive in color, when used for preserves they are as a rule much sweeter, and therefore in good demand for a dessert fruit. I find the old White Grape still better than most any other white variety. Berries are of medium size, very good quality and very sweet for a currant.

Price, well rooted, strong plants: 30c each; 10 for \$2.80; 100 for \$25.00.

BLACK CHAMPION. Very productive, large bunch and berries, excellent quality; strong grower. Leading black currant. Does well in the Dakotas, Montana and Wyoming. All black currants are shy bearers in my garden.

Price, well rooted, strong plants: 25c each; 10 for \$2.30; 100 for \$20.00.

CRANDALL. A native black seedling of the Western Wild Currant and considered by many to be much superior to any of the named varieties yet produced; distinct from the European black varieties and without their strong odor; exceedingly productive; strong, vigorous grower. The berry is of large size, being half to three-quarter inch in diameter. Can also be used as ornamental shrub in gardens, as the flowers are a beautiful yellow and very fragrant.

Price of Crandall: 30c each; \$2.80 for 10; \$25.00 per 100.

Dear Sirs: I wish to say we received our order of trees, shrubbery and all O. K. Oh, we have had the worst drouth here for years but everything seems coming but the blackberries and now we have had a good rain and they seem to be starting from the roots. If they don't, we will try again next year. I set everything as deep as I dare and that seemed to help. Must say the grapes are fine, the best we ever got. Thank you for a square deal all around. Hope we may live to have more deals.

Yours truly,
Frank Miner, Bigfoot Prairie, Ill.

BLACKBERRIES.

Blackberries require the same treatment as Raspberries. They succeed well on any land suitable for corn or wheat, but amply repay high cultivation. Plant in rows six feet apart and three feet in the row. Pinch the canes back when they have reached about four feet in height, and cut out all the dead wood every year. Cultivate well and deep, or mulch heavily with straw. A very small plot of ground planted to blackberries will produce more than enough luscious, healthful fruit to supply the average family. Hardly any variety of blackberries is suitable for all countries. It is therefore best to try out different sorts, or find out with what varieties your neighbors are successful.

My blackberry plants are now all raised from root cuttings, insuring strong, well rooted plants, much superior to sucker plants. Please bear this in mind when comparing my prices with those of the other catalogs.

LA GRANGE. This berry is a Russian product, having been brought from that arctic country about fourteen years ago, and has been fruited by Mr. LaGrange in Vermillion County, Illinois, for the past twelve years and in that time has not received any injury from cold winters. It is the hardiest berry yet produced; it grows on canes like Lawton or Snyder, but stems from the ground up, and each fruit stem has ample foliage, each cluster of berries having a leaf. The fruit ripens in the shade, which materially adds to its flavor. Other varieties mostly produce their fruit at the top of their canes, which are almost bare of foliage, and frequently are sun-scalded. When the berries from the first bloom are about two-thirds grown, there comes on a second crop of bloom as profuse as the first; in ripening one cannot tell when the berries from the first blooms end and where fruits from the second blooms begin, keeping this rotation of blooming up till late in summer, remaining in ductive, one-ninth of an acre yielding 571 quarts. Rev. J. on ordinary land and cultivation. The LaGrange is free from any hard core and the berry melts in one's mouth, it is so delicious. Prof. S. A. Forbes says it is more free from disease than any blackberry he has ever seen. No one will make a mistake in planting LaGrange, either for home use or market.

Price: 15c each; 10 for \$1.20; 100 for \$10.00; 1000 for \$80.00.

MERSEREAU. This early, mammoth iron-clad blackberry originated in northwestern New York, where the mercury falls to from 15 to 25 degrees below zero, and the plants have never been injured. Berries are sparkling throughout and remain black under all conditions and circumstances. In quality is exceptionally sweet, rich, melting and luscious, being without core. As a shipper and keeper, it is unsurpassed. The canes are of exceedingly strong, upright habit. Foliage large, abundant and entirely free from rust or blight. One of the best for Nebraska. Can be grown farther north than any other variety.

Price: Strong plants, 12c each; 10 for \$1.00; 100 for \$7.00; 1000 for \$60.00.

EARLY HARVEST. Very early. Berries medium size and sweet. Splendid for market on account of its earliness. Brings high prices. Should not be planted in northern states. Does best in Oklahoma and Texas.

Price: Strong plants, 10c each; 10 for 80c; 100 for \$6.00; 1000 for \$50.00.

SNYDER. This is one of the best blackberries for market in the North; very hardy. The canes are vigorous and annually productive. The berries are medium in size, very sweet, juicy and of fine flavor. A market gardener from Omaha claims that Snyder makes him the most money year for year.

Price: Strong plants, 10c each; 10 for 80c; 100 for \$6.00; 1000 for \$50.00.

ELDORADO. A very vigorous grower and very hardy, enduring severe winters without injury. Fruit is large, borne in clusters.

Price: Strong plants, 15c each; 10 for \$1.00; 100 for \$6.00; 1000 for \$50.00.

ERIE. Berries large and nearly round, appearing thus even larger than they really are; of good quality. The canes are strong with healthy foliage, hardy, free from rust, supporting heavy crops of fruit. Ripens between Early Harvest and Wilson.

Price: Strong plants, 10c each; 10 for 80c; 100 for \$6.00; 1000 for \$50.00.

OHMER. Very large, fine flavor, hardy and very productive. Has been extensively planted in the last few years.

Price: 10c each; 10 for 80c; 100 for \$6.00; 1000 for \$50.00.

SONDEREGGER'S EARLIEST. This is a seedling found in an old orchard where there once was a field of Snyder and Early Harvest blackberries, and was first noticed by Arthur Modglin of Illinois, who is a prominent shipper and solicitor of small fruits. It has been grown and tested since 1911, but never were plants offered on the market. I find this blackberry has more points of merit than any other blackberry on the market. **First:** They are 15 days earlier than the Early Harvest, or any other blackberry and ten days earlier than any dewberry; ripens before either black or red raspberries and before strawberries are all gone. Ripens in Illinois May 30. **Second:** They are enormously productive, the vines are loaded with fruit to the tips of the canes, outyielding Snyder, LaGrange, Blowers or any other. **Third:** They are very hardy. The season of ripening lasts about four weeks. The great value of this variety is its earliness, productiveness, size, quality, and hardiness of cane. Canes grow not as stiff as with other varieties; grow rather more like a Dewberry.

Price: First class, well rooted plants, 15c each; 10 for \$1.25; 100 for \$10.00; 1000 for \$80.00.

Snyder.

Mersereau.

Plants arrived two days ago in fair condition. Trees from you last year grew fine. Three of the plum trees will be full of blossoms. I am pleased with your stock and fair dealing.

L. D. Wilmoth, Montrose, W. Va.

Logan Berry.

DEWBERRIES.

A variety of blackberry that trails on the ground. In size and quality the fruit excels the blackberry. Very profuse bearer and reasonably hardy. Vines should be covered with straw or earth over winter in cold climates. The fruit of the Dewberry is highly prized as a market fruit owing to its large size and quality.

LUCRETIA. One of the most widely planted of the Dewberries. It is a strong grower and exceedingly productive. The fruit is large, luscious and handsome. Glossy, shining black and ripens from the first to the middle of July, according to the locality.

Price: Strong plants, raised from root cuttings, 8c each; 10 for 60c; 100 for \$4.50; 1000 for \$40.00.

AUSTIN. Berries very much larger than those of any other dewberry or blackberry. It requires no trellis or stakes. The fruit is jet black and of superior quality and flavor. For productiveness it outrivals all dewberries. Not quite as hardy as the Lucretia.

Price: Strong plants raised from root cuttings, 10c each; 10 for 70c; 100 for \$6.00; 1000 for \$50.00.

Austin. An excellent Dewberry.

LOGAN BERRY.

The Logan Berry is a hybrid between the raspberry and blackberry. The fruit is as large as the largest blackberry, and is produced in immense clusters. The color is clear, dark red. It partakes of the flavor of both the blackberry and the raspberry, mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm and carry well. Strong grower, enormous bearer. Ripens early, just after strawberries. Not hardy north of the 40th parallel. Do not plant them in Nebraska unless you wish to cover them over winter. Lay canes down late in the fall and cover with straw. **Price:** 25c each; 10 for \$2.30; 100 for \$20.00.

HIMALAYA BERRY.

I have sold this berry for a number of years and in order to get the facts about this berry I have written to a large number of my customers in different states as to the success they had with this berry. Two-thirds of them were well pleased with the quality and productiveness—some say fruit is very good but a shy bearer; a few answered "no good." As a result of my inquiries, I recommend the Himalaya Berry anywhere south of here, and would advise my customers north of here to make a trial with a few plants. I sell the Michigan strain of Himalaya Berry only, as the California strain is not hardy. The vine is a vigorous grower, often making shoots of 20 to 30 feet in one season. Should be tied to stakes or trellises, or can be used for arbors, same as grape vines. The large clusters of good sized berries ripen all summer. Berries have no core and flavor is sweet, of unusual richness and when fully ripe, very melting. **Price:** Strong plants, 15c each; 10 for \$1.30; 100 for \$11.00.

ELDER BERRY.

ELDER, AMERICAN. (*Sambucus Canadensis*.) The common Elder Berry. A tall shrub with stout stems filled with white pith. The small, white flowers come in large, flat-topped cymes, fragrant, opening in early summer. Fruit black, very profuse, ripening in August and September. Grows 6 to 8 feet tall. The berries are highly esteemed for cooking and making of cordials. In many parts of Europe they are grown for the purpose of making wine, and are said to be of great value for medicinal purposes in case of stomach disorder. All varieties of Elder are largely planted in parks and gardens to attract the birds, which are very fond of the berries. **Price:** 2 to 3 feet, 20c each; 10 for \$1.80.

DWARF BLUE BERRY.

A dwarf shrub, growing 8 to 15 inches high with very shiny leaves and very productive. The berries are of good size, black, with a blue bloom, very sweet. This is the variety that is largely used for canning. Plant grows fine under cultivation, likes a sunny place and is perfectly hardy, growing wild in Minnesota. **Price:** 15c each; 10 for \$1.20; 100 for \$9.00.

JUNE BERRY or SERVICE BERRY.

IMPROVED DWARF. Good substitute for the large swamp huckleberry or whortleberry, which it resembles in appearance and quality. Fruit borne in clusters, reddish purple in color, changing to bluish black. Flavor a mild, rich, sub-acid; excellent as a dessert fruit or canned. Is extremely hardy and endures the heat of summer without injury. In habit it is bushy, growing up to 7 or 8 feet in height. Is largely planted for ornamental purposes. When in full bloom it is surpassed by few shrubs. The leaves are of a beautiful glossy green. Plants produce very few or no fibre roots even when transplanted two or three times. **Price:** 2 to 3 feet, 30c each; 10 for \$2.50.

BUFFALO BERRY.

The fruit of the Buffalo Berry resembles small currants; is round, smooth and glossy of a beautiful red color. Berries ripen in July and literally cover twigs and branches; will hang on bush until nearly spring. Make excellent preserves, jellies and butter, also much used for pies and tarts and for making wine. Is hardy anywhere, constant and prolific bearer, worth cultivating for ornamental purposes alone. Plant the Buffalo Berry for a winter berry, as they are the most delicious fruit from December to January. There are male and female plants, therefore a number of plants should be planted. One plant alone will not bear fruit. Remember this when ordering. **Price:** 2 to 3 feet, 30c each; 10 for \$2.50; 100 for \$20.00.

St. Regis Raspberry.

Plant in rows five feet apart and three feet in the row. Will do well in any soil. Cultivate thoroughly and keep free from weeds. Destroy all suckers, cutting out all old wood. My plants are strong and well rooted. There is big money in growing a good red variety for most any market. They have many advantages over the blackcap, as they can stand both cold and hot weather much better. They are easier cared for, selling for more money, and will produce as much fruit as the blacks. They become more popular each season for canning and jams, retaining their flavor for years after preserving.

Black varieties, also Columbian, do not rootsucker or make sprouts. Plants are raised by laying down the canes and covering the tips with dirt. This makes what are called tip plants. I transplant these tips in the spring and grow them one year. In this way they have hard roots that can be shipped and are easy transplanted, while tips are very soft and more difficult to ship than Strawberries.

RED VARIETIES.

ST. REGIS EVERBEARING RED RASPBERRY. An excellent novelty. Raspberries four months. That is what you get when you plant the St. Regis, the new everbearing variety. Moreover, they are not only raspberries, but raspberries of the very highest grade—in size, in brilliant crimson color, in firmness, in flavor. The variety has been aptly termed "the early till late" variety, for it is the first red raspberry to give ripe fruit, while it continues to produce berries without intermission until late October. St. Regis is of pure American blood and of iron-clad hardihood. In addition to the brightest color and large size of the fruit, it is so firm and rich in sugar that it will stand shipping 200 miles, arriving at market in first class order; and it can be readily kept in perfect condition for several days after being gathered. Unlike any other raspberry, the St. Regis yields a crop of fruit the season it is planted. Plants of it planted in early April gave berries on June 20th of the same year. For four weeks thereafter the berries were large and beautiful, firm and full flavored to the very best. I have tried the St. Regis here in Beatrice. It is hardy here; bears well and the berries are as described above. See my low price. **Price:** 10c each; 10 for 90c; 100 for \$7.00; 1000 for \$50.

COLUMBIAN. The great raspberry of the age. It is a seedling of the Cuthbert grown near the Gregg, and is believed to be a cross between the two. It is enormously productive, of large size and excellent quality. Season of fruiting from July 12th to August 15th. It has stood 28 degrees below zero without injury; is propagated from the tips and does not sucker. The color is dark red; adheres to the stem, but does not crumble in picking and is a splendid shipper. Does not rootsucker.

Price: 2 year plants, transplanted, not tips, 10c each; 10 for 90c; 100 for \$8.00; 1000 for \$70.00.

HERBERT. Originated in Canada. Prof. W. T. Macoun of Ottawa describes it as follows: "A chance seedling originating with R. B. Whyte, Ottawa, Canada, in 1887. One of 30 seedlings, probably of Clarke. A very strong grower, hardy and very productive. Fruit large to very large, obtusely conical, bright to rather deep red; drupes medium size, not crumbling; moderately firm; sweet and sub-acid, sprightly, juicy and of good flavor. Quality very good. Season begins a few days before Cuthbert. The best Red Raspberry tested here. It has all the good points required in a berry for local market, being hardy, vigorous, productive, with fruit of large size, and very good color and quality." I find this raspberry to be

exceedingly hardy, of fine quality, one of the best raspberries I have seen, and can recommend it to all my customers. **Price:** 10c each; 10 for 90c; 100 for \$7.00; 1000 for \$50.00.

CUTHBERT. (Queen of the Market.) A strong growing, hardy variety, well known everywhere; stands northern winters well; berries very large, firm, can be shipped long distances to market, flavor is sweet, rich and luscious. The best late red raspberry, but not quite as hardy as Herbert. **Price:** 10c each; 10 for 60c; 100 for \$4.50; 1000 for \$40.00.

SUNBEAM. Originated by Prof. Hansen of the South Dakota State College of Agriculture. Berries are of good quality, firm and of large size. It is worthy of trial where raspberries winter kill, as it has endured 41 degrees below zero without protection. It endured last winter at Bismarck, N. D., without protection. Even for Nebraska they are a safer berry to plant for good results every year than any other variety. **Price:** 3c each; 10 for 60c; 100 for \$5.00; 1000 for \$45.00.

BLACK VARIETIES.

These varieties do not rootsucker. They are grown by laying the ends of the branches in the ground in August. By late fall the tips have made roots. These are very soft though, and can hardly be shipped and then transplanted with success. I therefore transplant these tip plants and grow them another season. The roots are hard then and can be shipped with success any distance. **Please remember this when comparing my prices with those from other nurseries.**

CUMBERLAND. Very hardy and productive. Berries large, handsome, very firm and stand long shipments. Remarkably free from diseases. The last two years the Cumberland has given me more and larger berries than the Kansas. This variety is also planted largely in Idaho. **Price:** 2-year-old plants, each 10c; 10 for 90c; 100 for \$8.00; 1000 for \$70.00.

KANSAS BLACK. A valuable early blackcap, so strong and hardy as to endure extremes of cold and drought and yet bear heavy crops. **Price:** 2-year-old plants, each 10c; 10 for 90c; 100 for \$8; 1000 for \$70.

PLUM FARMER. Black. Vigorous, stocky growing black cap, very healthy and attractive in appearance; productive, bearing heavy crops of large, fine jet black berries; excellent quality and a good shipper. One of the most valuable market berries, as it commands top prices. Does well here in Nebraska. **Price:** Nice, strong 2-year-old plants, each 10c; 10 for 90c; 100 for \$8.00; 1000 for \$70.00.

STRAWBERRIES.

Strawberry Plants are all quoted at prepaid prices.

These should do well in any ordinary farm or garden soil. The ground should be well prepared. For field culture set in rows three feet apart, and from 12 to 15 inches in the row. For garden 15 inches apart each way. Cultivate well and keep clear from weeds. Cut off all runners as soon as they appear, as fruit will be much larger. In winter a covering of straw or old hay will protect the plant. Do not cover until the ground is frozen. Strawberry plants cannot be shipped by freight to distant points, but should go by express or parcel post to insure safe arrival. I pay the express or postage on all strawberry orders. When setting out plants, make holes with a spade by putting it in ground 5 or 6 inches and pull towards you, then take out. Hold plant in hole with hand and close hole with foot and press firmly (with feet) on both sides. This is the general way of planting strawberry plants, and we recommend this method for raspberry and blackberry plants as well. Some plough furrows and set cane plants in them, but unless soil is very moist, there is danger of plants drying out.

COMMON VARIETIES.

The varieties I offer below are all with perfect blossoms and will bear if planted alone, do not need to be mixed with other varieties.

SENATOR DUNLAP. Medium Early, Perfect. This is the most popular strawberry in all sections of the United States. It produces immense crops of dark red top-shaped berries of medium size to large size. Few varieties bear fruit of such uniform size and color. Stands universally as a leading commercial strawberry and succeeds equally well all over the country.

AROMA. Late, perfect. Berries very large, bright red to the center, rich, delicately aromatic, firm; a good shipper.

Senator Dunlap.

BRANDYWINE. Very late, perfect. Blood red, great yielder of large, round berries, fine quality, having a delicious flavor; makes plenty of good, strong, well-rooted plants. If you are looking for a No. 1 canning berry or for table use, I would recommend the Brandywine. A good shipper.

MICHAEL'S EARLY. Early, perfect. One of the earliest varieties grown. Conical in shape, of a rich crimson color, with a rich, mild flavor and deep pink meat. The plant is strong and healthy, one of the best for fertilizing early pistillate varieties. You can always depend on this one.

GIBSON PERFECT. Berries large beautiful dark red in color, vigorous grower and very productive. Bears through a long season, grows well almost everywhere and is very popular for canning. Not a shipping berry, but its high quality makes it very good for home garden or local market.

Price of all varieties of Strawberries, except Champion and Progressive. By parcel post or express, prepaid, 35c per 25; \$1.00 per 100; \$7.00 per 1000.

EVERBEARING OR FALL VARIETIES.

Everbearing strawberries have been largely planted in the last few years with very good success. They have come to stay. They will bring about as good a crop in June as the common varieties and will bear in favorable weather some berries off and on all summer and another good crop in the fall. Only during the hot weather they rest, while in states with cooler and damper climate, they bear steady all summer. I recommend them personally to all my customers, feeling perfectly sure that they will be well satisfied. To insure a good crop of berries in the fall, all runners should be cut off and the plants well cultivated or hoed.

CHAMPION STRAWBERRY

The \$2,000.00 per Acre Everbearer

Just read this sworn statement from the introducer:

"One acre of Champion plants were set in the spring of 1920. In just 94 days from that time the picking of berries commenced and continued for 129 days. During that time 362 16-qt. cases or 5,792 quarts of berries were picked and harvested, and the total amount of money received from them was \$2,059.20."

Above is the introducer's sworn statement. I do not want to say that everybody would get as good results. I give here another testimonial from Dr. A. D. Preston, Scranton, Pa:

"The 100 Champion plants you sent me were a great success. They were planted in May and in spite of two months of very wet weather followed by a very dry summer and fall, they yielded 40 quarts of large, delicious berries from August 1st until October 25th. At that time they were stopped by a hard freeze, but were loaded with green and ripe berries. Everyone who ate them said they were as fine a flavored strawberry as they had ever eaten."

In my nursery the Champion bore fine this summer. I had strawberries all summer and now as I write this (Oct. 15) the plants are full of green and ripe berries and blossoms and if we do not get very hard frost, I will be able to pick quite a number of quarts yet. The plants are strong, thrifty, growers. One or two hundred plants will bring a good many berries for any family.

I can recommend it to my customers. I know they will be pleased with the results. Strawberries bring a high price in the fall and it will pay to raise them for the market. My price is very low.

Price: 25 plants for \$1.00; 100 for \$3.00; 1000 plants for \$25, by parcel post or express, prepaid.

Aroma.

October, 1922.

Progressive and Superb Ever-bearing Strawberries picked in October. If anyone wants a good bearing strawberry, get those two sorts from Sonderegger Nurseries. They have a fine flavor and bear from May till ice freezes them.

B. G.
Clarksville.

STRAWBERRIES.—(Continued)

PROGRESSIVE. Considered by many as the best of the fall bearing varieties. The plants are vigorous and healthy and they multiply all they ought to. The berries are about an inch in diameter, uniform in size, of deep crimson color, very firm and of high quality. It begins to bear with the second early of the June varieties, yields then a heavy crop of berries and is really profitable for its June crop alone. It continues bearing all summer, though not as heavy, of course, and with favorable weather a good crop in the fall, when the weather gets cooler again.

Price: 55c per 25; \$2 per 100; \$16 per 1000. By parcel post or express, prepaid.

RHUBARB OR PIE PLANT.

Also called wine plant. This plant affords the earliest material in the spring for pies and tarts. Invaluable for canning and wine. Can be set out in either spring or fall. Will grow in any good garden soil. Deep, rich, moist soil is best, but it is such a strong, vigorous growing plant, it will almost thrive anywhere. Plant in rows four feet apart and the plants three feet apart. Set so that the crowns are about an inch below the surface. Rhubarb is a gross feeder and the more manure it is given the larger and finer the yield.

LINNEAUS. Medium size, early and tender.

GIANT. Very early, vigorous grower and of fine quality. Best for canning.

Price, both varieties: Nice, strong, two year old roots, each 15c; 10 for \$1.00; 100 for \$8.00; 1000 for \$65.00.

HORSE RADISH.

This popular condiment is very easily produced in the home garden and anyone who has compared the freshly dug article with that sold over counters can appreciate the value of good, home-grown horse radish. A half dozen roots will provide the ordinary family, and as it spreads quite rapidly, the source of supply is easily maintained. I furnish good, strong roots. **Price:** 10 for 25c; 100 for \$1.80; 1000 for \$16.00.

ASPARAGUS.

This earliest and finest of spring vegetables is among the earliest cultivated and most profitable. A bed once planted suffers no deterioration for many years if it is properly attended to and is well manured. See that the ground is well manured and well drained; work it up fine and deep, and make it very rich with well rotted barnyard manure. Place the plants 8 inches apart in rows 3 feet apart. Spread out the roots in a trench made deep enough to permit their crowns to be covered with 3 to 4 inches of mellow dirt. Give bed liberal dressings of manure at intervals.

CONOVER'S COLOSSAL. Produces large, tender shoots. Well known and largely planted.

COLUMBIAN MAMMOTH. A distinct variety of mammoth size and superior quality. Remarkable for the clear whiteness of its stalks.

Price, both varieties, two-year-old plants: 10 for 25c; 100 for \$1.80; 1000 for \$13.00.

CHIVES.

Perfectly hardy little perennial members of the onion tribe and are grown exclusively for their tops, which are used wherever the flavor of onions is required. The tops appear early in the spring and can be shorn throughout the season as needed. Good, strong plants, per bundle, 15c; 3 for 40c; 10 for \$1.10, postpaid.

MINT.

OLD FASHIONED. For mint sauce and juleps. Plant 1 year old, 15c each; doz., \$1.20, postpaid.

HOLT'S MAMMOTH SAGE.

The plants of this new variety are very robust, making a good growth the first season. The leaf is borne well above the ground, is of unusual substance, strong in flavor and of excellent quality. The plants are perfectly hardy and increase with age. They do not produce seed. 15c each, 10 for \$1.30; \$12.00 for 100.

Michael's Early.

Asparagus.

Holt's Mammoth Sage.

FOREST TREE SEEDLINGS

ALL NURSERY GROWN.

During the last 38 years I have probably grown more Forest Tree Seedlings than any other nursery in the West. I know how to grow them in the best and cheapest way, and having also the right kind of ground and a favorable climate. I can sell first-class seedlings at astonishingly low prices, as you will see below. I invite correspondence from parties wishing to purchase seedlings in large quantities. No farm should be without forest trees. The expense is very small, while it pays you well to have shade for your stock, and at least raise your own posts. If I can help you in selecting the right varieties for your climate, please just write me.

For descriptions of the different varieties, please see under "Ornamental Trees."

			Per 1	10	100	1000

I wish to let you know that our last fall order of Gooseberry, Currants, Rhubarb and Blackberries were received in first-class condition and I was well pleased with order. Wishing you further success, I remain
Yours truly,

Eugene Rochelle, DuQuoin, Illinois.

The Compass cherries bore some fruit last year and they were certainly fine, the finest fruit we have. The price on your White Knight Iris is very reasonable, as I have not been able to get it for less than \$1.00 anywhere else.

Mrs. M. B. Lewis,

3824 Grand Ave., Omaha, Nebr.

ORNAMENTAL AND SHADE TREES

Catalpa Bungei, three years old on my home place.

On this and several pages following I give a list of trees of which most are hardy and can endure the dry weather of the West. All these trees have been raised in the nursery, are well pruned and have good bodies and tops. All have been transplanted once and have therefore good roots. My prices are so low that anyone can afford to beautify his home. For one year seedlings of these varieties, see page 28.

For plans for your home grounds, please see page 45. Or if you wish to plant only a few trees and shrubs, write me and I may be able to advise you what trees, etc., are best for your climate and how to plant and arrange them. I will give you all the information I can free, but cannot give plans and blue prints free on small orders.

Most of the trees in this list are hardy, but few varieties will do well everywhere. For western Nebraska and Kansas and eastern Colorado, I recommend Honey Locust, Hackberry, Silver Poplar, Birch, Russian Olive and Russian Mulberry, the Honey Locust probably being best.

In the eastern parts one may add White Elm, Ash, European Linden, Catalpa, Speciosa, Horse Chestnut, Mountain Ash, Golden Willow and especially Norway Maple. On lower lands the Soft Maple also does well. In Wyoming my customers there have best success with Silver Poplar and Hackberry. I am always glad to give information in this matter. Please just write me.

Remember, I pay freight charges on orders for trees and plants amounting to \$10.00 or more. In large shade trees, this is quite an item.

AILANTHUS. Tree of Heaven. A Glandusola. Originates from Japan. A fast growing tree, with long, slender, feather-like leaves. Is absolutely free from insects and diseases and quite hardy here. Is a very odd, bushy ornamental tree. Can also be used as a shrub by cutting them low every year and are then making a tropical effect. I have often seen them in Omaha. **Price:** 4-5 feet, 50c each; 10 for \$3.50; 5-6 feet, 70c each; 10 for \$6.50.

ASH. (White.) Fraxinus Americana. A rapid growing native tree, of fine symmetrical outline. Very hardy; drought resistant. Good street or park tree.

Price of White Ash:	Per 1	10	100
3-4 ft., well pruned trees.....	\$0.15	\$1.30	\$10.00
4-5 ft., well pruned trees.....	.25	2.30	18.00
5-6 ft., well pruned trees, with good crown40	3.80	32.00
6-8 ft., well pruned trees, strong caliper65	6.00	52.00
8-10 ft., well pruned trees, strong caliper95	9.00	85.00
10-12 ft., well pruned trees, strong caliper	1.35	12.50	110.00

MOUNTAIN ASH. European. (Sorbus Aucuparia.) Hardy tree of medium size, a smooth bark, head dense and regular, covered from July till winter with large clusters of bright red berries. A fine lawn tree and very hardy. Does well here in Nebraska.

Price of Mountain Ash:	Per 1	10
4-5 feet, nice trees.....	\$1.00	\$9.00
5-6 feet, nice trees, with crown.....	1.50	14.00
6-8 feet, nice trees, with crown.....	2.00	19.00

BIRCH. White European, (Betula Alba.) A graceful tree with silvery white bark and slender branches. When a few years old, of an elegant drooping habit, rendering trees very effective in parks or on lawns. Hardy as far north as the Dakotas. I have quite a few European White Birch and also Cutleaf Weeping Birch in my garden, and they do as well as

any tree I have. Have not lost one of them in the last nine years, all are growing nicely. This shows that they are good trees to plant in Nebraska. It is well to keep them well watered after transplanting. Small trees are of a brownish color but turn to a clear white in a few years.

Price of European Birch:	Per 1	10
5-6 feet, trees well branched.....	\$0.90	\$8.00
6-8 feet, trees well branched.....	1.25	11.00
8-10 feet, trees well branched.....	1.50	14.00

BECTEL'S DOUBLE-FLOWERING CRAB. (Pyrus Coronaria.) Probably the best of the many varieties of flowering crab. Very hardy, thriving in most any soil, covered in the spring with large, beautiful double, fragrant flowers of delicate pink color. The tree then looks as if covered with small, very fragrant roses. The only sweet-scented double-flowering crab. Suitable for a lawn tree or for a group **Price:** 2-3 feet, 75c; 10 for \$7.00; 3-4 feet, \$1.25 each; 10 for \$11.00.

FLORIBUNDA, FLOWERING CRAB. A large bush, or rather a small tree, with broad top, very hardy and easy to grow. Flowers are red or reddish pink, turning to almost white before falling; are on long stems and the tree is in bloom a long time. I use them a good deal for cut flowers. The buds before they open are especially pretty and graceful. Sometimes more than one hundred flowers are on a limb of 18 inches in length. The apples are very small, one-third of an inch in diameter, on long stems and can be used for canning. One of the prettiest of shrubs in my garden. If planted in groups they should be at least 12 feet apart. Try a few trees. **Price:** 2-3 feet, 60c each; 10 for \$5.50; 3-4 feet, 80c each; 10 for \$7.50.

BLACK CHERRY, WILD. (Cerasus Serotina.) One of the most beautiful native ornamental trees. Also valuable for timber and largely planted for this purpose. A strong, straight tree, with dark brown bark, good wide crown and dark green foliage. Flowers are borne in long, loose racemes and are followed by purple-black fruit. Perfectly hardy, even as far north as North Dakota.

Price:	Per 1	10
5-6 feet, nice trees, branched.....	\$0.70	\$6.50
6-8 feet, nice trees, branched.....	.90	8.50
8-10 feet, nice trees, branched.....	1.25	11.00

BOX ELDER. Ash Leaved Maple. (Acer Negundo.) A small native tree, maple-like in its seeds and ash-like in its foliage. Of spreading habit, rapid growth, very hardy, desirable for street planting, and succeeds in many places where other varieties do not thrive. I hardly recommend this tree where other good shade trees can be grown. Unless it is kept well pruned for a number of years, it will not make a nice top, like Ash or Maple. Otherwise it is hardy and can stand lots of dry weather.

Price of Box Elder:	Per 1	10	100
3-4 feet, transplanted	\$0.20	\$1.80	\$15.00
4-5 feet, transplanted30	2.50	22.00
5-6 feet, transplanted50	4.50	40.00
6-8 feet, transplanted70	6.50	60.00
8-10 feet, transplanted	1.00	9.50	90.00
10-12 feet, transplanted	1.35	12.50	100.00

COTTONWOOD. This is our Nebraska Cottonwood, growing along our creeks. They are fast growing and very hardy. The trees I offer are nursery grown.

Price:	Per 1	10	100
4-5 feet	\$0.20	\$1.80	\$16.00
5-6 feet30	2.70	24.00

ORNAMENTAL AND SHADE TREES.—(Continued.)

HOPA RED-FLOWER CRAB. Professor Hansen's Description. Offered for the first time. "Hopa is the Sioux Indian word for 'beautiful.' A promising addition to our list of ornamental trees for the lawn, owing to its wealth of beautiful deep rose crimson blossoms. A striking sight when in bloom. The fruit is too small to be of value for eating, being less than one inch in diameter, but its bright red color will light up the tree in autumn. This was not a hand cross, but I am satisfied that the Baccata was the pollen parent. Trees of strong growth in nursery."

Price:	Per 1	10
2-3 feet	\$0.50	\$4.50
3-4 feet70	6.50
4-5 feet90	8.50
5-6 feet	1.10	10.00

CATALPA SPECIOSA. Hardy Catalpa. An effective tropical looking lawn tree with very broad, large leaves and fragrant purplish-white blossoms of pyramidal clusters, often a foot long. There are few trees that have been more extensively planted for commercial plantation in the Middle West and the Eastern states. It is hardy, grows rapidly on prairies, resists drouth remarkably well and has hardly any insect enemies. As a post timber it ranks with the Black Locust and Osage. Experiments have left no doubt as to its resistency to decay. Without doubt for fence post wood it has no equal, and in view of the fact that it can be grown so easily, it ought not to require much argument to cause farmers to plant Catalpa wherever it will grow. It is all right for posts here in Nebraska. For prices of one and two year seedlings, see page 28.

Price of Catalpa Speciosa:	Per 1	10	100
3-4 feet, not branched.....	\$0.20	\$1.80	\$15.00
4-5 feet, nice trees, branched.....	.30	2.50	23.00
5-6 feet, nice trees, well branched....	.48	4.50	40.00
6-8 feet, nice crowns.....	.75	7.00	65.00
8-10 feet, nice crowns.....	.90	8.50	82.00

CATALPA BUNGEI. (Chinese Catalpa.) A dwarf form, only 3 to 4 feet high, twice as broad. It is very useful in formal work when grafted on stems 5 to 8 feet high, forming a very pretty dome shaped head of large, soft, heavy leaves. Elegant for lawns, parks and cemeteries. The tree is hardy here. Do not recommend it, though, north of the middle of Nebraska. Very appropriate in front of the house along the walk. See picture, page 29.

Price of Catalpa Bungei:	Per 1	10
4-5 feet, nice crowns, straight stems.....	\$1.00	\$9.50
5-6 feet, nice crowns, straight stems.....	1.40	12.00
6-7 feet, nice crowns, straight stems.....	2.00	18.00

I also have some grafted on 2-3 feet stems. These will make a nice round crown, without showing the stem. Suitable where a higher tree would not do. **Price:** 2-3 feet, 75c each; 10 for \$7.00.

European Linden. See Page 31.

BLACK LOCUST. Also called yellow Locust. (Robinia Pseudacacia.) A large native tree of rapid growth, valuable for shade as well as quite ornamental. The yellowish-white flowers are in long, pendulous racemes and appear in June. Wood is very valuable for posts, growing quicker to a given size than any other hardwood tree. The timber is of very best quality and for posts outlasts, with a few exceptions all other sorts. The Forestry Division of the Agricultural Department at Washington recommends the Black Locust for timber plantation for Oklahoma, Texas, New Mexico, Kansas, Nebraska and California.

Price of Black Locust:	Per 1	10	100
3-4 feet, not branched.....	\$0.20	\$1.80	\$16.00
4-5 feet, not branched.....	.25	2.30	20.00
5-6 feet, well branched.....	.45	4.00	38.00
6-8 ft., well branched, with crown....	.75	7.00	60.00
8-10 ft., well branched, with crown..	1.00	9.00	80.00
10-12 ft., well branched, with crown	1.25	11.00

HONEY LOCUST. (Gleditsia Triacanthos.) This is an ornamental native tree of more than ordinary value. Its branches are spreading, forming a broad rather loose head. The branches and trunk are covered with strong thorns. It is of rapid growth, stands pruning well and is often used for a hedge; its thorns making it almost impenetrable. I do not know of a better tree for western Kansas and western Nebraska except probably the Hackberry, which does equally as well. Is found growing wild along creeks and streams most everywhere in Nebraska and Kansas.

Price of Honey Locust:	Per 1	10	100
3-4 feet, nice trees.....	\$0.20	\$1.80	\$16.00
4-5 feet, nice trees.....	.25	2.30	20.00
5-6 feet, nice trees, with crown.....	.45	4.00	38.00
6-8 feet, nice trees, with crown.....	.75	7.00	60.00
8-10 feet, nice trees, with crown.....	1.00	9.00
10-12 feet, nice trees, with crown.....	1.50	14.00

THORNLESS HONEY LOCUST. (Gleditsia Inermis.) Same as the common Honey Locust, except that it is entirely free of thorns and is therefore much more suited for a lawn tree. I cannot furnish Thornless Honey Locust in smaller sizes. They must be about 4-5 feet high before we can tell that they are absolutely thornless. Only about 20 per cent of Thornless seed comes true Thornless.

Price:	Per 1	10	100
4-5 feet, nice trees.....	\$0.50	\$4.50	\$40.00
5-6 feet, nice trees, with crown.....	.70	6.50	60.00
6-8 feet, nice trees, with crown.....	1.00	9.50	90.00
8-10 feet, nice trees, with crown.....	1.25	11.00
10-12 feet, nice trees, with crown.....	2.00	18.00

ELM. American White. (Ulmus Americana.) A noble native tree of large size, wide spreading head and graceful drooping branches. Easy to transplant, hardy grower. One of the best park and street trees; hardy everywhere. The White Elm, Honey Locust and Norway Maple are in my opinion the best park trees for most all middle and northern states of America. All three can be grown into fine specimens, are very hardy, make wide crowns, really perfect shade trees. I have a nice stock of Elm in all sizes and can furnish them in large quantities; all are well pruned, with good bodies and tops.

Price of White Elm:	Per 1	10	100
4-5 feet, few branches.....	\$0.30	\$2.50	\$20.00
5-6 feet, with crown.....	.45	4.00	35.00
6-8 feet, with crown.....	.70	6.50	60.00
8-10 feet, with crown.....	1.00	9.00	80.00
10-12 feet, with crown.....	1.50	14.00	125.00
10-12 feet, 2 inch caliper.....	2.50	24.00	225.00

HACKBERRY. (Celtis Occidentalis.) Also called American Nettle Tree. A native tree, with numerous slender branches which spread horizontally, and thick, rough bark; apple-like foliage, but more pointed and a bright, shiny green. In growth it resembles an Elm somewhat but does not make as wide a top or crown. In the northern half of Nebraska it succeeds better than Elm. A very desirable tree for street planting. Very hardy and stands our dry weather well. Is almost free from insects. A good tree for Kansas, Wyoming, Montana and Nebraska. I have seen fine Hackberry trees of 2½ feet in diameter in Wisconsin.

Price of Hackberry:	Per 1	10
5-6 feet, with good crown.....	\$0.90	\$8.50
6-8 feet, with good crown.....	1.25	11.00
8-10 feet, with good crown.....	2.00	19.00
10-12 feet, with good crown.....	3.00	27.00

HORSE CHESTNUT. European. (Castanea.) White flowering. A fine large tree of compact outline, dense green foliage. In June the tree bears in greatest profusion large panicles of white flowers, tinged with red. Very pretty for street or lawn. Hardy in Nebraska. There are some fine Horse Chestnut trees in Beatrice. A good lawn tree. In my old home in Switzerland they are planted extensively along highways, in parks and along streets. **Price:** 5-6 feet, each \$1.70; 10 for \$15.00; \$140.00 per 100. 6-8 feet, each \$2.25; 10 for \$20.00; 8-10 feet, each \$2.75; 10 for \$26.00.

ORNAMENTAL AND SHADE TREES.—(Continued.)

KOELBREUTERIA PANICULATA. (Varnish Tree.) A rare tree, 35 to 40 feet high, from North China, showy in July, when spangled with long clusters of golden flowers, and in autumn, when its foliage colors to crimson and gold. It is perfectly hardy. I have one tree in my garden which grows nicely and has stood our climate well the last 3 years. Price: 4-5 feet, \$1.15 each.

EUROPEAN LINDEN, BASSWOOD. (Tilia Europaea.) A very pyramidal tree with large leaves and fragrant flowers. A valuable tree for street and lawn planting, developing into beautiful specimens. Extensively planted for ornamental purposes and for bee culture. Rapid growth, not particular as to soil, and perfectly hardy. A few trees here in Beatrice are very large and tall, almost 2 feet in diameter. Price: 1-4 ft. with good stems and nice crowns, \$1.50 each; 10 for \$14.00; 4-5 feet \$2.00 each; 10 for \$18.00; 5-10 feet, \$2.75 each; 10 for \$25.00.

AMERICAN LINDEN, Basswood. (Tilia Americana.) Similar to the European Linden, has large leaves, but does not make as good a crown as the European Linden. Both are excellent street trees and the American probably grows a little faster, also has wider, larger leaves.

Price of American Linden:

	Per 1	10	100
4-5 feet, branched	\$1.00	\$9.00	
5-6 feet, branched	1.50	14.00	
6-8 feet, branched	2.00	19.00	

MAPLE NORWAY. (Acer Platanoides.) One of the most beautiful and desirable trees known. Of large size, perfect outline, with deep green foliage, which turns to a pale yellow in autumn. Desirable trees for street, park and garden. I have a number of Norway Maple in my garden. They grow faster than Hard Maple, do better here in Nebraska; in fact, about as good a shade tree as I have on my grounds. In the spring the leaves, when they first come, are red, turning slowly to green.

Price:

	Per 1	10	100
4-5 feet	\$0.75	\$7.50	\$70.00
5-6 feet, with crown	1.50	15.00	
6-8 feet, nice trees, well branched	2.25	22.50	
8-10 feet, nice trees, well branched	3.00	30.00	

MAPLE, SOFT OR SILVER. (Acer Dasy-carpum.) A native tree of very rapid growth. Hardy everywhere and easily transplanted. Leaves are finely cut, bright green on upper and whitish on lower side. They are not as silvery-white, though, as those of the Silver Poplar, and people often get those trees mixed, especially as the leaves of the Silver Poplar resemble Maple leaves. If you wish a tree with leaves of silver white on the lower side, order a Silver Poplar or Boissiana Poplar. When you order a Silver Maple you get what is mostly called a Soft Maple; when quick effect or shade is desired, Soft Maple is one of the best trees. They do especially well on bottom or second bottom land. Omaha seems to be an ideal place for Soft Maple trees. They also grow well on high land, but do not grow quite so fast. Best time to prune all Maple is in June.

Price:

	Per 1	10	100
4-5 feet, with branches	\$0.50	\$5.00	\$50.00
5-6 feet, with crown	.50	5.00	50.00
6-8 feet, nice trees, well branched	.75	7.50	75.00
8-10 feet, nice trees, well branched	1.25	12.50	125.00
10-12 feet, nice trees, well branched	1.75	17.50	175.00
10-12 feet, 2 inch caliper	2.00	20.00	200.00

MAPLE, SUGAR OR ROCK. (Acer Saccharum.) A popular American tree of pyramidal form. The foliage is large and handsome and of rich, pleasing green turning to orange yellow and red in autumn. Its upright habit of growth, dense shade and adaptability to different soils has rendered it one of the most extensively used. Valuable for sugar and timber. Grows very slow here in Nebraska. I have seen perfect specimens in large numbers in Wisconsin, Iowa and Minnesota.

Price:

	Per 1	10	100
4-5 feet, nice trees	\$1.50	\$15.00	\$150.00
5-6 feet, nice trees, branched	2.00	20.00	200.00
6-8 feet, nice trees, branched	2.50	25.00	250.00
8-10 feet, nice trees, branched	3.00	30.00	300.00
10-12 ft. nice trees, branched	3.50	35.00	350.00

PIN OAK. (Quercus Palustris.) An upright, vigorous growing variety, forming a stately, round topped tree, with long, slightly pendulous branches. The dark green, deeply cut foliage turns to brilliant yellow and crimson shades in autumn, forming one of the best of our fall colored trees. Grows faster than other Oak, often making shoots of 2 feet or more in one season. Transplants the easiest of all Oaks, and is one of our very finest lawn trees

and a desirable avenue tree. I have two fine trees in my garden and many people admire them. Price: 4-5 ft., \$1.50 each; 10 for \$15.00; 5-6 feet, \$2.00 each; 10 for \$20.00; 6-8 ft., \$2.50 each; 10 for \$25.00; 8-10 ft., \$3.00 each; 10 for \$30.00.

RUSSIAN OLIVE. (Elaeagnus.) A beautiful lawn tree, with spreading top, nearly black shining bark, and silvery-white, long narrow foliage. The small yellow blossoms have a wonderful fragrance. The exquisite perfumes are carried long distances in the air. Fine if planted in a group with green leaved trees, among shrubbery or as a lawn tree. Hardy as far north as Canada. Can also be used as a hedge or screen as it stands pruning or shearing well. See under plants for hedges and screens, page 36. In my garden they are perfectly hardy and show dry weather better than most any other tree I have.

Price:

	Per 1	10	100
4-5 feet	\$1.00	\$10.00	\$100.00
4-5 feet, all with branches	1.50	15.00	150.00
5-6 feet, all with crowns	2.00	20.00	200.00
6-8 feet, all with crowns	2.50	25.00	250.00

NORWAY POPLAR. (Sudden Saw Log, Populus.) A very distinct tree in habit of growing and making a straight upright, somewhat pyramidal tree. The foliage is large, thickly borne, bright and glossy. It grows rapidly in almost every soil and yet it possesses strength and durability which most of the poplars lack. For city planting it is superior to most of the other poplars as it resists smoke and dust better. It is claimed that this tree will mature a log two feet in diameter in 14 years, making quicker growth than any other tree adapted for the middle or northern states. I could never see very much difference in foliage and growth of this and the Carolina poplar, the Norway poplar making a quicker and stronger growth, though.

Price of Norway Poplar:

	Per 1	10	100
4-5 feet, whips	\$0.10	\$1.00	\$10.00
4-6 feet, whips	.15	1.50	15.00
5-6 feet, mostly branched	.25	2.50	25.00
6-8 feet, well branched	.50	5.00	50.00
8-10 feet, well branched	.75	7.50	75.00
10-12 feet, well branched	1.00	10.00	100.00

Dear Sir: I have received the nursery stock I unpacked it and tested it in and found it in fine condition and since I received that I have decided to change my plans a little which call for more plants as follows. * * *

E. F. Marshall, DeSoto, Kansas.

Norway Maple

ORNAMENTAL AND SHADE TREES.—(Continued.)

CAROLINA POPLAR. (*Populus Carolinensis*.) One of the most rapid growing trees, with large, handsome, glossy, deep green leaves. Succeeds everywhere; especially adapted to cities, where it makes unusually fast growth and resists smoke and gas. Pyramidal in form, making a spreading head and dense shade when properly trimmed. Makes a splendid windbreak or screen. It is used in larger numbers for street planting than any other tree. Good for northern Nebraska. There are some very fine poplars in Beatrice.

Price of Carolina Poplar:	Per 1	10	100
3-4 feet, whips	\$0.10	\$0.90	\$8.00
4-5 feet, whips15	1.20	10.00
5-6 feet, mostly branched.....	.20	1.80	15.00
6-8 feet, well branched.....	.40	3.80	35.00
8-10 feet, well branched.....	.65	6.20	60.00
10-12 feet, well branched.....	1.00	9.00	80.00

SILVER POPLAR. (*Populus Alba*.) Quick growing tree, with spreading outline; leaves dark, glossy green above and silvery white below. Hardy everywhere. Of great value in farm and private forestry, much more so than the Soft or Silver Maple. It is perfectly hardy anywhere and is especially largely planted in Wyoming. An ornament to any lawn.

Price:	Per 1	10	100
4-5 feet, partly branched.....	\$0.40	\$3.80	\$35.00
5-6 feet, well branched.....	.60	5.50	50.00
6-8 feet, well branched.....	.80	7.50	70.00

VOLGA POPLAR. A new, hardy poplar from Russia. The tree is an upright grower, similar to the Lombardy Poplar. The branches are much stronger, however, and the leaves are larger, of better form and deeper green. Perfectly hardy, of strong vigorous growth. A tree of this variety transplanted on my home grounds last spring made new shoots 5 feet in length and a few trees I planted 7 years ago are now 35 feet high, with a diameter of 16 inches, one foot above the ground. Perfectly hardy, even in Minnesota or South Dakota.

Price:	Per 1	10	100
4-5 feet, few branches.....	\$0.30	\$2.70	\$24.00
5-6 feet, partly branched.....	.45	4.30	40.00
6-8 feet, partly branched.....	.65	6.30	60.00
8-10 feet, well branched.....	.90	8.70	85.00

LOMBARDY OR ITALIAN POPLAR. Of obelisk form, growing rapidly to 100 feet. Forms striking lawn groups; is much used at Newport for tall screen hedges. Always makes a striking feature in any landscape. I do not recommend this poplar for Nebraska. It cannot stand our climate well. Should do well, though, as far north as Missouri. The Volga answers the same purpose.

Price:	Per 1	10	100
4-5 feet, mostly whips.....	\$0.30	\$2.70	\$24.00

6-8 feet, branched65	6.30	60.00
8-10 feet, branched90	8.70	85.00

BOLLEANA POPLAR. Similar to the well known Lombardy Poplar in growth, but with leaves shining dark green above and silvery white below. Will grow to a tall spire of 80 feet high. It is very hardy, doing well in South Dakota, the hardiest of all the upright poplars and also the most beautiful.

Price:	Per 1	10	100
4-5 feet, nice trees	\$0.70	\$6.50	\$62.00
5-6 feet, nice trees	1.00	9.50
6-8 feet, nice trees	1.30	12.00

BALM GILEAD. Balsam Poplar. (*Populus Balsamifera*.) Very strongly growing native tree, planted and esteemed for its vigor and hardness and the resinous fragrance of its large buds in the spring. Leaves broad and heart-shaped, leaf stalk usually hairy and somewhat flattened. It makes a fine street tree and is probably the best of the Poplars for shade. Some people use the buds for medicinal purposes.

Price of Balm Gilead:	Per 1	10	100
4-5 feet, partly branched.....	\$0.30	\$2.80	\$25.00
5-6 feet, with crown.....	.45	4.20	40.00
6-8 feet, with crown.....	.65	6.20	60.00

RED BUD. Judas Tree. (*Cercis Canadensis*.) A very ornamental native tree of medium size, with perfect heart-shaped leaves and hardy even in Canada. Blooms early in the spring, before the leaves appear, covering the branches with small reddish purple flowers. Hardy; does well also on wet land. Grows wild in Kansas, Missouri, Iowa and some parts of Nebraska.

Price: 3-4 ft., well branched, \$1.00 each; 10 for \$9.

PRUNUS TRILOBA. (Double Flowered Plum.) Early in the spring before its leaves appear, the whole tree is decked in a fleecy cloud of double light pink blossoms, on long slender branches. These are very useful for bouquets. Hardy most anywhere.

Price: 2-3 foot, \$1.75 each; 10 for \$16.00.

SIBERIAN PEA TREE. (*Caragana*.) An extremely hardy shrub or low tree, originally from Siberia. The branches have small, sharp thorns. It bears beautiful yellow flowers; its seeds are said to be valuable for poultry and culinary uses. Will grow anywhere and I especially recommend it for the North, as it is perfectly hardy, even in Canada. A fine plant for a hedge. Price for Siberian Pea Tree, small plants suitable for hedges, see page 36.

Price: 3-4 ft., well branched, 40c each; 10 for \$3.50.

SYCAMORE, AMERICAN. (*Platanus*.) Noble, upright growing tree, with spacious head and large deep green foliage. A free grower and very desirable for park or street planting. It is not hardy, though, north of here, and I can not recommend it even for the middle of Nebraska, but is all right anywhere south of Nebraska. Claimed to be one of the best trees for large cities as it stands smoke and gas very well.

Price:	Per 1	10	100
5-6 feet, well branched	\$0.80	\$7.50	\$70.00
6-8 feet, well branched	1.00	9.50	90.00
8-10 feet, well branched	1.50	14.00

GOLDEN WILLOW. (*Salix Aurea*.) An exceedingly showy and pretty variety, with bark of bright golden color, making it very conspicuous during the winter. The catkins also are of yellow color. A handsome tree at all seasons and will make lots of wood in a short time. Very hardy, even in the Dakotas.

Price:	Per 1	10	100
3-4 feet, branched	\$0.15	\$1.20	\$10.00
4-5 feet, well branched20	1.80	12.00

6-8 feet, well branched50	4.50	40.00
8-10 feet, well branched70	6.50	60.00

LAUREL-LEAVED WILLOW. A beautiful, distinct medium-sized tree, 8 to 20 feet high, with shining laurel-like leaves that make it very conspicuous in sunshine. It can be clipped into form like a bay tree; has bright green bark; is beautiful the year round. The tree does well in Nebraska; stood our severe winter a few years ago at 23 degrees below zero without being injured.

Price:	Per 1	10	100
4-5 feet, well branched	\$0.20	\$1.80	\$16.00
5-6 feet, well branched30	2.80	26.00
6-8 feet, well branched40	3.80	36.00

WISCONSIN WEEPING WILLOW. A large tree with long, drooping branches similar to the Babylonica, but much hardier. A good ornamental tree, also excellent for wood in low places. Grows very fast. Branches are very good for tying purposes. In the northern states largely used for windbreaks.

Price:	Per 1	10	100
4-5 feet	\$0.30	\$2.50	\$22.00
5-6 feet50	4.50	35.00

Pin Oak.

WEeping DECIDUOUS TREES

The trees form objects of great beauty when planted as single specimens on lawn, in the front yard, and especially when used for cemetery decorations. Also of great value for covering arbors. All are invaluable for the variety they add to landscape and garden. My list embraces the best varieties. A few Thurlow Weeping Willows planted near a pond make a beautiful sight. This willow will grow its branches to the water in two years.

TEAS' WEeping MULBERRY. (Morus.) The most graceful hardy weeping tree in existence. Forms a perfect umbrella-shaped head, with long, slender, willowy branches, drooping to the ground. It has beautiful foliage, is wonderfully vigorous and healthy; is one of the hardiest, enduring the cold of the North and the heat of the South; safe and easy to transplant; admirably adapted for ornamental small or large grounds, or for cemetery planting. While the tree is very hardy, I would not recommend it for the extreme North, say north of Nebraska, except in well protected localities. **Price,** fine, strong trees, grafted 5 to 6 feet high, with good tops: \$2.25 each.

CAMPERDOWN WEeping ELM. Its vigorous branches, which have a uniform habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large and rich, glossy, dark green. Tree a strong, vigorous grower. One of the best weeping trees. It can be trained to form an arbor if desired. The peculiar characteristics of this tree make it very popular and valuable for the lawn. Hardy everywhere and not particular as to soil. With age the weeping branches will eventually sweep the ground and enclose a shady place as effectively as an arbor. This tree thrives splendidly in our state and is adapted more for homes or parks; for the cemetery lot it gets too large. **Price,** grafted six feet high: \$2.25 each.

BABYLONICA WEeping WILLOW. This weeping willow grows fast, has long, drooping branches with olive green leaves. If planted near to a pond the branches will reach the water after a few years. **Prices:** 5 to 6 feet, 75c each; 10 for \$7.00; 6 to 8 feet, \$1.00 each; 10 for \$9.00.

NIOBA WEeping WILLOW. Resembles the Golden Willow in color of the bark, a pretty golden yellow. Branches are slender, long and well drooping, growing to the ground in a short time. Leaves are a whitish green. Very vigorous grower and perfectly hardy, even in the Dakotas.

Price:	Per 1	10
4-5 feet, nice trees	\$0.40	\$3.80
5-6 feet, nice trees60	5.80
6-8 feet, nice trees75	7.20

THURLOW WEeping WILLOW. (Salix Elegantisima.) This willow, like the Babylonica, is not grafted or budded; its nature is weeping. Tree vigorous, fast grower, very hardy, and a graceful weeper. The branches are very slender, leaves long, of bright green with lighter shade of green on the lower side. Spring, 1917, I planted a Thurlow Weeping Willow near my little lake. It has made a wonderful growth and stood 22 degrees below zero last winter.

Price:	Per 1	10
4-5 feet	\$0.45	\$4.20
5-6 feet65	6.20

CUT LEAF WEeping BIRCH. Have none of our own growing this year and have been unable to find a nursery that has them.

I bought quite a bill of shrubs and seeds of you this spring. I never saw prettier Hydrangeas sent out from any nursery. Everything is doing fine.

Mrs. Jacob Tescher,
Noblesville, Ind., R. F. D. No. 3.

Owensboro, Ky., September 3, 1923.

Dear Sir:

Enclosed you will find a picture of a Tea's Weeping Mulberry I bought from you in Fall of 1919. This tree is now 7 feet high, with a top of 6½ feet in diameter. Last March the branches were all cut off at the bend where they start to droop. July first, when this picture was taken, the new grown branches reached the ground again.

Yours truly,

Martin Hurm, Owensboro, Ky., R. R. 3.

Trees and Plants by Parcel Post, see pages 68-71

Babylonica Weeping Willow.

Weeping Mulberry, planted Fall 1919; picture taken July 1, 1923. 7 feet high, 6½ feet diameter.
Martin Hurm. Owensboro. Ky.

EVERGREENS OR CONIFERS

Red Cedar can be trimmed to most any shape, as shown in above picture.

Chinese Arbor Vitae.

Hardy' Coniferous Evergreens are particularly valuable for use in all classes of ornamental planting inasmuch as they preserve their graceful foliage and rich coloring throughout the summer and winter, adding much to the charm of the landscape during that period when deciduous trees and shrubs are without foliage. The following Evergreens are very hardy and particularly adapted to our western climate. **Evergreens cannot be shipped before April 1st, and should go by express.** For short distances we can pack them in boxes with other trees and send them by freight, but on long distance shipments it is best to send them by express or parcel post. Please do not expect Evergreens packed in with your other trees. They will come separate after April 1st. Sometimes a few days sooner.

ARBOR VITAE, AMERICAN. (Thuja.) A well known evergreen of great value; it forms an upright, conical tree of medium size, and is, all things considered, the finest evergreen for screens, being hardy and easily transplanted. It grows rapidly and with little care, and soon forms a beautiful hedge, very dense and perfectly impervious to the sight. Are widely planted throughout the United States. Here in Nebraska the American Arbor Vitae will freeze back badly in a dry, cold winter, while the Chinese Arbor Vitae is perfectly hardy.

Price of American Arbor Vitae:	Per 1	10	100
6-8 inch, once transplanted.....	\$0.12	\$1.10	\$ 9.00
12-18 inch, twice transplanted.....	.35	3.20	30.00
18-24 inch, twice transplanted.....	.50	4.70	45.00
2-3 feet, twice transplanted.....	.75	7.20	68.00

CHINESE ARBOR VITAE. (Thuja Orientals.) Similar to the American, but it is claimed to be better adapted for the Middle West. The State Agricultural College, Manhattan, Kansas, recommends it very highly for planting in Kansas. I have some in my garden. They are of a better green, do not turn brownish over winter, grow fast and seem perfectly hardy. I recommend this variety for Nebraska and the North

Price:	Per 1	10	100
6-8 inch seedlings	\$0.10	\$0.80	\$ 6.00

2-3 feet, twice transplanted.....	.80	7.80	75.00
3-4 feet, three times transplanted.....	1.50	14.00

DOUGLAS FIR. (Abies Douglasii.) A beautiful, rapid growing tree, with nice, dark green foliage. It is a splendid tree for lawn planting, and is used in all work where a particularly choice tree is required. By Express.

Price of Douglas Fir:	Per 1	10	100
6-8 inch seedlings	\$0.12	\$1.00	\$ 9.00
8-12 inch, once transplanted.....	.45	4.00	35.00
1½-2 feet, twice transplanted.....	1.00	9.00
2-3 feet, twice transplanted.....	1.25	11.00

NORWAY SPRUCE. (Picea Excelsa.) A lofty tree of perfect pyramidal form, remarkably elegant and rich, and as it gets age, has fine pendulous branches; it is exceedingly picturesque and beautiful. One of the best evergreens for hedges and windbreaks. Largely used for Christmas trees. I have four Norway Spruce in my garden; have been planted for 7 or 8 years. They grow fine and I never lost one, so I consider them perfectly hardy here.

Price of Norway Spruce:	Per 1	10	100
6-8 inch, seedlings.....	\$0.08	\$0.60	\$ 5.00
12-18 inch, twice transplanted.....	.45	4.20	40.00
18-24 inch, transplanted.....	.70	6.50	60.00
2-3 feet, twice transplanted....	.90	8.50	80.00

WHITE SPRUCE. Western type. The White Spruce is a native of the northern portion of the United States and Canada, therefore extremely hardy most anywhere. On account of its compact habit of growth, regular conical outline and soft bluish-green color, it is a very desirable ornamental tree for the lawn and parks. It makes a perfect windbreak or screen and as it is perfectly hardy, it can be planted for this purpose in northern climates where dense windbreaks are needed most.

Price of White Spruce:	Per 1	10	100
4-6 inch seedlings	\$0.10	\$0.90	\$ 8.00
10-12 inch, twice transplanted ..	.50	4.70	45.00

EVERGREENS OR CONIFERS—(Continued)

COLORADO BLUE SPRUCE. (*Picea Pungens.*)

The blue spruce is the most beautiful of all conifers. Its silver foliage, glistening in the sunlight makes it surpass in beauty any other Evergreen. It is very hardy; a good grower, will withstand severe winters and excessive moisture and is very easily transplanted. The blue spruce has no equal for lawn and cemetery use. In raising Blue Spruce from seed, only about 20 per cent come real blue, the rest come from bluish green to green. These green trees make fine ornamental trees, are very hardy and can stand dry weather better than the Norway Spruce. Koster Blue are grafted trees and come absolutely blue. The blue spruce I offer are beautiful blue specimens.

Price of Colorado Blue Spruce: Per 1 10 100
4-6 inch, as they run; not selected..\$0.12 \$1.10 \$10.00
18-24 in., good color; twice transpld. 5.00 45.00
2-3 ft., selected blue; with ball dirt..10.00 90.00

SCOTCH PINE. (*Pinus Sylvestris.*) A dense growing, broad pyramidal tree with stout, erect shoots and pleasing silver-green foliage. One of the best ornamental forest trees. Grows luxuriantly in most soils. I have quite a number of this pine on my grounds doing fine. It is well to water this tree thoroughly before it freezes up in the fall if the ground should be very dry. This should really be done with most evergreens, except Red Cedar.

Price of Scotch Pine: Per 1 10 100
6-8 inch seedlings.....\$0.07 \$0.60 \$ 5.00
12-18 inch, twice transplanted..... .50 5.20 48.00

2-3 feet, 3 times transplanted..... .80 7.50 70.00
3-4 feet, 3 times transplanted..... 1.20 11.00

AUSTRIAN PINE. (*Pinus Austriaca.*) The Austrian or Black Pine is a stout branched tree of rapid growth; branches rather long in proportion to the trunk than most pines. The elegant whorles of branches are densely clothed with deep, blackish green foliage. It is one of the best pines for forming screens. Perfectly hardy and thrives well in dry soil, upon high, bleak hills. Does well in any garden.

Price of Austrian Pine: Per 1 10 100
4-6 inch seedlings(3 years old.....\$0.15 \$1.00 \$ 8.00
12-18 inch, twice transplanted..... .70 6.50 60.00
18-24 inch, twice transplanted..... .90 8.50 80.00
2-3 feet, three times transplanted..... 1.20 11.00

BULL PINE. (*Pinus Ponderosa.*) Resembles the Austrian Pine, but has much longer needles. A native of northern Nebraska and the Black Hills. It does well in my garden and can stand dry and cold weather well, rather better than any other pine.

Price of Bull Pine: Per 1 10 100
4-6 inch, 3 year seedlings.....\$0.07 \$0.60 \$ 5.00
6-8 inch, once transplanted..... .22 2.00 18.00

2-3 feet, 3 times transplanted..... .75 7.00 68.00
3-4 feet, 3 times transplanted..... 1.00 9.50

MUGHO PINE. (Dwarf.) Very distinct, leaves short, stiff, little twisted and thickly distributed over the branches; does not grow tall but spreads over the ground, generally assuming a globular form; very dense

Price of Mugho Pines: 10-12 inch, twice transplanted, broad top, \$1.50 each; 10 for \$14.00; 1½ feet, \$2.25 each.

RED CEDAR. (*Juniperous Virginica.*) My cedars are all raised from the seed gathered on the Platte River, in Nebraska. They are very pretty, of dark green color. Being a native of Nebraska, they are exceedingly hardy, and will stand any amount of dry weather. The very best for windbreaks.

Price of Red Cedar: Per 1 10 100
4-6 inch, 2 year seedlings.....\$0.14 \$1.20 \$ 9.00
12-18 inch, twice transplanted..... .70 6.50 60.00
18-24 inch, twice transplanted..... .90 8.50 82.00
2-3 feet, three times transplanted.... 1.10 10.00 90.00
3-4 feet, three times transplanted.... 1.50 14.00

AMERICAN YEW. (*Taxus Canadensis.*) A magnificent small tree, the hardiest of the Yews. It is admired for its appropriateness in parks and cemeteries, but especially it is popular for small lawns and dooryards where space is limited. The foliage is a deep, dark, glossy, verdant green, with a peculiar richness, and a certain stiff formality in growth that pleases the taste of every one. In size this remarkable tree rarely grows over 5 feet high and about twice as broad, and in season is fairly covered with bright red, edible berries, which contrast very prettily with its dark green foliage.

Price of American Yew: 10-12 inch once transplanted, 40c each; 10 for \$3.50.

EUROPEAN LARCH. (*Larix.*) A very pretty erect fast growing tree, of pyramidal form. Leaves (or needles) are light green, very soft. In the fall they turn to a golden color, and fall before winter. A real ornamental and interesting tree. I have two in my garden over 25 feet high.

Price: 8-10 inch seedlings, 15c each; 10 for \$1.20; 100 for \$10.00.

The plants and seeds I ordered received, except the Evergreens and I am very much pleased with the size and quality of the stock.

Yours very truly,
Irene Stone, Richmond, Mo.

Colorado Blue Spruce.

Black Hill Spruce.

Entrance to Beatrice Athletic Park. No. 1, Climbing Honeysuckle on bank; Hedge which is also marked No. 1 is Spirea Thunbergii; No. 3, is Artemesia Pontica, which was used to hold bank; No. 4 is Spirea Van Houttii.

PLANTS FOR HEDGES AND SCREENS

A hedge to be pretty and effective must be very dense and well pruned. The thorny varieties that are used to turn horses, cattle and hogs should be planted eight inches apart, which will make three for every two feet. The ornamental varieties may be planted 12 to 18 inches apart. In planting ornamental hedges, you get a prettier effect by planting two rows, say about 10 inches apart, alternating the plants. Your hedge will look wider and more dense and the plants can develop better. Cut plants back the first year to 2 to 3 inches, second 10 to 15 inches, third year to 24 inches.

ORNAMENTAL VARIETIES WITHOUT THORNS.

AMOO RIVER PRIVET. Hardy. Foliage glossy green and holds its color well till late fall. Will stand shearing to any extent. Where the California Privet is not hardy, the Amoor Privet should be planted. In my garden I have an Amoor Privet hedge 300 feet long, and it came through the last eight winters perfectly sound and bloomed fine, while California Privet froze clear to the ground. I recommend this Privet for all states north of Missouri. It costs a little more, but will stand your climate and will be perfectly satisfactory.

Price:	Per 1	10	100
12-18 inch, bushy plants	\$0.12	\$1.10	\$10.00
18-24 inch, bushy plants17	1.60	14.00
2-3 feet, bushy plants30	2.70	25.00

CALIFORNIA PRIVET. (Ligustrum.) No plant has come more rapidly and deservedly into public favor. It is of vigorous growth, has glossy dark green foliage, keeping its color until after Christmas. Almost evergreen. Makes a perfect hedge. Can be pruned in almost any shape or form. Should not be planted where the thermometer goes much below zero. Not hardy in Nebraska.

Price:	Per 1	10	100
12-18 inch plants, well branched.....	\$0.10	\$0.70	\$ 5.00
18-24 inch plants, well branched.....	.15	1.00	8.50
2-3 feet plants, well branched.....	.25	2.20	18.00

POLISH PRIVET. A very hardy and showy variety especially when in full bloom, the pure white flowers being some larger than on other Privets. In my garden it grows upright, strong and is perfectly hardy. Good as a shrub or for a hedge.

Price:	Per 1	10	100
12-18 inch, strong plants.....	\$0.15	\$1.30	\$22.00
18-24 inch, strong plants.....	.20	1.70	15.00
2-3 feet, strong bushy plants.....	.30	2.50	23.00

IBOTA PRIVET. Spreading and tall growing. On my old farm I had a screen of this Privet 12 feet high. Leaves are grayish green, berries are black. The hardiest of all Privets. Best for the North.

Price:	Per 1	10	100
18-24 inch	\$0.25	\$2.20	\$20.00
2-3 feet35	3.20	30.00

RUSSIAN OLIVE. (Full description, see page 31.) It is well adapted for a hedge and is perfectly hardy anywhere. Should be well pruned every year. I know this hedge will please you. For prices see page 28, under "Forest Tree Seedlings."

RUSSIAN MULBERRY. It is well adapted for hedges and screens. Must be pruned often, see full description and prices on page 16.

SIBERIAN PEA TREE. (Caragana.) Full description on page 32. Is perfectly hardy, even in Canada, and especially adapted for an ornamental hedge. Stands shearing well and grows very dense. Never looks coarse and on account of its hardness, can be planted on any place wherever desired.

Price: 12-18 inch seedlings, 15c each; 10 for \$1.30; 100 for \$11.00; 18 to 24 inch seedlings, 20c each; 10 for \$1.80; 100 for \$16.00.

SPIREA THUNBERGII. Makes very dense and pretty hedge fence, not over 3 feet high. See description on page 44.

Price: 12 to 18 inches, 25 plants for \$8.00; 100 for \$30.00. For larger sizes, see page 44.

SPIREA VAN HOUTTII. This is the best plant for an ornamental hedge that I know of. See description on page 44. Plants for hedges should be set 12 inches apart.

Price: 12-18 inches high, 25 plants for \$5.00; 100 for \$17.00.

THORNY VARIETIES.

OSAGE ORANGE. (Bois d'Arc.) A valuable tree for its timber, posts of this wood being almost indestructible. It should be planted exclusively south of here. It is not hardy north of Nebraska. Stands pruning well and makes a beautiful and effective hedge.

Price: See page 28, under "Forest Tree Seedlings."

HONEY LOCUST. See description on page 30. Has very long thorns and turns cattle and hogs well.

Price: See page 28, under "Forest Tree Seedlings."

BARBERRY THUNBERGII. Where a low hedge is wanted (2 to 3 feet high) this is the best plant I know of. It forms a very dense and almost impenetrable hedge, stands shearing well and is very hardy. See full description on page 39.

Price: 12 to 18 inch, bushy plants, 25 for \$5.00; 100 for \$18.00.

COMMON BUCKTHORN. (Crataegus Oxyacantha.) A hardy shrub, extensively used in England and the continent for live hedges. Is covered with pretty white blossoms in the spring and red berries in the fall. The Buckthorn does well in Nebraska and is perfectly hardy.

Price: For 12 to 18-inch plants, 15c each; \$1.20 per 10; \$11.00 per 100.

LANDSCAPE VIEWS

Above picture shows a small formal flower garden which we planned and planted for Mr. Hargrave, Wymore, Nebr., in the fall of 1921. The picture was taken in the summer of 1922, showing the garden in full bloom. This garden is only about 30 feet square, but nevertheless it makes a very beautiful effect. Any one wishing to lay out a garden as above shown, we will be pleased to mail a sketch, free of charge, Also giving a list of trees, shrubs and flowers to be planted and cost of same.

Corner in my Garden. On the little island are planted Caladiums on the outside (Petunias can be used in place of Caladiums and look very pretty); inside Cannas; Lawn, Kentucky Blue Grass and White Clover. See description and prices under Grass Seeds. The small building is a partial reproduction of a castle-ruin near my old home in Switzerland. A rockery of this kind gives one a chance to display plants found in rocky places. In one corner of the pond I grow several kinds of Water Lilies and Lotus.

ORNAMENTAL SHRUBS

There is nothing which so quickly and for so little cost, adds so much to the beauty, cheerfulness and home-like appearance of a place as an assortment of hardy shrubs. They are permanent improvements which increase in size and beauty year after year. I have a large collection of flowering shrubs in my own garden now for ten years and can give any kind of information in regard to hardiness and blooming qualities of these for Nebraska and similar climates. If my customers will send me a plan of their grounds to be improved, I will be glad to help in the selection of suitable varieties and their location.

Your house will show up much prettier if shrubs are planted along the wall. For this purpose the *Spirea Van Houtti* is the best for an ordinary wall, while for a low wall *Spirea Thunbergi* would be better. Plant about 2 feet from the wall and plant 3½ feet apart.

Baby Rambler Roses are very pretty planted about 6 to 8 feet apart, along the walk from the house to the street. These are also very good as a hedge around a flower bed. On the lawn Evergreens look much better if planted in groups, from 3 to 5 trees, as if planted alone. Always leave a free view from your front porch to the street. Do not plant large trees in front, but rather on both sides of the house. Cover up unsightly places with flowering shrubs, especially towards the alley. Outhouses can be covered with vines, such as *Ampelopsis Engelmannii*, *Clematis Paniculata*, etc. Prices are for strong, healthy, field-grown plants, two year old and 2 to 3 feet high, unless otherwise mentioned. If these shrubs are wanted in large quantities, please write for prices.

SHRUBS FOR SHADY PLACES. Waxberries, *Spirea Opufolia*, Japan Barberries, *Deutzias*, all *Cornus*, Yellow Flowering Currants, all Privets, all Forsythias and *Rosa Rugosa*, also *Spirea Van Houtti* if not too shady.

MOSS ACACIA. (*Robinia Hispidia*.) An elegant shrub 5 to 6 feet tall, with light green pinnate leaves and long, graceful clusters of pea-shaped rose colored flowers in June, often throughout the summer. The branches are covered with a moss-like growth, similar to Moss Roses. The shrub is hardy here, is beautiful when in full bloom and should be in every garden. Can be raised in tree form if desired. It is easily raised, and really a good shrub for any garden. **Price:** Strong, 2-3 feet, 70c each; 10 for \$6.00.

MOSS ACACIA IN TREE FORM. These are grafted on Black Locust stems, about 4-5 feet high. They soon make large crowns and when in full bloom are very pretty. Suitable along walks, planted about 10 feet apart. **Price:** 4-5 feet trees, with good crowns, \$1.75 each.

ALMOND, DOUBLE FLOWERING PINK. (*Amygdalmus*.) The Flowering Almonds are pretty dwarf bushes that bloom quite early and are very showy in spring. Their slender, leafless upright branches are entirely hidden by stemless very double flowers of pink color, resembling small roses. Grows to a height of 4 to 5 feet and blooms in May. One of the best flowering shrubs and highly recommended for the western states. **Price:** 2 to 3 feet, 95c each; 10 for \$9.00.

ALMOND, DOUBLE FLOWERING WHITE. Same as the above, only the flowers are white. **Price:** 2-3 feet high, 95c each; 10 for \$9.00.

Althea.

ALTHEA

(Rose of Sharon.) Unsurpassed by any hardy shrub for freedom of Bloom. From mid-summer, until frost, when few other shrubs are in bloom, the *Althea* blooms freely. Grows 4 to 6 feet tall. They have rich foliage and bear large flowers. Of the easiest culture and very hardy, thriving splendidly here in the west. As far south as Beatrice, *Altheas* freeze to the ground in the very severe winters, but will sprout up again in the spring, will not bloom, though, the next summer. To avoid this I cut all my *Altheas* in my garden back to about 10 inches in the fall and cover with some coarse manure or straw. In this way they come through the winter in fine shape and bloom well the next summer. I offer these in following varieties and colors.

JEANNE D'ARC. Double pure white.

LADY STANLEY. Double blush white, crimson eye in center.

ANAMONEFLORA. Very large flowers, measuring 3½ to 4 inches across. Semi-double, red with very deep red base on outer petals. Stamens showing prominently.

ARDENS. Double Violet 2½ to 3 inches across flower; petals quilled, vigorous grower. Very fine.

PURPUREA. Purple, semi-double, showing cardinal red base.

BOULE DE FEU. Deep red, very double. Blooms very freely.

AMPLISSIMA. Shell pink flowers, with red stripes; very large and double. A good variety.

DUCHESS DE BRABANT. Large reddish lilac flowers. Very fine.

TOTUS ALBA. A very fine white variety. Blooms freely and always opens up fine.

Price of all varieties of Althea. 2-3 feet, bushy plants, will bloom first summer, 45c each; 10 for \$4.00. One of each of above nine varieties, \$3.50.

AMORPHA FRUTICOSA. (False Indigo.) A strong growing shrub from 6 to 7 feet high, with finger-like spikes of indigo-colored flowers, three or more spikes in a cluster; blooms early in June; perfectly hardy in my garden. **Price:** 2-3 feet, 50c each; 10 for \$4.50.

Moss Acacia in Tree Form. Two-Year Head.

ORNAMENTAL SHRUBS— Continued

BARBERY THUNBERGII. Japanese Barberry. (Berberis.) The Barberry Thunbergii can be planted anywhere. It has nothing to do with Black Rust. You need not be afraid to plant the Thunbergii. Invaluable little shrub that fits in almost every planting. Grows about everywhere, handsome foliage of bright green, oval leaves that turn to most brilliant shades of orange and red in the fall. Slender, graceful branches protected by thorns, are lined with little scarlet berries of great attractiveness from early autumn well into winter. Very valuable for a low hedge.

Price: 1 10 100
12-18 inch strong plants \$2.25 \$2.50 \$3.00
18-24 in. strong plants, transplanted .40 .50 .60
2-3 feet strong plants .75 1.00 1.50

THE EVERBLOOMING BUTTERFLY BUSH. (Buddleia Variabilis Magnifica.) This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often attains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant the first season will throw out as many as 50 flower spikes, which increase greatly in number during the succeeding years. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous by which we mean in some latitudes it will die down to the ground, and while hardy, I recommend covering the roots with manure, leaves or other suitable material as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden or placed promiscuously in the shrubbery border.

Price: 45c each; 10 for \$4.00.

CALYCANTHUS. The Sweet Scented Shrub or Strawberry Shrub; also called Chocolate Shrub and Carolina Allspice. Flowers very double, a brownish purple in color and deliciously fragrant. Blooms nearly all summer and is one of the most desirable shrubs; even the roots are very fragrant. Hardy and of easy culture.

Price: 2-3 feet 45c each; 10 for \$4.00.

YELLOW FLOWERING CURRANT. (Ribes Aureum.) The flowering currants are much prized for their wealth of bright flowers in early spring and their prevailing spicy odor. The leaves are glossy green and turn to brilliant colors in the fall. This variety has yellow fragrant flowers followed by dark brown fruits which are edible. Very hardy. Attains a height of 3 to 5 feet. Early in April when few trees or shrubs have awakened from their winter's sleep, the Yellow Flowering Currant puts forth its leaves and brilliant colors of bright flowers, loading the air with their sweet fragrance and adding a touch of sunshine to the landscape otherwise dull.

Price: 2-3 feet 45c each; 10 for \$4.00; 3-4 feet 75c each; 10 for \$7.00.

CLETHRA ALNIFOLIA. Sweet Pepper Bush. An upright growing shrub of 3 to 5 feet. Blooms in September when flowers are scarce. The flowers are white on long stems and very fragrant, therefore the name. Should not be planted north of here.

Price: 45c each; 10 for \$4.00.

CORNUS SIBERICA. Siberian Dogwood. Tree growing 5 to 10 feet tall and very hardy; forms a small, handsome tree in some situations; its clusters of small, white flowers in early summer are very dainty, and its bark is a showy dark red in winter. All the Siberian Dogwoods bear in early fall a fusion of whitish-blue berries, making them distinctly ornamental after the flowers have gone. A very brilliant shrub in the winter and early spring when the bark is intensely colored.

Price: 2 to 3 feet 45c each; 10 for \$4.00.

CORNUS FLORIDA. White Flowering Dogwood. The green, white, beautiful flowers are 3 inches and more in width, lasting in favorable weather for as many weeks. Besides the fine characteristics given above, the bright red bark on its young growths makes it attractive and cheery in winter. Tree rarely grows over 20 feet in height and is branching in habit. Blooms when it is still quite small. Hardy here.

Price: 2 to 3 feet 45c each; 10 for \$4.50; 3-4 feet 75c each; 10 for \$7.00.

CORNUS PANICULATA. (Gray Dogwood.) One of the best sorts for tall shrub groups 10 to 15 feet. Showing a profusion of good sized white flowers in June. Berries white, on noticeable red stems. Bark and underside of leaves gray.

Price: 2-3 feet 45c each; 10 for \$4.50; 3-4 feet 75c each; 10 for \$7.00.

Buddleia Variabilis

Cornus Florida

ORNAMENTAL SHRUBS—(Continued)

American Everblooming Hydrangea, Grown on My Home Place.

CORNUS MASCULA. Cornelian Cherry. Dense growing bush, 10-12 feet high, with glossy green foliage and yellow flowers very early in the spring, succeeded by scarlet berries which persist a long time. Berries are edible. This I consider one of the best of tall growing shrubs.

Price: 2-3 feet, 40c each; 10 for \$3.50; 3-4 feet, 50c each; 10 for \$4.50.

All above Cornus are perfectly hardy here.

CHOKE CHERRY. Prunus Denissa. A native shrub or small tree which should be used a great deal in parks and gardens. The flowers in long panicles with the leaves, are very fragrant and followed by small berries or cherries, dark blue and edible when fully ripe.

Price: 3-4 feet, 50c each; 10 for \$4.00.

DEUTZIA, PRIDE OF ROCHESTER. Has very large panicles of double white flowers when fully open, but a striking pink when in bud. The bush is a very upright grower, vigorous and healthy. Blooms late in June. A splendid hardy variety. There are more varieties of Deutzias. I find, though, the above the best for the Middle West.

Price: 2-3 feet, 40c each; 10 for \$3.50.

DEUTZIA LEMOINEI. This variety forms a small dwarf shrub with spreading branches, usually growing about 3 feet tall. Leaves bright green, 2 to 3 inches long; flowers pure white, in large clusters or panicles. Of vigorous growth, very free flowering and of easy culture. In my garden Lemoinei stands our winters best of all, seldom freezing back in the least. Before the white buds open they look like a bunch of pearls. A few years ago we had 22 degrees below zero, but my Deutzia Lemoinei bloomed nicely the next spring.

Price: 2-3 feet, 75c each; 10 for \$7.00.

DEUTZIA GRACILIS. (Slender Branched.) Dwarf growing, dense, bushy, its drooping branches wreathed with pure white flowers in May. Also valuable for winter blooming in pots. Where a low shrub is desired there is none better 2 feet high.

Price: 18 to 24 inch, 90c each; 10 for \$8.50.

ELDER, GOLDEN. (Sambucus Aurea.) A variety with golden yellow foliage. A valuable plant for producing contrast when planted with other shrubs. Grows to a height of about 8 feet, and is of vigorous, spreading habit. The berries, as of the American Elder, are edible, but more red in color. Should have full sun to give best effect. Grows well on all soils and can be pruned into a neat, compact little bush. One of the best golden foliaged shrubs.

Price: 2 to 3 feet, 50c each; 10 for \$4.50; 3-4 feet, 65c each; 10 for \$6.00.

ELDER, AMERICAN. (Sambucus Canadensis.) The common Elder Berry. A tall shrub with stout stems filled with white pith. The small, white flowers come in large, flat-topped cymes, fragrant, opening in early summer. Fruit black, very profuse, ripening in August and September. Grows 6 to 8 feet tall. The berries are highly esteemed for cooking

and making of cordials. In many parts of Europe they are grown for the purpose of making wine, and are said to be of great value for medicinal purposes in case of stomach disorder. All varieties of Elder are largely planted in parks and gardens to attract the birds, which are very fond of the berries.

Price: 2 to 3 feet, 20c each; 10 for \$1.80.

ELDER, CUTLEAF. (Sambucus Acutilobua.) Grows 6-8 feet high, with foliage that is almost fern-like. Great handsome cymes of delicate, white, fragrant flowers in June and July, followed by large clusters of edible fruit.

Price: 2-3 feet, 45c each; 10 for \$4.00.

FORSYTHIA, FORTUNI. Golden Bell. Few, if any of the spring flowering hardy shrubs can surpass the splendor and brilliancy of the Forsythia. Both the grace and beauty give them a prominent place in all shrub plantations. Of upright, vigorous growth, foliage rich, dark green and lustrous. Flowers brilliant golden yellow, borne in great profusion early in April before the leaves appear.

Price: 2 to 3 feet, 40c each; 10 for \$3.00; 3-4 feet, 50c each; 10 for \$4.50.

FORSYTHIA VIRIDISSIMA. Some years ago I imported this variety from France. I find it a much better bloomer and the flower buds are hardier. The yellow bell-shaped flowers cover the branches to the tips. Like all Forsythias, it blooms very early in the spring, even before the Flowering Almond comes out.

Price: 2-3 feet, 50c each; 10 for \$4.00.

WEeping FORSYTHIA. Drooping Golden Bell. (Forsythia Suspensa.) A graceful shrub with long, slender, drooping branches. Leaves dark green and lustrous, persisting until heavy frost. The beautiful flowers come in great profusion, are golden yellow and very showy. Grows about 8 to 10 feet tall, very odd and interesting and one of the showiest of the shrubs in cultivation.

Price: 2 to 3 feet, 60c each, 10 for \$5.00.

GLOBE FLOWER, YELLOW. (Kerria.) A graceful shrub from Japan, with long, slender branches, clothed with peculiarly rough, sharply cut foliage, bright green in summer and fading yellow in autumn. The double, brilliant golden flowers are borne in profusion throughout the summer. A handsome shrub, growing 4 to 5 feet tall, of spreading habit with drooping branches. Of strong, vigorous growth.

Price: 18 to 24 inch, 75c each; 10 for \$7.00.

GLOBE FLOWER, WHITE. (Rhodotypos.) Similar to the above, except the flowers are white and single, but very pretty and elegant. Landscape architects use this shrub in large quantities.

Price: 2-3 feet, 50c each; 10 for \$4.50; 3-4 feet, 70c; 10 for \$6.50.

I got the other order that I sent for, and I am well pleased with it.

Mrs. Lily Hutchings, Bingwood, Okla. R. F. D. 4.

TREE
LILAC
GROWN
ON
MY
HOME
PLACE

**HYDRANGAEA PANICULATA GRANDIFLORA.**

The flowering Hydrangea. Flowers would be scarce in August and September, if it were not for this showy shrub, with its large panicles of pure white flowers, often turning to pinkish as they age. Blooms until hard frost kills them. Can be planted as a specimen plant, or in the foreground of other taller shrubs; also used as a hedge. In cold localities, cut all limbs back to 15 inches and cover with some straw manure, and you will be sure of a mass of flowers the next fall. Bush grows about 4 to 5 feet tall. A fine cemetery plant. Use it in numbers wherever a mass of white flowers are desired. This fall I had flowers 12 inches long and 8 inches in diameter. At Waterloo, Iowa, and La Crosse, Wisconsin, I have seen large bushes of these which would show that where there is snow over winter they are perfectly hardy, even as far north as the above towns, even harder than here in Nebraska, where we do not have as much snow. Grows well in partial shade.

Price: 2-3 feet, 75c each; 10 for \$7.00; 3-4 feet, \$1.00 each; 10 for \$9.00.

HYDRANGAEA, AMERICAN EVERBLOOMING. The Snowball Hydrangea. This new Hydrangea is the most beautiful hardy shrub introduced in the last 20 years. The plant, which attains a height of 5 or 6 feet, with nearly the same breadth, is of far more graceful habit than the old form, with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty. The flowers are full and round as a ball, resembling the flowers of the well-known Snowball shrub, but larger. They bloom much earlier than Hydrangea paniculata here about the middle of June, and if well watered, will bloom almost all summer. Like all Hydrangeas, they like plenty of water. Its hardiness and vigor have been well tested in all parts of the country, and it has been found well adapted to this part of the country and all western states. I cut them back every fall to within six inches of the ground and cover over winter with straw or coarse manure. Grows well in partial shade.

Price: 2-3 feet, 75c each; 10 for \$7.00; 3-4 feet, \$1.00 each; 10 for \$9.00.

HYDRANGAEA PANICULATA IN TREE FORM.

These are 4 to 5 feet trees with good stems and splendid crowns. They are very effective for the lawn or park, or planted along the sidewalks or driveways, about 10 feet apart, they make a most beautiful sight when in full bloom. By planting one or more of these beautiful trees you can show to your neighbors and friends something nice and not commonly seen. **Price:** 4 to 5 feet trees, \$1.25 each; 3 for \$3.50; 10 for \$11.00.

HIGHBUSH CRANBERRY. (*Viburnum Opulus*.)

A magnificent large shrub, with upright and spreading form. The leaves are broad, oval, three-lobed and bright green. The small, white flowers, which appear in early summer, are borne in broad, flat clusters surrounded by a ring of large, sterile flowers. These are followed by very showy scarlet berries, which cling to the bush all winter, as they are not disturbed by the birds. It will thrive and grow to perfection in the coldest climates or where the extremes of heat and cold are the greatest.

Price: 2 to 3 feet, 65c each; 10 for \$6.00.

WITCH HAZEL. *Hamamelis Virginica*. Grows 10 to 15 feet tall, with fine leaves that color to yellow, orange or purple in fall and drop before the bright yellow flowers with narrow, twisted

petals appear, making them quite conspicuous among bare branches. Likes a moist, sandy or peaty soil and partial shade.

Price: 2 to 3 feet, 75c each; 10 for \$7.00.

UPRIGHT HONEYSUCKLE.

(*Lonicera*.) All Honeysuckle are very hardy, have bright and pretty fragrant flowers, followed by showy berries, that stay on the bush a long while. Where a tall hedge is wanted this is one of the best shrubs, as it grows very dense. First of the shrubs to clothe themselves in spring verdure.

See different varieties and prices of Honeysuckle, page 42.

Tree Hydrangea.

ORNAMENTAL SHRUBS—(Continued)

BUSH HONEYSUCKLE, PINK TARTARIAN. (*Lonicera Tartarica*.) The best known of all the Bush Honeysuckles, and in our estimation, the finest variety of all. Grows to a height of 8 to 10 feet, with upright, somewhat spreading branches and bright green foliage. The flowers are borne freely in May and June, are of bright pink color, followed by showy, red berries, which ripen in midsummer, and cling to the bush for several weeks. This fine shrub is of great value when planted as a background for smaller shrubs or in a commanding position where their size will make them conspicuous. It is one of the best shrubs for northern latitudes as it withstands the severest winters.

Price: 2 to 3 feet, 50c each; 10 for \$4.50; 3-4 feet, 60c each; 10 for \$5.50.

BUSH HONEYSUCKLE, RED TARTARIAN. Same as the above Pink Tartarian Honeysuckle excepting that the flowers are red. I have now the genuine Red Tartarian. A good many nurseries send the pink for the red and then do not list the pink. I can furnish either absolutely true.

Price: 2-3 feet, 55c each; 10 for \$5.00.

BUSH HONEYSUCKLE, WHITE TARTARIAN. About the same as the red except that the flowers are white.

Price: 2-3 feet, 40c each; 10 for \$3.50.

HONEYSUCKLE FRAGRANTISSIMA. Foliage bright green, almost an evergreen. A large, spreading shrub with sweet, creamy white flowers. In the more southern states it blooms already in January and is, therefore, often called the Christmas Honeysuckle. Here it blooms the first few warm days we get. If planted in groups, make a dense, heavy growth. In my garden they stood the last three winters well. **Price:** 2-3 feet, 50c each; 10 for \$4.50.

BUSH HONEYSUCKLE, MORROWI. Japanese variety. Grows 4 to 6 feet tall and spreading. In early spring its pure white flowers are very attractive. The finest berry-bearing variety, the fruit being a rich crimson and remaining a long time. Very hardy.

Price: 2 to 3 feet, 55c each; 10 for \$5.00.

LILACS.

Everybody knows the Lilacs, a still popular old fashioned flower. All are perfectly hardy, grow up to 10 feet and when in full bloom are very ornamental. Their dark shiny green leaves make them very attractive the whole season. By selecting different varieties you will have lilacs in bloom for 4 to 5 weeks.

LILAC, COMMON PURPLE. The old-fashioned Lilac, which grows into a very high bush, with bright green, heart-shaped leaves. In May the plant is crowned with its wondrous wealth of light purple flowers in clusters. It is without doubt, the best known and most popular shrub grown, and notwithstanding the introduction of so many new flowering shrubs of late years, the Lilac holds its own. A fine, tall shrub for the lawn and one of the best for a fancy hedge. Can be used to a good advantage in making effective backgrounds for smaller shrubs. Hardy everywhere.

Price: 2-3 feet, 45c each; 10 for \$4.00; 3-4 feet, 55c each; 10 for \$5.00.

LILAC, COMMON WHITE. This is substantially the same as the purple, save in the color of its flowers, which are pure white. In May it forms one of the most charming sights the garden affords, with its handsome clusters of exquisitely fragrant flowers shining out in contrast with the bright green, heart-shaped leaves. Try these. I know you will be delighted.

Price: 2-3 feet, 50c each; 10 for \$4.50.

PERSIAN LILAC. Purple. Blooms a good deal more than the common, and has smaller leaves. Does not sprout as much from the roots. I prefer the Persian for the flowers, but the leaves of the common are decidedly prettier. **Price:** of Persian Purple, 2-3 feet, 50c each; 10 for \$4.50.

PERSIAN LILAC WHITE. Bush and leaves are the same as the Persian Purple. The flowers are larger, though, and pure white. One of the best of the white lilacs and blooms very freely.

Price: 2-3 feet, 75c each; 10 for \$7.00.

LILACS—BUDDED, SPECIAL VARIETIES.

All these are fine varieties, bloom profusely, almost every year. Do not rootsucker. In my garden I have them planted along a walk and when in full bloom they are certainly pretty, and perfume the air wonderfully. The plants I offer are strong and very bushy; 2 to 3 feet high and of a fine variety of colors and shades.

MME. CASIMIR PERIER. The finest double white Lilac yet introduced. The individual flowers, which resemble miniature Tuberoses, as well as the truss, are of immense size, deliciously scented; fine for cutting.

Price: 1½-2 feet, \$1.00 each; 3 for \$2.70.

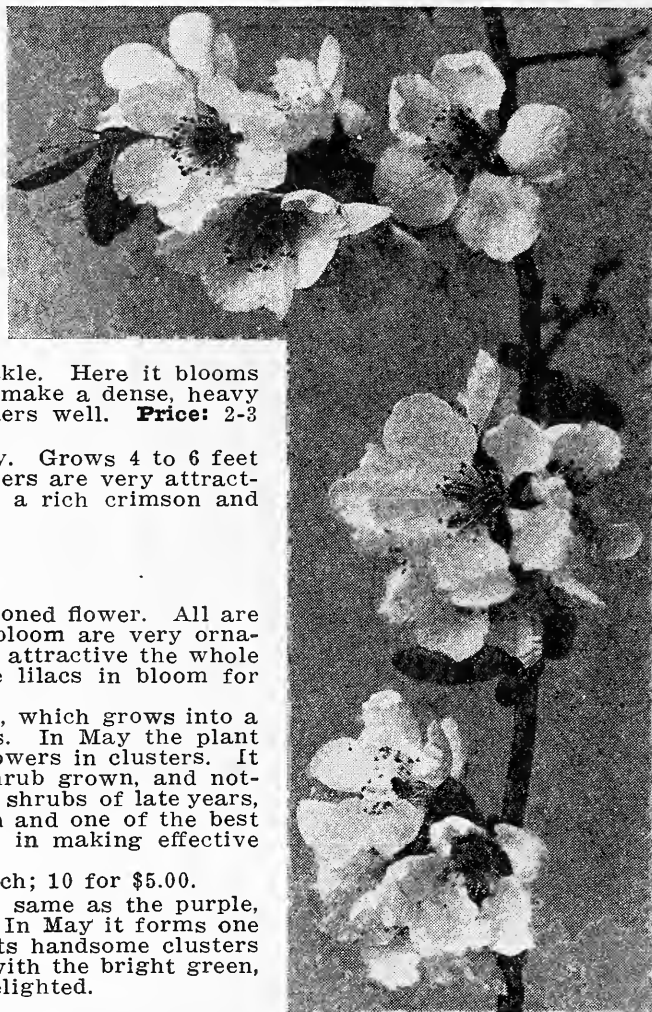

CHARLES X. A strong, rapid growing variety, with large shining leaves. Trusses rather loose; large, reddish-purple. **Price:** 1½-2 feet, \$1.00 each; 3 for \$2.70.

LILAC, ROTHOMAGENSIS. Rouen Lilac. A strong growing bush from 10-12 feet high, with extra large flowers of reddish-purple color. Probably one of the very best of the lilacs. Does well here. Good for bouquets.

Price: 2-3 feet, 75c each; 10 for \$7.00.

OTHELLO. Dark purple, large flowers. One of the finest for cut flowers and a free bloomer. **Price:** 1½-2 feet, \$1.00 each; 3 for \$2.70.

LILACS IN TREE FORM. I can furnish purple and white lilacs, some reddish purple in tree form, grafted 4 to 5 feet high. Very fine for lawn or park, or may be planted along sidewalk or driveway. Is showy and something not usually seen. These are grafted and seldom root-sucker, unless the trees are planted too deep. **Price:** 4-5 feet trees, very strong and stocky, \$1.50 each; 3 for \$4.20. Too large to be sent by mail.

Japanese Quince.

Pearl Bush.

ORNAMENTAL SHRUBS—(Continued)

MOCK ORANGE. (*Philadelphus* or *Syringa*.)

The *Philadelphus* is one of the best and most popular old shrubs, the taller growing sorts largely used for hedges to cover alleys or other unsightly places. The flowers are very profuse, similar to strawberry blossoms but larger, white with a rich creamy tinge imparted by the golden stamens.

MOCK ORANGE, CORONARIUS. One of the very best of the old, well-known shrubs. It seldom or never fails to bloom. The fragrant and beautiful waxy white flowers appear in great profusion in June. In shape and fragrance they resemble the orange blossoms, therefore the name. The shrub grows to a height of 10 feet, can be kept lower, though by pruning. Often used for an ornamental hedge. Hardy everywhere and valuable for immediate effect in landscape planting. This is one of the most satisfactory shrubs for the Middle West, hardy and it never fails to bloom and needs little care. To cover an unsightly alley in your back yard, this and the upright Honey-suckle are the best. Plant in this case about 4 feet apart. **Price:** 2-3 feet, 45c each; 10 for \$3.50; 3 to 4 feet, 60c each; 10 for \$5.50.

MOCK ORANGE, MONT BLANC. Flowers are very large, pure white and very fragrant, almost covering the bush. Very choice and distinct. Better than *Coronarius*. **Price:** 2 to 3 feet, 50c each; 10 for \$4.50.

MOCK ORANGE, GRANDIFLORA. Flowers are larger than with other sorts, also later, therefore making the season for this flower longer. **Price:** 2-3 feet, 45c each; 10 for \$4.00; 3-4 feet, 60c each; 10 for \$5.50.

MOCK ORANGE, AUREA. Golden Leaf Mock Orange. Very valuable for planting between green leaved shrubs. The leaves are of a golden yellow and hold the color better than any other golden leaf shrub. Flowers and growth are the same as *Coronarius*. Do not plant in shady places. **Price:** 1½-2 feet, 75c each; 10 for \$7.00.

MOCK ORANGE, LEMOINE. Flowers of this variety are large, semi-double, very fine. The bush is of more dwarfish habit and will not get over 4 feet high. Suitable to plant in front of taller shrubs, or where a low shrub is desired. Blooms later than *Coronarius*. Considered one of the best of the many varieties of Mock Orange. **Price:** 2 to 3 feet, 50c each; 10 for \$4.50.

PRUNUS TRILOBA. (Double flowered Plum.) Early in the spring, before its leaves appear, the whole bush or small tree is decked in a fleecy cloud of double light pink blossoms. The twigs full of the little rose-shaped flowers, are fine for bouquets. **Price:** 2-3 feet, \$1.75 each; 10 for \$16.00.

PEARL BUSH. (*Exochorda Grandiflora*.) One of the most distinctly ornamental shrubs in cultivation, a leader in its season. It grows vigorously to a height of 6 to 10 feet, and can be trimmed to any desirable shape. Stands our severe winter well. Has never failed to bloom yet. The early buds look like pearls strung on slender threads. May opening them up to long, gleaming sprays of pure white. One of the best in my garden. **Price:** 2-3 feet high, 75c each; 10 for \$7.00; 3-4 feet, strong, bushy plants, 90c each; 10 for \$8.50.

JAPANESE QUINCE. (Red.) *Cydonia*. Also called Firebush. Very showy and one of the earliest shrubs to bloom, the flowers appearing before the leaves are fully developed, the brilliant scarlet flowers gleaming like red hot coals. Fruit about 1½ inches in diameter, yellowish green, and of aromatic fragrance. A few of these cooked with apples gives them a fine quince flavor. Invaluable for border or garden planting and make beautiful informal or clipped hedges. Very hardy and easily transplanted, and will thrive in almost any well drained soil. **Price:** 2 to 3 feet, 45c each; 10 for \$4.00; 100 for \$36.00.

JAPANESE QUINCE. (White.) Flowers same as the above except that the flowers are white, and the fruit is some larger. **Price:** 2-3 feet, 45c each; 10 for \$4.00.

PRIVET, LIGUSTRUM. Description and prices on page 36. Privet are used for ornamental hedges and also for groups and with other shrubs.

SPIREA. (Meadow Sweet.)

All varieties bloom with the greatest freedom, making them indispensable for ornamental purposes. I grow the following 12 varieties. Some of them will give nice flowers all through the season. All the species are very hardy, easy to grow in many soils and situations, and will be found useful for specimens, groups, screens, borders, ornamental hedges, etc. These 12 comprise the best varieties of all *Spireas*. They all do well in the Middle West.

SPIREA, ARGUTA MULTIFLORA. (Snow Garland.) A slender shrub, 3 to 5 feet high, with branches a snowy mass of clear white flowers in early May. **Price:** 2 to 3 feet, 55c each; 10 for \$5.00; 3-4 feet, strong bushy plants, 75c each; 10 for \$7.00.

SPIREA, ANTEONY WATERER. This beautiful variety produces flowers of a bright crimson and blooms so freely that it may be kept flowering during the summer till late fall by trimming away dead blooms. Foliage is very handsome, being variegated with creamy white or yellow. Grows 15 to 20 inches high, is very useful for massing or border in front of taller shrubs. **Price:** 18 to 24 inch plants, 70c each; 10 for \$6.00.

Spirea, Anthony Waterer.

Bridal Wreath from Sonderegger.

Have so far been pleased with everything from you.
Mrs. Anna Eicholt, Anthon, Iowa.

ORNAMENTAL SHRUBS—(Continued)

SPIREA BILLARDI. Rose colored flowers in large spikes, blooms nearly all summer. Very pretty and showy and splendid for cut flowers. Grows 4 feet high. **Price:** 2 to 3 feet, 30c each; 10 for \$2.50; 3 to 4 feet, very strong bushy plants, 45c each; 10 for \$4.00.

SPIREA BILLARDI. White Flowers. (Alba.) About the same as the above, but spikes of flowers are white. **Price:** 2 to 3 feet, 35c each; 10 for \$3.00.

CALLOSA RUBRA. (Fortune's Spirea.) Has large panicles of deep rosy blossoms, grows freely and blooms all summer. Grows about 2 feet high and makes a good border plant. **Price:** 1½ to 2 feet, bushy, 55c each; 10 for \$5.00.

CALLOSA ALBA. (Fortune's Dwarf White Spirea.) White flowering variety, of dwarf, bushy symmetrical form. Keeps in flower all summer. A valuable small shrub. **Price:** 18-24 inch, 65c each; 10 for \$6.

SPIREA, CALLOSA, PROEBELA. A strong growing shrub, somewhat similar to Anthony Waterer,

but grows a trifle taller, with broader leaves. The flowers are more rose pink. Blooms from June till fall. The tips of the leaves are reddish-purple, making the bush much more attractive than Anthony Waterer. Perfectly hardy here.

Price: 1½-2 feet, 70c each; 3 for \$2.00; 10 for \$6.20.

SPIREA WALLUFI. (New.) A dwarf growing, bright red flowered seedling of Spirea Bumalda, in luxuriant bloom from June until frost. This is one of the most striking new shrubs that has come to my notice. Blooms in the same broad, graceful panicles and has the same habit of growth as Bumalda or Anthony Waterer, but does not fade to the washed-out magenta or rose color, as does the type. Wallufi remains red until flower is old and turns brown. Valuable for small shrub groups or as an edging to large shrub borders and mounds. The plants I offer are very bushy and shapely, ready to bloom this season. With me it bloomed fine this summer, although we had a long dry spell.

Price: 18 inch, 75c each; 10 for \$7.00.

SPIREA PRUNIFOLIA. (The real Bridal Wreath.) Among the earliest of the double Spireas and very showy. It is very graceful and plume-like in effect, the branches being covered thickly, almost their whole length, with small, double, white flowers and sweeping outward in gentle curves.

Price: 2-3 feet, 60c each; 10 for \$5.50; 3-4 feet, very bushy plants, 70c each; 10 for \$6.50.

SPIREA THUNBERGI. (Snow Garland.) A Japanese variety of medium size, with narrow, delicate leaves and a profusion of small, white flowers in early summer. One of the best. Leaves narrow, bright green, turning in autumn to brilliant shades of orange and scarlet. Grows 3 to 4 feet high. Very few shrubs are better for a low hedge. **Price:** 2-3 feet, 50c each; 10 for \$4.50; 100 for \$40.00.

SPIREA VAN HOUTTI. Often called Bridal Wreath. One of the most popular shrubs, especially in the Northwest. The branches are very graceful and drooping when in full bloom, the leaves are almost covered with masses of white flowers will thrive anywhere, even in the shade, close to the north wall of a house; also in the sun. One of the very best shrubs for an ornamental hedge. It likes a wet season, but the driest weather will not kill it. Grows about 6 to 8 feet high in good ground. Pruning should be done right after blooming. **Price:** 2 to 3 feet, very bushy, 40c each; 10 for \$3.50; 100 for \$30.00; 3 to 4 feet, very bushy, 55c each; 10 for \$5.00; 100 for \$40.00.

SPIREA OPULIFOLIA. (Nine Bark.) The strongest growing sort, attaining 8 to 10 feet. Growth upright, the white, heavy flower heads turn to dark red and make a striking variety of colors at different stages of maturity. It is especially valuable for shady places and where a tall shrub is desired.

Price: 2 to 3 feet, 40c each; 10 for \$3.50.

VIBURNUM.

A very beautiful group of shrubs from 5 to 12 feet in height, all blooming profusely in the spring and vividly beautifying the autumn aspect with gleaming berries and richly colored foliage.

SNOWBALL. *Guelder Rose.* (Viburnum Opulus Flora Plena.) One of the favorites of old-time gardens. It grows into a magnificent high bush with upright branches and handsome foliage. It forms one of the most impressive sights of early summer, when its pure white, four-petaled flowers, borne in showy balls are in bloom. I had a Snowball bush on my farm on which I counted over 800 blossoms. Hardy everywhere.

Price: 2 to 3 feet, 60c each; 10 for \$5.50; 3-4 feet, 75c each; 10 for \$7.00.

JAPANESE SNOWBALL. (Viburnum Plicatum.) From north China. Of moderate growth, handsome plicated leaves, globular heads of pure white neutral flowers early in June. It surpasses the common Snowball in several respects. Its habit is better, foliage much handsomer, flowers whiter and more delicate. One of the most valuable flowering shrubs.

Price: 2 to 3 feet, 95c each; 10 for \$9.00.

HIGHBUSH CRANBERRY. (Viburnum Opulis.) See page 41.

VIBURNUM LANTANA. (Wayfaring Tree.) 10 to 15 feet; beautiful, wrinkled. Lantana-like leaves, white flowered in May and June. Fruits color unequally from crimson to black, causing a most charming combination of colors all summer. Perfectly hardy. **Price:** 2 to 3 ft., 50c each; 10 for \$4.50.

Snowball.

Fern Leaf Sumac. (See Page 45.)

ORNAMENTAL SHRUBS—(Continued)

Weigelia Rosea.

SNOWBERRY OR WAXBERRY, White Fruited. (*Symphoricarpos*.) A desirable shrub with small, pink flowers, followed by large, white wax-like berries, which hang on the plant through most of the winter. Grows to a height of 2 to 4 feet. Is very showy and succeeds everywhere. Of special value for planting in densely shaded places, where few other shrubs will grow.

Price: 2 to 3 feet, 45c each; 10 for \$4.00.

SNOW OR WAXBERRY, Red Fruited. Same as above, only the berries have a red color, and are smaller, but will hang on the bushes till winter. Also called Indian Berry. Can be found growing wild along creeks in Nebraska. Does well in shady places. **Price:** 2 to 3 feet, 30c each; 10 for \$2.50.

SUMAC RHUS.

Who has not admired the sumac on the hillsides, along the driveways and the outlines of the woods, when autumn has painted the leaves to a blazing red and brought forth its gorgeous reddish-brown fruit? Autumn would not seem natural to us without them. A few Sumac should find a place in every garden, even very dry spots will suit them.

SUMAC, FERN LEAVED. Staghorn Sumac. (*Rhus Typhina*.) This variety of native Staghorn Sumac was found on the hills of Vermont. It is of rapid, robust growth, producing cones of bright red fruit. Leaves beautifully formed, rivaling the most delicate fern. For massing with other shrubs, the effect is striking. Can also be cut to the ground each season and a mass of beautiful foliage will result. The shrub will thrive on the poorest of soils with a surprising luxuriance. In the fall the leaves turn to the most beautiful pinkish red, a large group of them is a wonderful sight. This is probably the best of the Sumacs.

Price: 2-3 feet, 60c each; 10 for \$5.50.

SUMAC COPALLINA. A large shrub with glossy green leaves, which turn scarlet red in the fall. Berries are dark red.

Price: 2-3 feet, 30c each; 10 for \$2.50.

RHUS AROMATICA. (Fragrant Sumac.) Grows 2 to 4 feet tall; flowers yellow, in clusters along the stems, followed by red berries in June. Leaves color to brilliant scarlet in fall.

Price: 2-3 feet, 60c each; 10 for \$5.50.

GLABRA. (Smooth Sumac.) Grows to a small tree with beautiful leaves which color brightly in autumn; flowers in July followed by crimson or brown fruits. **Price:** 3-4 feet, 50c each; 10 for \$4.50.

SIBERIAN PEA TREE. (*Caragana*.) An extremely hardy shrub or low tree, originally from Siberia. The branches have small, sharp thorns. It bears beautiful yellow flowers; its seeds are said to be valuable for poultry and culinary uses. Will grow

anywhere and I especially recommend it for the North, as it is perfectly hardy, even in Canada. A fine plant for a hedge. Price for Siberian Pea Tree, small plants suitable for hedges, see page 36.

Price: 2-3 feet, partly branched, 35c each; 10 for \$3.00.

TAMARIX ODESSA. A Russian variety, much superior to the African Tamarix. The foliage is bluish green, similar to the Colorado Blue Spruce. The flowers are of delicate pink color. Blooms in July and often again in August and September. The branches are very graceful and the shrub is much hardier than the African. Stood in my garden, a temperature of 25 degrees below zero without injury, while the African froze to the ground. Excellent in making bouquets, owing to its superb foliage and very delicate, beautiful flowers.

Price: 2-3 feet, 40c each; 10 for \$2.50; 3-4 feet, 55c each; 10 for \$5.00.

TAMARIX HISPIDA. A very handsome and distinct variety, with dense bluish foliage. The delicate soft sprays of carmine rose blossoms are exceedingly attractive. Blooms in September, when few other shrubs are in flower. Hardy in my garden. **Price:** 2-3 feet, 55c each; 10 for \$5.00; 3-4 feet, 75c each; 10 for \$7.00.

TAMARIX AFRICANA. Has, like all Tamarix, very pretty, feathery leaves of a bright green color, and pink flowers. This variety is not hardy here in Nebraska, freezes to the ground every winter, but always comes up again in the spring and generally gets to be 6 to 8 feet high by fall, and makes a fine shrub and with plenty of flowers.

Price: 2-3 feet, 30c each; 10 for \$2.50; 3-4 feet, strong and bushy, 40c each; 10 for \$3.50.

WEIGELIA ROSEA. An elegant shrub with beautiful rose colored flowers. Blooms very profusely, June. It is erect in habit with good foliage. The height is five feet. Very hardy. I find this to be the only variety of Weigelia that is really hardy in Nebraska and does not need winter protection.

Price: 2 to 3 feet, 55c each; 10 for \$5.00; 3-4 feet, 70c each; 10 for \$6.50.

WEIGELIA, EVA RATHKE. A new variety from Germany and probably the best and finest of all Weigelias. Flowers are of brilliant crimson color, a beautiful and distinct shade. Blooms nearly all summer and when in full bloom the whole plant fairly glows with color. On September 27, my Eva Rathke Weigelias were still in full bloom and the plants literally covered with their beautiful, intensely rich flowers. Grows 2 to 3 feet tall. It is not real hardy in Nebraska. Cut the bush back late in the fall to one foot and cover with strawy manure. It will amply repay this little work the next summer.

Price: 2 to 3 feet, 75c each; 10 for \$7.00.

Landscape Service . . .

If you are planning to beautify your home grounds, our Landscape Department will be pleased to assist you in every way possible. Any information you might wish will be gladly given free of charge. We furnish plans and blue prints for the home grounds, parks, school grounds, hotel grounds and estates. Write for particulars.

Trumpet
Vine.

HARDY ORNAMENTAL CLIMBING SHRUBS

Your home, outbuildings, fences and trunks of old trees can be made very attractive by the use of hardy vines. Such permanent improvements add greatly to the value of your property, and the value increases from year to year. I furnish nice, strong, field grown plants, all in splendid varieties at prices given below.

CLIMBING VINES FOR SHADY PLACES. All large Flowering Clematis, Honeysuckles, Dutchmen's Pipe, Akebia, Bittersweet, Ampelopsis, Engelmanni and Veitchi.

AKEBIA. A beautiful, hardy vine with unique, dainty foliage and chocolate purple flowers of delightful fragrance in large clusters. The foliage is never attacked by insects and is nearly evergreen. Blooms in May. Its rapid growth makes it highly suitable for porches, trellis or running over walls and banks. Does best in a sunny location and well drained soil. **Price:** 65c each; 10 for \$6.00.

ARISTOLOCHIA. (Dutchman's Pipe.) Derives its name from the peculiar shape of its flowers, which resemble the old-fashioned Dutch pipes. It is one of the most rapid climbers in use. Does best on the north side of houses, where the full force of the noonday sun does not strike it. This is an extremely desirable feature, however, as it fills locations where most other vines are not a success. A very pretty and odd climber. Blooms in June.

Price: \$1.25 each; 10 for \$11.00.

AMPELOPSIS ENGELMANNI. A new variety of Woodbine which has long been desired. It has shorter joints and very much smaller and thicker foliage, which in fall turns to a pretty red color. It also is better equipped with tendrils by which it will climb walls of stone or brick as closely as the Boston Ivy. This variety has proved itself perfectly hardy in Minnesota and I have no doubt it will occupy the same place in the North and West that Boston Ivy does in the East. Will grow in any soil and withstands drought and heat. **Price:** 35c each; 10 for \$3.00.

BOSTON IVY. (Ampelopsis Veitchi.) One of the finest climbers for covering walls, as it clings firmly to the smoothest surface, covering it evenly with overlapping leaves, which form a perfect mass of foliage. The color is fresh, deep green in summer, changing to bright shades of crimson and yellow in autumn. The handsomest vine possible for growing on house walls especially the foundation and first story, around the doors and windows. When once established it is quite hardy. This Ivy is not perfectly hardy here in Nebraska. I have seen very good, large plants, though, even as far north as Omaha, and also in Wisconsin and the Mississippi

Valley, especially if planted on the east or north side of a building. Not on the south side; in warm days during the winter the sap will rise, then following cold weather will kill the vines. This plant is worthy to be planted anywhere it will stand the climate. It is one of the most beautiful climbing plants I know and adheres to walls and even very smooth surfaces without any tying whatever. In a dry fall, do not forget to water the plant thoroughly before the ground freezes up for the winter. It will come through the winter much better. **Price:** 55c each; 10 for \$5.00.

VIRGINIA CREEPER. Woodbine. (Ampelopsis Quinquefolia.) A strong rapid grower, foliage large, dark green, in autumn bronze and crimson. This is an old favorite and valuable for covering back porches, outbuildings, arbors, etc. Perfectly hardy everywhere and will grow in any soil and situation but must be tied, as it will not adhere to a wall. **Price:** 25c each; 10 for \$2.00.

BITTER SWEET. (Celastrus Scandens.) A native climber with handsome, glossy foliage and large clusters of beautiful orange-crimson berries, remaining all winter. Very bright in effect and charming for winter house decorations. Very hardy.

Price: Strong plants, 45c each; 10 for \$4.00.

EUONYMUS VEGETUS. Essentially a low-wall cover. For this purpose it is unsurpassed; being close-covering, absolutely hardy, leaves evergreen. Bright throughout most of winter with its persisting orange-red berries. Can also be used as a creeper in rock work. **Price:** Strong plants, 70c each; 10 for \$6.50.

CINNAMON VINE. (Diacorea.) This beautiful climber possesses the rare quality of emitting from its flowers the delightful odor of cinnamon. Perfectly hardy, the stem dying down every autumn, but growing again so rapidly as to completely cover any trellis or arbor very early in the season. With its heart-shaped leaves and clusters of delicate, white flowers, it is a most desirable climber.

Price: Strong roots 30c each; 10 for \$2.50.

CLIMBING HONEYSUCKLE.

(Lonicera.)

HONEYSUCKLE, RED CORAL. A fine climber and one of the most satisfactory of all plants. The odd-shape foliage is showy and attractive and it produces its bright red, fragrant, trumpet-shaped flowers almost continuously. A splendid vine for porches. Grand for trellises and ground cover. Will thrive in almost any kind of soil, growing to a height of 10 to 15 feet. Can also be raised in bush or tree form.

Price: 40c each; 10 for \$3.50.

HONEYSUCKLE, HALL'S EVERGREEN JAPAN. (Lonicera.) One of the best of the climbing Honeysuckles, and a free bloomer. Has oval semi-green foliage and fragrant yellow and cream colored flowers in constant succession. Grows to a height of 12 to 15 feet. Excellent for covering trellises, rocks, dry banks, etc. The Honeysuckle perfume is much remembered and loved throughout the world. **Price:** 35c each; 10 for \$3.20.

JAPANESE KUDZU VINE. Jack and the Bean Stalk Vine. (Pueraria.) The most remarkable, rapid growing, hardy perennial extant. In rich soil the plant will grow 70 feet in one season. Starts into growth slowly, but after three or four weeks it grows almost beyond belief. Leaves in shape like Lima beans; dark green, soft and wooly. For porches, arbors, old trees, etc., I know of nothing its equal. Here in Nebraska, it freezes to the ground over winter, but always comes up again in the spring, and soon it is as large as it was in the fall. It is claimed by some that the Kudzu vine makes good feed for cattle and yields enormous crops. I have never tried it myself so cannot vouch for it. **Price:** Strong, field grown roots, 40c each; 10 for \$3.50.

HARDY ORNAMENTAL CLIMBING SHRUBS—(Continued)

CHINESE MATRIMONY VINE. (*Lycium*.)

Vigorous growing, hardy climbing vine that may be used anywhere that a vine is needed for training to trellis, fence or wall. The foliage is of a grayish green. The flowers, which appear from June to September, vary through shades of pink to purple. The fruit which follows is of a deep crimson color and very showy. It is borne abundantly along the entire length of the branchlets. It is especially attractive in the fall when it is thus loaded with its bright fruits which contrast well amid the green foliage. Will grow in nearly all soils and climates. One of the very best shrubs to hold steep banks and terraces, as it strikes roots wherever it touches the ground. **Price:** 35c each; 10 for \$3.00.

MADERIA VINE. Also called Mignonette Vine and Mexican Vine. A beautiful tuberous rooted climber, with glossy green leaves and handsome racemes of fragrant, white flowers. The vines make a rapid growth, and a few plants will cover a trellis or cottage wall in a single season. Will grow anywhere without care. **Price:** Strong tubers, 7c each; 10 for 60c.

TRUMPET VINE. (*Bignonia Radicans*.) A robust, woody vine, climbing high and twining tightly, with numerous roots along its stems. Great, leathery, trumpet-shaped flowers of orange scarlet, clustering all the tips of the branches, bending them gracefully with their weight. In bloom nearly all summer. Extremely valuable for covering old stumps or walls; wherever a showy vine is desired, it will be found most useful. Can also be grown as a small tree or bush. **Price:** 35c each; 10 for \$3.00.

WISTARIA, CHINESE PURPLE. This variety bears in great profusion large, drooping clusters of purple, pea shaped flowers, somewhat resembling a bunch of grapes in size and form. Blooms in May and June, and sometimes again in the fall. Foliage is very pretty, of pale green color. A beautiful climber that may also be trained to tree form. **Price:** 60c each; 10 for \$5.50.

WISTARIA ALBA. A form of the above, but flowers are pure white, in large drooping racemes. **Price:** 70c each; 10 for \$6.50.

DAKOTA AND BETA GRAPE. Splendid vines for covering arbors. See description under Grape Vines, page 19. **Price:** 50c each; 10 for \$4.50.

TRAILING PERIWINKLE. (*Vinca Minor*.) A hardy evergreen creeper, trailing close to the ground and forming a dense mat. Does well even under trees where grass will not grow. Useful for binding the soil on slopes or banks to prevent washing by rains. In Europe one sees them in cemeteries as borders for graves. The blue flowers contrast finely with the dark, glossy green foliage. Hardy most everywhere. **Price:** 15c each; 10 for \$1.30, post-paid.

Clematis Paniculata. Grown on my Home Place.

CLEMATIS.

Beautiful free flowering vines with very showy flowers. They are well adapted for training on porches, balconies and trellises, or for covering walls, fences and arbors. A loamy, fertile soil suits them best, and to secure the best results the ground should be enriched frequently. I can furnish the following varieties, all strong, field grown plants:

LARGE FLOWERING CLIMATIS

DUCHESS OF EDINBURG. One of the few double flowering clematis. Flowers are large, white, very double and attractive. The vines are hardy and very free blooming. I know my customers will be well pleased with this Clematis. I had some blooming this year in my garden; very large, double, snow-white flowers really extra fine. Bloomed yet in October. **Price:** Strong, 2-year-old plants, \$5c each; 3 for \$2.40.

JACKMANI. The well known large flowering blue Clematis. The beautiful flowers, when fully expanded, measure 4 to 6 inches in diameter, intense violet-purple, with a rich, velvety appearance, distinctly veined. It blooms continually from July until frost. Plant is hardy, abundant and successful bloomer. **Price:** For strong, 2-year-old plants, \$5c each; 3 for \$2.40.

HENRYI. This is the finest of all large flowering, white Clematis and should find a place in every collection. It is not only a vigorous grower, but a remarkably free and continuous bloomer, beginning with the earliest, holding out with the latest. Flowers are large, of beautiful creamy-white, with reddish-chocolate anthers. **Price:** Strong, 2-year-old plants, \$5c each; 3 for \$2.40.

MADAME EDOUARD ANDRE. Has been called the Crimson Jackman. The plant is a strong, vigorous grower, very free in bloom. Lovely flowers of a distinct crimson color. Distinct from all other varieties. **Price:** Strong, 2 year-old plants, \$5c each; 3 for \$2.40.

VILLE DE LYON. The only real bright Clematis I have seen. Flowers are large, very red, and bloom a long time. Better than Madame Andre for color. **Price:** Strong, 2-year-old plants, \$5c each 3 for \$2.40.

Clematis Madame E. Andre. Grown on my Home Place.

HARDY ORNAMENTAL CLIMBING SHRUBS—(Continued)**SMALL FLOWERING CLEMATIS.**

PANICULATA. The small flowering, sweet scented Japan Clematis. One of the most vigorous and beautiful of all climbers. It is a rapid grower and desirable wherever a quick growing vine is needed, on walls, verandas, fences, etc. In late summer it produces dense sheets of medium sized, pure white flowers of the most pleasing fragrance. Will grow in

almost any soil and is entirely free from blight and insects. **Price:** 45c each; 10 for \$4.00.

COCCINEA. Scarlet Bell-Flower Clematis. A beautiful and graceful climber, with broad green leaflets and very pretty flowers of intense scarlet color. Blooms freely in June and all through the summer. The plants are healthy; will stand drought quite well. **Price:** Each, 35c; 10 for \$3.00.

Gruss An Teplitz.

Rayon D'or Rose. Picture sent in by Mr. Jacob Klein, Sutton, Nebr.

and will withstand ordinary freezing weather, but should have protection during the winter. Suitable for garden or house culture. In the open field the K. A. Victoria, Gruss An Teplitz, Maman Cochet and especially Killarney and Madame Ravary, withstood our hot, dry summer extremely well and bloomed profusely all through the summer and fall.

In my garden I protect all my roses over winter. In the fall I cut them back somewhat, then lay them down, and cover first with dirt and when it gets colder, with strawy manure. In this way I am sure to get my roses through the winter in good shape. This I would advise everywhere, where the thermometer will go down to 10 above zero or lower. Please remember that roses like very rich ground and plenty of water.

AMERICAN BEAUTY. This rose has become as famous as the Marechal Neil. It is a hardy rose of the largest size, having the everblooming qualities of the Tea Rose, with the delicious odor of the Damask or Moss Rose. It is the sweetest of all roses. Color a deep brilliant red, shading to a rich, carmine crimson. A valuable rose for the garden or indoor culture, flowering freely during the winter.

Price: 85c each; 3 for \$2.25.

GRUSS AN TEPLITZ. One of the brightest colored roses grown. When first opened, it is a dark, rich crimson, changing to a bright scarlet. Blooms continually; flowers good size and delightfully fragrant. It is the rose for everybody, succeeding everywhere.

Price: 85c each; 3 for \$2.25.

HUGH DICKINSON. Flowers very dark crimson, shaded scarlet, very large, fully double, and of magnificent form, with high, pointed center, vigorous, upright grower, and blooms freely and continuously all summer. The sweetest perfumed rose for outdoor planting.

Price: 85c each; 3 for \$2.25.

K. A. VICTORIA. The finest white everblooming hardy garden rose. Soft, pearly white, lightly tinted with lemon in the center, just enough to relieve the white. Remarkably fragrant buds and open flowers of elegant form. The plant is a strong grower, blooms freely and the flowers are carried on long, stiff stems. Best rose for garden and house. **Price:** 85c each; 3 for \$2.25.

KILLARNEY, PINK. Queen of the Irish Roses. This beautiful new rose is unquestionably the finest pink, hardy everblooming tea rose introduced. Blooms large, full and of exquisite shade of shell bright pink. Fragrant and handsome. The bush is strong and upright with beautiful deep bronze green foliage, very free blooming. When fully open not so very double. **Price:** 85c each; 3 for \$2.25.

MADAME RAVARY. (Hybrid Tea.) A beautiful monthly rose, blooming profusely all summer. The plant grows vigorously. Buds are very long and nicely formed. The flower is large, very double and of exquisite orange-yellow color, which it holds well. **Price:** 85c each; 3 for \$2.25.

MAMAN COCHET, PINK. The best pink garden rose. In the open ground it quickly makes a strong bush, producing on long, stiff stems, in wonderful profusion, flowers that are perfect. The buds are beautiful, large, full and firm, elegantly pointed, while the open flowers are extra large, and perfectly double. The color is clear, rich pink, changing to silvery rose. Blooms all the time. One of the best pink roses for our hot summers. **Price:** 85c each; 3 for \$2.25.

HARDY ROSES

The Rose, the Queen of Flowers, is justly one of the most popular. Few plants give better satisfaction to the lover of beautiful flowers when properly treated. To obtain the most satisfactory results, roses should be planted in well drained, rich, deep loamy soil, and given a location where they will have sunlight and a circulation of air. For winter protection, an application of composite or manure should be given them in late autumn, and spaded into the ground the following spring. All my roses are two-year-old, field grown plants, about 2 to 3 feet high and well rooted. I have no small green house grown stock. You will find my prices very reasonable, much lower than you can buy from agents.

**HARDY
EVERBLOOMING
HYBRID TEA ROSES**

The following varieties are free bloomers and excellent for cutting. Hardy

HARDY EVERBLOOMING HYBRID TEA ROSES—(Continued)

Hugh Dickinson. (See Page 48.)

SUNBURST. Plant a bed of Sunburst and you will have cut flowers all summer. Always in bloom. Very select, with long spiral buds. A lovely bronzy yellow, fading to apricot. Probably the best of the yellow roses. Plant a few, you will be satisfied. **Price:** 90c each; 3 for \$2.50.

MADAME ED HERRIOTT or DAILY MAIL. A coral red, shaded yellow at base, passing to shrimp red, or bronze and geranium red. This rose has wonderfully beautiful coloring. A quite hardy, vigorous well branched and thorny shrub with burnished bronze-green foliage. A seedling of Carolina Testout. **Price:** \$1.00 each; 3 for \$2.70.

Los Angeles. Grown in my garden.

MAMAN COCHET, WHITE. What has been so long desired, viz: a pure white, hardy, everblooming rose, has been obtained in this grand variety. It has the requisites of a perfect garden rose—substance, size, fragrance, hardiness, vigor and profusion of bloom—rivaling the best of the monthly everblooming roses in the latter all-important quality. It is a "sport" from the well known and much valued rose, "Maman Cochet." Inheriting all its fine qualities, full firm buds, long and pointed, the ideal rose, keeping long when cut. **Price:** Each, 85c; 3 for \$2.25.

MADAME CAROLINE TESTOUT. One of the most popular roses in its class and undoubtedly one of the best for outdoor culture. Should be in every garden. Immense large, clear pink flowers, full and double; beautiful buds. Very hardy. Blooms very freely; almost

always in bloom. Probably the most prolific bloomer in my garden, in fact, a good deal like Pink Maman Cochet. **Price:** 85c each; 3 for \$2.25.

RAYON D'OR (Golden Rays.) A Hybrid Tea Rose, everblooming, furnishes roses all summer. Without doubt the best yellow everblooming rose. Strong, bushy grower, with green, shining leaves and oval shaped buds, which are of a yellow color, striped with carmine red. The big, well formed flowers, when fully open, are of a fine canary yellow color. Received golden medals in London and the Lyon (France) exhibitions. **Price:** 90c each; 3 for \$2.50.

RED RADIANCE. Very hardy more so than most Hybrid Tea Roses. Flowers are large, round, very double with strong stems. Color a brilliant crimson. A constant bloomer. **Price:** 85c each; 3 for \$2.25.

OPHELIA. A variety which has made such a record for itself that qualifies it to be classed with the very best, a Rose that is admired by everyone; its flowers are held erect on long stiff stems, are of perfect form, good size, and of a most pleasing, delicate tint of salmon-flesh, shaded with rose, very floriferous. I have seen as many as 12 well developed Roses on one branch, a bouquet of its own. You will get more Roses of Ophelia than of any other variety. **Price:** 90c each; 3 for \$2.55.

LOS ANGELES. This is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame pink, toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Neil. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever-increasing wealth of color is maintained from the incipient bud until the last petal drops. Everybody that saw Los Angeles Roses in my garden pronounced them the prettiest roses they had ever seen. **Price** \$1.00 each; 3 for \$2.70.

HARDY HYBRID PERPETUAL ROSES

These hardy roses combine hardiness, vigor of growth and size of flower with great variety. They are very popular and most useful of all roses. While called "Perpetuals," they are not such constant bloomers as the Everblooming Tea Roses. Particularly valuable for beds or borders in the Northern or Middle States. If you like roses, set out a row or two of these and you will be well repaid. I furnish field grown, 2-year-old, well rooted plants. It will be safer to cover these over winter where the thermometer goes much below zero.

PRINCE CAMILLE DE ROHAN. Deep, velvety crimson maroon, large moderately full. One of the darkest in cultivation and a splendid rose. A good bloomer and very hardy. At a distance, the beautiful, fragrant, large, deep, double flowers appear black. A wonderful rose. **Price:** Each, 75c; 3 for \$2.10.

GENERAL JACQUEMINOT. A rich, velvety crimson, changing to a scarlet crimson. This is the best known of all hybrid perpetuals, and is without rival in fragrance and richness of color. As easy of cultivation as many of the more common varieties and perfectly hardy. Does well anywhere and blooms freely. Also adapted for growing in the house. **Price:** Each, 75c; 3 for \$2.10.

HARDY HYBRID PERPETUAL ROSES—(Continued)

PAUL NEYRON. The largest rose in cultivation, sometimes called the Paeony Rose. Color bright, fresh cerise red. Flowers are very double and full, delightfully fragrant. The plant makes a strong healthy growth and has clear, glossy foliage. Blooms almost without intermission from June until late October. **Price:** Each 75c; 3 for \$2.10.

ULRICH BRUNNER. A superb rose; a seedling from Paul Neyron. Extra large, bold flowers; full and globular; petals large and of good substance. Color, rich, glowing cherry, elegantly lightened with scarlet, very fragrant. Plant is of vigorous, healthy growth; blooms freely. One of the best and finest hardy roses for the garden. Very effective when planted in masses. **Price:** Each, 75c; 3 for \$2.10.

GLOIRE de GUINOIS-SEAU. A novelty. Much

better than Ulrich Brunner. Flowers are much larger and more beautiful, as the color is a bright vermillion red with velvet shadings. Blooms almost continuously, more so than other hybrid perpetuals. A grand novelty worthy of a trial. I would be pleased to hear from any of my customers, that make a trial next fall. **Price:** 85c each; 3 for \$2.40.

Snow Queen. One-half Size, Pure White.

SOLEIL D'OR. (Golden Sun.) Yellow is the one desirable color that has been lacking in hardy roses. This new rose is the result of a cross between Persian Yellow and Antoine Doucher. It is a fine, strong grower, producing superb, conical shaped buds, varying from gold and orange yellow to reddish gold, shaded with nasturtium red. The flower is very full, large and globular, the petals in the center being well incurved. It is a robust, vigorous grower with a brownish wood and beautiful bright green foliage. Should have a place in every garden. **Price:** Each, 80c; 3 for \$2.25.

SNOW QUEEN. (Frau Karl Druschki.) The finest snow white hardy perpetual rose. Pure white, large long pointed buds of first class form. Open flowers are very large, perfectly double, petals well shaped. Continuous free bloomer, as much so as most Hybrid Tea Roses. At last we have in this class a rose of purest snow white, whose desirability and value we could not possibly overstate. This is, in my opinion, the greatest new rose that has been introduced in many a year, if it is not today the greatest of all roses. Certainly no other white rose can begin to compare with it. An exceedingly strong grower and very hardy. **Price:** Extra nice, two-year-old plants, each, 75c; 3 for \$2.10.

GEO. ARENDS, PINK SNOW QUEEN. Splendid buds and immense flowers, 4 to 5 inches across, perfectly double and delightfully fragrant, large, thick petals, very durable and handsome. Bright, shining green leaves; elegantly veined; a healthy, vigorous grower, entirely hardy and a constant and abundant bloomer. The most beautiful and largest pink rose now before the public. It is as hardy and vigorous and just as constant bloomer as the white Snow Queen. In my opinion, both the pink and white Snow Queen (Frau Karl Druschki) are among the very best hardy perpetuals. **Price:** 75c each; 3 for \$2.10.

MOSS ROSES

Admired for the beautiful moss covering of the buds. The Moss Rose is strong and vigorous, perfectly hardy and very desirable for outdoor culture. Most varieties bloom but once in the season, but the flowers and buds are very large and handsome, remain in bloom a long time and are highly prized.

WHITE BATH. White, sometimes tinged with flesh; attractive in bud and open flower. The best White Moss. **Price:** Each, 75c; 3 for \$1.85.

SALET. Light rose, medium size, very mossy; the best in its class. **Price:** Each, 70c; 3 for \$1.85.

HENRY MARTIN. Red, well mossed; is a fine rose. **Price:** Each, 70c; 3 for \$1.85.

SUMMER ROSES

The roses of this species are summer or spring bloomers, but they flower profusely and their rich coloring is so intense that they deserve a place in all collections. These roses bear on the terminals of a preceding year's growth, and pruning must be done just after blooming.

MADAME PLANTIER. Flowers are pure white, large, full and double; produced in great abundance early in the season. Hardy. Suitable for cemetery planting. **Price:** 60c each; 3 for \$1.50.

PERSIAN YELLOW. The hardy yellow rose of your mother's garden. Perfectly hardy. Flowers are semi-double and a golden yellow in color. Very hardy. Does not need any cover over winter. **Price:** Each, 80c; 3 for \$2.10.

Killarney.

HARDY CLIMBING ROSES AND RAMBLERS

As an ornamental plant for covering porches, sidewalls, pillars, fences, etc., they are unequalled, calling forth more admiration than anything else that can be similarly used. They require but little care and are very hardy. My plants are field grown, hardy, two-year-old stock, 2½ feet high.

CLIMBING AMERICAN BEAUTY. A grand novelty of great merit. Cross between an American Beauty and an unnamed seedling; color rosy crimson similar to its popular parent, and with same exquisite fragrance, a quality rarely found in climbing roses. Strong growth, making shoots 10 to 15 feet in one season. Flowers are from 3 to 4 inches in diameter, of fine form, and are produced in great profusion, not only in May and June, but in a fair sprinkling of flowers throughout the growing season. Try a few; you will never regret it. I offer this new rose in strong, two-year-old field plants, that will bloom this summer, for 65c each; 3 for \$1.80.

PAUL'S SCARLET CLIMBER. No other Rose, in any class, can compare with this for brilliancy of color, which is maintained until the petals fall. The flowers, a vivid scarlet, are of good size, semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes, the plants being literally covered from top to bottom with bloom. It is of strong climbing habit and perfectly hardy. This is one of the most popular climbing roses. Price: 85c each; 3 for \$2.40.

AVIATOR BLERIOT. Makes clusters of perfectly double, medium-sized, fragrant blooms, of rich, deep saffron-yellow, deepening in the center to copper or golden yellow. Foliage is so shiny it seems glazed and is insect and disease proof. The plant is reasonably hardy, a good grower and very good blooming. Price: 70c each; 3 for \$1.80.

SILVER MOON. Novelty. The grandest white climbing rose. Flowers are very large, semi-double and when open resemble a white Clematis. My customers will be pleased with this rose. Price: 70c each; 3 for \$1.80.

MARY LOVETT. A new rose of much merit. A beautiful pure white climbing rose, similar to Dr. Van Fleet. Roses are much larger, though, pure white, very double and come on long stems and are very fragrant. Blooms all summer not only in June, like most Climbing Roses. The plant grows very strong, has plenty of leaves which do not suffer from mildew. I consider this the best white Climbing Rose. Price: \$1.00 each; 3 for \$2.70.

BESSIE LOVETT. This is a glorified Climbing American Beauty, and better in every way than that popular variety. It is also the most fragrant of all Climbing Roses, and is of strong growth, with large, glossy, Silver Moon like foliage. The roses, which are lavishly produced, are of good size, double full and of cupped form. They are similar in make-up to the Climbing American Beauty, but very much brighter in color and far more fragrant. The color is clear, bright red, much like that of the brilliant Ulrich Brunner. If anything, it is of even a more lively or dazzling hue. The blooms, which are very lasting, are also very beautiful in bud and are borne on long, strong stems much in the same way as are those of the variety Dr. W. Van Fleet; hence they are admirable for cutting. Price: \$1.00 each; 3 for \$2.70.

DR. W. VAN FLEET. The flesh-pink rose. A cross between a Hybrid Tea and a Rosa Wichuriana. The flowers are perfect in every way—form, color, delicate fragrance—and are borne on long strong stems. A bouquet of this variety and cut just before the roses open, will outshine any other rose bouquet in sheer loveliness. When fully established it will bring a number of canes 10 to 15 feet long, which will produce a mass of roses the following June. The plant is perfectly hardy, a good hearty grower, has shiny bronze-green foliage and crimson thorns, which with the exquisite blooms, make this the choicest variety of the climbing roses. Open flowers are 4 inches and over in diameter with high built center and beautifully cupped petals. The color is a remarkably delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. Flowers full and double, delicately perfumed; buds pointed; stems 12 to 18 in. long, fine for cutting. From one plant hundreds of Roses can be cut for your friends, for selling or for indoor decoration. Price: 75c each; 3 for \$2.10.

SEVEN SISTERS. (Grevillea.) White and crimson, making it unique, as both white and crimson flowers may be seen on the plant at the same time. Blooms in large clusters. An old and tried variety, very hardy. Price: Each, 55c; 3 for \$1.50.

Received trees in good condition and thank you for them.

Herbert L. Yesterva,
Oraibi, Ariz.

Dorothy Perkins Pink. Sent in by
P. J. Keating, Atkinson, Nebraska.

Thousand Beauty Climbing Rose. Mrs. John M. Jones, Hennesey, Okla.

RAMBLER OR POLYANTHA ROSES.

With these climbing roses the flowers are small, but they come in large clusters, often up to 20 little roses in one cluster. Bloom during 2 or 3 weeks. All varieties grow very fast, are strong, fairly hardy.

CRIMSON RAMBLER. It is a vigorous grower, making shoots 10 to 12 feet high in a single season. Flowers glowing crimson and produced in immense panicles, covering the plant from top to bottom. Few roses have been more generally planted. Should be planted on trellises, so the wind can get through them, not to a wall. **Price:** Each, 60c; 3 for \$1.65.

DOROTHY PERKINS, Pink. In general habit closely resembling the Crimson Rambler, but of a beautiful shell pink, full and double, of an unusually large size for a Cluster Rose. The trusses are made up of from 20 to 40 flowers. I consider this to be the finest of all climbing roses. I have never seen it mildew, which cannot be said of most of the Ramblers. I think this is the best climbing rose on the market. **Price:** 50c each; 3 for \$1.35.

DOROTHY PERKINS, White. **Price:** 45c each; 3 for \$1.20.
HIAWATHA. Its small flowers, deep ruby crimson, accentuated by a white eye are unequally borne in long trails of 40 to 50 blossoms. Very popular for training on fences, not only as a covering for the fence, but because it is really one of the prettiest roses of its kind. Also extensively used as a climbing rose on trellises or porches. **Price:** 70c each; 3 for \$1.95.

EXCELSA. (Red Dorothy Perkins.) A grand novelty. Intense crimson scarlet double flowers in brilliant clusters set in glossy, shining foliage, which never mildews or spots. An intensified Crimson Rambler, which promises to displace all red climbers. **Price:** Each, 50c; 3 for \$1.35.

AMERICAN FILLAR. One of the most valuable and attractive of the hardy climbers, flowering profusely in large, compact clusters. The single flowers range from 2 to 5 inches in width. Brilliant carmine rose, with a slight cream variegation and yellow stamens at center. I consider this one of the best red climbing roses. **Price:** 60c each; 3 for \$1.65.

SOURCE D'OR. Flowers are golden yellow, changing to flesh pink, as the flowers expand, are large for their class (Climbing Wichuriana), and are much better bloomers than any of the yellow ramblers. The plant grows very vigorous, making long shoots. Hardy. **Price:** 60c; 3 for \$1.65.

THOUSAND BEAUTIES. The most sensational climbing rose yet introduced, not even barring Crimson Rambler. A single cluster of flowers is a bouquet in itself, hence the very fitting name. "The Thousand Beauties." Blooming profusely from the beginning of June until the last of July, the flowers appear in large clusters (10 to 15 in a cluster), are of splendid size and quite double. The colors run from delicate balsam to tender rose through the intermediate shades of bright rose and carmine, with the white, yellow and various other indescribable tints showing. There is no other rose in cultivation like it. It is a strong grower, with but few thorns and magnificent foliage. The most remarkable rose of its kind in the world. After trying this rose a number of years, I can recommend it to my customers. **Price:** 70c each; 3 for \$1.80.

THE BLUE ROSE. Veilchenblau or Violet Rose. This new climbing rose surpasses all others of recent introduction in having a blue color. The flowers appear in large clusters after the manner of the Crimson Rambler, are semi-double and of medium size. Upon first opening the color is partly bright red and partly bright blue, turning soon to a steel blue. The color is best described by saying it resembles that of early violets. This variety is a strong grower, has shining green foliage and few thorns. It has not been troubled with mildew, and is classed among the hardiest climbing roses, withstanding the winters successfully. With me, it is not a very free bloomer, not nearly as free as Crimson Rambler. Could hardly call it a real blue. **Price:** Each, 60c; 3 for \$1.60.

WHITE RAMBLER. In growth and flowering about the same as Crimson Rambler. Planted together they make very showy, pretty effect. **Price:** 50c each; 3 for \$1.35.

Baby Ramblers planted 2 feet apart along a walk, alternating with red, pink and white, make a very pretty effect. Grown on my home place.

Dear Sirs:

Three years ago I purchased a Dorothy Perkins rose bush from you. I am sending a picture of it. It was supposed to have been a pink in color, but it turned out white, for which I was very much disappointed. But, is it not a beauty? And grew over 20 feet in one season and as you see was completely covered with bloom. Such things are a novelty here and people came to see it from distance to ask about it. I am very proud of it, though it is white.

Respectfully yours,
David Rinker, Greybull, Wyo.

I am enclosing a kodak picture of my Grevillea or Seven Sisters purchased from the Sonderegger Nurseries. It not only covered the arbor shown, but ran along the fence for about 12 feet and a solid mass of bloom. You may enter this in your contest if worthy.
Mrs. Chas. C. Frank, Gibbon, Nebr.

BABY RAMBLERS

(Dwarf Polyantha Roses.)

A type of roses which is very popular for bedding purposes or for borders around rose beds, or along walks. They form shapely, compact, bushy specimens about 18 inches high and produce in great profusion immense trusses of small flowers from May till severe frost. This variety of roses I cut back in the fall pretty severely and bank them up some with dirt. Always in bloom.

RED BABY RAMBLER. (Madame L. Levvasseur.) One of the best hardy bedding roses in existence. The plants are very vigorous and grow 18 to 24 inches high. The foliage is dark, glossy green and remarkably free from insects and fungus. The flowers are borne in clusters of 20, 30 and more to the cluster, in every way resembling the blossoms of the Climbing Crimson Rambler. It is perfectly hardy and blooms all the time indoors and from May to November outdoors. Splendid for making a border.

Price: 75c each; 3 for \$1.90.

BABY DOROTHY. (Maman Levvasseur.) This magnificent Baby Rambler is equally as meritorious if not more so than Red Baby Rambler, which has become so famous. Of dwarf growth, it blooms practically all the time, producing in amazing quantities large clusters of panicles of its beautiful pink flowers, which are full and double, the color of which is almost identical with the flowers of Dorothy Perkins. Entirely hardy.

Price: 75c each; 3 for \$1.90.

BABY TAUSENDSCHOEN. (Thousand Beauties.) A grand novelty of the Baby Rambler type. Flowers appear in large clusters, the same as with the climbing "Thousand Beauties," are of a good size, of the same beautiful colors, all shades from pink to white and yellowish. Blooms all summer. A grand novelty that is sure to give satisfaction. I counted 37 nicely developed roses on one small limb this summer. Price: 75c each; 3 for \$1.90.

ERNA TESCHENDORF. The most vivid crimson of any Polyantha Rose, easily the best all-red Baby Rambler yet produced. One valuable quality in which it excels is that it never loses color. Flowers large, fully double, and borne profusely the entire season. Price: 85c each; 3 for \$2.25.

CATHERINE ZEIMET. A most beautiful companion to the Crimson Baby Rambler, growing to the same height and bearing great masses of double, pure white flowers, covering the plants as with a mantle. The roses are delightfully scented, reminding one somewhat of a hyacinth. Price: 55c each; 3 for \$1.50.

YVONNE RABIERE. The best white Baby Rambler, with full double flowers produced in great profusion. Always in bloom. A variety when once known, will remain very popular. Price: 85c each; 3 for \$2.25.

ORLEANS. Brilliant geranium red, suffused rose and deep cerise. Bushy habit, grows and blooms freely; florets not crowded, but of beautiful arrangement and most lasting quality, with their stiff, paper-like texture. The showiest and prettiest of the pink Baby class. Gold Medal. Price: 85c each; 3 for \$2.25.

RUGOSA ROSES

A valuable, perfectly hardy type, much used in landscape work; the heavy wood and shrubby formation adapting it to hedges and hardy borders, or to mixed shrubbery groups. The foliage is lustrous, dark green, usually corrugated, and is impervious to attacks of insect pests. Flowers are borne in clusters of varying size and construction, and are succeeded by persistent fruits which carry their usefulness into winter.

RUGOSA RUBRA.

Plant grows 4 to 5 feet high and is very ornamental with its beautiful, large, glossy foliage, distinctly wrinkled. Blooms all season. Flowers single, very large, of a most beautiful, bright, rosy crimson, succeeded by large berries of a rich, red color. Makes a beautiful low hedge. Price: 60c each; 3 for \$1.65.

RUGOSA ALBA.

In growth and foliage the same as above. Flowers, though, are pure white. In groups both go together very well. Price: 65c each; 3 for \$1.90.

ROSA RUBRIFOLIA. A purple leaf Rose, by Landscape Architects mostly used in shrubbery planting as a shrub. It takes the place of the purple leaf Barberry pretty well. A few of these planted among other shrubs makes a very pretty effect. Grow 6 feet high. Price: 3-4 feet, each \$1; 3 for \$2.70.

EVERGREEN MEMORIAL ROSES AND HYBRIDS

The Memorial Roses are of the most charming and unique beauty, very valuable wherever an absolutely hardy climbing rose is required, forming lovely objects in the garden while in bloom, and splendid for covering unsightly objects.

WICHURIANA. (White Memorial.) The plant clings closely to the ground, rapidly branching and covering any surface. The flowers appear in July and continue throughout the season, forming showy clusters of pure white blossoms. Single and of sweet fragrance. Entirely hardy everywhere. Used extensively in cemeteries, rock work, etc.

Price: 45c each; 3 for \$1.20; 10 for \$3.50.

SWEETHEART. A beautiful shade of rosy pink, free and continuous bloomer, suitable for the cemetery. Planted with the white Wichurina Rose is very effective.

Price: 45c each; 3 for \$1.20; 10 for \$3.50.

TREE ROSES

I used to import all tree roses from Holland, as none were raised in America. This could not be done the last few years as our government forbids all importations of trees and plants from Europe. I can offer tree roses now, grown in this country by experienced Holland growers in the following varieties:

These little trees have a stem of about 4 feet with a well developed crown. They are budded in the top of the stem and all bloom profusely all summer. I have the following fancy varieties.

K. A. VICTORIA. See description under Hybrid Tea Roses.

KILLARNEY. See description under Hybrid Tea Roses.

GRUSS AN TEPLITZ. See description under Hybrid Tea Roses.

MADAME CAROLINE TESTOUT. See description under Hybrid Tea Roses.

MADAME BUTTERFLY. The countless admirers of Ophelia will appreciate this new variety, its offspring. All the color tones of Ophelia are intensified, making it a symphony of white, bright pink, apricot and gold. As between the two, Madame Butterfly is fuller petaled, more prolific and of greater color appeal. The buds are a rich Indian Red. Yellow at base.

LADY HILLINGDON. Deep apricot yellow. The color is solid without any shading and absolutely unique. It can be told at a glance from any other rose known. A wonderful thing about it is that even after the flower is cut the color will deepen. It never fades. The new wood and long stems are deep violet, making a contrast with the flower that has to be seen to be appreciated. Growth is strong and vigorous. Foliage at first dark violet, becoming a very deep green with slight violet hue. Flowers are large and loose, with long, pointed buds and remarkably large petals. The finest yellow rose to date.

Price of above Tree Roses: \$2.00 each; 3 for \$5.70; 10 for \$18.00.

Tree Rose.

Please pack potatoes to avoid freezing. Your catalogs are very beautiful. Life is worth living just to see those beautiful Fruit pictures. It is the most beautiful catalog I ever saw. Later on I am going to order more from you.

Porter H. Pleasants,
Willow Ranch, California.

HERBACEOUS PERENNIAL PLANTS

Bleeding
Heart.

ANCHUSA ITALICA

Bearing all summer panicles of clear sky-blue flowers similar to the Forget-me-not. A very useful perennial, growing 4 feet high, and commences to bloom in July. Planted with Oriental Poppies, they make a splendid effect.

The honey bee is very fond of this species. **Price:** 18c each; 10 for \$1.50, postpaid.

AQUILEGIA. (Columbine)

The Columbines have established a place in all old-fashioned gardens. Their curious forms and many pleasing shades of color and the readiness with which they adapt themselves to all localities, have made them prime favorites. See illustration.

CHRYSANTHA. The Golden Columbine. Flowers very numerous. 2 to 3 inches across, bright yellow. In bloom all summer. Height 3 to 4 feet. Easily grown in any good garden soil.

COERULEA. The true Rocky Mountain Columbine. An exquisite flower with pale blue sepals and white petals; grows about 1½ ft. high; blooms from May to July.

VULGARIS. The well known garden Columbine in all shades of blue and purple; very free blooming. Height, 2 feet. **Price above three varieties:** Each, 20c; 10 for \$1.80, by paid parcel post.

MIXED AQUILEGIA. I have some plants on which the label was lost, all good kinds as above, but mixed. **Price:** 15c each, 10 for \$1.20 by paid parcel post.

ASTERS

(Michaelmas Daisies.)

These are among the showiest of our late flowering hardy plants, giving a wealth of bloom at a season when most other hardy flowers are past, and for best effect should be planted in masses of one color. They grow freely in any soil.

FELTHAM. Masses of aniline blue flowers on branchy plants 2½ feet high. Blooms in August and September. A good Aster, especially where seasons are short.

NOVAE-ANGLIAE ROSEA. (New England Aster.) The richest and gayest of our native Asters; has the largest flowers and is usually considered the finest. It ranks "among the best of all the hardy border plants." Its stout leafy stems vary from 3 to 5 feet in height, and its beautiful rose flowers appear from September to October.

ROBERT PARKER. Pale Heliotrope blue. A very good variety and blooms freely. 3-4 feet high.

GLORY OF COLWELL. Good size, almost double, ageratum blue flowers. 2½ feet high.

TARTARICA. 4 to 5 feet high, free flowering. Blossom large, of a lovely bluish color. Blooms in October.

Price of all Asters above mentioned: 25c each; 10 for \$2.20, by paid parcel post.

NEW HARDY ASTERS

MAGGIE PERRY—Very large flowers, frequently 2½ inches across, loosely arranged in large trusses, of a pleasing tone of soft mauve. Most distinct and striking novelty.

PERRY'S WHITE. The finest white Michaelmas Daisy yet introduced, perfect in habit and remarkably free flowering. The stout stems are well branched and covered with flowers 2½ inches across.

Price of above two Asters: 25c each; 10 for \$2.20, postpaid.

Perennials have never been so popular as they are at the present time. Their permanency appeals to all. They are planted once and are always there; living through the winter with little or no protection, the flowers become better as the plants grow older. Will grow well in any soil, which may be enriched with re-composed manure or bone meal. The varieties I list are all perfectly hardy, the tops dying down in winter, but coming up early in the spring. My prices are for field grown plants. These plants cannot well be shipped by freight in a box. **They should go by parcel post or express, so I will give prepaid prices only.** I can ship perennials all fall, and fall is a very good time to plant them. In the spring I commence digging and shipping perennials about March 25, and can continue until May 10 or later.

ACHILLEA. "THE PEARL"

The finest of all plants for cemetery planting. The plants grow about 15 to 20 inches high and are completely covered with double, pure white flowers from July until frost. A fine cut flower. Is daintily formed; quite double flowers are borne on long stemmed branching sprays so profusely as to give a refreshing, cool, airy effect through the summer heat and late into fall.

Price: 20c each; 10 for \$1.80, by paid parcel post.

Columbine.

PERENNIAL PLANTS—(Continued)

Chrysanthemum.
Normandy Yellow.

ARTEMESIA PONTICA

Beautiful plant for border or filling in within the shrubbery. The foliage is silvery white, finely cut, and has a peculiarly agreeable fragrance. I have

used this plant with good success to hold steep banks and terraces, especially on a south exposure, where blue grass will not grow. Used thousands of them in the Beatrice Athletic Park to hold up the steep banks. Grows readily in any soil and can stand any amount of dry weather. **Price:** 8c each; 10 for 60c; 100 for \$5.00, postpaid. Not prepaid. 1,000 for \$40.00. Plant 10 inches apart each way for holding banks.

ASCELPAS

Sometimes called Butterfly Flower. One of the showiest of our native perennials. About 2 feet high and producing during June and July close, compact umbels of brilliant orange colored flowers. They are found in Nebraska on rather dry land. A fine

flower, lasting a long time on the plant or when cut for bouquets. Do well in any garden. They are not a weed, but a really fine garden flower. **Price:** 30c each; 10 for \$2.50, postpaid.

BABY'S BREATH (*Gypsophila*.)

This is a new variety of Baby's Breath. The little flowers are like charming dainty rosettes, on delicate, lacy stems about 2 to 2½ feet high. There is no better flower for a spray effect in a bouquet. **Price:** 20c each; 10 for \$1.80, postpaid.

CANTERBURY BELLS. (*Campanula*)

An old time favorite, growing 2 to 3 feet high and bearing in great profusion very pretty bell-shaped flowers. The Campanulas give to our gardens exceedingly pretty flowers for almost every location, moist or dry, sunny or shaded, and the flowers are produced even in summer drought. Valued for cut flowers. See illustration on page 56. Shades, blue white and rose mixed. **Price:** 18c each; 10 for \$1.50, postpaid.

COREOPSIS

COREOPSIS, YELLOW. One of the most popular hardy plants. The flowers are of a rich golden yellow, of graceful form and invaluable for cutting; in bloom from June until autumn. It succeeds everywhere. Height, 1½ to 2 feet. A group of these plants furnishes an unfailing mass of rich, glowing color. The plants grow vigorously in any sunny location. **Price:** 18c each; 10 for \$1.50, by paid parcel post.

CHRYSANTHEMUM**GRANDMOTHER'S HARDY GARDEN 'MUMS.**

I offer an assortment of the hardy varieties. They flower profusely in September and October, after everything else has been killed. They are excellent for cut flowers and bouquets. Sure bloomers and satisfactory growers that should be included in all orders. Even after several light falls of snow, in sheltered positions, it is sometimes possible to cut uninjured clusters of beautiful flowers. The fine, thick foliage makes a good screen or background.

GOLDEN QUEEN. Yellow.

OLD HOMESTEAD. Buff, a good variety.

SNOW CLAD. White. Blooms a long time.

DWARF WHITE. Flowers are not large, but almost cover the bushy plant. 1½ feet high.

LARGE FLOWERING PINK. About 3 feet high. Branches well and bears an immense amount of flowers.

Price of above varieties: 20c each; 10 for \$1.80.

NORMANDY YELLOW. 2 feet. Blooms from early fall till winter. Dwarf and bushy.

NORMANDY PINK. 2 feet. Sometimes flowers come out almost white, slowly turning to pink.

Price of the Normandy varieties: 25c each; 10 for \$2.20, postpaid.

BLEEDING HEART. (*Dicentra*.)

Bleeding Heart, the popular name of the *Dicentra*, is derived from the curious heart-shaped blossoms with the drop of blood below. These fine, hardy perennials were great favorites in the old gardens. Fine for the border or margins of shrubbery. In the spring these plants bear beautiful heart-shaped flowers of a light red color. The stems grow 18 to 24 inches high, with abundant deeply cut leaves of light green color. **Price:** 80c each; 10 for \$7.50, postpaid.

BAPTISIA AUSTRALIS. False Indigo

A strong growing plant, about 2 feet high: suitable either for the border or perennial garden, with dark green, deeply-cut foliage and spikes of dark blue flowers in June. In the early summer blue flowers are rather scarce. This has long stems, suitable for any bouquet. It is easily grown and perfectly hardy. **Price:** 20c each; 10 for \$1.80, postpaid.

Desmodium, on my home grounds.

PERENNIAL PLANTS—(Continued)

DELPHINIUM—(Larkspur)

One of the finest sights of modern gardens is a fine collection of blooming Larkspurs. They give us the greatest abundance of flowers and utmost variety in tints and shades of blue during June and July. The Delphiniums make good border backgrounds. Although plants thrive in any good garden soil, a deep, rich, loamy one, with sunny exposure is best.

FORMOSUM. Showy plants, growing 2 to 3 feet tall. Flowers deep blue with violet spurs. The stout stems are clothed with fine delicately cut leaves. Blooms persistently through the summer.

CHINENSIS. The Chinese Larkspur. A fine and sturdy old type, fascinating because of its many variations as well as for its beauty. The leaves are finely cut and fernlike, the flowers single or double, and colors ranging from clear, deep blue to creamy white. For about ten weeks of mid-summer it makes a grand display of bloom.

BELLADONNA. A magnificent new sort, unrivaled for continuance of bloom, with large spikes of the most delicate turquoise-blue. July till frosts. **Price of all above varieties of Delphinium:** 20c each; 10 for \$1.80, postpaid.

DELPHINIUMS. Tall English

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties growing 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long, in fact, they will bloom from spring till fall.

Price, mixed varieties: 30c each; 10 for \$2.80, postpaid.

DIGITALIS or FOXGLOVE

An old fashioned flower that should be planted in quantity. Succeeds under all conditions, furnishes a grand display during July and August. The flowers are very showy, thimble shaped and are borne close together on stalks, 3 to 4 feet high. For backgrounds and contrast among the shrubbery, it is a very fine plant. Grows well in a partly shaded location. Mixed colors, pink and white. **Price:** 18c each; 10 for \$1.50, postpaid.

DESMODIUM PENDULIFLORUM

(SWEET PEA SHRUB.)

A most magnificent shrub, covered from 1st of September till frost, with red pea blossoms in enormous quantities. In fact, so many flowers are on the branches that they give to the plant a drooping effect, which greatly enhances its beauty. Grows to a height of about 4 feet. Does well here in Nebraska and is perfectly hardy here. The branches all freeze to the ground in the fall and come up again in the spring. North of here it might be well to cover with a little straw over winter.

Price: 60c each; 10 for \$5.50 by paid parcel post.

DESMODIUM, White. About the same as above, except the flowers are white. Both planted together make a very pretty effect. **Price:** 50c each; 10 for \$4.50, postpaid.

DIANTHUS BARBATUS

SWEET WILLIAM. Charming, hardy plants, great favorites in every garden. Stems 12 to 18 inches high; flowers in greatest profusion in large, round topped clusters. Sweet William gives masses of colors as brilliant as any of our perennials. Its splendor lasts five weeks, then, if fading branches are cut away, fresh ones appear at intervals all summer. **Price:** 18c each; 10 for \$1.50, postpaid.

GARDEN OR GRASS PINKS. (Dianthus Plumarius.) Thick tufts of handsome bluish-green foliage and pretty, carnation-like, fragrant flowers. Very hardy and grows well anywhere. **Price:** 20c each; 10 for \$1.80.

The Giant tulips I planted last fall are eight inches high and have large buds coming. I am delighted with them. All seeds and shrubs bought from you are doing fine.

Sarah J. Robinson,
Palmer, Nebr., Box 5.

Delphinium.

Dianthus Barbatus.
(Sweet William.)

Canterbury Bells. (See Page 55.)

PERENNIAL PLANTS—(Continued)

ORNAMENTAL GRASSES

A few of these beautiful hardy grasses should be in every garden. Their beautiful plumes are almost a necessity in making large bouquets. Also will keep all winter.

EULALIA GRACILLIMA. (Japan Rush.) Narrow green leaves with a silvery white midrib. Late in the fall nice plumes appear at the top, which will keep all winter. The plant gets about 4-5 feet high. Price: 15c each; 10 for \$1.50.

EULALIA ZEBRINA. Leaves crossed every two or three inches by a band of yellow one-half inch wide. Make about the same plumes as the above Eulalia, also about 4-5 feet high. A very pretty and showy plant. Price: 22c each; 10 for \$2.00, postpaid.

ARUNDO DONAX. Will grow from 12 to 15 feet in this climate, must be covered in winter with light manure or old hay, beautiful for center in large group of ornamental grasses or hiding unsightly objects. Will multiply yearly by sending up new canes. It is the best ornamental grass I have in my garden, and the feathery flowers are very useful in making bouquets. I cut them to the ground in the fall and cover with a little manure and have no trouble in getting them through the winter. Price: Each, 30c; 10 for \$2.50.

HARDY PAMPUS GRASS

(*Erianthus Ravennae*.) Also called Plume Grass. Grows 10 to 12 feet high, frequently throwing up from 30 to 50 flower spikes. It closely resembles the Pampus Grass. Price: 35c each; 10 for \$3.00, by paid parcel post.

PHALARIS. (Ribbon Grass)

A tall, hardy grass with variegated foliage and a common plant in old-fashioned gardens. It thrives in almost any kind of soil or exposure. Stems 2 to 5 feet tall, with graceful, drooping foliage. Price: Each, 15c; 10 for \$1.20, postpaid.

FLAX

(*Linum Narbonense*.) This variety of flax is raised for the flowers. Are good bloomers. The flowers are of a nice blue and grow on long stems. Should be planted in every garden. Blooms June and July. Price: 15c each; 10 for \$1.20, postpaid.

HARDY FERNS

I offer only very hardy ferns, natives of Minnesota. They do well in shady and half shady places in the garden and park and are often used for growing close to houses in corners which are too dark for most plants. While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter. The hardy ferns do not make satisfactory house plants. Most ferns ripen up their leaves in the fall and remain dormant all winter, even under favorable conditions.

MAIDENHAIR FERN. (*Adiantum Pedatum*.) One to three feet high. Frond, forked at the summit of the slender, polished black stalk, the recurved branches bearing on one side several slender, spreading pinnate divisions; pinnae oblique, triangular oblong. Price: 40c each; 10 for \$3.50, by paid parcel post.

WOOD FERN. (*Aspidium Spinulosum*.) The plant varies greatly in height, breadth and way of holding itself. Sometimes the fronds stand 3 feet high and are broad and spreading. Again, they are tall, slender and somewhat erect. At its best it grows with almost tropical luxuriance and is a plant of rare beauty, its fronds having a certain feathery aspect. Price: 40c each; 10 for \$3.50, by paid parcel post.

CLAYTONIANA. (*Osmunda Claytoniana*.) A large cinnamon-colored fern, growing a crown. The fronds, when unfolding, are clothed with loose wool, soon becoming perfectly smooth. This kind will do well in dry, shady places or in the sun and will probably stand more abuse or neglect than any other fern. It ranks with the Ostrich fern in stately beauty, but is an altogether different type. Price: 50c each; 10 for \$4.50, postpaid.

OSTRICH FERN. (*Onoclea Struthiocterus*.) Grows in a crown 3 to 10 feet high. Fronds broadly lance shaped, once pinnate; pinnae divided into narrow, oblong segments which do not reach the midvein. Great plume-like frond of a rich green. This magnificent plant luxuriates on soil which is subject to an annual overflow. Its vase-like masses of foliage suggest the Cinnamon Fern, but the fertile fronds are dark green, while those of the Cinnamon Fern are golden brown. The Ostrich Fern does well under cultivation and it propagates sometimes by means of underground runners. Price: 45c each; 10 for \$4.00, by paid parcel post.

One each of the above 4 ferns: \$1.50; 5 each (25 in all) \$7.50, postpaid.

GAILLARDIA GRANDIFLORA

(Blanket Flower.)

Among the everblooming hardy plants there is none more showy or ornamental than this. Flowers borne in prodigal profusion from June to frost; useful for cut flowers. They are of gorgeous coloring, dark red-brown in center with bands of crimson orange and vermillion, meriting the popular title of "Aurora Flower." Height, 2 feet. I find this to be one of the best perennials in my garden. It is very hardy, needs little care, blooms continuously all summer, has long stems and therefore can be used in almost any bouquet. Those who wish flowers and have not much time to take care of them should plant Gaillardia. A good mate to Shasta Daisies. Price: For strong out-of-doors grown plants, 30c each; 10 for \$1.80, by paid parcel post.

HARDY CANDYTUFT. (*Iberis Simpervirens*.)

Most desirable dwarf plants, 5 to 10 in. high, with ever-green foliage, which is completely hidden with dense heads of flowers, early in the spring. Good border for flower beds or for rock plants. Price: 30c each; 10 for \$2.50, postpaid.

Foxglove. See Page 56.)

Gaillardia.

PERENNIAL PLANTS—(Continued)

GEUM

MRS. BRADSHAW. Brilliant, beautifully ruffled scarlet flowers, resembling carnations, on long slender, upright stems. 1½ feet. Blooms from June to September. **Price:** 25c each; 10 for \$2.00, postpaid.

HOLLYHOCKS

Among the very finest of old hardy garden plants, the Hollyhock still holds a proud place and may be termed one of the great flowers of July. It has the widest range of colors among tall garden plants. Flowers are very showy, produced in great abundance on long, towering spikes. Height 6 to 8 feet. Blooming period June to August. I have the **Double White**, **Double Dark Red**, **Double Pink**, **Double Maroon**, **Double Yellow**. They are very hardy and need no protection, but like good rich soil. It makes a good border background. Can be used as a screen for a fence or other unsightly places. **Price:** 17c each; 10 for \$1.50, postpaid.

LYTHRUM

ROSEA SUPERBUM. (Rose Loose Strife.) Large, compact spikes of deep rose colored flowers from June to September. Grows very bushy. Fine for bouquets. **Price:** 20c each; 10 for \$1.80, postpaid.

MALLOW MARVELS

Most Gorgeous Perennial Creation of the Twentieth Century.

The plants are perfectly hardy and grow from strong, fleshy roots to a height of 6 to 8 feet in one season. They seem to thrive in almost any soil, having a preference, however, for a moist rather than a dry situation. In the last days of July the blooms appear and continue until late fall. The huge flowers some of them measuring over 10 inches in diameter, come in the most gorgeous and brilliant shades of

crimson, white and pink. They seem to be immune from the attacks of insects or scale, and I have yet to find anyone who cannot be successful with them. In regard to their hardiness, I can only say that in the colder regions of Canada, they have withstood a temperature many degrees below zero without any protection. You can't make a mistake in getting the gorgeous Mallow Marvels. They are sure to please you, as they have thousands of others. I can supply them in pink, crimson, and white. I always put some short manure on my Mallow Marvel bed in the fall and then spade it early in the spring, as they like a very rich soil. **Price:** For heavy, strong roots, 35c each; 10 for \$3.00, by paid parcel post.

PLATYCODON. (Chinese Bellflower)

An extra good, very hardy and free flowering perennial. Grows 1½ to 2 feet high. Flowers are a lovely shade of blue and they come from June until October. I also have them in pure white. This is one of the most free flowering plants, and I cannot understand why it is not planted more. It grows well in sunny or shady places, almost in any soil, and does not need much attention. Useful for bouquets in a time when flowers are scarce. The price is low and you will get plenty of flowers the first season. **Price:** Either blue or white, 18c each; 10 for \$1.50, by paid parcel post.

PERENNIAL PEA LATHYRUS

These peas are perennial and come up again every spring. Vines grow very fast and flowers are similar to the Sweet Peas, but not as fragrant, white and pink. Quite hardy and easy to grow. **Price:** 20c each; 10 for \$1.80.

PHYSOTEGIA VIRGINICA

(False Dragon Head.)

The flowers of this plant are borne on dense spikes of purplish pink color, of very delicate but conspicuous beauty. The spikes are three to four feet high, with plenty of branches. I use them often in large bouquets. The plants are easily grown, increase freely and are very hardy, needing no protection here. Eight or ten of these planted in a group will give you a mass of cut flowers. Have the same plant with white flowers, otherwise just the same. **Price, mixed colors:** 18c each; 10 for \$1.50, by paid parcel post.

PYRETHRUM

Tall white. 2-3 feet. Flowers are large, with many long, narrow petals of glistening white. Large numbers of flowers on each branch or stem. **Price:** 20c each; 10 for \$1.80, postpaid.

Double Hollyhocks.

Geum.

PERENNIAL PLANTS—(Continued)

RUDBECKIA. (Golden Glow.)

A fine, hardy plant that should find a place in every garden. It will be found excellent for cut flower purposes. Plant attains a height of 4 to 6 feet and will produce hundreds of large blossoms, very double and of brilliant golden yellow, during August and September. **Price:** Very strong plants, each, 22c; 10 for \$2.00, by paid parcel post.

SALVIA

BLUE SAGE. Rocky Mountain species that grows 3 feet tall and produces pretty sky blue flowers in August and September. Exquisite for cutting; one of the finest plants for the border. Very hardy. **Price:** Each, 18c; 10 for \$1.50, postpaid.

SHASTA DAISY

Remarkably large, semi-double Daisies, 3 to 4 inches across and pure white, with petals in two or more rows about a golden center. The plant is extra vigorous and maintains a fine show of great flowers throughout the summer and autumn. A splendid border plant and of great value for cutting. My plants are strong, field grown and will bloom abundantly the first season. **Price:** Each 20c; 10 for \$1.80, by paid parcel post.

STOKESIA. (Stoke's Aster.)

This beautiful plant grows 1 to 2 feet high, and produces in great profusion Aster-like flowers from 4 to 5 inches across; it is of easy culture, succeeding in any open position, used as a cut flower and for planting in masses in the hardy border. **Price:** Each 20c; 10 for \$1.80, by paid parcel post.

VERONICA LONGIFLORA. (Speedwell)

An admirable species of border plants with various forms of growth, but alike in gorgeous showiness of bloom. Flowers are borne in long compact spikes of some shade of blue or white. Abundant during August to October. This variety has deep indigo blue flowers. **Price:** 25c each; 10 for \$2.00

VIOLA ODORATA**(SWEET SCENTED VIOLET.)**

This is the hardy kind that here in my garden needs little or no protection. Fine for a border for flower beds. A cool, somewhat shady place is best for them. It blooms early in the spring and again in the fall, when the weather gets cooler. Flowers are very fragrant. A dozen little flowers will scent a whole room. Needs little care, is easily transplanted and blooms very freely. **Price:** 15c each; 10 for \$1.30; 100 for \$10.00, by paid parcel post.

TRITOMA

FLAMING TORCH. 2 to 3 feet high. Dazzling scarlet, lower half tinged with rich orange. In the North the roots should be taken up in the fall. Blooms August to October. **Price:** Each, 20c; 10 for \$2.00, by paid parcel post.

TRAILING PERIWINKLE

(Vince Minor.) A hardy evergreen creeper, trailing close to the ground and forming a dense mat. Does well even under trees where grass will not grow. Useful for binding the soil on slopes or banks to prevent washing by rains. In Europe one sees them in cemeteries as borders for graves. The blue flowers contrast finely with the dark glossy green foliage. Hardy most everywhere. **Price:** 15c each; 10 for \$1.30.

YUCCA FILAMENTOSA. (Adam's Needle)

Tropical looking plant with long, narrow leaves; remains green the entire year. Grows in clumps and throws up a flower stalk 3 to 4 feet high, from which hang from 100 to 200 creamy white, bell shaped flowers. It blooms a long time. A fine plant for the lawn or cemetery. **Price:** Each, 25c; 10 for \$2.30, postpaid.

Shasta Daisies.
Vine on Wall, Boston Ivy.

LILIUM.**(THE LILY.)**

With a well selected collection, Lilliums may be had in bloom from June to October. They should be planted in the fall, from October 1, as long as the soil can be worked, and in spring until the first of May. Plant about 5 inches deep.

AURATUM. (Gold Banded Japan Lily.) Flowers are very large, broad white petals, thickly studded with crimson maroon, bright golden band through center of each petal. Stalks frequently have from 12 to 15 flowers of immense size. Large bulbs, each, 40c; 10 for \$3.50, postpaid.

LONGIFLORUM. (Gigantes.) A well-known variety, with snow white, trumpet shaped flowers that are very fragrant. Quite hardy and blooms freely in the open ground in June and July. Each, 40c; 10 for \$3.50, by paid parcel post.

(Lilium continued on next page.)

Veronica Longiflora. (Speedwell.)

PERENNIAL PLANTS—(Continued)

LILIUM—(Continued)

THE REGAL LILY. (*Lilium Regale* or *Myriophyllum*.) A novelty of rare production and wondrous beauty, achieved through the adventurous research and resourcefulness of one of our greatest plant collectors, who recently brought the original bulbs from the wilds of Northwestern China. Experiments prove this new Lily to be **hardier than most kinds**; so it is reasonable to expect that the glorious bloom which forces so easily for Easter time, may be available to the amateur for its delightful unfolding within his own home. The flowers are white, slightly suffused with pink; with a beautiful glow of canary yellow at center, which continues part way up the trumpet. Its perfume is exquisite; not oppressively heavy like some types, but the sweet refreshment of the Jasmine. In the garden, it should bloom early in July. I have raised them in pots and so had them in my house during winter in full bloom. **Price:** Large bulbs that will bloom first season, \$1.00, each, postpaid.

SPECIOSUM RUBRUM. Flowers white with crimson band on each petal. Large and very fragrant. Perfectly hardy. Grows 2 to 3 feet high. Blooms in August. Large bulbs, each, 40c; 10 for \$3.50, postpaid.

TIGER LILY. Perfectly hardy; easily grown Lily, with very large double flowers of rich orange color, spotted with black. Exceedingly pretty. Each, 22c; 10 for \$1.80, postpaid.

DOUBLE TIGER LILIES. (*Tigrinum Flora Plewna*.) Same as above, but the flowers are double. Price, each, 30c; 10 for \$2.50, postpaid.

LILIUM UMBELATUM GRANDIFLORA. Tall growing, upright, beautiful bell shaped flowers of coppery orange, sometimes slightly spotted. **Price:** 25c each; 10 for \$2.20, postpaid.

UMBELATUM ERECTUM. Flowers are orange yellow; otherwise about the same as above. **Price:** 25c each; 10 for \$2.20, postpaid.

CALLAS

SPOTTED LEAF CALLA. *Ellotiana*. Leaves dark green with creamy white spots; flowers are a rich, lustrous golden yellow. The largest of the yellow blooming Callas, almost as large as the white. With a little covering, I keep them over winter in my garden. Also a good house plant for winter blooming. **Price:** For large bulbs, 35c each; 3 for 90c, postpaid.

WHITE CALLA. I can furnish White Callas in the fall only. Send for Fall Catalog; ready in September.

HEMEROCALLIS. (Day Lilies.)

A well known family of plants resembling lilies in character and bloom, very sweet scented and bearing great numbers of yellow and brown flowers during long periods of summer. Foliage is similar to the Iris.

HEMEROCALLIS FLAVA. **Lemon Lily.** These are among the oldest and best loved of garden plants. Very hardy and persisting; they need no winter protection and thrive in any good soil, preferring, however, a rich, moist loam. For garden borders and waterside planting, few perennials are more satisfactory. A good clump of this fine old lily, when blooming in June and July, lights up the border superbly with many tall stems of fragrant, waxen, clear yellow blooms, grows about 2 feet high. **Price:** 15c each; 10 for \$1.20, by parcel post.

FULVA. **Brown Day Lily.** Same as Lemon Lilies, except that the flowers are of a reddish-brown color with dark red shading. Very pretty. **Price:** 20c each; 10 for \$1.80, by paid parcel post.

THUNBERGI. In colors, shape of flower, about the same as Fulva, but blooms 5 or 6 weeks later, when the Lemon Lily is through blooming. **Price:** 25c each; 10 for \$2.20, postpaid.

DWARF IRIS

Grow about 10-12 inches high, are, therefore, suitable for borders of flower beds. The flowers are dark blue and come early in the spring, much sooner than the larger Iris. **Price:** 10c each; 10 for 90c; 100 for \$8.00.

I received my trees and thank you very much for the nice trees I received of you. If I need more trees you will get my order.

John Snyder, Geneva, Ind.

Longiflorum Lily. (See Page 59.)

Siberian Iris. (See Page 61.)

Yucca. (See Page 59.)

PERENNIAL PLANTS

(Continued.)

IRIS, FLUER DE LIS.

(IRIS GERMANICA.)

The true "Fleur-de-Lis," the national flower of France. They are perfectly hardy, thrive anywhere, grow and bloom luxuriantly, particularly if plentifully supplied with water. Plants well established produce 50 to 100 spikes of bloom. In beauty the flowers rival the finest of orchids. The plant grows 18 to 24 inches high. I offer the following selected varieties:

FLORENTINA ALBA. Extremely free flowering, and very beautiful, white, sweet scented blossoms. One of the best.

HONORABILIS. Fine yellow with lower petals of maroon. An odd but very pretty Iris.

FLICATA. Dark purple, lower petals lilac. The best dark colored Iris.

CELESTE. A soft shade of light blue, changing into lavender. A fine and beautiful shade.

MAD. CHEREAU. White, elegantly frilled, with a wide border of clear blue; one of the most charming sorts. Price of any of the above varieties: 12c each; 10 for \$1.00; 100 for \$8.00, by paid parcel post.

HER MAJESTY. (New.) The best pink Iris with yellow center. Free bloomer. I think this is one of the prettiest of the Iris. Price: 15c each; 10 for \$1.20, by paid parcel post.

CHOICE MIXED VARIETIES. Each 10c; 10 for 70c; 100 for \$6.00, by paid parcel post.

IRIS DALMATICA. One of the most beautiful of all the Irises. Exquisite shade of lavender blue. Perfectly hardy, strong grower and very free flowering. 12c each; 10 for \$1.00; 100 for \$8.00, postpaid.

SIBERIAN
IRIS

(Iris Siberica.)

SUPERBA.

Tall and slender growing, with flowers like those of the German Iris in structure, but

smaller and much more numerous. The plant forms clumps and blooms so freely that its deep blue blossoms give solid color effects. Hardy, thrives in almost any soil. Each 12c; 10 for \$1.00, postpaid.

SNOW QUEEN. Flowers are pure white, good size and well formed and come as freely as the Blue Siberian. Leaves are more dainty than with Iris Germanica.

Price: 12c each; 10 for \$1.00, postpaid.

MIXED IRIS. These are all good colors. Plants of which the labels have been lost in the nursery. Price: 10 for 75c; 100 for \$6.00.

JAPANESE IRIS. (Iris Kaempferi.)

Finest of all the Iris family. The flowers are of immense size, from 6 to 8 inches in diameter, and of the most beautiful, delicate shades. Are perfectly hardy and will flower in profusion during June or July. A well established plant gives a dozen or more flower stalks 2 to 3 feet high, each stalk producing 2 to 4 enormous blooms. These plants prefer a cool, moist place, but do well in most any location. I offer some of the finest varieties in cultivation. I have them in best color mixture. Price: 30c each; 3 for 80c; 10 for \$2.50, by paid parcel post.

I am sending you a photograph of a Dwarf Duchess pear tree, which bore six pears weighing $\frac{1}{2}$ pound each, second year after setting out. It was ordered from your nursery. I wish to enter the photograph in your picture contest.

J. J. Shorney, Narka, Kansas.

The grape vines you sent us last year all grew just fine. We were well pleased.
A. E. Siegfried, Mo. Valley, Iowa.

Paeony. Rosea Grandiflora. See Page 62.

PERENNIAL PLANTS—(Continued)

PAEONIES

Few hardy perennials are so suited to any position in the garden or lawn as the Paeony. The gorgeous display of flowers is very effective, rivaling the Rose in beauty. They are also well suited for massing in beds by themselves. A good, rich, deep soil and sunny location, suits them best, but they will thrive in almost any soil. My plants are field grown, strong and well rooted, with 3 or 4 eyes. In comparing prices with other growers, please bear this in mind. We offer the following selected varieties, which we consider the best for general planting. Plant Paeonies this fall and they will bloom for you next spring.

FESTIVA MAXIMA. 30 inches. About the largest and undoubtedly the most popular Paeony of them all. High built flowers borne on long, stiff stems; the purest white the inner petals slightly tipped with red. A vigorous grower and early bloomer. Always in bloom by Decoration day. **Price:** 50c each; 10 for \$4.50, by paid parcel post.

FELIX CROUSSE. Red. 30 inches. Large, compact, globular bomb. Large guard petals. Brilliant ruby red, without any shades of violet or purple. Fragrant. Strong grower. Free bloomer. The most dependable cut flower. **Price:** 70c each; 3 for \$2.00; 10 for \$6.00, postpaid.

FRANCIS ORTEGAT. Crimson. An old favorite. Rich purplish crimson, with very pretty golden center. Good bloomer. **Price:** 50c each; 10 for \$4.50, by paid parcel post.

DUCHESS DE NEMOURS. White. Large and full, the most nearly pure white. **Price:** 50c each; 10 for \$4.50, by paid parcel post.

LA SUBLIME. Crimson. A favorite wherever known. Rich, purplish crimson with very pretty golden center. A profuse bloomer. **Price:** 55c; 10 for \$5.00, postpaid.

MADAME DE VERNEVILLE. Creamy white. Received the first prize at the Paeony exhibition at St. Paul, Minn., last summer. Medium sized, globular flower, petals crinkly and semi-transparent. Creamy white throughout, flaked purple at center. **Price:** 55c each; 10 for \$5.00, postpaid.

PLUTARCH RED. A very good, large flowered red Paeony. Mid-season. You will be pleased with it. **Price:** 55c each; 10 for \$5.00, postpaid.

EDULIS SUPERBA. Mauve Pink. One of our earliest variety, always open by Decoration day. Color is a bright, clear mauve-pink, with silvery reflex. Flowers are of large size and very fragrant. **Price:** 60c each; 10 for \$5.50, postpaid.

ROSEA GRANDIFLOREA. Rose pink. A large flower of rose pink color. One of the best of the pink varieties. **Price:** 55c each; 10 for \$5.00, by paid parcel post.

COUNT DE MANTEUIL. Very large, double flowers of dark rose color. Grows very strong and thrifty and blooms more freely than most other varieties. **Price:** 55c each; 10 for \$5.00, postpaid.

HARDY PHLOXES

The ease with which they are cultivated, season of blooming, combined with the varied and beautiful coloring, make them particularly valuable for garden planting. In bloom from June till late autumn. Phloxes are very effective, either as single specimens, in small groups or large beds on the lawn. They produce a beautiful and harmonious contrast when massed against a background of shrubbery. I offer a carefully selected collection, all field grown plants, that will bloom the same season as transplanted.

FRAULEIN VON LASSBURG. White. The purest snow white. Flowers larger than any other white sort. Blooms early, tall, extra fine. Each, 20c; 10 for \$1.80, by paid parcel post.

MISS LINGARD. White. The best Phlox in cultivation. It produces immense heads of beautiful white flowers in June and blooms again in September and October. Splendid foliage and habit, and free

from attacks of red spider. Better results will be had if old flowers are cut off. **Price:** 25c each; 10 for \$2.00, by paid parcel post.

SIR EDWIN LANDSEER. Bright, glowing crimson. The best red. Of robust, tall growth, and a free bloomer. **Price:** Each, 23c; 10 for \$2.00, by paid parcel post.

BRIDESMAID. White, with crimson eye. Very fine trusses. One of the best. Dwarf. Suitable in front of taller varieties. **Price:** 25c each; 10 for \$2.00.

ISABEY. Salmon pink, a very good variety and a good, constant bloomer. **Price:** 22c each; 10 for \$2.00, by paid parcel post.

INDEPENDENCE. White. A very good white variety, with extra large clusters of flowers. Blooms profusely, 2 feet high. **Price:** 20c each; 10 for \$1.80, by paid parcel post.

LAVENDER. This variety we happened to get from seed. It comes in all shades of lavender from very light to dark, but all are pure lavender. **Price:** 15c each; 10 for \$1.30, postpaid.

RHEINLANDER. A new variety of rare beauty. A rare shade of salmon pink with claret red eye. Flowers and panicles are very large and come in great profusion. **Price:** 25c each; 10 for \$2.30, postpaid.

PHLOX SUBLATA. Pink. Creeping plants with evergreen, moss-like foliage. When in bloom almost completely hidden under a blanket of rose-colored flowers in early spring (here in May), often blooming again through the summer. Height of plant about 6 in. **Price:** 15c each; 10 for \$1.00, postpaid.

PHLOX SUBLATA. White. See page 63.

Fraulein von Lassburg Phlox.

PERENNIAL PLANTS—HARDY PHLOXES—(Continued)

PHLOX SUBLATA. White. Same as Pink Sublata, the flowers, though, are white. Very pretty, especially when mixed with the pink. Price: 15c each; 10 for \$1.25, by paid parcel post.

PHLOX MIXED VARIETIES. I have some Phlox of which the names have been lost. All good kinds. Price: 15c each; 10 for \$1.50, postpaid.

SUMMER BLOOMING BULBS

Bulbs for spring planting require scarcely any care and quickly make a gorgeous display. The bulbs can be kept over winter, and year after year will return a hundred fold in beauty and satisfaction at the trifling expense of the original cost. All varieties here offered I have thoroughly tried in my garden and can recommend them. In the fall the bulbs should be dug after one or two good frosts and stored in a dry, frost-proof room or cellar.

DAHLIAS

These showy and pretty flowers are becoming very popular and justly so. The Dahlia is one of the showiest of all fall flowers, commencing to bloom in July and continuing until frost.

NEW AND RARE DAHLIAS

MADONNA. Magnificent Decorative Dahlia. A perfect wonder; its remarkable qualities being beautiful shape, excellent cut-flower variety, and one of the most satisfactory in the garden. The flowers are borne in a miraculous profusion upon long graceful stems of wiry stiffness, making it one of the most desirable. In color a very beautiful white, very slightly tinted with a most delicate shade of lavender-pink. The form is perfectly original, each petal curling and twisting in a very pleasing manner. 50c each; 3 for \$1.30.

MINA BURGLE. This new introduction is one of the finest varieties to date—a champion variety, producing flowers of gigantic size and remarkable beauty; the best in existence. Color, a glowing and most brilliant scarlet. The flowers are of perfect Decorative type and are borne upon long, wiry stems well above the foliage. Attracts universal attention. 50c each; 3 for \$1.30.

MRS. BOWEN TUFTS. This creation is the finest of my new Paeony-flowered Dahlias, having gigantic, deep rosy-purple blossoms, which are produced well above the foliage upon long, graceful stems. The habit of the plant is excellent, flower stems being long and the bushes tall and exceptionally sturdy. 50c each; 3 for \$1.30.

BIANCA. (Hybrid.) A new Cactus Dahlia of large size and splendid form. Coloring is beautiful rose-lilac, with white shadings and bloom is held perfectly erect on strong, stiff stems. Free flowering. One of the most satisfactory garden varieties and one I can highly recommend. An early and continuous bloomer. Price: \$1.00 each; 3 for \$2.70.

LATONA. (Hornsveld.) New Holland Paeony-flowered Dahlia. An unusual blending of orange, buff and yellow. Flowers are nearly full to the center, and produced freely, upon good stems. Price: \$1.00 each; 3 for \$2.70.

MAUDE ADAMS. (Alexander.) Ideal new show Dahlia. This wonderful introduction is unsurpassed in quality in every respect; in reality a model of perfection. I cannot speak too highly of this variety. The color is a pure snowy white, very effectively overlaid, clear delicate pink. Undoubtedly one of the finest of the Show type. Price: 50c each; 3 for \$1.35.

CACTUS DAHLIAS

EUREKA. Dark purple. This variety has all the good qualities of the Dahlia, being properly named. Color, very deep purple. Petals are long, straight and tightly quilled. 20c each; 3 for 50c.

J. H. JACKSON. Black. The finest black Cactus Dahlia in existence. An exceptionally satisfactory all-round Dahlia; one of the most prominent for garden decoration, superb as a cut flower variety and equally good as an exhibition flower. Color, a perfectly gorgeous, deep velvety, blackish-maroon. Gigantic in size. Every Dahlia lover should grow this variety. 30c each; 3 for 75c.

(Cactus Dahlias continued on next page.)

Madonna. Decorative Dahlia.

Pearl de Lyon. Cactus Dahlia. See Page 64.

SUMMER BLOOMING BULBS—(Continued)

CACTUS DAHLIAS—(Continued.)

KRIEMHILDE. (Hybrid.) Color, flesh delicate pink shading to white in the center; very late flowering. 25c each; 3 for 60c.

PEARL DE LYON. White (Hybrid.) A pure white exhibition variety of great value. Petals fringed or nicked, giving unique appearance. 30c each; 3 for 75c.

PRINCE OF ORANGE. Old Gold. One of the most attractive varieties. A rich shade of old gold at the outer petals with a bright yellow center; very showy. 30c each; 3 for 80c postpaid.

SHOW AND DECORATIVE DAHLIAS

CUBAN GIANT, or DR. J. P. KIRKLAND. Crimson. Dark velvety crimson, large. Stems long and wiry. Plants are very tall and sturdy. 25c each; 3 for 60c.

EMPRESS OF AUSTRALIA. Yellow. A very reliable variety. The color is a pure yellow, slightly tipped a reddish-brown. Of good size and habit; free bloomer. 25c each; 3 for 65c.

JACK ROSE. Pink. The identical shade of the rose with the same name. This variety is exceedingly free, carrying fairly large flowers on very erect stems in great abundance; flowers early, and during the hot weather the color is likely to burn somewhat. 25c each; 3 for 65c.

ROBERT BLOOMFIELD. Pure white. Tall grower. 20c each; 3 for 50c.

SOUVENIR DE GUSTAVE DOAZON. Orange red. This variety is a good comparison to the "Sunflower." It is the largest Dahlia in existence. The color is a pleasing shade of orange-red. Flowers are full to the center and often measure 9 inches and over in diameter; they can be forced to measure over 12 inches. The plant is a very tall, vigorous grower with heavy, dark, glossy green foliage and a remarkable constitution. Very long stems of pleasing stiff-upright type. Should be in every garden. 30c each; 3 for 75c.

FRANK A. WALKER. Alexander's Decorative Seedling. Expressly named for Mr. Frank A. Walker of Stoneham, Mass., in compliment to his intense love of Dahlias. A charming shade of deep lavender-pink. For garden decoration or for cut flowers this variety is exceptionally good, having long stems and producing flowers in great abundance. This Dahlia should be in every garden. 35c each; 3 for 90c.

STRADELLA. Beautiful deep purple crimson. Exceptionally free-flowering. Stems long and wiry. One of the finest to date. 20c each; 3 for 50c.

VIVIAN. Rose Violet. A great favorite which received the admiration of everyone who saw its wonderful flowers, the color being white, effectively edged rose-violet. An extremely wonderful blending of color possessed only by the rare novelties. One of our champions and a variety worthy of the highest words of praise. 30c each; 3 for 80c.

COLLARETTE DAHLIAS

ACHIEVEMENT. This phenomenal creation is the largest Collarette Dahlia in existence—a perfect wonder, especially distinguished for its perfection and unsurpassing qualities. The flower is a clear, rich velvety maroon; collarette, a beautiful snowy white, very daintily overlaid with a delicate shade of pinkish-crimson. The remarkable contrast of the above combination of color, together with its ideal form and profusion of flowers, secures for this variety a supreme place in the Dahlia world. 35c each; 3 for 90c.

MAURICE RIVOIRE. French Collarette Dahlia. Of sterling quality. The flowers are produced in great profusion on long, graceful stems, well above the foliage. The flower is a gorgeous, rich crimson with pure white collarette of short, well formed petals, perfectly arranged around the rich golden-yellow center. One of the finest novelties. 25c each; 3 for 65c.

CANNAS

The grandest of all bedding plants. Of quick growth and tropical appearance. Throughout the summer they present a mass of gorgeous colors until withered by frost in the fall. I give the height of the plants right after the name. Cannas need a good deal of water and a liberal dose of liquid manure should be applied from time to time. Never let the bed get weedy or baked hard.

HOW TO PLANT CANNAS

I sell dormant roots. These can be started in 4 inch pots in the house in March and then transplanted in the bed in May, after danger of any frost is over. The roots can also be set in the bed in May, after the ground gets warm. If bulbs are planted too early, they are very apt to rot, especially if the ground should be wet and cold. Nothing is gained by too early planting. Do not set them too

deep; the eye should show a little through the ground when done. Plant in good rich garden soil, mixed with one-half of old rotted stable manure. Set them about 18 inches each way. Water sparingly the first two weeks after planting. After plants begin to grow good, water liberally.

FLAMBEAU. 6 feet. I have had them eight feet in my garden. Very vigorous, a strong grower, and exceptionally free bloomer. Flowers are very large, often six inches in diameter; are of a peculiar salmon red or reddish yellow color, with a gold colored narrow border around the outside of the petals. A bed of about 40 plants in my garden was admired by everybody who saw it. One of the very best Cannas I have seen. I can recommend it to all my customers. I am sure this Canna will please you. **Price:** 22c each; 10 for \$2.00, by parcel post.

A bed of Flambeau Cannas in my garden, with a row of Pennisetum RUEPPelianum Ornamental Grass (page 65 in catalog) on the outside. This bed is 12 feet in diameter and took 50 Cannas and 30 Pennisetum.

SUMMER BLOOMING BULBS—CANNAS—(Continued)

BURBANK. About 3 feet. This and the Austria are very much alike. Both are really half way between Orchid and truss Cannas. The color is a pure, strong canary yellow with some red spots in throat, a beautiful color. The flower is often four to five inches across and they are profuse bloomers. **Price:** Each, 15c; 10 for \$1.20 by parcel post.

KING HUMBERT. 5 feet. Orchid flowering. Its flowers measure six inches in diameter, produced in gigantic trusses, a brilliant orange scarlet, with bright red markings; foliage broad and massive, of a rich coppery bronze. One of the very best. **Price:** Each 18c; 10 for \$1.50, by parcel post.

YELLOW KING HUMBERT. 4-5 feet. New, about the same as King Humbert, only that the flowers bloom yellow and the leaves are green. Often the flower is half yellow and half red and even part of the leaves come red on such a stalk. **Price:** Each, 22c; 10 for \$2.00 by parcel post.

EUREKA. 5 feet. So far the very best white Canna I have seen. Large flowers, almost pure white, and very profuse bloomer. Very pretty in a bed with red Cannas. **Price:** 20c each; 10 for \$1.80.

JULIUS KOCH. 3-4 feet. Large broad bunches of brilliant blood red flowers. One of the very best low growing red Cannas. **Price:** 18c each; 10 for \$1.50, by parcel post.

ROSEA GIGANTEA. 3½ feet. Giant flowers of soft rose to carmine pink. This Canna was used in a large bed in front of the White House in Washington. **Price:** 25c each; 10 for \$2.00.

OLYMPIC. 5 feet. Rich oriental red, with center shaded lighter red and dappled carmine. Large individual blossoms that make heads which are simply immense. I tried this Canna for the first time two years ago and used it considerably in making large bouquets. It is one of the best in my collection. **Price:** 50c each; 3 for \$1.25 by parcel post.

RUBIN. 3 feet high. Very dark bronze foliage, surmounted by shapely trusses of large flowers, intense ruby-red, with small yellow border. Makes an ideal bed, planted alone. **Price:** 18c each; 10 for \$1.50.

WYOMING. 7 feet. A beautiful new variety, with rich purplish bronze foliage. Flowers are large as King Humbert, and of good substance; bright orange, slightly rimmed and flaked with rose. 20c each; 10 for \$1.70.

VENUS. 4-5 feet. An exceedingly beautiful variety, at once the most delicate in coloring and texture, and as vigorous and long seasoned as any Canna grown. Long, erect stems bear trusses of large size, perfect form and ever clean freshness. The large, oval petals are exquisitely variegated; warm rose-pink, mottled near center, and edged with creamy white. **Price:** 20c each; 10 for \$1.60, postpaid.

MRS. ALFRED F. CONARD. 3-4 feet. The prettiest of all salmon or rose pink Cannas. Many people say if they could have only one variety of Cannas, they would take Mrs. A. F. Conard. Green leaves, beautifully rounded petals and shaped flowers and of such good substance that they keep longer than most varieties as cut flowers. **Price:** 30c each; 10 for \$2.70, by parcel post.

FIREBIRD. 4-5 feet. This is by all means the very best of the red-flowered, green leaved Cannas today. Flowers are borne in immense trusses on strong stalks, well above the leaves. They are of splendid form, round and shapely. **Price:** 25c each; 10 for \$2.00.

GLADIOLORA. 3-4 feet. Remarkable on account of the unusual shape of its flowers which look like a Gladioli; color, crimson changing to carmine-rose, with an irregular edge of gold. **Price:** 20c each; 10 for \$1.80. All prices of Cannas postpaid.

HOW TO ARRANGE CANNAS IN A CIRCULAR BED.

Plant about 18 in. apart. For circular beds the highest growing plants must be placed in the middle, then the medium sized and last the small ones.

6-ft. bed: Middle, 1; 1st row, 6; 2nd row, 10 plants.

8-ft. bed: Middle, 3; 1st row, 8; 2nd row, 15 plants.

10-ft. bed: Middle, 7; 1st row, 12; 2nd row, 20 plants.

The last row can be planted to *Pennisetum Rueppelianum*, same as on the picture on page 64.

PENNISETUM RUEPPELIANUM is not perennial and must be raised from seed each spring. We sow early in small pots and can furnish good strong plants. **Price:** 15c each; 10 for \$1.00, by parcel post.

King Humbert.

SUMMER BLOOMING BULBS—(Continued)

GLADIOLUS

The Gladioli is the most attractive of all summer flowering bulbs and deserves a place in every garden, as it is sure to do well with little care. For best results they should have a sunny position and light, sandy soil. Flowers are of almost every desirable color. By cutting the spikes when two or three of the flowers are open and placing them in water, the entire spike will open beautifully. Plant bulbs in April or May for early, and late June for fall blooming.

WAR. (See picture on inside cover page.) Considered by many the best commercial blood-red to date. Its flowers are of immense size in long spikes, and borne freely; late. 20c each; 10 for \$1.80, postpaid.

NIAGARA. (See picture on inside cover page.) Of American character, but somewhat larger; rich cream color deepening to canary yellow on lower petals. A faint carmine blush at tips of petals and streak at throat, with purple stamens and carmine stigmas, make a lovely combination. Flowers are on tall stems, fine for cut flowers. Price: 15c each; 10 for \$1.20, postpaid.

PANAMA. A novelty of great value. Color a lovely pink, flowers are large and come very profusely. Without question, one of the best of the Gladiolus. Price: 15c each; 10 for \$1.20, postpaid.

AMERICA. (See picture on inside cover page.) Its color is a most beautiful soft pink, very much like the "Enchantress" Carnation. The individual flowers are very large and massive. There is no other flower which can excel it in effectiveness. Price: 10c each; 10 for 80c.

BARON HULOT. (See picture on inside cover page.) Rich, deep indigo blue. Besides being the only blue Gladioli known, it is a really fine sort. Price: 15c each; 10 for \$1.20, postpaid.

GLOEY OF HOLLAND. White, with light purple stamens. Blooms very early and is fine for forcing in the home or in greenhouses. Price: 15c each; 10 for \$1.20, postpaid.

WILLY WIGMAN. Light yellow with dark blotch. Very unusual color and blooms freely. Price: 15c each; 10 for \$1.20, postpaid.

KUNDERI "GLORY." With "Ruffled Petals." Broadly expanded wide open flowers, paired by two's, all face in the same direction and are carried on straight, stout stalks, fully 3½ feet in height. From 3 to 8 of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted. The color is delicate cream pink, with a most attractive crimson strip in the center of each lower petal, the shade of which is unique in Gladioli. The ruffling of the petals in this new strain has attracted much attention the world over. Price: 15c each; 10 for \$1.20, by paid parcel post.

PRINCE OF WALES. A seedling of Halley, which it somewhat resembles, but is even earlier to bloom; and on account of its attractive, nebulous orange color has become equally popular for early cutting. Price: 15c each; 10 for \$1.20, postpaid.

PRINCEPS. The \$1,000 Gladioli. Its wonderful size of flowers, perfect shape, brilliant coloring, and artistic form of flower spike are each so notably an improvement over all other varieties that all place it in the front rank. Flowers are 5 to 7 in., broad, petals wide and rounded, forming an almost circular flower. The color is brilliant crimson, carrying mostly three broad, white blotches on the lower petals. Spikes 4 feet in height; produce 12 to 15 flowers. Price: 12c each; 10 for \$1.00 by paid parcel post.

GLADIOLI, CHILDSII MIXED, FIRST SIZE.

These outrank most other Gladioli in size of spike, size of flower, vigor, varied and magnificent coloring and freedom of bloom. Every color among Gladioli is represented and the form of both flowers and spikes is considered perfect. In the colors, a number of blues, smoky grays

and purple-blacks appear, varied with pink, crimson, yellow, etc. Price: 3 for 18c; 50c per doz.; \$4.50 per 100 p'paid.

Princeps Gladiolus.

Caladium. See Page 66.

CALADIUM. Esculentum.

ELEPHANT'S EAR. A splendid tropical appearing plant usually growing 4 to 5 feet high. Very showy leaves, often growing 3 feet long. Of easy culture. They are used to a great extent for large beds, together with Cannas, also as single specimens or as groups on the lawn and garden, this beautiful plant takes a prominent place. Will grow in any soil, but to get the best results, they should have plenty of water and good, rich soil. When at its best, stands 6 to 7 feet high, with bright green leaves 3 to 4 feet long and 2½ feet wide.

EXTRA LARGE SIZE BULBS. Each, 25c; 3 for 60c; 10 for \$1.90.

LARGE SIZE BULBS. Each 20c; 3 for 45c; 10 for \$1.30.

TUBEROSES

EXCELSIOR PEARL. This variety is characterized by its short robust stem and long spikes of flowers, perfectly double and twice the size of the common Tuberoses. Spikes frequently bear 30 to 50 flowers. They are always wax-like and pure white. Large bulbs, each 5c; per dozen, 40c; 100 for \$3.00 by paid parcel post.

SUMMER HYACINTH

The flower stems grow 3 to 4 feet high and are loaded with very pretty, drooping bell-shaped flowers of ivory white. The plant will grow well in dry soils. A splendid bulb to plant in the perennial border, as it is hardy and need not be taken up in the fall. Plant in rear of bed on account of its tall growth. Each 10c; doz. \$1.00, by paid parcel post.

Make the Home More Beautiful

Too much cannot be said in regard to the planting of Tulips, Hyacinths, Narcissus, and other early spring blooming bulbs. I do not think there are any flowers which are enjoyed more than these. They are very easy of culture and will reward you handsomely for the attention you show them. Plant some bulbs this fall sure and you will feel more than repaid, for they will furnish you with beautiful cut flowers in the spring as well as beautify your home surroundings most effectively. Can also be grown indoors over winter. They will keep on blooming year after year—some varieties getting more beautiful with age.

Early in the spring, just as soon as the snow is gone and before the grass begins to green, you will find the Crocus in their beautiful shades of yellow,

purple, and white peeping through the ground. They bloom freely two to three weeks. Crocus do not need transplanting and will bloom more year after year.

A little later comes the Narcissus, Daffodils and Hyacinths in their many beautiful colors. Early flowering tulips follow close, and last of all come the gorgeous Giant Darwin Tulips which begin to bloom about the time all other bulbs are through. You are sure to have some cut flowers for decorating purposes when Memorial Day comes again if you plant this fall.

When you have made your selection of spring blooming bulbs do not forget that they should be planted in the fall—October or November, or two or three weeks before the ground freezes.

WINTER BLOOMING BULBS.

For fall planting, either for house culture or early spring blooming in the garden, I offer a large assortment of choice **Holland Bulbs**, my own importation, such as **Hyacinths, Tulips, Narcissus, Crocus, Snow-**

drops, Oxalis, Jonquils, etc. Also have a choice stock of **Roman Hyacinths, Freesias, Japanese Lilies, Star of Bethlehem, Chinese Sacred Lilies, etc.** Write for **Illustrated Price List**, ready September 1st.

Residence of Mr. J. Young.
After planting.—A home.

Before planting —A house.

In your catalog I noticed a request for photos of trees and shrubs bought from you. Am therefore sending you a few pictures. All the trees and shrubs were planted in 1915 and later. I think they have made a fine growth. Enclosed also find a picture of my house before any planting was done.

James Young. Keokuk, Iowa.

Parcel Post **TREES AND PLANTS BY MAIL** Parcel Post**TREES OF SIZES LARGER THAN QUOTED BELOW CANNOT BE SENT BY MAIL.**

I can now send trees and plants of suitable sizes by Parcel Post, and they will be delivered right at your door. No need of going to town after them, and I know that they will not cost you more than half as much as if you buy of an agent. **I pay postage on all mail packages, when prices are figured as quoted below.** The prices here below are for goods delivered at your door.

Trees will be well rooted, sound and healthy, and of 2 to 3 or 3 to 4 feet sizes, so you will know exactly what you will get. Larger trees cannot go by parcel post, as the circumference and length of a package cannot exceed seven feet. Always use prices given below if you wish trees by parcel post.

SEED DEPARTMENT

This Department is under the management of my sons, Ernest and Arthur Sonderegger, who have been raised in my seed business, and both have worked in large seed establishments in Europe. All orders entrusted to us will be conscientiously and promptly filled and dispatched.

On the following pages I list the standard varieties, also newer sorts of merit, in **Vegetable, Flower and Farm Seeds**. All varieties are reliable and have my recommendation, and I describe them as near true as is possible.

ORDER YOUR SEEDS EARLY. Some varieties of Vegetable and Flower Seeds are more scarce this year and while in most varieties I have a large stock on hand, I would advise all my customers to order early; the demand for good seeds with good germination will be unusually large. I want to supply all my customers, and can do it if you will just send me your orders early.

I will be prepared to fill seed orders when this catalog reaches you, and I will be greatly obliged to my customers if they would order early to avoid the rush, which always comes late in the Spring. Send in your combined orders of trees, seeds and plants, and I will send seeds at once and trees and plants when time for planting comes in your locality. You will find two places on the order sheet in my catalog one for trees and plants, and one for seeds. You will help me very much and there will be less delay in filling orders, if you use spaces as indicated.

My seeds are not grown on a basis of cheapness but of quality, yet I aim to quote every item at reasonable prices, being satisfied with a small percentage of profit. It takes great care, costs much time and money to produce my **Selected Stock of Seeds**—such seeds cannot be sold cheaply. I do not handle cheap seeds, and I guarantee all seeds which I carry in stock to comply with the laws of Nebraska in regard to purity and germination.

This catalog is intended to appeal to those seed buyers who want first-class stock at lowest prices consistent with such stock, buyers who can appreciate honest descriptions and illustrations, and who expect to receive seed just as represented.

Prices. Although many kinds of good seeds are more scarce this season, my prices are no higher than last year. I have made them as low as possible and assure my customers that I am in no way taking advantage of them.

SEEDS BY PARCEL POST. I deliver postpaid by parcel post or express any seeds offered in my catalog "By Paid Parcel Post."

NOTICE. Seeds are now included in the parcel post system. As I am located in the center of the U. S., I can deliver packages by parcel post much cheaper than any eastern seed house.

The new parcel post rates are much cheaper than the old rate of 8 cents per lb. The weight of packages for local and first, second and third zones has also been increased from 11 lbs. to 70 lbs. and for fourth, fifth, sixth, seventh and eighth zones has been increased to 50 lbs. In this way, much larger packages at a much less cost can be delivered free at your door. It will save you many trips to the express or freight office.

FOREIGN ORDERS. To my customers in Australia, New Zealand, Mexico and other countries, I will ship Vegetable and Flower Seeds in packets, ounces and pounds, at mailing prices, provided the order amounts to \$1.00 or more. For all Canada orders by mail, the amount of 8 cents per pound must be added to my postpaid prices.

SEEDS BY EXPRESS OR FREIGHT means that I will deliver them to express or railroads here, and the purchaser pays all transportation charges on receipt of the goods.

I send \$10.00 orders of trees and plants freight prepaid, but cannot do so on seeds, except in packets, ounces and pounds at mailing prices.

MARKET GARDENERS' trade is especially invited. I can please you, and all I ask is to give me a trial. Special Wholesale Price List for Market Gardeners is sent free to all who buy bulk seeds in large quantities.

GUARANTEE ON SEEDS. While I exercise the greatest diligence and care to have all my seeds true to label and of best quality. I wish it understood that I give no warranty, express or implied, as to description, quality, productiveness or any other matter, of any seeds I send out, and will not in any way be responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once. Subject to the above conditions, I make sales at the very moderate prices at which I sell my goods.

Sonderegger Nurseries & Seed House, Beatrice, Nebr.

\$1.00

SONDEREGGER'S VEGETABLE COLLECTION

\$1.00

A collection which I plant in my garden, with the exception of Beebe's Tomato. My seed crop of this variety is very short, so cannot put it in this collection.

- 2 oz. Beans, Fordhook Favorite.
- 2 oz. Beans, Sonderegger's Improved Black Wax.
- 2 oz. Pole Beans, Old Homestead or Kentucky Wonder.
- 1 pkt. Beets, Sonderegger's Early Blood Turnip.
- 1 pkt. Cabbage, Sonderegger's Improved Danish Ballhead.
- 1 pkt. Chinese or Celery Cabbage.
- 1 pkt. Carrot, Sonderegger's Half Long.
- 1 pkt. Sweet Corn, Sonderegger's Golden.
- ¼ lb. Sweet Corn, Early Evergreen.

- 1 pkt. Cucumber, Improved Long Green.
- 1 pkt. Lettuce, Sonderegger's Extra Early Head.
- 1 pkt. Onion, Large Red Wethersfield.
- 1 pkt. Onion, Sonderegger's Prizetaker.
- 2 oz. Peas, Alaska.
- 2 oz. Peas, American Wonder.
- 1 pkt. Pumpkin, Large Sweet Cheese.
- ¼ lb. Pop Corn, White Rice.
- 1 pkt. Radish, Sonderegger's Icicle.
- 1 pkt. Tomato, Earliana.
- 1 oz. Turnip, Purple Top White Globe.

THESE 20 PACKAGES WILL BE SENT BY MAIL TO ANY ADDRESS IN THE U. S. FOR ONLY \$1.00. REGULAR PRICE WOULD BE \$1.81.

50c

SMALL CITY GARDEN COLLECTION

50c

TWELVE VARIETIES, ALL GOOD RELIABLE SORTS, ONE PACKET OF EACH FOR ONLY 50c. REGULAR PRICE WOULD BE 93c.

- 1 pkt. Sweet Corn.
- 2 oz. Beans, Burpee's New Stringless.
- 2 oz. Beans, Black Valentine.
- 1 pkt. Beet, Early Blood Turnip.
- 1 pkt. Carrot, Danver's Half Long.
- 1 pkt. Lettuce, Early Curled Simpson.

- 1 pkt. Onion, Yellow Globe Danvers.
- 1 pkt. Pop Corn.
- 2 oz. Peas, Alaska.
- 2 oz. Peas, Surprise.
- 1 pkt. Radish, Early Scarlet Globe.
- 1 pkt. Turnip, Purple Top Strap Leaved.

NOTICE—All Collections are put up before the rush of the season and cannot be changed.

PRICES SUBJECT TO CHANGE.

I WILL FILL ORDERS of Vegetable Seeds in larger quantities, also of Potatoes and Field Seeds of all kinds, at PRICES QUOTED IN MY CATALOG UNTIL MARCH 1st. After that date prices will be subject to change; there is a great probability that all prices will advance a good deal before the spring trade is over. Order early, or after March 1st please write me for prices if seeds are desired in large quantities.

Enclosed find photo of my float on which I was awarded first prize at our County Fair. The fruits and vegetables were grown from trees and seeds purchased from your nursery and seed house.

Mr. Hahn, Coffeyville, Kans

VEGETABLE SEEDS

Every effort possible is used in the selection of my seeds, and I feel justified in saying that all my seeds are the purest and best to be had. The packages are, I believe, better filled than most seedsmen send out, while my prices are as low as those of any other reliable firm.

ASPARAGUS

In early spring sow seed, after soaking it 24 hours in warm water, in drills one foot apart, and one inch deep. During the summer keep the soil mellow and free from weeds, thinning the plants to 4 inches apart. The following spring transplant them into permanent beds that have been deeply dug and highly manured. One ounce of seed to 50 feet of drill, 5 lbs. to the acre.

F100. EARLY GIANT ARGENTEUIL. The earliest large green sort. Best for gardeners. Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.40 postpaid.

F102. CONOVER'S COLOSSAL. A mammoth green sort of the best quality. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.40 postpaid.

F104. PALMETTO. An early green sort, prolific and very desirable. Is fast becoming the favorite everywhere. Pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.40 postpaid.

F106. CALUMBIAN MAMMOTH WHITE. This variety is in great demand because it furnishes white shoots. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.40 postpaid.

ASPARAGUS ROOTS. See page 27.

BORECOLE OR KALE

The best plant for furnishing "greens." The greens are for fall, winter and spring use. Sow seed about the middle of June and later transplant to rows 2½ to 3 feet apart. The dwarf sorts may be sown later. Frost improves the quality. One ounce will produce 2,000 plants.

F110. DWARF GREEN CURLED. Hardier than cabbage, leaves very tender, finest flavor. Excellent for cooking with meats and vegetable soups. Immense quantities are grown in the South and shipped to northern markets. Pkt. 10c; oz. 25c; ¼ lb. 60c postpaid.

F112. DWARF PURPLE CURLED. A variety of the preceding and identical with it, except in color, which is a beautiful deep purple. Pkt. 10c; oz. 25c; ¼ lb. 65c postpaid.

F114. TALL GREEN CURLED SCOTCH. This is one of the most popular varieties. It is very hardy and is much improved by frost. Grows 2 feet high. Pkt. 5c; oz. 15c; ¼ lb. 50c postpaid.

BROCCOLI

Sow seed in Central West early in May, transplant in June. Growth and habit like cauliflower, but far more hardy. Of special value in the North. One ounce produces 2,500 plants.

F116. LARGE WHITE. (150 days.) Large white heads. Pkt. 10c; oz. 25c; ¼ lb. \$1.25 postpaid.

Borecole or Kale.

BRUSSELS SPROUTS

The sprouts of the plant, which resemble small heads of cabbage formed closely around the stalk, are considered by many to be one of the most delicious vegetables of the whole cabbage family. These small heads may be boiled like cabbage or otherwise prepared the same as cauliflower. The sprouts appear on the axils of the leaves and these latter ones, therefore, should be taken off, as close to the stem as possible when they begin crowding. They are improved by slight frost. Will do well on any soil which is adapted for cabbage and cauliflower, and should be grown in the same way. I have tried them out here in Nebraska, but our summers, as a rule, are a little too hot and dry for best results.

F118. IMPROVED DWARF. Of dwarf habit, a healthy grower, finest quality. Pkt. 10c; oz. 30c; ¼ lb. 85c.

Last year I ordered one package of New Zealand Spinach. We use a great deal of Spinach, so I decided to try the new kind. I want to tell you it is wonderful; it is delicious, always tender and truly everbearing.

I planted first of February, 1922. It was one of driest springs we ever had. I was gone through July and August and not a drop of rain fell and it received no attention whatever. I was amazed on my return. We ate spinach until January 22, 1923, when the temperature fell to 20 degrees. So my friends want to try it out with me this year. You understand this has been a mild winter.

Mrs. W. H. Frey, Stephenville, Tex.

BEANS DWARF GREEN POD VARIETIES.

Plant in drills $1\frac{1}{2}$ inches deep and drop the beans 3 inches apart in the drills. The rows should be 2 to 3 feet apart. Beans are sensitive to both cold and wet, and cannot be planted until danger of frost is past and the ground has become dry and warm. A sandy loam is best. Up to the time of blossoming the plants should have frequent shallow cultivation. For succession plant every two weeks. $1\frac{1}{2}$ lbs. will plant 100 feet of drill, 90 lbs. per acre. **NOTICE**—Deduct 8c from pound price if to be sent with other goods at your expense.

Bountiful. (F123.)

Fordhook Favorite.

SONDEREGGER'S GIANT STRINGLESS GREEN POD.

F120. (40 days.) I consider this the best of the large green podded early varieties. The bushes grow 12 to 14 inches high, but do not vine nor fall over easily. The pods are extra long, round and fleshy, very tender and absolutely stringless. As an early snap bean, and for canning purposes they are unexcelled. In my trial grounds they have proven to be one of the very best. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 45c; 3 lbs. \$1.25, postpaid. Not prepaid, 40c per lb.

FORDHOOK FAVORITE.

F122. (48 days.) The bushes grow high, are very vigorous and well filled with light green pods, which are 5 to 6 inches long and almost round. They do not bear quite so heavy as some of the other varieties, but are much superior in quality. The pods are very juicy, free from fibre and are entirely stringless until they are old and begin to wilt. I have tried them for the past four seasons and like them fine, both fresh and for canning. As a shell bean for winter use, I have found none better. They are very mealy, of fine flavor and cook up much quicker than the navy beans. The past season I planted Fordhook beans as late as July 15th and they made a fine crop by September 1. They do well in hot weather if they have enough moisture. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.10 postpaid.

F123. NEW BOUNTIFUL. (42 days.) This variety is another big improvement in green podded bush beans, and has become very popular everywhere grown. The plants are of thrifty growth, and practically free from rust and mildew. It is very hardy, extremely early, very prolific and bears continually for several weeks. It is the first to give pods fit to pick in the spring, and the last to yield edible pods in the fall. The pods are green, of very large size, thick, broad, flat, extra long, very uniform in shape, solid, meaty and of high quality, melting, tender, absolutely stringless which makes them unexcelled for home use and market. Also excellent as a shell bean for winter use. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 40c postpaid. Not prepaid, 3 lbs. \$1.00.

F126. BURPEE'S STRINGLESS GREEN POD. (42 days.) One of the finest stringless green-podded beans. They are early and very hardy, producing an abundance of large, handsome round pods measuring 5 inches in length. They are of dark green color, crisp and tender and of fine flavor. This variety has a long bearing season, making it another very desirable variety for the small garden. You make no mistake by trying them. Pkt. 5c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 35c.

F131. LONGFELLOW STRINGLESS. This variety should be planted more; it is an old variety and still one of the best on the market. The vines are of robust growth, and produce the pods in truly wonderful profusion. Pods are extra long, round and fleshy, very tender and absolutely stringless. As an early snap bean and for canning purposes it is unexcelled. Also very desirable for home use and market gardeners. Pkt. 5c; $\frac{1}{4}$ lb. 15c; lb. 35c; 3 lbs. \$1.00, postpaid.

F129. FULL MEASURE. (42 days.) A fine stringless, very early and medium green, high quality bean. Pods straight, 6 inches long, very fleshy, round and showing depression around the bean. Excellent for market gardeners and home use. Pkt. 5c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.10 postpaid. Not prepaid, lb. 35c.

F130. IMPROVED RED VALENTINE. (43 days.) Grows robust and vigorous, producing the round, curved pods very abundantly. The pods are remarkably fleshy and very tender, and remain on the plant a long time without becoming hard. Excellent in quality and uniformity of ripening. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F132. EARLY ERFURT BROAD BEAN. An improvement of the old English broad or Windsor Bean. The plant is of robust and upright growth, entirely different from any other bean. Pods are very long, broad and filled with 5 to 9 beans of extra large size and of most delicate flavor. The beans are used shelled and are superior in quality to Lima Beans. Can be planted early, as they are quite hardy. Pkt. 10c; $\frac{1}{4}$ lb. 20c; lb. 60c; 3 lbs. \$1.50, postpaid.

BEANS—(Continued) DWARF GREEN POD VARIETIES

F135. NEW ROBUST FIELD BEAN. This new strain of White Field Beans was introduced by the Michigan Agricultural College and every where it has been grown, has given excellent results. At the agricultural college it has always out yielded all other beans. The plants are very robust, making a good root system before setting on pods. From this time on they make a very rapid growth and ripen all pods quickly and evenly. The ripe beans are about the size of the Michigan Pea Bean and of a clear white color. Pkt. 5c; $\frac{1}{4}$ lb. 15c; lb. 35c; postpaid; 3 lbs. 90c not prepaid.

THREE IN ONE INOCULATOR. The same tube will inoculate either beans, peas or sweet peas. One tube will inoculate 5 lbs. Price per tube, 15c each, postpaid.

DWARF WAX POD VARIETIES**SONDEREGGER'S IMPROVED BLACK WAX.**

F140. (40 days.) I think this is one of the best wax beans for early planting. It is an improved variety of the old Black Wax. The bushes grow 12 to 14 inches tall, are well filled with pods, and are more rust-resisting than any other variety I have tried out. The pods grow 5 $\frac{1}{2}$ to 6 inches long, straight, flat and are of bright yellow color which makes them very attractive for home use and market. They are grown more by market gardeners in the South because of their earliness and hardiness. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 45c; 3 lbs. \$1.20, postpaid. Not prepaid, lb. 40c.

SURE CROP STRINGLESS.

F141. This new bean I can highly recommend to all my customers. It is a most prolific cropper and of excellent quality. The handsome rich yellow pods are slightly curved, averaging six or seven inches in length, almost round, half an inch wide, very meaty and sweet, and perfectly stringless at all stages. The bushes branch quite freely and have a dense foliage which covers about 90 per cent of the beans, protecting them from the hot sun and the early light frosts. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.05, postpaid.

F144. IMPROVED GOLDEN WAX. (40 days.) The standard variety of wax beans, well known and largely planted by market gardeners everywhere. I planted them twenty years ago when I was on a farm, with the best of success. They are still much better than many of the newer varieties. Pods are 4 $\frac{1}{2}$ to 5 inches long, brittle, entirely stringless and of a beautiful, rich, golden wax color. As a snap bean it excels most of the new varieties in tenderness and rich, buttery flavor. It is a very prolific yielder. Seeds are white, mottled brown and purple. Pkt. 5c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.10, postpaid. Not prepaid, lb. 35c.

F148. BLACK WAX. Well known in many localities as Butter Beans. A very superior snap bean, ripening among the first earliest and almost as well suited for late planting. It is a sturdy grower and yields well. Pods are round, yellowish-white, tender and of fine flavor. Continues in bearing a long time. Seeds are glossy black. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F152. WARDWELL'S KIDNEY WAX. (48 days.) A second early prolific wax bean. Hardy and productive. Pods large, flat, 5 $\frac{1}{2}$ to 6 inches long, of a delicate, waxy yellow and very brittle. Seed white, mottled brown around the eye. A favorite with market gardeners and one of the best kinds for a main crop and field planting. Pkt. 7c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.15 postpaid. Not prepaid, lb. 35c.

F151. EARLY WONDER WAX. (35 days.) This is no doubt the earliest wax bean on the market. The bushes grow quite large and are well filled with large, flat, waxy white pods, 5 to 6 inches long which are very crisp and tender. It also has a very long bearing season which makes it very profitable, both for market gardening and home use. Pkt. 7c; $\frac{1}{4}$ lb. 10c; lb. 35c postpaid.

F153. ROUND PODDED KIDNEY WAX. (45 days.) This is a new variety which I have tried out with good success. The bushes are of medium size and are very prolific. The pods are 4 to 6 inches long, round and entirely free from strings. The beans are white with a black eye and are very good for winter use. Pkt. 5c; $\frac{1}{4}$ lb. 12c; lb. 30c postpaid.

BUSH LIMA BEANS.

Select land especially warm, rich and well supplied with vegetable fiber or humus. Plant as soon as the soil has become warm in the spring. Make rows 2 feet apart and give to each plant 10 inches space in the row. I have selected three old standard varieties which I know are good and I can recommend them.

F154. HENDERSON'S BUSH LIMA. (55 days.) The earliest of the bush limas. A good bearer. The beans are somewhat smaller than other limas, but I can highly recommend them for Nebraska and the southern states. Pkt. 7c; $\frac{1}{4}$ lb. 15c; lb. 45c; 3 lbs. \$1.25 postpaid. Not prepaid, lb. 35c.

F156. BURPEE'S BUSH LIMA. (60 days.) Second early variety of fine quality. Beans large. Pkt. 7c; $\frac{1}{4}$ lb. 15c; lb. 45c; 3 lbs. \$1.25 postpaid. Not prepaid, lb. 48c.

F157. JACKSON WONDER. For the home garden there is no better Lima bean. It is of the finest quality, ripens early, is very prolific, and its large pods contain 3 to 5 large flat beans, which are unexcelled for table use, both green and dried. Ready for table use in 60 days. Pkt. 5c; $\frac{1}{4}$ lb. 15c; 1 lb. 35c; 3 lbs. \$1.00 postpaid.

Wardwell's Kidney Wax (F152)

Sonderegger's Improved Black Wax

I wish to say that the Black Wax String Beans No. 145 bought from you last year were very fine. There were no rust spots all through the summer. Other years, when I bought Wax beans locally, after the first crop, I always had trouble with rust spots. I found your beans remarkably free from rust.

Edw. Matthias, Elgin, Ill.

I have always been delighted with all orders received from you and I want to thank you for your courtesy and promptness I have received. We think you furnish the finest of all the nurseries.

Mrs. Harwell,
Boyl Idaho R. F. D. No. 3.

BEANS—(Continued)**POLE OR RUNNER BEANS.**

Set poles 4 feet apart each way and plant 4 to 6 beans about an inch deep around each pole. Thin out to three plants to a pole. If the soil is rich; pinch off the plants when they overrun the top of the poles. 1½ lbs. will plant about 100 hills.

SONDEREGGER'S WHITE SEEDED GREEN POD.

F160. (65 days.) This bean is a continuous bearer and almost rust proof. The round pods, borne in clusters, average 6 to 8 inches in length, are uniformly straight, stringless, of dark green color, very tender and of a delicious flavor, I prefer them to the Kentucky Wonder as it is earlier and covers a longer season of productiveness. If the beans are not all used green, the ripe beans, which are pure white, can be used as a shell bean. They do well in Nebraska and the South. Pkt. 10c; ¼ lb. 15c; lb. 40c; 3 lbs. \$1.10 postpaid. Not prepaid, lb. 32c.

KENTUCKY WONDER WAX

F164. (60 days.) Very similar to the well known Kentucky Wonder or Old Homestead, except the pods, which are of a light, waxy yellow color. They are very long, broad, tender, stringless and of a delicious flavor. The plants make a quick, healthy growth and bear when only a few feet high, till frost in the fall. Pkt. 7c; ¼ lb. 12c; lb. 40c; 3 lbs. \$1.10 postpaid. Not prepaid, lb. 35c.

F162. OLD HOMESTEAD OR KENTUCKY WONDER. (65 days.) This old variety is well known to everyone. It is still one of the best Pole Beans. Vine vigorous, very productive, bearing its pods in clusters; pods green, very long, often reaching nine or ten inches, nearly round and very crisp. Good market sort. Pkt. 5c; ¼ lb. 10c; lb. 35c. 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F166. GOLDEN CLUSTER WAX. (60 days.) It bears profusely its long, golden pods in clusters of three to six, from the middle of July until cut by frost. Pods are 6 to 7 inches long and about an inch in width. They are fleshy, absolutely stringless and very brittle, while their flavor is delicious. Pkt. 7c; ¼ lb. 12c; lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F170. YARD LONG. A great curiosity and of excellent quality. Pods usually 18 to 25 inches, but frequently 30 inches in length. An excellent table vegetable, being tender and of a rich asparagus flavor. They are not a profitable bean to grow for market. Dry beans are kidney shaped, of dark brown color and vines keep on bearing for a long time. Pkt. 10c; 3 pkts. 25c, postpaid.

F172. EXTRA EARLY JERSEY LIMA. Matures 70 days after germination. This variety is earlier than the large White Lima. Pods contain three and four large beans each. Splendid quality. Good market sort. Pkt. 7c; ¼ lb. 12c; lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F174. LARGE WHITE LIMA OR BUTTER. (90 days.) Productive, large, flat pods, rich and of finest flavor. The early beans are white. Pkt. 7c; ¼ lb. 12c; lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, lb. 30c.

F176. SCARLET RUNNER. Grown extensively for ornamental purposes, as flowers are of a most brilliant scarlet and borne in profusion. Beans are broad and flat, and of fine flavor when cooked. A hardy, vigorous grower. Pkt. 10c; ¼ lb. 15c; lb. 50c. postpaid.

MANGEL WURZEL

Every farmer and every one who raises chickens should plant a small patch of ground to Mangels. They yield more tons of feed per acre and at less expense than any other crop. During the winter when there is no green feed to be had, Mangels are a very good substitute. When fed to cows, they will increase the milk production a large per cent. As green feed for chickens there is nothing better. They keep your hens healthy and help them lay during the winter months when the prices of eggs are high. Mangels are very easily grown and are a sure crop. They are very valuable for feeding, and will keep your stock healthy and free from diseases. Sow in April or May in drills 3 feet apart and thin out to 10 in. in row. 5 to 6 lbs. of seed per acre will produce several tons of good feed for winter.

F194. DANISH SLUDSTRUP. (90 days.) This is considered the best of all Mangels, having been awarded a first class certificate. Its color is reddish-yellow and very hardy, grows well above the ground and is easily harvested. It contains a larger per cent of nutriment than other sorts. Oz. 10c; ¼ lb. 20c; lb. 75c postpaid.

F198. GIANT HALF SUGAR. (85 days.) The roots of this new Mangel are more valuable than the best strain of sugar beets. They are not only a better quality, but will yield more than twice as much. The roots grow partly out of the ground, which makes digging very easy. A few Mangels fed to your cows and chickens in the winter are about the same as green feed and will bring you big returns in butter and eggs. Oz. 10c; ¼ lb. 20c; lb. 75c postpaid; 5 lbs. per express, not prepaid, \$3.25.

F200. MAMMOTH LONG RED. (110 days.) Largest of all Mangels; valuable for stock. Oz. 10c; ¼ lb. 20c; lb. 75c postpaid; 5 lbs. per express, not prepaid, \$3.25.

Seeds came all right. I like your seed very much, used some of it last year.

Mrs. August Dibbern, Wood River, Nebr.

I received my order of trees, which I ordered from Mr. Geseking of Seward a short time ago and I found them to be nice trees, also the grape vines.

John G. Ringenberg, Garland, Nebr.

Kentucky Wonder Wax.

Jackson Wonder Lima.

BEETS

Everyone should plant more beets. They are one of the best vegetables. At least two plantings should be made, one early for summer use and the second July 10th to 20th. Planting at this time they get plenty large for winter use and are much more tender than the early spring planting, as the latter usually get a little tough and woody by fall, especially in dry weather. The July planting is best for canning. For best results this should be done when beets are about as large as green walnuts, about September, when it is not so hot. Vegetables canned at this time will also keep much better than the early canning. If you wish any information about canning, kindly write me or the U. S. Dept. of Agriculture, Washington, D. C., for Farmer's Bulletin No. 339, English only. They are free.

The soil for beets should be rather light and well enriched. Sow in drills one foot apart and one inch deep as early as the ground can be worked, continue for a succession as late as middle of July; when the plants are large enough, thin out to stand six inches apart in rows. One ounce to 50 feet of drill; 5 to 6 pounds to the acre in drills.

SONDEREGGER'S EARLY BLOOD TURNIP.

F178. This splendid beet is an improved strain of the old standard variety of Early Blood Turnip. It is nearly as early as the Extra Early Egyptian, and greatly surpasses that variety in quality and flavor. It is free from fibrous roots, being always smooth. The roots are of a dark red color, very solid, and remain crisp and tender for a long time. Also one of the best varieties for early spring and summer use. I grow them in my garden and have always had good success with them, especially when planted about July 15th. For a late summer crop they are much better for canning and winter use than the early spring planting. Farther north they should be planted about July 1. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25.

CROSBY'S EGYPTIAN.

F180. An improved strain of the Early Egyptian. I plant them for first early. The roots are of perfect shape when small, making a good beet for bunching. Uniform in size and shape, small tops and tap root. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25 postpaid.

CRIMSON GLOBE.

F182. An extra early variety of medium size and globe shaped. Entirely free from rootlets, very smooth and of a rich, deep red color. Flesh is of the finest quality, sweet and tender. Foliage is small and of a bronze purple color. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

F184. EARLY BLOOD TURNIP. (45 days.) Very early; excellent for family use. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.15 postpaid.

F186. DEWING'S EARLY BLOOD TURNIP. (45 days.) Excellent for late planting. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.15 postpaid.

F190. LONG BLOOD RED. (65 days.) Matures rather late, but is of fine quality and an excellent keeper; resists drought better than any other variety. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.20.

F192. SWISS CHARD OR SILVER BEET. Ready to use 25 days from germination. Should be grown more. It produces an abundance of greens from early spring until cut by frost. Of superior quality to spinach and ordinary beet greens. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.20.

SUGAR BEETS

Sugar Beets are grown on a large scale throughout the West. The government says every farmer should plant a small patch of Sugar Beets and make their own syrup. The beets are easily grown, the syrup is easily made and is of the finest quality. When planted for beet sugar factories, 12 to 20 pounds per acre is the usual quantity. For stock feeding the Sugar Beets are superior to the Mangels. My seed is grown by the foremost growers of Europe, who have made the growing of Sugar Beets their specialty for many years. I list only two of the very best varieties, which do well throughout the country. Write for prices on large orders.

F202. KLEIN WANZLEBEN. (75 days.) This variety has proved to be a very valuable sort. It has a rather long, slender root, very rich in sugar, and it has claimed to yield under average conditions about 18 tons to the acre, containing 12 to 13 per cent of sugar. Pkt. 5c; oz. 8c; $\frac{1}{4}$ lb. 20c; lb. 65c; postpaid; 5 lbs. \$3.00, not prepaid.

F206. LANE'S IMPERIAL. (50 days.) Grows to a large size, will yield almost as much in bulk as the best Mangels, and contains a large per cent of sugar. The roots are smooth, broad at the shoulder and gradually taper to the base. Pkt. 5c; oz. 8c; $\frac{1}{4}$ lb. 20c; lb. 65c; postpaid; 5 lbs. \$3.00, not prepaid.

Crosby's Egyptian.

Crimson Globe

Sonderegger's Early Blood Turnip.

CABBAGE

Everyone who has a garden should raise a few heads of early and late cabbage. It is easily grown and does well in most localities. If your cabbage heads, early or late, begin to crack open, they should be gathered and used at once. Can them, using the "Cold Pack" method, or make them into sauer kraut. If the green worms bother your cabbage, sprinkle it with Slug Shot or Bug Death. I prefer the Bug Death, as it is not poison, but it sure gets the worms. Denmark produces the best cabbage seed. I received my shipment from there this season. It is of high germination and of much better quality than American grown seed. One ounce will produce 3,000 plants.

EARLY JERSEY WAKEFIELD.

F224. The most profitable early cabbage crops are the early varieties. For this I recommend the Early Jersey Wakefield, an old standard variety; and I have found it to be one of the best on the market for early use, both for family and market. The heads are conical in shape, with blunt point. I plant them for early and usually have nice heads by July 1st. Ready for use in 70 to 75 days after germination. Pkt. 10c; oz. 30c; ¼ lb. 75c postpaid.

Early Jersey Wakefield.

SONDEREGGER'S SUMMER BALLHEAD.

F223. The chief merit of this variety consists in early maturity, but nevertheless, it forms perfectly round heads as solid as the ballhead strains, but it is about three weeks earlier. It is without reserve, the finest cabbage for summer cutting, yielding heavy crops of perfect heads, and is exceptionally fine for table use. I can recommend this variety to all my customers and especially the market gardener. For best results, use one table spoon nitrate of soda, worked into the ground around each plant at transplanting time and again about four weeks later. Pkt. 10c; oz. 35c; ¼ lb. \$1.00 postpaid.

SURE HEAD.

F234. (100 days.) A well known variety, producing very large, round heads, slightly flattened, and is remarkable for its certainty to head. A vigorous grower and one of the best cabbages for late or main crop. Heads are remarkably uniform, very hard and exceedingly fine in texture weighing about 10 to 15 pounds each. Of very fine flavor, a fine keeper and good shipper. Pkt. 10c; oz. 35c.

SONDEREGGER'S

IMPROVED DANISH BALLHEAD.

F236. (105 days.) This is an improved variety of the old Danish Ballhead, which I have grown in Denmark by one of the best seed growers in that country. The heads are of excellent market size, not too large. The heads are very hard, almost round, fine grained and juicy. Will weigh one-fourth more than any other variety of the same size. For main crop and late planting. I like this variety best, as it is a sure header and one of the very best keepers for winter use. You can make no mistake by planting this variety for fall and winter use. Pkt. 10c; oz. 35c postpaid.

F226. EARLY COPENHAGEN MARKET. (60 days.) Anyone wishing a good early round-headed cabbage can make no mistake by planting this variety. For a main early crop, I prefer it to Early Jersey Wakefield; it is a few days later but the heads are somewhat larger, weighing 8 to 11 lbs. each. It is a great advantage, especially for the market gardener, that the heads keep well in storage and that most of them can be gathered at one cutting, saving much labor and clearing the ground for a crop of turnips. Pkt. 10c; oz. 35c.

F230. EARLY WINNINGSTADT. (85 days.) A well known and very popular variety. Early, heads large, decidedly conical; solid and hard, even in summer. This is a very sure heading variety, valuable not only for early use, but also for late planting to be used for winter cabbage. Pkt. 5c; oz. 30c.

F232. THE GLORY. (100 days.) A good second early sure heading variety. It is a vigorous grower, forming large, compact heads, which are of a nice, yellowish-green color. It has only a few outer leaves and can be planted closely. The heads are as round as a ball. An excellent market sort, combining all the good qualities one may expect of an early cabbage. Excellent for first early and late plantings. I can highly recommend this cabbage to all my customers. Pkt. 10c; oz. 30c.

F233. PREMIUM LATE FLAT DUTCH. This variety produces immense solid and uniform heads, maturing quite late and, therefore, well adapted for storing during the winter. In colder climates, they will come out of the pits in spring as solid and perfect as they were when stored in the fall. It is largely grown for sauer kraut making. A big favorite with market gardeners. Pkt. 8c; oz. 25c.

Sure Head.

Sonderegger's Summer Ball Head, grown by one of my customers from Hanover, Kans. The heads weighed 10, 12 and 16 pounds.

The bulbs and bowl were received and in splendid condition. They were fine looking bulbs and I put them out immediately. The bulb bowl is certainly beautiful and very reasonable in price. I thank you for your kind promptness and interest. Mrs. O. Schafale, Marion, Ill.

I received my order of trees today, order No. 4700. I am very much pleased with the trees. All had good roots and came in fine shape. They are the best trees I have ever received from a nursery. I am so well pleased I will send you another small order, but hold this order for spring delivery. I am enclosing my check for same. C. H. Frischm. Cole Camp, Mo.

SAVOY CABBAGE

Savoy Cabbages require the same culture as the common varieties. They have finely curled leaves and are of a superior flavor. Preferred by many to all other cabbages especially for home use.

F240. KING OF EARLIEST SAVOY. The earliest of all Savoy Cabbages. Forms medium sized, very solid heads of conical shape, with blunt point, leaves are finely crimped. Its flavor is like that of Brussels Sprouts. Pkt. 10c; oz. 35c.

F242. LARGE DRUMHEAD SAVOY. An excellent winter and spring cabbage, forming nice solid heads, with curly leaves. Plants are strong and vigorous. Pkt. 10c; oz. 35c.

RED CABBAGE

F244. MAMMOTH RED ROCK. The largest and surest heading variety of the red cabbages. I have tried many varieties and find this one to be the best. The plant is of vigorous growth and forms round, solid heads of deep red color. In quality and flavor it is considered to surpass any green cabbage. Pkt. 10c; oz. 30c.

CHINESE CABBAGE

CELERY CABBAGE.

F222. This delicious vegetable should be more generally used. It is more easily grown than the ordinary cabbage and when boiled with meat, it is much better than either cabbage or turnips. As a salad or cold slaw it is excellent. Every home garden should have a plot of Chinese Cabbage. From seed sown the first week in July and plants transplanted about three weeks later, I had excellent success with this cabbage. Some of the heads were 18 inches in circumference and 12 to 15 inches long. They were solid and of fine quality. Seeds should be sown in July and plants transplanted. If sown too early the heads will go to seed. A few light frosts do not injure Chinese Cabbage. Pkt. 10c; oz. 30c; ¼ lb. \$1.00 postpaid.

CURLED CHERVIL

F208. The leaves are used in flavoring soups and salads and for garnishing. More beautiful than parsley. Of dwarf growth, with finely curled leaves. One ounce will sow 100 feet of drill. Cultivate same as parsley. Pkt. 10c; oz. 20c; ¼ lb. 65c postpaid.

CHICORY

F210. The leaves are used as salad; roots are used to mix with or be substituted for coffee. Cultivate same as parsnips. Pkt. 10c; oz. 25c; ¼ lb. 60c; lb. \$1.60.

CHUFAS

F212. EARTH ALMOND. Small ground nut greatly liked by children. In sweetness and flavor they resemble cocoa-nut or almond and are nice to put on the table with candies as an after-dinner relish. Pkt. 7c; oz. 10c; ¼ lb. 30c; lb. \$1.00 postpaid.

COLLARDS

F214. GEORGIA MAMMOTH. A form of cabbage extensively grown in the South for greens. They form large open heads. It is improved by slight freezing. Give the same cultivation as cabbage. Pkt. 10c; oz. 25c; ¼ lb. 65c.

CORN SALAD OR FETTICUS

F216. LARGE LEAVED. This small salad is used during the winter and spring months as a substitute for lettuce and is cooked and used like spinach. Sow seed in shallow drills one foot apart during August or September or early in the spring. Pkt. 8c; oz. 20c; ¼ lb. 50c; lb. \$1.50 postpaid.

CRESS OR PEPPER GRASS

Cress should be sown in a sheltered spot in shallow drills. Sow seed thickly. Ready for use in a month. For continued use, sow every few weeks.

F218. CURLED GARDEN. Much used with lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. Pkt. 7c; oz. 20c; ¼ lb. 50c.

F220. TRUE WATER CRESS. The pleasant and peculiar flavor of the water cress causes it to be highly esteemed for table use. Will grow along margins of creeks, streams and ponds. Pkt. 20c; oz. 60c; ¼ lb. \$2.25 postpaid.

I have but three lots in Atwood, Kansas, all sown in your onion seed. I can see clear across already today. I have dealt with your house since 1917 and your seeds never failed me as yet.
Sanford S. Martin, Atwood, Kansas.

Sonderegger's Improved Danish Ballhead.

Large Drumhead Savoy.

Chinese Celery Cabbage.

CAULIFLOWER

Sow the seed in a hotbed in January or February and when plants are large enough transplant three inches apart in boxes until time to plant out. If hardened off, they are seldom injured by planting out as early as the ground can be properly prepared, 2½ feet apart each way. Keep well hoed, watering freely in dry weather, and especially when they begin to head. The late varieties mature in autumn and are sown and managed similar to winter cabbage.

SONDEREGGER'S IMPROVED EARLIEST DWARF.

F246. (95 days.) This is one of the finest vegetables I grow in my garden. Many people think it is hard to grow and that only experienced gardeners can grow it. This is a big mistake, as it is almost

Sonderegger's Improved Earliest Dwarf Cauliflower.

as easily grown as cabbage and every one should put out a few plants. Get the seed sown early in February and transplant to the garden as soon as weather permits, so they will get well started before hot, dry weather hits them. In this cauliflower you will find a remarkably sure and early heading variety. It is of dwarf habit, with short outside leaves. It produces smoothly rounded heads which are of uniformly even size, fine grained, compact and pure white. If planted in rich soil at proper season, heads 8 to 10 inches in diameter can be marketed in July. I have also had good success with this variety by planting the seed in the garden in May. By keeping it well watered through the hot summer, the heads will begin to form as soon as the weather gets cool, which will be ready for use in September and October. Pkt. 20c; ¼ oz. 75c; oz. \$2.25.

F248. EARLY SNOWBALL. (90 days.) A well known variety, producing very early, fine grained, smooth heads which are compact and even in size. The plants are of dwarf habit. On account of the short outer leaves, the plants can be set out as close as 18 to 20 inches apart each way. Equally good for forcing or planting in open ground for main crop. I obtain this seed from the most reliable growers in Denmark. Pkt. 20c; ¼ oz. 50c; oz. \$1.75.

F250. NEW DANISH GIANT. (130 days.) The dry weather cauliflower. Originated in Denmark. A little later than Snowball. It withstood the dry and hot weather of last summer much better and formed large, pure white and solid heads. It also has large leaves, which help to protect the head. For dry climates I would recommend planting Danish Giant Cauliflower. Pkt. 20c; ¼ oz. 50c; oz. \$1.75.

CELERY

One ounce will make about 2,500 plants. The seed should be started in shallow boxes or hotbed. Sow thickly and cover lightly; keep well watered and transplant when 2 inches high in rows 3 feet apart and 6 inches in the row. The essentials to success in Celery growing are rich soil and plenty of water.

F272. SONDEREGGER'S SELECT SELF-BLANCHING. (110 days.) This celery can be easily grown on rich, sandy loam if you give it plenty of water. The ground should be thoroughly soaked at least once a week all summer. This is the best sort for early market and home garden. I advise planting nothing else here in Nebraska, where the summers get quite dry and hot, in my own garden it has proved much more satisfactory than all others. Plants are of medium size, compact and stocky with yellowish green foliage. As they mature the inner leaves turn to a beautiful golden yellow, so that blanching is very easily done. Of handsome color, crisp, tender, free from stringiness and of fine nutty flavor. Pkt. 15c; ½ oz. 45c; oz. 75c.

F274. GOLDEN SELF-BLANCHING. (120 days.) The leading early market sort. Stalks are broader and heavier than those of White Plume and much superior in quality. The ribs are perfectly solid, crisp, brittle and of delicious flavor, surpassed by no other variety. Pkt. 10c; ¼ oz. 20c; oz. 65c.

F276. GIANT PASCAL. (140 days.) This is the best keeper of all late sorts. Very solid and crisp. This variety is unsurpassed for market gardeners. Pkt. 10c; oz. 45c.

F278. FLAVORING CELERY. Old seed used for flavoring. Oz. 5c; ¼ lb. 15c; lb. 40c postpaid.

CELERIAC

Celeriac is much used for salads, and boiled like parsnips or turnips, it is a great favorite with lovers of celery. It should be started indoors and transplanted the same as celery, but does not need blanching. Should be kept well watered in dry weather.

F282. SONDEREGGER'S BEST. (120 days.) A new Celeriac, which, according to experiments, has proven to be the best of all Celeriacs. The beautiful white roots are large, very smooth, of fine flavor and best quality. They will make delicious salads and are also fine for seasoning meats and flavoring soups. I feel assured that anyone who tries this new Celeriac is bound to be perfectly satisfied with same. For best success, start the plants early in February and transplant to garden as soon as weather permits. Be sure and give plenty of water all summer. A good soaking once a week will make nice, tender tubers in the fall. Pkt. 10c; oz. 40c. postpaid.

F280. CELERIAC OR TURNIP ROOTED CELERY. (125 days.) Grown exclusively for its very tender marrow-like roots. The roots are cooked and sliced, used with vinegar, they make an excellent salad. Pkt. 10c; oz. 30c; ¼ lb. 85c postpaid.

Sonderegger's Select Self-blanching Celery.

Just received your seed, all O. K. and am well pleased with your promptness. Am sending another order, hoping it will receive your attention at once.

A. F. Hallenbeck, Oak Harbor, Wash.

CARROTS

The Carrot is one of the most nutritious and healthful of roots, and should be more generally used for the table, as well as for stock feeding purposes. Will grow in any soil; sandy loam is best. I am not listing quite so many varieties this season as usual, but what I have are the very best quality and will do well in most localities. Sow as early as the ground can be worked in rows 15 to 18 inches apart, covering about $\frac{1}{2}$ inch. For field culture sow in drills 18 to 24 inches apart. One ounce will sow 100 feet of drill, 3 to 4 pounds per acre.

SONDEREGGER'S NEW SCARLET.

F254. (70 days.) This new carrot I find to be of the very best table quality and of good size and color. It is the best large carrot I have; is not quite as large as the Long Orange, but somewhat earlier and of finer quality. It is one of the best second early and main crop carrots. I plant them for winter use; they are good keepers. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c postpaid.

SONDEREGGER'S IMPROVED HALF LONG.

F256. (65 days.) Another excellent all around carrot. This is an improved variety of the old standard half long type. They are smooth, of dark orange color, broad shouldered, stump-rooted and very productive. I had some of them in my garden this season and they did exceptionally well during our dry and hot summer. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 40c postpaid.

DANVER'S HALF LONG.

F258. (75 days.) This is one of the old standard varieties. It is very much like my Sonderegger's Improved Half Long, but is about 10 days later and not quite so fine grained. They are an excellent carrot, though, both for the market and for home use. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.80 postpaid.

F262. EARLY CHANTENAY. Another old standard sort. They are early, smooth and of finest quality. Very productive under unfavorable conditions. I consider them one of the best table carrots. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.80 postpaid.

F264. OXHEART OR GUERANDE. (60 days.) A short, stumpy variety, which I sometimes plant for early use. The tubers are very short, but almost as large around as long. They are of finest quality for early use. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.25 postpaid.

F266. LONG ORANGE. Grows to a large size, in fact, it is the largest table carrot I list. They are of good quality and a heavy yielder, but not quite so fine grained as the earlier varieties. Pkt. 5c; oz. 12c; $\frac{1}{4}$ lb. 30c; lb. \$1.10 postpaid.

STOCK CARROTS

Culture same as for Table Carrots.

F268. VICTORIA. A very large and rich stock carrot. It is a heavy cropper on all soils. Roots are very symmetrical, of excellent quality and orange yellow in color. This variety is also grown quite extensively for rabbit feed. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.10 postpaid. Write for prices on larger quantities.

F270. LARGE WHITE BELGIAN. Root pure white, green above ground. It will grow to a very large size, and is easily gathered. Flesh rather coarse. Is raised extensively for stock. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00 postpaid.

POP CORN

Pocket Money for the Boys.

Every boy on the farm should plant a few small patches of ground to Pop Corn. It always yields well and brings a good price on the market. The past season many of the pop corn men have been paying 12 to 15 cents per pound. Next year it may not be quite so high, but it will not be cheap and will help to make you pocket money. Five pounds will plant an acre.

F312. BABY RICE OR JAPANESE. Was imported from Japan; it is the smallest and best of all Pop Corn. I gave this corn a thorough test in my fields and found it to be much better than expected. It stools or suckers very freely. One kernel often producing 6 to 12 stalks. The stalks grow 4 to 5 feet high, and each stalk producing 3 to 6 small, well developed ears. The ears average 3 to 4 inches long and are well filled with beautiful kernels, 300 to 400 per ear. The corn when popped is snowy white and the kernels are free from hard centers, as found in all other varieties. Pop corn dealers usually pay 5 to 8 cents per pound more for this corn than any other variety. Pkt. 5c; $\frac{1}{4}$ lb. 8c; lb. 20c; 3 lbs. 55c postpaid.

F314. MONARCH WHITE RICE. Bears from 3 to 6 ears per stalk and produces from 1,500 to 2,000 pounds per acre. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 15c; 3 lbs. 45c postpaid.

F313. BABY GOLDEN. This variety is very much like Baby Rice, only the kernels are a rich golden yellow. The ears are small, but every stalk, and sucker have 3 to 5 nice, well filled ears. For quality, Baby Rice is far superior to all other varieties. The kernels are small, but pop out nice and white, almost as large as the larger varieties, but do not contain any hard centers. I prefer it to all other varieties for eating. It will not yield quite so heavy as the large eared varieties. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 20c; 3 lbs. 50c postpaid.

F316. QUEEN'S GOLDEN. Color a peculiar lustrous golden yellow, pops to a rich cream color, very prolific. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 20c; 3 lbs. 45c postpaid.

Danver's Half Long

Oxheart.

Sonderegger's Improved Half Long

SWEET CORN

Sonderegger's Earliest

Every farmer should plant a small patch of Sweet Corn, some early and some late. Of the yellow varieties I would recommend Sonderegger's Golden, and of the white varieties Sonderegger's Earliest for early use; Sonderegger's Improved Early Evergreen and Stowell's Evergreen for late planting.

One pound will plant about 150 hills; 15 pounds will plant one acre in hills. Sweet Corn being liable to rot in cold or wet ground, should not be planted before May, or until the ground has become warm. Give frequent thorough, but shallow cultivation until tassels appear. My prices for pkt., $\frac{1}{4}$ lb., lb., and 5 lbs. is postpaid, larger quantities to go at purchaser's expense.

F292. SONDEREGGER'S GOLDEN. (65 days.) If you like a yellow sweet corn, do not fail to try Sonderegger's Golden. I have grown it for six years with the best of success. The stalks grow 4 to 5 feet high, each stalk producing one or two well-developed ears 7 to 9 inches long, filled with beautiful golden yellow kernels. Matures about the same time as Early Minnesota. This corn contains about 5 per cent more sugar and 55 per cent less starch than the early white varieties, which makes it much better for table use. The originator says: "It is the sweetest Sweet Corn in the world." Had several varieties tested for sugar and starch contents, have found none sweeter. I would advise all of my customers who are fond of a good Sweet Corn to try at least a packet. Once used, you will plant no other. Does well in all localities where the seasons are not too short. Pkt. 8c; $\frac{1}{4}$ lb. 10c; lb. 30c; 5 lbs. \$1.40. postpaid.

F293. DELUE'S GOLDEN GIANT. Is just as good as Golden Bantam to eat but the ears are 50 per cent larger, which has made it very popular wherever grown. They have 12 to 14 rows of deep yellow luscious kernels and about 50 of them will fill a bushel box. It is one of the most profitable varieties, both for market and home use. Is just a little later than Golden Bantam. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 35c; 3 lbs. \$1.00, postpaid. 10 lbs. \$2.75, not prepaid.

F296. SONDEREGGER'S EARLIEST. (60 days.) If you want an early Sweet Corn, plant this variety. It originated in Montana, where the seasons are short and where only the earliest varieties mature. After giving it a thorough trial three years on my trial grounds, I find it is the largest eared early white variety I have ever grown. The ears are pearly white, 7 to 8 inches long and of fine quality. It matures somewhat earlier than Early Minnesota. I can recommend this variety especially for the North and West. Pkt. 8c; $\frac{1}{4}$ lb. 10c; lb. 30c; 5 lbs. \$1.40 postpaid.

F302. EARLY MINNESOTA. (65 days.) Another old variety which most all market gardeners plant, both for early and main crop. The stalks grow 4 to 5 feet high, bearing one or two ears each, long and eight-rowed; kernels very broad, sweet and tender. I can recommend this corn both for home use and market. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 25c; 5 lbs. \$1.10 postpaid. Not prepaid, 10 lbs. \$1.75.

F304. SONDEREGGER'S IMPROVED EARLY EVERGREEN. (70 days.) In this new sort I believe a valuable variety of Sweet Corn has been found. It resembles Stowell's Evergreen very much, only is ready for use about ten days earlier, and remains in condition fit for use longer. The ears grow to a good size, about 7 or 8 inches long, are well filled and kernels are of a very sweet and tender flavor. Extra fine sort for market gardeners. It is one of the best varieties for canning and drying, as the ears are ready for use when the weather is still hot, which helps much in drying corn in the sun. Pkt. 8c; $\frac{1}{4}$ lb. 10c; lb. 25c; 5 lbs. \$1.35 postpaid. Not prepaid, 10 lbs. \$1.85.

F300. MAMMOTH WHITE CORY. (65 days.) An old standard variety which is planted quite extensively for early use. The ears are large and of good quality. Pkt. 5c; $\frac{1}{4}$ lb. 10c; lb. 25c; 5 lbs. \$1.10 postpaid. Not prepaid, 10 lbs. \$1.75.

F306. COUNTRY GENTLEMAN. (70 days.) Extremely productive; stalks average three ears. Kernels small, irregular, very deep and pure white, of very sweet and delicious flavor. Ears average 9 inches long. Pkt. 5c; $\frac{1}{4}$ lb. 8c; lb. 25c; 5 lbs. \$1.15 postpaid. Not prepaid, 10 lbs. \$1.90.

F308. STOWELL'S EVERGREEN. (80 days.) The standard variety. Very productive; ears large; grains deep, tender, sugary and remain long in edible condition. This variety is used by most canning factories; is also an excellent sort for drying. Pkt. 5c; $\frac{1}{4}$ lb. 8c; lb. 22c; 5 lbs. \$1.00 postpaid. Not prepaid, 10 lbs. \$1.75.

Enclosed please find draft for \$4.00 for tulips and please rush order out at once. The bulbs we received from you on previous orders were the finest tulips I have ever seen.

Mrs. J. B. Sutter,
Carmen, Okla.

Delue's
Golden Giant.Sonderegger's Early Golden, grown by
H. Schwarzenbach, Dahlia, Wash.

CUCUMBER

One ounce will plant about 50 hills, two to three pounds to the acre. Succeeds best in rich, loamy soil. For first early, sow in hot beds, six weeks before the plants can be set out in the open ground. For general crop, plant in May, in open ground, about 3 seeds to a hill, 4 feet apart each way. For cucumber bugs I advise using Slug Shot or Bug Death very freely in the morning, when the dew is on, or right after a rain.

IMPROVED LONG GREEN.

F324. (65 days.) A standard main crop variety, and one that always sells well in the markets. I can personally recommend them for the home garden, as they make delicious pickles when small, and are also one of the best for slicing, being crisp and of fine flavor. The fruits grow about 9 inches long, are dark green in color and of excellent quality. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.25.

WHITE WONDER.

F319. This is a new snow white cucumber which I can highly recommend to all my customers. It grows to a good size, usually 6 to 8 inches long and is very prolific and uniform. It matures eatable fruits about the same time as the White Spine, but will keep much longer. It is of fine flavor and the flesh is firm and crisp, which makes it in great demand for slicing, also for salads and pickling. Aside from the excellent quality of this cucumber, it bears a great quantity of them. I would be pleased to hear what success my customers have with this cucumber next season. For cucumber bugs and green lice, use Slug Shot, which you will find listed on page 126. Pkt. 15c; oz. 35c; $\frac{1}{4}$ lb. \$1.00, postpaid.

DAVIS PERFECT.

F320. (50 days.) An excellent cucumber for both outdoor use and forcing. The fruits grow 11 to 12 inches long on an average; slim, slightly pointed, a dark glossy green color, which they keep until ripe, then turning white. In quality it is very tender, brittle and of fine flavor. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.10 postpaid.

HYBRIDE WHITE SPINE.

F325. This splendid new cucumber is the result of a cross between an English forcing variety and the White Spine. The result was the cukes are longer, of thinner shape and of a much darker color. They are very prolific and excellent shipper and hold their color well which makes them a great favorite among the market gardeners as well as the home gardeners. My stock of seed is all northern grown and is of excellent quality. Pkt. 15c; oz. 40c; $\frac{1}{4}$ lb. 90c; lb. \$3.25 postpaid.

F318. EARLY FORTUNE. (52 days.) An attractive new variety of recent introduction, which is becoming very popular. It is well liked by market gardeners and shippers because of its deep green color, which it retains much longer than most other varieties, and therefore, remains in slicing condition long too. In size it is larger and slimmer than White Spine, smooth and of very fine texture. Flesh is white, crisp and brittle, making an excellent slicing sort. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 65c; lb. \$2.40 postpaid.

F322. IMPROVED EARLY LONG WHITE SPINE. (55 days.) Selected stock. The most popular variety with market gardeners. One of the best for the table. Flesh tender and crisp. Fruit uniform in size, straight and light green, with few spines. Very prolific. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.25 postpaid.

F326. EARLY FRAME OR SHORT GREEN. (50 days.) An excellent early variety for table use and pickling. The fruit is straight, handsome, smaller at each end, bright green, and flesh crisp and tender. The vines are vigorous and productive. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 65c; lb. \$2.30, postpaid.

F328. EARLY CLUSTER. (50 days.) Every spring I have a number of calls for Early Cluster Cucumber and as it is my aim to always please my customers, I decided to list this old and popular variety this spring. The vines are hardy and very vigorous, bearing fruits in clusters of two and three. The fruits are short, thick, dark green, crisp and tender. This sort is planted in many sections for the home garden. It is extensively used as a pickling cucumber as well as for slicing. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 65c; lb. \$2.40 postpaid.

F330. NEW EVERBEARING. (65 days.) It is of small size, very early, enormously productive and valuable as a green pickler. Continues to produce fruit until killed by frost, whether the ripe cucumbers are picked off or not. The fruit is perfect in shape, of fine color. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.10

Improved Long Green.

Hybride White Spine.

F332. CHICAGO OR WESTERFIELD PICKLING. (65 days.) Selected stock. Fine for market. It is the best cucumber for pickles, and is used by a vast majority of the pickle factories. The fruit is of medium length, pointed at both ends with large and prominent spines. The color is a beautiful deep green. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.25, postpaid.

F336. JAPANESE CLIMBING. While all cucumbers are running vines, yet this variety is much more creeping or climbing in its habit, so much so that it quickly climbs on poles and trellises. This makes it very desirable for small gardens as it takes up less room and the fruits keep much cleaner as they are kept up from the ground. The quality is splendid for pickling as well as for slicing for salads. The fruits are of good size and of fine flavor. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.00, postpaid postpaid.

Last season I planted your White Wonder Cucumber and as dry and hot as the season was we raised and sold them by the bushel. They did unusually well, and am sending for an ounce of seed, also an ounce of Improved Long Green.

Mrs. E. Gerber, Hendley, Nebr.

Davis Perfect.

KOHLRABI

One ounce will produce 3,000 plants and cover 200 feet of drill.

F342. EARLY WHITE VIENNA. (50 days.) Can be started the same time as Cabbage and transplanted or can be sown in the open ground. They are easily grown. The flesh is white, tender and of delicate flavor, much better tasting than turnips. Should be cooked same as turnips. I consider this the best variety both for market gardeners and for home use. Pkt. 10c; oz. 30c postpaid.

F344. EARLY PURPLE VIENNA. (60 days.) Bluish-purple similar to above except in color. Flesh white. Pkt. 10c; oz. 30c; ¼ lb. \$1.10.

LENTILS

F348. Used in oriental countries as principal article of diet. Splendid for soups. Cultivate same as peas. Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 85c postpaid.

EGG PLANT

F284. NEW YORK IMPROVED LARGE PURPLE. (140 days.) This variety has about superseded all others, both for market and home use. They are easily grown and should be grown more. Pkt. 10c; ½ oz. 35c; oz. 60c.

F285. CHINESE WONDER. This is a new variety of egg plant from China. The fruits are long and slim, often attaining a length of 12 to 15 inches, and only 2½ to 3 inches in diameter. They are a beautiful pink color when ripe and contain but very few seeds, which make them very desirable for cooking. The culture directions are the same as for other egg plants. Pkt. 15c; ½ oz. 50c postpaid.

OKRA OR GUMBO

The young seed pods of this southern plant are used for the well known and delicious "Gumbo" soups, alone or with chicken. Its smooth, glutinous taste is much liked. Probably the finest known vegetable for table use. Easy to grow. Plant in spring as soon as danger of frost has passed. Plant in drills or hills, 18 to 24 inches apart. Cultivate same as corn.

F380. WHITE VELVET. Produces pods larger than any other. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.25 postpaid.

ROSELLE

F384. The Currant Jelly Plant and uses only one-half the amount of sugar. While, of course, it is not true currant jelly, for that could only come from a currant bush, Roselle makes a bright red jelly and tastes very much like currant, making it an excellent substitute. Sow in April where the plants are to remain and thin out to 12 inches in the row. The plants grow very fast and produce many deep red berries. Plants are adapted more to warmer climate. Pkt. 10c; oz. 35c, postpaid.

MUSTARD

F376. WHITE. Best for salad or culinary purposes. Pkt. 5c; oz. 15c; ¼ lb. 30c; lb. \$1.10 postpaid.

F378. SOUTHERN GIANT CURLED. Highly esteemed in the South, where seed is sown in fall and plants used early in spring as a salad. Pkt. 7c; oz. 15c; ¼ lb. 35c; lb. \$1.25 postpaid.

ENDIVE

Ready for the table in 45 to 50 days from seed. One ounce to 100 feet of drill. One of the best autumn and winter salads. Sow from June until August, one-half inch deep in drills 14 inches apart and thin out to one foot apart in rows. When nearly full grown, bleach by tying the tips of the leaves.

Everybody should plant Endive. It is easy adaptable to our soil and climatic conditions, and is just as easy to grow as lettuce. If they are to be used green, the leaves must be tied together and bleached. For use during the winter they should be dug in fall before heavy frosts set in, with some dirt around the roots and brought into the cellar for bleaching. I prefer it to lettuce. Pkt. 5c; oz. 15c; ¼ lb. 40c postpaid.

F288. BROAD LEAVED BATAVIAN. (45 days.) A large summer variety, productive. Pkt. 10c; oz. 20c; ¼ lb. 50c.

F290. GIANT FRINGED WINTER. (45 days.) Best for late planting. Leaves large, very curly, of fine flavor. Pkt. 5c; oz. 15c; ¼ lb. 40c.

LETTUCE

I would not advise my customers to plant Lettuce seed during the hot summer (from the latter part of June to the latter part of August) as it seldom comes up during hot weather. Lettuce is a cool weather plant and does best early in the spring and from early fall until after frost. To grow nice head lettuce, the seed should be started in green house or hotbed by the first of March and transplanted to the garden as soon as weather permits. For fall use, plant in open ground the latter part of August and transplant to cold frame or hotbed. Lettuce seed should be covered very shallow to secure germination. For late supply sow in the open ground as soon as the season will permit, in rows one foot apart; thin out plants 2 to 3 inches in rows. One ounce will sow 100 feet in drill, 2 to 4 pounds to the acre.

F366. EARLY CURLED SIMPSON. (35 days.) White seeded. One of the best early sorts for market or family use. Forms a large, loose head. Leaves beautifully crimped, dark green, very tender and crisp. Pkt. 10c; oz. 15c; ¼ lb. 35c postpaid.

Early White Vienna Kohlrabi.

New York Egg Plant.

F286. GREEN CURLED. (40 days.) Everybody should plant Endive. It is easy adaptable to our soil and climatic conditions, and is just as easy to grow as lettuce. If they are to be used green, the leaves must be tied together and bleached. For use during the winter they should be dug in fall before heavy frosts set in, with some dirt around the roots and brought into the cellar for bleaching. I prefer it to lettuce.

Green Curled Endive.

LETTUCE—(Continued)

SONDEREGGER'S EXTRA EARLY HEAD

F350. (40 days.) This new lettuce is sure to become popular, both in home or market gardens. Heads are medium size, solid, round; leaves of light green color, outer leaves slightly tinged with brown and inner leaves of a bright yellow. The flavor is very rich, buttery, crisp and tender. It is hardy as well as early, and its fine, large heads are ready for use in advance of any other head lettuce. I plant this variety for early, sowing seed early in March in hot-bed, and transplanting as soon as the frost is out of the ground. Lettuce is not damaged by light frost. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 45c postpaid.

LOS ANGELES OR NEW YORKER.

F361. I find this to be one of the solidest heading varieties of lettuce I have ever grown. The heads are large, firm, crisp, very tender, and of fine flavor. It is a great favorite with the market gardeners in California and other western states, also the south, where head lettuce does well. Here in Nebraska the heads do not get quite so solid. I have grown some very nice ones the past season. I would be pleased to get reports from my customers as to your success on this variety, or any other varieties which I list. It will help me in making my next catalog. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. \$1.15 postpaid.

F352. IMPROVED HANSON. (47 days.) This is one of the most reliable sure heading sorts I list. The heads are globular, but later than my Sonderegger's Extra Early Head. The leaves are large and very broad, fairly blistered and crimped; color light green; quality fine. A fine variety for midsummer planting outside, as it withstands the hot seasons better than any other sort I know and is slow to run to seed. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c postpaid.

SONDEREGGER'S BUTTERHEAD.

F354. (45 days.) This is the best all around head lettuce I list. It is an excellent variety for forcing and summer use, as it is slow to run to seed and resists heat well. I can recommend it for our western climate, as in my trial grounds it withstood the dry hot weather remarkably well. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 40c postpaid.

F356. MAY KING. (52 days.) The new early lettuce. This variety is exceptionally early outdoors, attaining a size suitable for use before other sorts, and is also very satisfactory for forcing. It has medium sized, solid and round heads. Flavor rich, crisp and tender, melting in the mouth like butter. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c.

F358. PRIZE HEAD. (50 days.) A splendid lettuce for the home garden. Leaves are of reddish brown color, variegated with dark green. The heads are of good size, tender and of fine flavor. Excellent for late planting, as it stands heat and drought well. A splendid variety for the western states. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c.

F362. BIG BOSTON OR IMMENSITY. (45 days.) A very popular variety with gardeners who want a large heading, forcing sort, and also for outdoor winter culture. The plants are large, hardy and vigorous, with broad, smooth, thin leaves of light green color, and when well grown are very tender. This is grown in the South as a winter lettuce. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c postpaid.

F370. PARIS WHITE COS. The Cos lettuce differs entirely in shape from other varieties, the head being elongated and of conical form. The outer coloring of this variety is yellowish green. Very crisp and sweet. Considered by many to be the highest quality of all lettuces. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c postpaid.

F371. CHICKEN LETTUCE. (Chisna.) You have doubtless often read in the poultry journals that lettuce was an excellent green feed for chickens. In my new Chicken Lettuce you will find a feed that will yield more than any other green feed plant. This is the best to grow for chickens, for when once cut, it starts again, or the leaves can be pulled off each stem like kale. This lettuce does not make heads, but grows a stout stalk 2 to 3 feet high, just loaded with leaves. Pkt. 10c; oz. 25c.

I think your Giant Butter Radish are the best I have ate anywhere. We have had some eight inches in circumference and they are just as mild and solid as the smaller varieties.

Mrs. Geo. G. Johnson
Ashby, Nebr

Improved Hanson.

Sonderegger's Extra Early Head

In the spring we purchased Los Angeles or New Yorker Lettuce seed of you. We had some heads that weighed 8 lbs., the roots cut off and the outer leaves. Our customers called it Cabbage Heads. I will enclose photo of some of our heads.

Miss Madeline Muths 1508 4th St. Coeok, Alabama 16460

Sonderegger's Earliest Muskmelon.

Are sending two snap-shots of Watermelons, Mushmelons, Tomatoes and Mangels, that were raised from your seeds. All of your seeds grew just fine this year. The Watermelons are from your mixed variety seeds.

Anna Schmale, North Bend, Neb.

Bender's Surprise.

F387. DELICIOUS GOLD LINED. A wonderful new melon of the Rocky Ford type. It is slightly oblong, absolutely covered with a thick netting and has an extremely small seed cavity. The flesh is green, except for a slight gold lining next to the seed cavity. It is very sweet and juicy and of excellent flavor. Ripens medium early. Pkt. 10c; oz. 25c; ¼ lb. 60c; lb. \$2.25 postpaid.

F390. THOROUGHbred ROCKY FORD. (70 days.) This is a good all around melon and is somewhat better than the old strain of Rocky Ford. Flesh is greenish white in color, very juicy and rich. It is medium in size, of round, oval form and good keeper. Pkt. 10c; oz. 15c; ¼ lb. 55c; lb. \$2.00 postpaid.

F396. BURRELL GEM (75 days.) Same size and shape as the Rocky Ford, but the flesh is of a rich golden and most delicious flavor. Pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.50 postpaid.

MUSKMELONS

Earliest varieties ready in 80 to 100 days from sowing. General crop requires 115 to 140 days. Melons thrive best in a light rich soil. Plant when ground has become warm and dry and danger from frost is past, in hills 6 feet apart each way, in well enriched soil, 12 to 15 seeds in a hill. After all danger of bugs is over, thin out to three plants per hill. One ounce will plant 60 hills, 3 lbs. to the acre.

SONDEREGGER'S EARLIEST.

F395. I can highly recommend this new melon to all my customers, especially the market gardeners. This is the earliest muskmelon on the market; in Michigan and Minnesota the fruit ripens in 60 days from planting of the seed. It is two to three weeks earlier than any variety I have ever tried out. The melons are netted, slightly ribbed and of medium size, weighing about 3 pounds each. There has been other early melons and other varieties that are vigorous and hardy, but there is none besides Sonderegger's Earliest that combines all those characteristics with the quality of the late maturing varieties. The flesh is deep, very sweet and melting and of golden yellow color, which makes it attractive to buyers. If you try this melon once you will always want it again. Pkt. 10c; ½ oz. 35c; oz. 50c.

Gentlemen: Please do not run out of Sonderegger's Earliest Muskmelon seed. They are the best Muskmelons ever raised in this state in productiveness, in flavor, in size, in earliness; they stand at the head of the class. I had them last year three weeks before any home-grown Muskmelons were on the Topeka market. If anyone should not believe this, just tell him to come to my place the middle of July and I can show them what a good Muskmelon is.

M. A. Keyser, Willard, Kans.

F386. EXTRA EARLY HACKENSACK. (65 days.) Melons weigh from 4 to 10 lbs., round in form, flattened at the ends and well ribbed. Skin is deeply netted. Flesh light green, rich and sugary, and of excellent flavor. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.75 postpaid.

F398. EMERALD GEM. (80 days.) Of excellent quality and medium size. The white ribbed skin is perfectly smooth and of a deep emerald green color. The flesh is thick, of a rich salmon color and very juicy. Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.75 postpaid.

F400. BANANA (85 days.) Long, slim, banana-like fruit, cream color; flesh salmon, of rich flavor and delicious odor. Matures late. Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$2.25 postpaid.

F402. HONEY DEW CASABA. (120 days.) A new variety that came here from Egypt, and is sure to become a favorite on account of its exceedingly sweet flavor. It is a globular, smooth, white melon, measuring about nine inches in diameter and weighing generally about 10 pounds. The flesh is a transparent greenish white and very thick. Fruits ripen in about 120 days. The melons will keep under proper care for months, and some growers pile them up and cover them with vines and straw to await a better market. I would advise to try one packet this year. Pkt. 10c; oz. 25c postpaid.

F389. BENDER'S SURPRISE. The melons are of oval shape, light green with coarse setting, as they mature they have a golden tint. Flesh deep orange, very thick, delicious, sweet and of fine flavor. Grows to quite large size, weighing up to 10 lbs. each. The melons are very firm, keep 5 to 7 days after picking and actually improve in flavor during this time. The genuine seed which I offer is still scarce. Pkt. 10c; oz. 30c; ¼ lb. \$1.00.

F391. GOLDEN HEART. Is a medium early melon, ripening 6 to 8 days ahead of Osage. The flesh is thick, very tender and of a beautiful golden salmon color. Is of excellent flavor, being very sweet and delicious. It ripens clear to the skin. It is well ribbed, and the thin dark green skin is covered with a dense netting of grayish green. The melons are small, about 5 inches in diameter, and weigh 1½ to 2 lbs., just the right size for hotels and restaurants which prefer them to all others. Pkt. 10c; oz. 25c; ¼ lb. 60c; lb. \$2.25 postpaid.

WATERMELONS

A light, sandy soil, with good exposure to the sun is the best for watermelons. It should be prepared deep, but receive shallow cultivation. Hoe often and thoroughly. To get good, strong vines early in the season form large, well drained hills of earth made very rich, about 8 feet apart. In these plant the seed as soon as the ground is warm and dry, dropping 6 to 10 seeds in the hill. Protect the young plants from insects. One ounce to 30 hills, 3 lbs. to the acre.

TOM WATSON.

F404. (90 days.) An extra long melon of attractive appearance, uniform shape and quality. The dark green rind is tough, but thin, and easily withstands shipment to distant markets. The deep red flesh extends to within three-fourths of an inch of the green rind, is crisp, melting and of finest flavor. The melon measures about 24 inches long and 12 inches in diameter and often attains a weight of from 50 to 60 pounds. It is very prolific, producing large, delicious fruits. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.90 postpaid.

NEW IRISH GRAY.

F407. The size of this melon is uniformly large and it closely resembles the Kleckley's Sweet except in color, which is a yellowish-gray. Its superior eating and shipping qualities have made this new melon very popular wherever grown. Flesh is brilliant, sparkling red, very sweet and firm but without hard centers. The rind is almost as tough and hard as Citron, making it an excellent shipper. It is earlier than Tom Watson and practically every melon gets to be marketable size. They keep a long time after picking. Seeds are white. Would be pleased to get photos of this variety or any other which I list for my photo contest next season. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 80c; lb. \$2.10, postpaid.

NEW WINTER MELON.

F405. A new long keeping watermelon not a Citron. Every farmer should plant a few seeds of this variety so you will have the sweet, luscious melons for Thanksgiving day. The fruits are of medium size, round, pale yellow when ripe. Flesh bright red, very crisp, and as sweet as honey. Seeds very small and black. Take fruits from field before frost and store in cool cellar, they will keep in perfect condition at least sixty days. Pkt. 15c; oz. 30c; $\frac{1}{4}$ lb. 85c; lb. \$2.75 postpaid.

F406. COLE'S EARLY. (65 days.) This is a very choice melon for the home garden and can be grown farther north than any other variety. Flesh bright red, crisp, very delicate, sweet and excellent in flavor. It is an abundant bearer of medium sized but very solid melons with thin rind. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$1.75 postpaid.

F408. KLECKLEY'S SWEET. (70 days.) Very productive. The fruit is oblong, color dark green, flesh deep red, stringless, solid and very sweet, with but few seeds, set near the rind. I can personally recommend this melon as being one of the best to raise in Nebraska. They ripen early and are of a large size. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50.

F422. McIVOR'S WONDERFUL SUGAR. (90 days.) This is becoming the most famous melon for sweetness and high quality. The fruits are long, averaging about 35 lbs. each. Rather light colored, irregularly striped and mottled with dark green. The rind is thin, but tough, so that it is a good shipper. Flesh is delicate, light red, entirely stringless, very tender, juicy and luscious. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.75 postpaid.

F411. GOLDEN HONEY. At last there has been produced a really good yellow fleshed Watermelon. The flesh is golden yellow in color, firm, crisp, glistening and freely melts in your mouth. The rind is very thin and hard which makes it a good keeper. Golden Honey is oblong in shape, light green, with broad molted stripes of a darker shade. Will average about 20 lbs. each. I can highly recommend this new variety to all my customers. Pkt. 15c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.25 postpaid.

F413. HALBERT'S HONEY. This melon grows to about the size of Kleckley's Sweet, is very blunt on both ends and averages 18 to 20 lbs. in weight. The flesh is a beautiful crimson, very crisp and tender. The rind is quite thin so it is not a good shipper, but an excellent melon for home use and local market. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50, postpaid.

F428. CITRON. (90 days.) For preserving. Grows uniformly round and smooth, dark green mottled with light green; flesh white and solid. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

F430. MIXED VARIETIES. Many kinds in a good mixture. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25 postpaid.

Two years ago we had 50 American Elm trees from you; small ones, 12-20 inches high. These were for use in our park nursery and have proven very satisfactory.

A. E. Thompson,
Mayor, Gooding, Ida.

I received the order and everything is O. K.

J. Katyll, Chicago, Ill.

Enclosed you will find a photograph of some of my large melons I raised this year. Please enter this in your picture contest in October. These are Tom Watsons. U. J. Hildebrand, Rosemond, Ill.

You will find enclosed a picture of Irish Gray Melon, that I raised from seed I got from you last spring. No doubt, you will receive pictures of larger Melons, but I consider my Irish Grey very nice one weighed 42, 40, 38. This has been an off year for Melons in this part of the state.

H. L. Hartzell, Wakefield, Kans.

A ton of Kleckley's Sweet, grown by Mrs. H. H. Linke, Eustis, Nebr.

ONIONS

Onions are easily grown from sets or seed. If grown from seed, the ground should be prepared in the fall and the seed sown the following spring, just as early as the ground is dry enough to work. Sow in February or March—the earlier the better. Onions are not damaged by frost. By sowing early the onions tend to. On good ground onions usually yield 100 to 200 bushels per acre, and they always bring a good price. A strong, deep, rich and loamy soil is most suitable for this crop. Sow thinly in drills $\frac{1}{4}$ inch deep and 14 inches apart. Keep the surface of the ground open and free from weeds, but do not ridge up to the growing bulbs. One ounce will sow 100 feet of drill, 4 to 5 lbs. per acre.

Sonderegger's Prizetaker.

Yellow Globe Danvers.

Large Red Wethersfield.

SONDEREGGER'S PRIZETAKER.

F432. Everyone who has a garden should plant more onions. They are the most healthful vegetable grown and are fine for table use both green and sliced. I find this to be the largest and handsomest yellow globe onion for home use or market. They attain an immense size, which you will note by the above photograph. The six Prizetakers measured almost 22 inches in diameter. It has a bright straw color and a thin neck. Ripens up hard and fine; flesh is pure white, fine grained, mild and of delicate flavor. Excellent for fall and winter use. In size and quality, they were equal to the large yellow Spanish onions. In growing onions they should be closely watched. Pull them before they begin to make second growth roots. If they are allowed to make second growth roots before pulling it will spoil the keeping quality of the onions. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 65c; lb. \$2.25.

YELLOW GLOBE DANVERS.

F440. (120 days.) A yellow onion of large size and globular shape that I have planted in my garden with the best of success. The flesh is white, solid and of good quality. The crop is uniform and ripens at one time. It is one of the best yielding varieties and an excellent keeper. I consider this the next best yellow onion to my Sonderegger's Prizetaker. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

LARGE RED WETHERSFIELD.

F434. (100 days.) To any of my customers that want a red flat onion of extra good keeping qualities for winter use, I would recommend Red Wethersfield. Onions of large size, round, somewhat flattened, heavy yielder and most excellent keepers. The skin is deep purplish red; flesh purplish white, moderately fine grained and of a stronger flavor than other kinds. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 60c; lb. \$2.30.

DANVERS YELLOW FLAT or LARGE STRASSBURG

F442. (110 days.) Similar to Danvers Globe except in shape. Ripens very quick, is a sure cropper and yields well. Will stand drought well and is used largely for growing onion sets. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

F433. SOUTHPORT YELLOW GLOBE. (110 days.) A fine strain of yellow globe. Bulbs of handsome appearance and superior quality. They are fine keepers uniform in size and shape and always in good demand in all markets. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.75 postpaid.

F436. SOUTHPORT RED GLOBE. (110 days.) Medium early, grows to a large size, skin deep red, flesh fine grained mild and tender. A good yielder. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 65c; lb. \$2.50 postpaid.

F444. AUSTRALIAN BROWN. (110 days.) This variety is planted quite extensively in the western states. It is early and exceeds all other onions in keeping qualities. Will produce a fine crop of hard, solid onions, even in unfavorable seasons. Of globe shape. The skin is light brown, flesh pure white and exceptionally mild. Pkt. 5c oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50 postpaid.

F446. LARGE WHITE GLOBE. (120 days.) Pure white, of large size and globe shape. An immense yielder and will keep good until late fall. The flesh is very fine grained, solid, of fine flavor and very mild. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 70c; lb. \$2.50 postpaid.

F448. SILVER SKIN OR WHITE PORTUGAL. (95 days.) A well known and popular variety suitable for bunching, pickles and onion sets. Also makes a good sort for winter use, the onions being large, flat, of a mild, pleasant flavor and good keepers. Ripens early. Especially good for northern latitudes. The white varieties will not keep as long as the red or yellow. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$2.50 postpaid.

F450. WHITE BERMUDA. True Tenerife Grown. These are the first early onions which are shipped north in large quantities, both from Bermuda and our southern states. My imported Tenerife seeds give the best results. In our northern climate the bulbs are smaller, but mature early and retain much of the mild, sweet flavor of the imported ones. They are pearly white, flat and very mild. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$2.50.

F456. WHITE WELSH. For Green Onions. Does not form a bulb, but puts out many shoots, making it the best kind for "green onions." On account of the mild and sweet flavor, it is superior to the green onions grown from sets. Plant is perennial. Sow either in spring or fall. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c.

ONION SETS

Indispensable for early onions for bunching, as in a very few weeks they are ready for the table. My stock is carefully grown and very nice. Prices per 15 and 25 lbs. are subject to market variation, and shipped at buyer's expense. Onion sets weigh 32 lbs. per bushel, so 1 lb. is the same as 1 quart. If you want a large lot, write for prices.

F458. WHITE BOTTOM SETS. ½ lb. 13c; 1b. 22c; 10 lbs. \$2.00 postpaid. Not prepaid, 15 lbs. \$2.40; 32 lbs. \$4.25.

F460. RED BOTTOM SETS. ½ lb. 12c; 1b. 20c; 10 lbs. \$1.90 postpaid. Not prepaid, 15 lbs. \$2.00; 32 lbs. \$4.25.

F462. YELLOW BOTTOM SETS. ½ lb. 12c; 1b. 20c; 10 lbs. \$1.90 postpaid. Not prepaid, 15 lbs. \$2.00; 32 lbs. \$4.00.

F466. WHITE MULTIPLIER SETS. Excellent quality; very early, ½ lb. 15c; 1b. 30c; 10 lbs. \$2.10 postpaid. Not prepaid, 15 lbs. \$4.00.

F468. SHALLOTS. ½ lb. 20c; 1b. 35c; 10 lbs. \$3.00 postpaid. Not prepaid, 15 lbs. \$3.90.

F464. POTATO OR MULTIPLIER SETS. Early cropper. The sets are the largest of all. ½ lb. 15c; 1b. 30c; 10 lbs. \$2.90 postpaid. Not prepaid, 15 lbs. \$4.00.

F470. RED TOP OR BUTTON SETS. Earliest of all. ½ lb. 20c; 1b. 35c; 10 lbs. \$3.00 postpaid.

F472. PERENNIAL OR WINTER SETS. Also called Egyptian or Tree Onion. Produce the earliest spring onions without winter protection. ½ lb. 12c; 1b. 22c; 10 lbs. \$1.80 postpaid.

BOTTOM ONION SETS

POTATO ONION SETS

Silver Skin.

PARSLEY

One ounce to 150 feet of drill. Soak the seed a few hours in lukewarm water and sow early in the spring in drills one foot apart. Thin out to four inches. To preserve in winter, transplant to a light cellar or glass frames. Used for garnishing and seasoning. A few seeds sown in onion rows use no space.

F476. NEW EMERALD. (70 days.) Plants are of compact growth; leaves are a handsome bright green color, finely crimped and curled. Pkt. 5c; oz. 20c; ¼ lb. 60c postpaid.

F474. CHAMPION MOSS CURLED. (65 days.) Leaves extra large, deep, rich green, very curly, which makes them excellent for table decorations. Pkt. 10c; oz. 25c; ¼ lb. 60c postpaid.

F478. HAMBURG. (100 days.) Turnip rooted variety. The roots as well as the leaves are used for flavoring soups, etc. Pkt. 10c; oz. 25c; ¼ lb. 70c postpaid.

PARSNIP

One ounce will sow 200 feet of drill, 5 lbs. for one acre. Sow early in spring in drills 15 inches apart, covering half an inch deep. When well up thin out to 5 or 6 inches apart in rows. They are improved by frost and take up in fall a quantity for winter use.

F480. IMPROVED GUERNSEY. (85 days.) Roots not so long as the Hollow Crown, but of greater diameter. Very smooth, fine grained and of excellent quality. A heavy cropper. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1b. \$1.00 postpaid.

F482. HOLLOW CROWN OR LONG SMOOTH. (85 days.) Roots long, ending somewhat abruptly with a tap root. Pkt. 5c; oz. 15c; ¼ lb. 40c; 1b. \$1.25.

MUSHROOMS

The ease and certainty with which a crop of mushrooms can be grown to perfection in any ordinary house, cellar, wood shed or barn, and the astonishing success of so many who have taken up this industry, both for profit and their own use, induces us to call special attention to the subject. The great luxury can be enjoyed by all at a trifling expenditure of money, time and labor. I recommend our English mushroom spawn as generally better both for the market gardener and private planter.

F372. BOOK. "How to Grow Mushrooms." 10c.

F374. IMPROVED ENGLISH SPAWN. Grown by special culture from large, perfect heads and then pressed into bricks of about 1½ lbs. each. Per brick, 50c postpaid. Not prepaid, 5 bricks, \$1.80.

Mushrooms.

Perennial or Winter Top Sets.

Moss Curled Parsley.

I am writing you to let you know I received my order of J. H. Hale peach trees (Order No. 6948). They are the finest trees I have ever seen in this country. The inspector said you sure have a fine bunch of trees. It will do a lot of advertising for you in this locality. Lots of trees and vines going out here and they sure stick some prices on them here.

Your customer,
Walter R. Grover, Modesto, Calif.

PEAS

Peas should be planted more in every garden. There is no vegetable any better than new peas, fresh from your garden. Peas are a very profitable vegetable to can, using the "Cold Pack" method. They are sure to keep and are much better than the canned ones you buy at the stores. Peas can be planted just as soon as danger of frost is past; a light frost will not injure them. For early plantings I can recommend **Alaska, First and Best, Tom Thumb and Extra Early May**. These are all good varieties, but do not bear quite so heavy as the later varieties, neither are the pods quite so large. Wrinkled varieties are more susceptible to cold wet weather than the small, round sorts, hence should not be planted very early, but they are sweeter and better flavored. Everyone should make two or three plantings of peas two weeks apart. Here in Nebraska do not try to raise two crops of peas on the same ground in one season. I have tried it several times and find that the second crop gets into the hot weather and never amounts to much. One pound will plant 75 feet of drill. In comparing prices please bear in mind that my prices are postage paid by me on pkts., $\frac{1}{4}$ lb., lb. and 5 lbs. On 10 and 25 lbs., by freight or express, purchaser paying charges.

Pioneer.

Extra Early Dwarf or Improved Tom Thumb.

EXTRA EARLY DWARF.

F492. Or Improved Tom Thumb. This is an improved strain of the old Tom Thumb and is one of the best peas for early planting. The vines grow a little taller, about 14 inches high, but they produce many more pods, which are about 3 inches long and are well filled with 6 or 7 medium sized peas. The pods mature very early and the vines do not produce more than one or two good pickings. They require little or no brush or stakes. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 45c postpaid.

EXTRA EARLY MAY.

F494. (50 days.) An extremely early variety of superior merit. Vines are dwarf, about 18 inches high, completely covered with an abundance of the finest well-filled pods. My experience has been that for a first early heavy bearing variety, you will not make a mistake by planting Extra Early May. It is of upright, hardy growth. Pods are large for an extra early sort, and quality the very best. Matures in 40 to 50 days and is always in great demand for the home garden as well as for market gardeners. I have grown them without brush or stakes, but most seasons they get a little too tall. For best results with peas, I would advise growing them on 2' or 2½ foot chicken wire. In this way peas are easily gathered and the vines are not injured, which gives them a longer bearing season. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 35c.

F488. ALASKA. (45 days.) This is the earliest pea I list. It is grown very extensively for canning and especially by market gardeners for first early. It is a good bearer. The pods are 2½ inches long and well filled, with six light green peas. Height 2 feet. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 40c; 5 lbs. \$1.75 postpaid.

F490. FIRST AND BEST. (50 days.) Pods are of good size and well filled with round, smooth peas of excellent flavor, ripening at one time. Is very productive and hardy. Height of vine, 2 to 2½ ft. Ready for the table in 50 days. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 35c, postpaid.

WRINKLED VARIETIES.

AMERICAN WONDER.

F498. (52 days.) An old standard variety, well known by most gardeners. This is the earliest of the wrinkled varieties. The vines grow 10 to 14 inches high and do not need any brush or stakes. The pods are medium sized and well filled. An excellent pea for the city gardener. Pkt. 10c; $\frac{1}{4}$ lb. 13c; lb. 40c postpaid.

EVERBEARING.

F512. (60 days.) For a second early or main crop variety I do not hesitate to recommend Everbearing in the least, as they have proven very satisfactory in my garden. The pods are of large size, well filled with very large peas of superior flavor. The vines are of robust growth and branching habit, producing new blossoms after repeated pickings. Height 20 to 24 inches. Pkt. 10c; $\frac{1}{4}$ lb. 13c; lb. 45c.

F500. PREMIUM GEM. (55 days.) Ripens a little later than American Wonder, but generally a better yielder. Pods are 2½ inches long and well filled with wrinkled peas of the finest quality. Height 12 to 16 inches. Pkt. 5c; $\frac{1}{4}$ lb. 13c; lb. 45c; 5 lbs. \$1.75 postpaid. Not prepaid, 10lbs. \$3.00.

F502. GRADUS OR PROSPERITY. (55 days.) The earliest large podded wrinkled pea. Bears in great abundance handsome pods and ripens nearly as early as the small, round, early sorts. Is quick to germinate and of vigorous growth. The pods are of bright green color, and measure 4 inches in length, well filled with luscious peas, 8 to 10 or more in pod. Height 2½ feet. For the market and home garden one of the best varieties. Pkt. 10c; $\frac{1}{4}$ lb. 13c; lb. 45c postpaid.

F504. SUTTON'S EXCELSIOR. Resembles Nott's Excelsior, but has longer and broader pods, of a light green color. The pods are square at the ends and filled with 6 or 8 large size peas. Very tender and of a most delicious flavor. Vines grow about 15 to 20 inches high and are hardy, therefore permitting early planting. Pkt. 10c; $\frac{1}{4}$ lb. 13c; lb. 45c postpaid.

My order came in fine shape, every plant being alive.

Mrs. P. J. Matz, 908 2nd St. West, McCook, Nebr.

Was pleased with every thing on my other order. Must say that you send as represented in your catalog.

A. J. Richards, Grand Island, Nebr.

PEAS—(Continued)**PETER PAN.**

F506. A splendid new pea of sturdy growth. The vines grow 15 to 18 inches high, are dark green in color and wonderfully productive, bearing numerous, handsome, large dark green pointed pods, which measure 4 to 4½ inches in length and contain 9 to 10 deep bluish-green, sweet wrinkled peas of finest quality. They mature a little earlier than Gradus, with pods equally as long. If you plant this variety, I am sure you will want them again. Pkt. 10c; ¼ lb. 13c; lb. 45c;

PIONEER.

F508. (Novelty..) One of the latest achievements in the perfection of early peas, and I cannot speak too highly of them. Vines grow about 18 inches high, are very strong and do not need support unless the soil is very rich. The pods are filled with large, tender, fine flavored peas and are ready for market about the same time as Thomas Laxton, but are much superior in quality. Pkt. 10c; ¼ lb. 15c; lb. 45c.

F514. CHAMPION OF ENGLAND.. (75 days.) The vines are of vigorous growth and produce large pods of luscious peas in abundance. If you want a late, climbing, heavy bearing pea, I would advise you to plant this variety. Pkt. 10c; ¼ lb. 13c; lb. 40c.

SUGAR PEAS.

F516. SONDEREGGER'S GIANT SUGAR. (70 days.) Edible pods. They are used in the same manner as string beans. The large broad, flattened pods are of a waxy yellow color, stringless, very sweet and tender; 4 to 5 feet high and very prolific. Pkt. 10c; ¼ lb. 15c; lb. 50c postpaid.

F518. DWARF GRAY SUGAR. Most desirable and sweetest of all edible pod peas. In my garden they turned out exceptionally fine. Pods are of good size and filled with 6 to 8 peas. Pkt. 10c; ¼ lb. 15c; lb. 50c.

F520. TALL GRAY SUGAR. Edible pods. Height 4 to 5 feet. Produces abundantly large size brittle pods, which are cooked like string beans; they are delicious, sweet and tender. Pkt. 10c; ¼ lb. 15c; lb. 50c.

LEEK

F346.. LARGE LONDON. (80 days.) A species of onion, but much milder in flavor. It is highly esteemed for flavoring soups, also when cooked like creamed onions. They are easily grown and should be cultivated same as onions. Are hardy and can be left in the ground all winter and taken up when wanted. Pkt. 10c; oz. 35c postpaid.

GARDEN LEMON

F338. This fruit is round in shape and is somewhat smaller than Vine Peach, which it resembles in growth, but has thinner flesh and has decidedly more acid, thus dispensing with the sliced lemons which are so important in putting up the Vine Peach. Directions for cooking with each packet. Pkt. 10c; oz. 35c; ¼ lb. 75c.

VINE PEACH

F340. The vine on which they are borne is somewhat similar to the muskmelon vine, and requires the same cultivation. The fruit is about the size of a large peach, oval shaped, and of bright orange color, somewhat russeted. For sweet pickles, pies or preserving, they are superb. Directions for cooking this fruit are given on every packet of seed. Pkt. 10c; oz. 40c; ¼ lb. 85c postpaid.

POMEGRANATE OR QUEEN ANNE MELON.

Delightfully fragrant. A very pretty little fruit that was grown centuries ago and is coming into popularity again. The Melons are round and yellow, irregularly striped with orange and spotted with red. The size varies with that of the peach to a good sized orange. Very aromatic. It is very easy to grow and prolific. This little fruit has always been imported, but during the war and several years since, I have been unable to get it. Pkt. 10c; oz. 25c.

Pomegranate.

I am delighted with the strawberry plants I received from you last week. They came in such good condition, far better in fact, than those which I bought in this state. I will have the pleasure in recommending wherever I can. I have given your address to some newcomers in Duneden, who I believe will order from you.

Mrs. C. A. G. Ferguson,
Box No. 74, Duneden, Fla.

Peter Pan.

Large London Leek.

Sonderegger's New Royal Pepper.
Photo from peppers grown in my
trial grounds last season.

PEPPER

Sow in hot bed in April and transplant to open ground when the weather is favorable, in warm mellow soil, in rows 18 inches apart. May also be sown in open ground when danger of frost is past and soil warm. One ounce to 2,000 plants.

SONDEREGGER'S NEW ROYAL.

F522. This new variety was found in a field of Ruby King Peppers by a pepper grower. After 18 years of experimenting and improving same, he developed this new wonderful variety. I find it is much superior in every way to the old Ruby King, therefore I have dropped that variety. My New Royal is exceptionally thick meated, practically twice as thick as the old Ruby king, and more than double the thickness of the Bell peppers. It is very mild, perfectly sweet and free from pungency and can be eaten like apples. The plants are very productive and the yield per acre is exceptional. The peppers are unusually firm and excellent for shipping; just what the market gardener has been looking for. For home use there are none better. I can highly recommend this pepper to all my customers. Try a packet and let me know next fall how you like them. Pkt. 15c; ½ oz. 25c; oz. 40c postpaid.

F526. LARGE SWEET MOUNTAIN. Bell shaped. Very large, of square form, thick, hard and less pungent than most sorts. A variety that I can personally recommend, as I have planted them in my garden for years, with the best of success. Ripens early. Pkt. 5c; oz. 40c; ¼ lb. \$1.50.

F524. CHINESE GIANT. Undoubtedly the largest pepper in existence. Plant is of strong growth and a very prolific bearer. Flesh is thick, of bright scarlet color, very mild and sweet. Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.25.

Sonderegger's Pimento Pepper.

F528. RED CAYENNE. A long, slim pod, and when ripe, of a bright red color; extremely strong and pungent. Used for making chili sauce, etc. Pkt. 10c; oz. 40c; ¼ lb. \$1.50.

F530. RED CHILI. Small fruits, three inches in length and about an inch in diameter. Bright red, very hot and fiery. Used for making Mexican chili. Pkt. 10c; oz. 40c; ¼ lb. \$1.50.

SONDEREGGER'S

PERFECTION PIMENTO PEPPER.

A New Vegetable for my Many Customers.

F532. I gave this new variety a thorough trial in my trial grounds before I listed it and find it to be all the originator claims for it. Following is the originator's description: "Years of careful selection and improvement have brought the 'Perfection Pimento' Pepper to perfection indeed, and we know it has no superior or, in fact, no equal on the market today. While the pepper is excellent for home use, it is especially desirable for canners. The meat is several times as thick as the bell pepper type and yields fully 50 per cent more edible product. It is the mildest of all peppers and is very sweet, delicious and is free from all pungency. The flesh is about 3 to 4 times thicker than that of the red peppers. It is unusually smooth and uniform in shape, so that the skins can be slipped off easily after being burnt over a hot fire for a few seconds or by being boiled a few minutes in hot water, or it can be pared like an apple. When ripe, it is a beautiful scarlet red. It is exceptionally productive and yields a heavy crop until frost. It is especially in demand by canners for pimentos, pickles and pulps. They are easy to raise. Should be grown the same as pepper." Pkt. 10c; ½ oz. 40c; oz. 75c

PUMPKIN

Pumpkins are frequently planted in connection with a crop of corn, or as a second crop after early peas, etc. Plant in hills, 8 to 12 feet apart, one ounce of seed for 25 hills; 3 to 4 pounds per acre. The fruits are very susceptible to frost, should be gathered and stored in a cool, dry place in the fall.

WINTER LUXURY.

F533. (95 days.) One of the best pie pumpkins in existence and its winter keeping qualities are almost unequalled. It is slightly oval in shape and of medium size. The fruits are evenly and finely netted and is of a yellowish russet color, so medium, early and a great producer. Flesh deep golden color, sweet and tender, and unexcelled for pies. Pkt. 10c; oz. 25c; ¼ lb. 55c; lb. \$1.50 postpaid.

F534. TENNESSEE SWEET POTATO. (75 days.) Hardy, productive, sweet and delicious. It is of medium size, of a white, creamy color and has an excellent flavor; a good keeper. Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. \$1.00 postpaid.

F538. LARGE SWEET CHEESE. (85 days.) Fruit flattened, skin cream color; flesh yellow, thick and very tender. Large, hardy, productive. Good keeper. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.25 postpaid.

F540. CUSHAW OR CROCKNECK. (75 days.) Very productive, color light cream, sometimes lightly striped, flesh salmon colored, mealy, sweet. This variety is called a squash by many people and is about as much of a squash as a pumpkin. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.30 postpaid.

F542. KING OF MAMMOTS. (90 days.) Grows to an immense size, often weighing over 200 lbs. The flesh and skin are of a bright golden yellow color. Flesh fine grained and of excellent quality. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.30.

F544. SMALL SUGAR. (65 days.) Also called Sweet Pumpkin. It is small, being about 10 inches in diameter. It has a deep orange yellow skin and fine grained flesh, handsome and an excellent keeper. The average weight is about 5 lbs. Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.30 postpaid.

F546. COMMON FIELD. (90 days.) Well known old Connecticut field pumpkin, which is of medium size, orange yellow in color and good flavor. If planted with corn, it requires only 2 pounds of seed per acre. Also good sort for kitchen use. Pkt. 10c; oz. 12c; ¼ lb. 30c; lb. \$1.15 postpaid.

Although quite dry here last year I raised more tomatoes than my neighbors did that irrigated. Will never plant a garden without some of your Beebe's Tomatoes.
Mrs. Ed. C. Lipman, Bethune, Colo.

In my back yard I have two Concord grapes three years old from which I picked over a bushel of grapes last year. These are from your nursery.
A. M. Norton, Independence, Iowa.

RADISH

One ounce will sow 100 feet of drill, 8 to 12 lbs. per acre. For first crop sow as early in the spring as the ground can be worked, and every two weeks throughout the season for succession. A warm, sandy loam, made rich and light by strong manure, is best. Sow in drills 10 to 12 inches apart. The winter varieties should be sown in July and August.

My Radish seed is saved from selected, transplanted roots; it costs more to raise Radish Seed grown that way than if no selection is made.

SONDEREGGER'S GIANT BUTTER.

F553. This is a splendid new variety which grows extremely large, but in spite of its uncommon size, does not become hollow or pithy but keeps crisp, tender and juicy ten days to two weeks longer than any other variety. One of its most prominent features is the perfect round, beautiful scarlet shape with its very small tap root which is white. The flavor of its tender and crisp flesh is unrivaled and this will be acknowledged by everyone who has compared it with other varieties. Being early, large, crisp, beautifully colored, short leaved, good forcer and long keeper, make it a most desirable radish for home use and especially for the market gardener. I have grown this variety for several years and can highly recommend it. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c postpaid.

Sonderegger's Giant Butter.

SONDEREGGER'S ICICLE.

F556. (24 days.) This is without doubt the best long white radish. I have found them to bring excellent results when other sorts fail, and I think they are of better quality, too. They are very early, with long slender, pure white roots, which will keep crisp for a long time. The roots are of a transparent whiteness, brittle, crisp, and of a fine flavor; tops very small. In my garden I plant them for first early for summer and for late use. Quality is always good. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 40c; lb. \$1.50 postpaid.

Sparkler.

FRENCH BREAKFAST.

F568. (25 days.) Well known, quick growing variety of oval shape. Will not remain crisp as long as other varieties. Bright scarlet, tipped with white. Of medium size, crisp and tender. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c postpaid.

SPARKLER.

F554. (20 days.) A very attractive and desirable radish on account of its beautiful color, quick growth and fine quality. The color is a very deep scarlet, with a pure white tip covering about one-third of lower part of root. In shape it is nearly round, slightly flattened on under side. Roots are solid, crisp and sweet and remain fit for use longer than most early radishes. It is equally well adapted for forcing as for outdoor planting. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25 postpaid.

French Breakfast.

F552. SAXA. (20 days.) The earliest Radish for forcing or outdoor culture. They have repeatedly been tried both under glass and outside, but have invariably proved to be ready for market about five days earlier than any other forcing variety. The roots are globe shaped, bright, deep fiery scarlet, with no hint of purple in it, and often reach a marketable size with only two true leaves. Because of its small tops, quick maturity and handsome color, it is considered the best forcing radish and can be recommended equally well for outdoor culture. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c postpaid.

F555. EARLY BIRD. (16 to 20 days.) This is without a doubt considered the earliest radish in cultivation. It is a very rapid grower producing radishes fit to pull in 16 to 20 days. Its rich scarlet color attracts attention everywhere, while the flesh is snow white, crisp and very sweet. Hotels and restaurants prefer them to all others. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.60 postpaid.

F558. CRIMSON GLOBE. (35 days.) This variety is suitable both for forcing or early planting out of doors. A remarkable feature of this radish is that it will grow double the size of other round red forcing radishes and still remain solid. In shape this new radish is round to oval. Flesh is mild and tender. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25 postpaid.

F560. EARLY SCARLET GLOBE. (20 days.) Extra early brilliant scarlet; nearly globe shaped and remarkably crisp and tender. Pkt. 8c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.10 postpaid.

F562. NE PLUS ULTRA. (20 days.) An extra early sort especially adapted for forcing, being ready for market in 20 days. Round and bright scarlet, very small tops; quality the best. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c postpaid.

F572. EARLY LONG SCARLET SHORT TOP. (28 days.) It grows 6 to 7 inches long, half out of the ground. It is very brittle and crisp and of quick growth; color bright scarlet. Pkt. 5c; oz. 12c; $\frac{1}{4}$ lb. 25c postpaid.

Scarlet Globe.

RADISH—(Continued)

F574. CHARTIER. (35 days.) The color of the top is crimson, running into pink about the middle, thence downward it is pure waxy white. It is very crisp, tender and of pleasant flavor. Pkt. 5c; oz. 12c; ¼ lb. 25c; lb. 90c postpaid.

F575. JAPANESE MAMMOTH OR SAKURAJIMA. This is no doubt the largest radish in cultivation. It is somewhat rounded or oblong in shape, often attaining the enormous weight of 5 to 10 pounds. The flesh is solid, firm and brittle and of excellent flavor. It will grow and thrive in any soil or climate and may be transplanted or left where it was sown. One matured radish will produce a meal for a large family. It is also excellent for feeding stock. If sown in the spring it will be ready for late fall and winter storage. This is a good novelty for your county fair. Pkt. 10c; oz. 25c postpaid.

F578. MIXED VARIETIES. Many varieties in a good mixture. Pkt. 5c; oz. 10c; ¼ lb. 25c.

WINTER RADISH

Should be sown during July and early August.

F580. ROSE CHINA. (60 days.) Bright rose color, flesh white, firm and of superior quality. Pkt. 5c; oz. 15c; ¼ lb. 35c postpaid.

F582. CALIFORNIA MAMMOTH WHITE. (65 days.) Pure white. Flesh tender and crisp; keeps perfectly through the winter. Pkt. 5c; oz. 15c; ¼ lb. 35c postpaid.

F584. LONG BLACK SPANISH. (72 days.) Roots oblong, of very large size and firm texture. Somewhat sharp in taste. Best keeper. Pkt. 5c; oz. 15c; ¼ lb. 30c postpaid.

SALSIFY OR OYSTER PLANT

Resembles a small parsnip, and when thinly sliced and cooked, is a good substitute for oysters, having a very similar flavor. It succeeds best in a light, rich soil. Sow early and quite deep, thin out and cultivate like carrots. Perfectly hardy and may remain out all winter. For winter use store a quantity in the cellar. One ounce to 50 feet of drill.

F586. MAMMOTH SANDWICH ISLAND. (95 days.) Grows to a large size, is of superior quality and pure white color. Pkt. 5c; oz. 20c; ¼ lb. 60c.

SPINACH

One ounce will sow 100 feet of drill, 10 lbs. per acre. Select rich, well drained soil, sow in drills one foot apart and one inch deep, or it may be sown broadcast at the rate of 30 lbs. to the acre. For spring and summer use make first sowing early in spring and continue at intervals of two or three weeks until the middle of June; sow in August and September for early spring use, and protect with a covering of straw during severe winter.

NEW ZEALAND OR EVERBEARING.

The best Spinach for the home garden.

F596. (55 days.) This sort is grown to supply the place of the ordinary spinach during the hottest month of the year or in dry, arid places, where the ordinary spinach does badly. In my garden I plant nothing else but New Zealand, as it does best in both cool and wet, as well as for hot and dry summers. It makes long branches or runners in the ground and by picking the end shoots it makes the plant produce much more. The plant is very large, with thick, fleshy leaves of very fine flavor, and remains crisp and tender from early summer till cut by frost. Pkt. 10c; oz. 20c; ¼ lb. 40c; lb. \$1.50.

I bought one packet of New Zealand from you last year. I supplied my friends with it and ate it at least three times a week and canned over 80 quarts, having it fresh day after day. It's the finest I ever ate and never saw it before. I have to tell you this because we are so pleased with it.

Mrs. J. G. Marron, Brainard, Nebr.

F588. ROUND LEAVED. (45 days.) Leaves large, thick and fleshy; excellent for fall sowing. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c postpaid.

F594. LONG STANDING. (50 days.) An improved strain of excellent merit, having all the good qualities of the ordinary sorts, and especially desirable because it is much later in going to seed. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 60c postpaid.

F592. VICTORIA. (50 days.) The foliage is heavy, the broad dark green leaves being of the true savoy appearance, and of finest quality. In prime condition from 2 to 3 weeks after other kinds have run to seed. I grow this variety for early use as it comes on a little sooner than New Zealand. Pkt. 5c; oz. 15c; ¼ lb. 25c; lb. 75c postpaid.

TOBACCO

One ounce will sow about 25 sq. ft., and produce plants for one acre. This is a paying crop and will do well in this state. The following varieties have been thoroughly tested in this climate. Early in the spring, burn a brush pile on the ground to be used for seed bed. Then thoroughly pulverize the soil, digging and mixing in the ashes. Sow seeds shallow. When plants are six inches high, transplant into rows 4 feet apart.

F598. CONNECTICUT SEED LEAF. Best adapted to the climate of the middle and northern states. Pkt. 5c; oz. 40c.

F600. WHITE BURLEY. Largely grown for manufacture of fine cut plug. Pkt. 5c; oz. 40c.

F602. HAVANA. Well known, large leaved variety. Pkt. 10c; oz. 40c.

Salsify.

Virginia Peanuts.

New Zealand Everbearing Spinach.

SQUASH

Any good, enriched soil is adapted to the growing of squash. The seed should not be sown in the spring until danger from frost is past and the ground is warm. Plant in hills (about 8 to 10 seeds in a hill) the early sorts 4 to 6 feet apart, the late varieties 8 to 12 feet thin out to three plants in the hill. Keep the earth about the plants loose and free from weeds. One ounce for 25 hills. 3 to 4 pounds per acre.

Every farmer should plant a small field of Squash. They do well in the corn field and also in orchards. I have had best success growing them in my apple orchard between the rows where nothing else does well. They are excellent for table use and make better pies than pumpkin.

SONDEREGGER'S TABLE QUEEN.

F603. A new squash for my many customers. This is the best baking squash I have ever tried out. When cut in halves and baked about 20 minutes it makes a most delicious dish. It is also excellent for pies. It grows 6 to 8 inches long and 4 to 6 inches in diameter, is of dark green color, hard and smooth, which makes it a good keeper. This squash is not a prize winner for size, but for quality and the number of fruits for one vine it cannot be beat. The past season from three hills of this squash I gathered 36 nice squash which were of excellent quality. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 65c; lb. \$2.25 postpaid.

BANANA.

F604. (60 days.) For a number of years I have had more or less inquiries for Banana Squash, so I made a special effort to obtain some of the seed for this spring's delivery. The seed is scarce, though, as they are very shy seeders and, therefore, somewhat high in price. The fruit grows to be of very large size, generally two feet long, and sometimes three feet. They keep equally as well as the Hubbard, but are of better quality, more prolific and earlier. They are probably the finest of all squashes in quality, very thick meated and excellent for baking. The shell is tough, but not hard like the Hubbard, and is a very good keeper. I have grown them several years and find them better than most all other varieties. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. 70c postpaid.

CUSHAW SQUASH.

F610. Every spring I have a number of calls for Cushaw Squash, so I decided to list them this year. This variety is often called a pumpkin and is about as much of a pumpkin as a squash. They grow to a very large size, are distinctly mottled green and white striped and very beautiful in appearance. The long crooked necks are solid which makes them very heavy. They are fine grained, of best quality and very sweet, which makes them fine for pies. They are also fine when sliced and fried like sweet potatoes. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 60c; lb. \$1.75 postpaid.

F606. GIANT SUMMER CROOKNECK. (45 days.) A great improvement upon the former size, runs more evenly as to type, and grows fruit in quantity on healthy, compact, bushy plants. The fruit is heavily warted, its flesh is of deep golden color, and quality best. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

F607. WINTER NUT. This is considered to be the best flavored of all the winter squashes. The fruits get to be of medium size, are almost white and have a very hard shell, which makes them excellent for shipping as well as for home use. Has a small seed cavity and seeds of small size. A good free grower and produces well. Not fit to use before September and the quality becomes better the longer the fruits are kept. As this is just a new variety the seeds are still very scarce. Pkt. 15c; oz. 35c; $\frac{1}{4}$ lb. \$1.00 postpaid.

F612. DELICIOUS. (60 days.) Considered to be the best flavored squash in existence. Color a handsome green and of nice size, weighing 5 to 10 lbs. Flesh is dark orange color, fine grained, sweet and dry. Best in winter. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 60c; lb. \$2.25 postpaid.

F614. WARTY HUBBARD. (65 days.) I consider this the ideal type of the Hubbard Squash. It is the best of all winter sorts and sells at sight in all markets. Very dark green, shell extremely hard and warty. Flesh dry, sweet and of finest flavor. Pkt. 10c oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

Table Queen Squash.

Cushaw Squash.

Banana Squash.

Warty Hubbard.

F616. GOLDEN HUBBARD. (65 days.) This is a very distinct sort of the shape and general character of the Hubbard, but a little smaller, earlier to mature, and of rich orange red color. The flesh is a little deeper colored and fully as good quality. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 55c; lb. \$2.00 postpaid.

F618. HUBBARD. (65 days.) A well known standard winter squash. Very similar to the above, however, the fruits are smoother and somewhat smaller in size. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$2.00 postpaid.

TOMATO

A part of a Beebe's Early Prolific plant, photographed in July.

White Beauty.

F624. BEEBE'S EARLY PROLIFIC. This is really a wonderful tomato and no one can make a mistake by planting it. I have grown it the past few years with the best of success. It is no doubt the earliest tomato on the market, at least I have never found any to be its equal for earliness and productiveness. The plants begin to bloom when very small and the first blossoms always set on fruits in clusters of from five to ten tomatoes. The fruits are of medium size, very solid with few small seed cavities, and of a dark red color. The skin is rather tough, which makes it a good keeper and shipper. Every year since I introduced this tomato, I have had ripe fruits in June. I kept an exact record of the tomatoes gathered from one Beebe's tomato plant from June 28th, when I gathered my first ripe ones, to Sept. 6th. I gathered 98 nice sized tomatoes, weighing 27½ lbs. After September 6th there were quite a number of green ones on the plant, but I was away for a few weeks, so did not get any record of them. When I returned the plant was still growing fine and continued to bear until killed by frost in October. Pkt. 20c; oz. 75c postpaid.

F625. ALBINO OR WHITE BEAUTY. (100 days.) At last there has been a white tomato produced which is of real value. The vines grow very strong and vigorous and are very prolific. The fruits are quite large, of an ivory white color, with no trace of red. The flesh is very solid and white, has few seed cavities, and is of the finest quality. It is the only tomato that does not contain any acid. This will make it a great favorite with thousands of people who could not eat the red tomatoes on account of their high acid contents. I have tried this variety two seasons before listing it, so my customers can make no mistake by ordering a packet. As the seed is very scarce I can offer it this season in packets only. Pkt. 25c; or one pkt. Albino and one pkt. Beebe's for 40c postpaid.

WHAT MY CUSTOMERS SAY ABOUT BEEBE'S EARLY PROLIFIC TOMATO.

I ordered my seeds from you last year. All seeds came up good. My Beebe's Early Prolific Tomatoes were the best I ever raised. Tom Watson Melons weighed 41 lbs.

Mrs. Lulu Fulgroat, Aline, Okla.

Am well pleased with the Beebe's Early Tomato. Ship at once, as the frost is out of the ground.

A. J. Suttle, Denver, Colo.

Enclosed find 20c for 1 packet of Beebe's Early Prolific Tomato. The ones I got from you last season were the FINEST and Earliest I ever raised. Am in office work here and will not be able to raise much garden, but will recommend your seed to my friends. Must raise a few toms anyhow.

Seldon Ragsdale, Perry, Okla.

The package of Beebe's Early Tomato you kindly sent me gratis for trial, was extra early, splendid quality, a good yielder, of uniform, solid, medium sized tomatoes. We have a short growing season. I find your Beebe's earlier and better quality than Bonny Best, the only other satisfactory tomato to grow in this section. The other seeds and trees I had from you were very satisfactory and shall send you a larger order this coming year.

James W. Davis, Farmington, Maine.

I have grown your Beebe's Early Prolific Tomato now for two years and never had nicer tomatoes. Many of my neighbors are buying plants from me.

Mrs. E. S. Hockensmith, St. John, Kansas.

I grew your Beebe's Early Prolific Tomatoes. They are three weeks earlier than other varieties and are sure fine. I would not have any other kind.

Mrs. Tom Huffstetter, SunLaba, Texas.

The Beebe's Tomatoes are the only kind that ever did any good with us. We had them the last two years. We used tomatoes off of a little patch for three months last year.

Fitzpatrick Bros., Bonner's Ferry, Idaho.

I am sending for a package of your early Beebe's tomato seed, price 20c.

I planted my Beebe's last year the 20th of March, and set them in the garden the 10th of May. Some of the tomatoes were getting ripe the 8th of July. We had an awful hail storm and cut them off in the ground so I didn't get any of the fruit, but they came up again and I had green tomatoes for pickles and other things. They were sure fine. I am going to try them again, so please send them at once.

Mrs. Dell Gieffith, Hiawatha, Nebr.

All seeds that I got from you last year did fine and especially the Beebe's Early Prolific Tomato. We had all we wanted to eat during the summer and canned fifty-two quarts, which we are using now.

B. L. Stone, East Vaughn, New Mexico.

I am sending you \$1.55 money order, hoping this will cover my order. If not, let me know. I tried last year without your Beebe's Early Prolific Tomato, but never again.

Mrs. J. H. Knox, Manville, Wyo.

TOMATOES

One ounce of seed for 2000 plants. Well manured, light, sandy soil is the best for early plants; sow seed in boxes or hotbeds in March. When the plants are about 2 inches high, transplant to 4 inches apart each way. Set out of doors as soon as danger of frost is over. Transplant carefully 4 feet apart each way and cultivate well as long as vines will permit. To obtain early fruit pinch off the ends of the branches when the first fruit is set.

F627. EARLY BELL. (Novelty.) (85 days.) This splendid new tomato ripens earlier than Earliana. The plants are vigorous and of extremely quick growth, yielding large, well shaped fruits in great abundance. It is smooth, of bright red color, almost seedless, the flesh thick, firm, and flavor delicious. Its main points are earliness, large size and fine flavor. Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 70c.

F628. SPARK'S EARLIANA. (85 days.) Extremely early, of large size and beautiful bright red color. Its solidity and fine quality are equal to the best late sorts. The plants are very compact with stout jointed branches. It is enormously productive. Fruit is even in form and smooth, very fleshy, solid and excellent for shipping purposes. Pkt. 5c; oz. 30c; $\frac{1}{2}$ lb. \$1.15 postpaid.

F632. NEW GLOBE. (95 days.) Extra good all round sort of distinct globe shape. Among the earliest in ripening. The fruits are of a large size, always smooth, of firm flesh and have few seeds, ripens evenly; color a fine, glossy rose, tinged with purple. Heavy yielder and of finest flavor. Pkt. 7c; oz. 30c; $\frac{1}{2}$ lb. \$1.25.

F637. NEW BIG DWARF. This big fruited but erect growing variety is one of the most important advances made in tomatoes; especially adapted to home gardens. The plant was discovered in a field of Ponderosa. Those who have in the past grown Ponderosa with its sprawling habit of vine may now have the same quality of fruit on strong, erect vines, requiring only one-fourth the space, by planting my Big Dwarf. The main stem or stalk grows about 20 to 24 inches high and is very strong and erect. The fruits are a little larger and more uniform in size than Ponderosa. Pkt. 10c; oz. 35c.

F640. NEW STONE. (115 days.) It ripens for main crop, is very large and of bright scarlet color, very smooth, ripening evenly to the stem without a crack; exceedingly solid and firm fleshed. Pkt. 5c oz. 25c.

F638. PONDEROSA. (110 days.) The largest fruited tomato. While the fruits often attain a weight of one lb. each, they are generally ridged and not as smooth as some of the smaller varieties, but solid, fleshy, with small seed cells and of fine sweet flavor. The vines are of strong growth; fruits are largely oblong in form and of deep purple color. If you want an extra large tomato of fine flavor, I would recommend to plant Ponderosa, as they have proven very satisfactory in my garden. Pkt. 10c; oz. 35c.

F644. KANSAS STANDARD. (110 days.) Very rapid growth, strong stalks, color bright red; shape round, slightly flattened, perfectly smooth; meat solid and thick, of excellent flavor. Good size, fine for shipping and first-rate keeper. Pkt. 10c; oz. 30c.

F646. GOLDEN QUEEN. (110 days.) Best large yellow variety. Ripens very evenly; fruit is smooth, of good quality and fine flavor. Fine for the home garden and a good yielder. Pkt. 5c; oz. 25c.

SMALL TOMATOES.

Excellent for Preserves and Pickles

F648. YELLOW PEAR SHAPED. (95 days.) Bright yellow, distinctly pear shaped, of rich flavor. Pkt. 5c; oz. 30c.

F650. YELLOW PLUM. (95 days.) Plum shaped deep, yellow, fine flavor. Pkt. 5c; oz. 40c.

F652. RED CHERRY (95 days.) About five-eighths inch in diameter, borne in clusters. Pkt. 5c; oz. 30c.

F654. GROUND CHERRY. Husk or Strawberry Tomato. Fruit golden yellow, size of cherry. The fruits are enclosed in a husk. Excellent for preserves, sauce or pies; very productive. Directions for preserving sent with each packet. Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 35c.

Enclosed find a picture of my garden. I am very well satisfied with your seeds; will order from you again in spring. The White Wonder Cucumber as seen in the picture, measures $3\frac{1}{2}$ in. long and nearly as thick. The fruit tastes good, will stay crisp and nice very long; is also valuable for canning. The Big Dwarf Tomato is hardly to be excelled. As seen in the picture, 5 tomatoes measured 1 yard and 2 inches. The tomato in my hand weighs 2 lbs. and 2 ozs. The picture was taken July 25. On July 2 we had enough tomatoes for our 5 men. I recommend this kind to everybody. I always start my tomatoes in a hot-bed.

Mrs. Anna Diedericks Fayette City, Pa.

I am sending you a snap-shot of my little boy and his Tomatoes. The Tomatoes are of Spark's Earliana, the first picking. They are certainly fine and I thank you for the seed. We had fine garden stuff from all the seed we bought of you.

Mrs. Arthur Magruder, Brunswick, Mo.

Kansas Standard

Big Dwarf Tomatoes and White Wonder Cucumber, grown by Mrs. Anna Diedericks See Testimonial.

Golden Ball Turnip.

Early Snowball Turnip.

White Russian Rutabaga.

Gentlemen:

I have grown your Early Prolific Tomatoes now for three seasons, and they have ripened earlier than any other kind and are of such nice uniform size. Last year was not a favorable one for any garden produce as we had an inroad of grasshoppers, but the tomatoes suffered less than anything else.

H. G. Baldwin, Dayton, Wyo.

TURNIPS

One ounce will sow 125 feet of drill. Two pounds per acre in drills, three pounds broadcast. Turnips do best in highly enriched sandy or light loamy soil. Commence sowing the earliest varieties in April, in drills from 12 to 15 inches apart and thin out to nearly six to eight inches in the row. For late planting or main crop, sow in July and August. Turnips are easily grown and are a very good vegetable. When I make my kraut I always slice a few turnips right in with the cabbage; it makes fine kraut, just try it.

F656. EXTRA EARLY PURPLE TOP MILAN. (40 days.) The earliest in cultivation. Of medium size, quite smooth, with a bright purple top; the leaves are few and short. Flesh of choicest quality, solid, fine grained. Pkt. 5c; oz. 15c; ¼ lb 35c; lb. \$1.25 postpaid.

F658. EXTRA EARLY WHITE MILAN. (40 days.) Very similar to the preceding, except the skin is pure white. My experience with both these varieties has been that they will do better planted late for early fall use, than planting in the early spring. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.25 postpaid.

F660. EARLY WHITE FLAT DUTCH. (45 days.) A most excellent early garden variety. Roots medium size, flat, color white; very early, sweet and tender. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 80c postpaid.

F662. PURPLE TOP STRAP LEAVED. (58 days.) Superior for early or late planting. Round and flat, good sized, small top, with but few leaves; flesh very fine grained. A splendid keeper. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 70c postpaid. Not prepaid, 5 lbs. \$3.25.

F664. EARLY SNOWBALL. (60 days.) A globe shaped, white skinned turnip, very fine grained, firm, and of delicate flavor. One of the best keeping of white fleshed sorts, very early and particularly adapted for family and market use. A popular sort of which I sell large quantities of seed year after year. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 75c postpaid.

F666. PURPLE TOP WHITE GLOBE. (70 days.) This is the most popular of all market turnips. The shape is globular and of good size and in appearance it is the best looking of all varieties, the white globe surface having an uneven purple edging at the top. The flesh is firm, fine grained, white and of most excellent flavor. It is a fine keeper, equally desirable for table and stock. An immense producer and good keeper. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 75c postpaid. Not prepaid, 5 lbs. \$3.25.

F668. GOLDEN BALL. (70 days.) One of the best and sweetest fleshed turnips. Not of large size, but firm, hard and of the most excellent flavor. Keeps well; excellent quality. Many of my customers prefer a yellow fleshed turnip and the Golden Ball is by far the finest of them all. It has given the best of satisfaction everywhere. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 85c postpaid.

RUTABAGAS OR SWEDES

These require a longer season than turnips do. For table use, they usually keep better and are slightly better flavored than the turnip. For feeding stock in fall or winter there is nothing superior to turnips and rutabagas, as they are liked by all kinds of stock and keep them in good condition. I would not advise planting rutabagas in localities where the summers are dry and hot. I have tried them here several times, but have had no success with them.

F672. SWEET GERMAN. (90 days.) Flesh pure white and very sweet; grows to a large size, always yields well and is a good keeper. The quality is all that can be desired. For table use and for stock feeding it is one of the best. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 75c postpaid.

F674. WHITE RUSSIAN. (90 days.) One of the finest rutabagas, a heavy yielder and very hardy. Keeps in good condition until late in spring. Quality very good, sweet and tender. This is a newer variety that has given splendid satisfaction everywhere and is in great demand for market and table use; also very good for stock feeding. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 85c postpaid.

F676. PURPLE TOP YELLOW. (95 days.) Is considered the best yellow fleshed variety. It is of fine quality and is widely grown. It keeps perfectly all winter and even into the following summer. It is justly held in high esteem for both table and stock feeding purposes and can be relied upon for general cultivation in all sections. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 70c postpaid.

AROMATIC, SWEET, POT AND MEDICINAL HERBS.

Herbs in general, delight in rich, mellow soil. Sow early in the spring in shallow drills one foot apart; when up a few inches thin out to proper distance to transplant. Some of them have very fine seed and it is only necessary after the seed is sown, to press the ground with a board. For flavoring fruits, meats, etc., a few pot and sweet herbs are necessary for every garden. If they are to be used during winter, the stalks should be cut on a dry day, when not quite in full bloom, then be dried quickly in the shade, and when dry be packed closely in boxes, with the air entirely excluded. Annual varieties are marked "A" and perennial varieties "P" after the name.

F678. ANISE. A. Used for garnishing, seasoning and for cordials. Seeds have an agreeable, aromatic taste. Pkt. 10c; oz. 25c; ¼ lb. 90c.

F680. BALM. A. The leaves are used for the making of balm wine, a pleasant beverage and tea used in fevers. Pkt. 10c; oz. 35c.

F682. BASIL, SWEET. A. The leaves are used for flavoring soups, stews, etc., also for garnishing. Pkt. 10c; oz. 30c.

F684. BORAGE. A. Leaves used for salads. Flowers excellent for bees. The flower spikes can also be used in cool drinks. Flowers very aromatic. Pkt. 10c; oz. 20c.

F688. CARAWAY. A. Seeds are used for flavoring bread, pastry, meats, etc., also used in confectionery and medicine. Pkt. 10c; oz. 15c; ¼ lb. 45c.

F690. CASTOR OIL PLANT. A. The seeds yield Castor Oil. Pkt. 10c; oz. 15c; ¼ lb. 30c.

F691. CHIVE SEED. P. Plants used for flavoring. Pkt. 25c. Plants, see page 27.

F694. CORIANDER. A. Seeds are aromatic. Used for flavoring and in the manufacture of liquor and confectionery. Leaves used for garnishing. Pkt. 15c; oz. 35c.

F696. DILL. A. Leaves and seeds are used for the flavoring of soups, preserves and pickles. Pkt. 10c; oz. 25c; ¼ lb. 75c.

F698. FENNEL. A. Leaves are used for garnishing, seeds for flavoring. The leaves boiled are used in fish sauces. Pkt. 15c; oz. 40c.

F700. LAVENDER. A. An aromatic, medicinal herb, but the plant is chiefly grown for its flowers, which are used in the making of perfumes. The dried leaves, put in paper bags, are used to perfume linen and to keep out moths. Pkt. 10c; oz. 40c.

F702. MARJORAM. A. Used for flavoring. The leaves and the shoots may be dried for winter use. Pkt. 10c; oz. 40c.

F706. SAGE. P. Leaves used for seasoning and dressing; also in medicine. Pkt. 10c; oz. 30c.

F708. SORREL, LARGE LEAVED. A. For boiling "greens" or used as a salad. Cook like spinach. Pkt. 10c; oz. 30c.

F710. SUMMER SAVORY. A. Plant is aromatic. Leaves and young shoots used for flavoring, especially with boiled string beans, also for dressing. Pkt. 10c; oz. 30c.

F712. THYME. A. Medicinal and culinary herb. Young leaves and tops used for soups, dressing, sauce, either green or dry. Thyme tea is a cure for nervous headache. Pkt. 10c; oz. 30c.

F714. WORMWOOD. A. Medicinal herb. Beneficial for poultry and should be planted in every poultry yard. Pkt. 10c; oz. 40c.

F716. WINTER THYME. P. True Winter or Perennial. It is used same as Thyme. Pkt. 15c.

DRIED HERB LEAVES.

Many of the herb seeds can be imported only from Europe, and since the war I have been unable to get them. So I have decided to list all the varieties I can get in dried leaves this year.

NOTICE—The Dried Herb Leaves are not put up in less than one-ounce packets. Prices are all postpaid.

F720. BALM. The leaves are used for the making of balm wine, a pleasant beverage and tea used in fevers. Oz. 10c; ¼ lb. 35c.

F722. BASIL, SWEET. The leaves are used for flavoring soups, stews, etc., also for garnishing. Oz. 35c; ¼ lb. \$1.00.

F724. HOREHOUND. Leaves are used for flavoring. Also used in the manufacture of cough remedies. Oz. 10c; ¼ lb. 35c.

F726. LAVENDER. The dried leaves, put in paper bags, are used to perfume linen and to keep out moths. Oz. 15c; ¼ lb. 50c.

F728. MARJORAM, SWEET. Used for flavoring. Oz. 10c; ¼ lb. 35c.

F730. PEPPERMINT. For flavoring and in cool drinks. Oz. 10c; ¼ lb. 35c.

F732. ROSEMARY. Leaves used for seasoning. Oz. 10c; ¼ lb. 35c.

F734. RUE. Medicinal. Good for fowls for the roup. Oz. 10c; ¼ lb. 35c.

F736. SAFFRON. Used for coloring and flavoring. Oz. 10c; ¼ lb. 35c.

F738. SAGE. Leaves used for seasoning and dressing; also in medicine. Oz. 10c; ¼ lb. 35c.

F740. SUMMER SAVORY. Leaves and young shoots used for flavoring, especially with boiled string beans, also for dressing. Oz. 10c; ¼ lb. 35c.

F742. TANSY. Leaves are used for tea and in bitters. Oz. 10c; ¼ lb. 35c.

F744. THYME. Young leaves are used for soup, dressing, sauce, either green or dry. Thyme tea is a cure for nervous headache. Oz. 10c; ¼ lb. 35c.

F746. WORMWOOD. Medicinal herb. Oz. 15c; ¼ lb. 50c.

GARLIC

F748. The most pungent of all the onion family. The root or bulb is composed of many small bulbs called "cloves," which are planted in the spring six to eight inches apart, and in August the bulbs are ready to gather. Large bulb 5c; ¼ lb. 12c; lb. 40c postpaid.

Marjoram

Summer Savory.

Garlic. Excellent for flavoring sausages and meats.

On the following pages I offer the best varieties of choice Flower Seeds. My seeds are fresh and of unsurpassed quality, grown by the best growers of this country and Europe. Quality is always my first consideration. There is no space so small that there is not room for a few of these beautiful flowers, and with a small outlay a succession and abundance of bloom can be obtained. **ANNUALS** bloom and ripen from the seed the first year and then perish. They are marked "A" after name. **PERENNIALS** continue flowering several years in succession. Many of them bloom the first year. They are marked "P" after name. I have cultural directions printed on all packets. For best results please follow them very closely. All Flower Seeds are sent postpaid by parcel post on receipt of price.

ASTERS. A.

Asters are of easy culture. The seed can be sown in the open ground in May and the plants will then bloom in September and October. For earlier blooming, sow in March or April, in cold frame or hotbed or boxes in the house. Seed should not be covered more than $\frac{1}{4}$ inch.

F799. CHINESE UNICUM. At last we have another beautiful new Aster. The flowers are composed of thin, thread-like petals which are a beautiful shining blood-red color. The blossoms are borne on long rigid stems which make them excellent for cut flowers and bouquets. They will keep for several days in water. Pkt. 25c; 2 pkts. 40c. postpaid.

F800. WHITE GIANT COMET OR POODLE ASTER. The handsomest of the tall Asters. Resembles Japanese Chrysanthemums. Pkt. 15c.

F802. ROSE GIANT COMET. Very large, double flowers of rose color, resembling the finest Chrysanthemums. Pkt. 10c.

F804. CRIMSON GIANT COMET. The large, double chrysanthemum-like flowers are of a beautiful crimson color and very free blooming. Pkt. 10c.

F806. PURPLE GIANT COMET. The flowers are large, double, resembling the finest chrysanthemums, and of a purple color. Pkt. 10c.

F810. COMET OR BRANCHING. Flowers large, very double, with long stems. Best cut flowers. Mixed. Pkt. 15c.

F814. PAEONY FLOWERED. Plants 12 to 18 inches high. Flowers large, extra double, mixed colors. Pkt. 10c.

F816. VICTORIA. Magnificent sort, 20 inches high, free bloomer, very double, colors distinct and brilliant. Finest mixed. Pkt. 10c.

F818. DWARF CHRYSANTHEMUM. The finest of all dwarf asters, with large, beautiful flowers in brilliant colors. Mixed. Pkt. 15c.

F822. SINGLE FLOWERING. True China Aster. Fine assortment of colors. Pkt. 10c.

F824. MANY KINDS MIXED. Pkt. 10c.

Comet Aster.
Grown on my trial
grounds.

ABRONIA. A.

F826. GRANDIFLORA. Flowers are rosy-lilac, and sweet scented. For beds, border and hanging baskets. Pkt. 10c.

F827. EVERBLOOMING WHITE. Fine for cutting. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

ARABIS. A.

F848. ALPINA. (Snow in Summer.) Very early white, spring flower. Dwarf, fine for edging. Quite fragrant. Pkt. 10c.

AGERATUM. P.

F828. BLUE. Very pretty sky-blue flowers. Nice for borders. Pkt. 10c.

F829. MANY VARIETIES MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 15c.

ALYSSUM. A.

F830. SWEET. Flowers white, fragrant, easily grown in boxes, vases and beds. A good border plant. Pkt. 10c; $\frac{1}{4}$ oz. 20c.

F832. CARPET OF SNOW. Of dwarf, dense growth, completely covered with snow-white flowers. Blooms all summer. Nice for borders. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

AMARANTHUS. A.

F834. CAUDATUS. (Love Lies Bleeding.) Very large, handsome, drooping flower spikes of blood red color, 3 feet high. Pkt. 10c.

F836. TRICOLOR. Handsome foliage plant. Leaves yellow, red and green. Well known as "Joseph's Coat." 3 feet high. Pkt. 10c.

ANTIRRHINUM. A. (Snapdragon)

They do not receive the attention they deserve. One of the best cut flowers. Easily grown from seed, excellent for beds and borders.

F838. GIANT FLOWERED. Flowers are very large and fragrant, produced in long spikes all summer. Pkt. 10c.

F840. DWARF MIXED. Plants grow one foot high. Pkt. 10c.

F842. TALL MIXED. Plants grow 2 feet high. A nice mixture of many shades and colors. Pkt. 10c.

AQUILGEIA. (Columbine)

F844. TRUE ROCKY MOUNTAIN. Colorado's emblem flower. Free flowering; for permanent borders, etc. Blossoms light blue. Pkt. 10c.

F846. SINGLE AND DOUBLE MIXED. All colors mixed. Pkt. 10c.

ARCTOTIS GRANDIS. A.

F850. AFRICAN LILAC DAISY. Pure white on top surface and reverse side of petals pale lilac-blue. Blooms all summer. Pkt. 10c.

Chinese Unicum.

ARMERIA. P.

F852. MOUNTAIN PINK. Flowers grow in large tufts, rosy pink. Beautiful for edging. Pkt. 10c.

ASPERULA. A.

F854. AZUREA. Fragrant light blue flowers. Thrive well in shady places. Pkt. 10c.

We are sending you a small order and want to let you know that trees, bushes and strawberry plants were received in fine condition and we wish to thank you very much for the honorable way in which you replaced the order we sent you last year that failed to grow. We do not know the reason why they did not live, as everything I ever ordered from you before lived and have grown nicely.

Again thanking you, I remain

Respectfully yours,

Mrs. W. Hyndman, Norwell, Mich.

BALSAM. A. (Lady Slipper)

One of the most beautiful annuals. Flowers brilliantly colored, very large and double. Balsams like rich soil and a sunny situation.

F856. CAMELLIA FLOWERED, WHITE. Pkt. 15c.

F864. COLLECTION of one packet of each of above four separate colors. 45c.

F866. CAMELLIA FLOWERED. Very double, extra large flowers of rich color. Finest mixed. Pkt. 10c.

F868. ROSE FLOWERED. Splendid rose-like flowers of brilliant colors. Pkt. 10c.

F870. DWARF DOUBLE MIXED. Finest mixture of double varieties. Pkt. 10c.

F872. NIGHTBLOOMING. (Nycterina.) Flowers single, pure white, emitting a strong heliotrope perfume after sundown. Pkt. 10c.

BRACHYCOME. A.

F874. SWAN RIVER DAISY. Of dwarf growth, very free flowering. Suitable for edging, small beds or pot culture. Blooms freely nearly all summer. Pkt. 10c.

BUTTERFLY PLANT. A.

F876. COMMELINA. Plants are of graceful trailing habit, superb for carpet bedding. In pots it will bloom every day in the year. In the garden from May until frost, showing daily scores of large blue, butterfly-like blossoms. Pkt. 10c.

CALCEOLARIA. P.

F878. Produces a mass of beautiful pocket-like flowers. A favorite for house culture and conservatory. Finest mixture. Pkt. 25c.

CALENDULA. A.

F880. Will grow in any soil and bloom all summer. Excellent for bouquets and vases. One foot high. Sow seed outdoors quite early. Mixed colors. Pkt. 10c.

CALLIOPSIS. A.

One of the showiest of garden flowers, covered with hundreds of beautiful yellow blossoms from July to October. Of easiest culture. Grows two feet high. Fine for cut flowers.

F882. GOLDEN WAVE. Plants very bushy and compact. Two feet high. Flowers beautiful golden yellow with dark center. Pkt. 10c.

F884. GOLDEN RAY. Bright, showy flowers of rich, purplish brown, turning to golden yellow toward the end of each petal. Eight inches high. Pkt. 10c.

F886. FINEST MIXED. Many varieties in a mixture. Pkt. 10c.

F888. DOUBLE MIXED. Fine double flowers, free bloomer. Splendid for cut flowers. Grows 15 inches high. Choice varieties in mixture. Pkt. 10c.

CAMPANULA. P. (Canterbury Bells)

Hardy perennial favorites, bearing large, bell-shaped flowers in profusion. Grows in light sandy soil.

F890. DOUBLE MIXED. Double flowering varieties of all sorts and colors. Pkt. 10c.

F892. SINGLE MIXED. Many colors. A splendid assortment. Pkt. 10c.

F894. CUP AND SAUCER. Bell-shaped flowers, nearly 4 inches across, in form of a saucer. Mixed. Pkt. 10c.

CANDYTUFT. A.

Hardy annuals that grow easily in any soil, and bloom very freely all summer. Fine for solid beds and edging.

F896. DWARF EMPRESS. About 8 inches high, covered with extra large, pure white flowers. Pkt. 10c.

F898. WHITE ROCKET. Large white flowers. One foot high. Pkt. 10c.

F900. ALL COLORS MIXED. Good assortment. Pkt. 10c.

CANNA. A.

Stately plants of luxuriant and tropical appearance. Easily grown from seed. Will bloom the first year.

F902. LARGE FLOWERING. Best varieties mixed. Pkt. 10c; ½ oz. 25c.

F904. MADAME CROZY. Dark leaved varieties. Pkt. 10c; ½ oz. 25c.

CARNATION. P.

For house and garden culture. Flowers are large and fragrant. **F906. SONDEREGGER'S DOUBLE.** Finest mixed. Sweet scented, double, large flowering sorts. Best for house culture. Pkt. 20c.

F908. EVERBLOOMING FRENCH. Flowers large, very double, deliciously sweet and of rich color. Blooms in four months from seed. Pkt. 25c.

F910. SCARLET GRENADIN. Flowers double, rich scarlet. Lives through the winter with but little protection. Pkt. 15c.

F912. MARGUERITE. The beautiful, fragrant flowers are in bloom four months after time of seeding. Blooms nearly all of the time. Mixed colors. Pkt. 15c.

F914. GIANT MARGUERITE. Will bloom about four months after sowing, and continue all through the summer. Flowers are very large, measuring 3 inches in diameter, colors are beautiful. Pkt. 15c.

Double Balsam.

Calliopsis.

CELOSIA or COCKSCOMB. A.

Handsome garden and pot plants, bearing large combs of crimson, pink or golden striped color.

F916. DWARF MIXED. Splendid mixture of dwarf sorts. Pkt. 10c.

F917. NEW FLUFFY. The most perfect type of the plumed Celosia yet produced, and is the result of 15 years careful breeding and selection. This Celosia is not stringy, coarse or seedy like ordinary Celosia, but the large plumes are wonderfully beautiful; as fluffy, graceful and airy as a fine ostrich plume and of many brilliant colors and shades. Many of the larger plumes or heads are terminated or crowned by delicate, small cockcombs of the finest texture like velvet plush and often of fantastic shades. This is a high class flower and attracts the admiration and wonder of all who see it. Plants commence to flower while small and continue to develop and increase in beauty until frost, attaining full perfection in autumn. Start seed early and transplant to garden, after danger of frost is past. The seed we offer is from selected specimens only. Pkt. 15c. 2 pkts. 25c, postpaid.

CINERARIA. P.

F942. For pot culture. Large, beautiful flowers. The extreme grace and elegance of the plant and flower makes it effective for decorations. Pkt. 20c.

CHOCOLATE FLOWER.

A.

F932. BIDENS. Two and one-half feet high. Bears numerous long stemmed flowers of a peculiar chocolate brown color and sweet odor. Fine for cut flowers. Blooms July to October. Pkt. 10c.

CHINESE WOOLFLOWER

A.

F930. CELOSIA PLUMOSO. This recent novelty is the most interesting and beautiful of the Celosias. The flowers appear like large balls of red wool, especially the one at the tip of the main stem. Each of the numerous side branches also produce flowers at

each tip, although somewhat smaller. Here the plant commences to bloom the last part of July and continues until cut down by frost. The flowers do not fade, but increase in size and brilliancy throughout the season; as a cut flower I have kept them in good shape for over two weeks. They are excellent for bedding or as specimen plants; are easily grown from seed just like the old Cockcomb. In a bed plants should not be planted over 10 inches apart. Height of plant. 2 to 3 feet. Pkt. 15c; 2 pkts. for 25c.

CENTAUREA. A.

Also called Bachelor's Button, Blue Bottle, Ragged Sailor, Corn Flower. Flowers freely in any situation and requires little care.

F918. MIXED. Many varieties mixed. Pkt. 10c.

Chinese Woolflower

F920. AMERICANA. Grows 3 feet high. Large ball-like flowers of heliotrope color. Fragrant. Valuable cut flowers. Pkt. 10c.

F924. EMPEROR. Lovely, dark blue flowers of many shades. Pkt. 10c.

F926. GUMNOCARPA. (Dusty Miller.) Finely cut, silvery-white leaves. Showy foliage plants for borders. 1½ feet high. Pkt. 10c.

F928. MARGUERITA. Large, pure white flowers, sweet scented. Fine for cutting. Pkt. 10c.

CHRYSANTHEMUM. A.

These hardy annuals are showy and effective border plants, extensively grown for cut flowers.

F934. DOUBLE AND SINGLE MIXED. Pkt. 10c; ¼ oz. 20c.

F936. EVENING STAR. Flowers pure golden yellow and 3 inches in diameter. Flowers single. Bloom about ten weeks after sowing until frost. The petals remain firmly extended in the rain and sunshine. Pkt. 10c.

F938. MAXIMUM. P. Ox-Eyed Daisy. Free blooming hardy perennial. 2 feet high, covered with large, single, pure white flowers. Pkt. 10c.

F940. PERENNIAL. Chinese and Japanese varieties. Will bloom in full from seed sown in March. Flowers large, very double. Pkt. 10c.

I received the plants and trees in very good condition and am well satisfied with same.
John Svenson, Webster City, Ia.

Sonderegger's Double Carnation.

New Fluffy Cockcomb.

COSMOS. A.

Grows and blooms with the greatest freedom in any soil. Flowers dainty, of brilliant colors, carried on long, slender stems. Foliage feathery and very pretty. Extra fine for cut flowers.

F946. EARLY FLOWERING. Many varieties mixed. Will bloom from July to November. Pkt. 10c.

F948. GIANTS OF CALIFORNIA. Flowers very large and beautiful. Handsome, fernlike foliage. Start seed early. Finest mixed. This variety should not be planted north of southern Kansas. They require a longer season of blooming. Pkt. 10c.

F949. DOUBLE FLOWERING COSMOS. A novelty of exceptional merit. Even in the northern states you may now have one of the finest varieties of Cosmos known to flower lovers. It so far surpasses the older types, which were rather small flowered, that there is no comparison. Although a large percentage of the seeds produce double flowers—some grow into singles of entrancing beauty. It is difficult to say which are the more desirable, the doubles or the new race of delightful singles. The plants are of quick growth and exceptionally free flowering. Cosmos make an exceptionally graceful vase bouquet. Pkt. 15c.

New Pink Quilled Daisy.

Sonderegger's New Dwarf Dahlia.

COLEUS. A.

F944. Handsome foliage plant, easily grown from seed. Leaves large and rich in color. 2 feet high. Mixed. Pkt. 20c.

F945. ROCOCO. (Novelty.) The leaves of this new Coleus, starting from a broad basis, run out to points with many odd and beautiful shapes, which are covered with blisters toward the margins. The green designs surrounded by golden yellow colors decorate the margins while the remainder of the leaf is white, thus giving a peculiar charm to the plant. It is especially adapted for beds and borders, and is very attractive as such. Can also be used for house culture. Pkt. 25c.

DAHLIA. P.

Can be easily raised from seed and will bloom profusely the first year. One of the best late summer flowering plants. Very pretty.

F950. CACTUS FLOWERED. Flowers large, fine cactus form. Splendid mixture. Pkt. 15c.

F951. SONDEREGGER'S NEW DWARF. This is a miniature Dahlia in the true sense of the word. If sown early in spring, the plant, when scarcely 12 inches high, covers itself with a profusion of single, vivid pink flowers, and continues blooming until frost. The plant preserves its compact, dwarf and globular habit, thus forming a natural bouquet. This new and pleasing Dahlia is most useful for borders and for house culture in pots. Pkt. 25c.

F952. DOUBLE MIXED. Large flowering. All colors. Pkt. 10c.

F954. SINGLE MIXED. Produces flowers of large size in greatest abundance. Pkt. 10c.

DOUBLE DAISIES. P.

Will bloom the first summer and continue to bloom for years with slight protection in winter.

F959. NEW PINK QUILLED. For the first time I offer this new strain of daisies. The flowers are very large and double, borne on strong stiff stems, which make them unexcelled for cut flowers. In bouquets they will retain their freshness and color for many days. The petals are quill shaped and of a beautiful light pink color. Pkt. 20c.

F961. SONDEREGGER'S NEW COLUMN DAISY. Compact but upright, almost forming a column. This is the growth of my new Double Daisy Bellis Perennis, fl. pl. The most noteworthy is this peculiarity of growth lasts during the whole flowering period. The professional as well as the amateur gardener will find many new uses for this beautiful flower. It is well adapted for out-of-door culture and will do just as well when planted in pots in the fall for house culture. The flowers are pure white and I am sure all who try them will be well pleased. Pkt. 25c postpaid. See photo, page 105.

F960. DOUBLE WHITE. Flowers large double, snow white on long stems. Free flowering. Pkt. 10c.

F962. FINEST MIXED. Assortment of various kinds and colors. Pkt. 10c.

DAISIES. P.

F956. MAMMOTH BLUE DAISY OR MARGUERITE. Plants form compact, well branched bushes, 12 inches high and produce in great profusion, single, sky-blue mammoth flowers. Seed sown in early spring will make blooming plants by May, and bloom until frost. Pkt. 20c.

F958. BURBANK'S GIANT SHASTA. Flowers very large and graceful, pure white, single, grow on long, stiff, wiry stems. Pkt. 15c.

DATURA. A.

F964. TRUMPET FLOWER. Large, trumpet shaped flowers, very showy. Of easy culture. Double and single mixed. Pkt. 10c.

Dear Sirs:

The Box Elder seedlings arrived in very good condition. I was surprised and pleased to find that these young seedlings had such splendid root systems. I wish to thank you for the very high and uniform quality of the entire lot and also for your promptness of shipment.

Yours very truly,

B. L. Hollywood, Rochester, N. Y.

Gentlemen:

Please send me ten pounds of Sonderegger's Improved Sorghum cane seed, by parcel post, collect on delivery for the postage, just as soon as you get this order. I made 38 gallons of the finest syrup I ever saw from the one pound of this seed I ordered last spring, for which find enclosed 90c.

Yours,

W. Haleman, Repton, Ky. R. F. D. 2.

DELPHINIUM OR LARKSPUR. A.

These hardy annuals are of great beauty in borders or among shrubs. The long flower spikes appear in greatest profusion.

Sonderegger's New Column Daisy.
Description page 104.

F966. DWARF HYACINTH FLOWERED. 2 to 3 feet high; the flower spikes resemble a double hyacinth. The colors are brilliant and delicate; finest mixture. Pkt. 10c.

F968. DOUBLE TALL MIXED. Produces freely, long slender flower spikes of great beauty. Plants 3 to 4 feet high. Pkt. 10c.

PERENNIAL VARIETIES.

F970. CHINESE BLUE. 3 feet high, produces freely of large blossoms in all delicate shades of blue. Pkt. 10c.

F972. ZALIL. Flowers bright yellow, resemble finest orchids. Pkt. 20c.

F974. PERENNIAL MIXED. Hardy perennial plants with brilliant flower spikes. Double and single flowering mixed. Pkt. 10c.

DIGITALIS OR FOXGLOVE. P.

F994. The long flower stems are loaded with pretty flowers of delicate and varied shades. 3 to 4 feet high. Pkt. 10c.

DIMORPHOTECA OR GOLDEN DAISY. A.

F996. AFRICAN GOLDEN DAISY. A rare and showy annual from South Africa, of easy culture. Plants grow 12 to 15 inches high and are very profuse in flowering. Its Marguerite-like blossoms, $2\frac{1}{2}$ to 2 $\frac{3}{4}$ inches in diameter, show a unique, glossy orange gold, surrounded by a black zone. Pkt. 15c.

F998. MIXED HYBRIDS. Same as above, except that it ranges in all colors and shades from pure white to a deep salmon-orange; some varieties even have different colored zones, such as white with a broad sulphur-yellow zone around the black disc or soft salmon-red inner circle, etc. Pkt. 20c.

ESCHOLTZIA. A.**(CALIFORNIA POPPIES)**

Showy summer blooming plants, bearing a profusion of richly colored flowers. Fine for beds, edging or masses.

F1002. DOUBLE MIXED. Pretty double flowers, white, rose and yellow. In bloom from June until cut down by frost. Mixed. Pkt. 10c.

F1004. CALIFORNIA. Large yellow flowers. Pkt. 10c.

F1006. BUSH ESCHOLTZIA. (Hunnemannia.) Very beautiful plant, forming a nice bush, covered with large cup-shaped flowers three inches across, on long stems. The color is bright yellow. The cut flowers keep in water for two weeks. Pkt. 10c.

FOR-GET-ME-NOTS. P.

Myosotis. Neat and beautiful little plants, with star-like flowers. Succeeds in a moist situation.

F1008. ALPESTRIS. Lovely, sky-blue flowers. Pkt. 10c.

F1010. PALUSTRIS. The true water Forget-me-not Blooms. continuously. Pkt. 15c.

DIANTHUS OR PINKS. A.

For beautiful and lasting flowers, ease of culture and freedom of bloom, these hardy Garden Pinks have no superior among annuals. Have long been a favorite garden flower everywhere.

F976. GIANT RUFFLED AND FRINGED. A magnificent new strain with extra large flowers. The petals are ruffled, frilled and fringed. Many colors. Pkt. 10c.

F978. DOUBLE ROYAL PINKS. Flowers of the largest size, very double; light and dark shades. Lovely cut flowers. Pkt. 10c.

F980. IMPERIAL CHINESE. Double flowers of great beauty and rich colors. Best mixture. Pkt. 10c.

F982. LACINIATUS. Flowers are large, very double and finely fringed. Pkt. 10c.

F984. HEDDEWIGII. Large double flowers. One of the most showy of all pinks. Mixed colors. Pkt. 10c.

F986. SNOWBALL. Flowers double, very large, often two inches in diameter, resembling a pure white carnation. Pkt. 10c.

F988. HEDDEWIGII, GIANT SINGLE. Immense flowers of strikingly pretty colors. Mixed. Pkt. 10c.

F990. GRASS PINKS. P. The delicately fringed flowers are fragrant and fine for bouquets. Pkt. 10c.

DWARF MORNING GLORY. A.

F1000. CONVULVULUS. Grows easily and rapidly from seed, and the plants are covered with flowers the entire season. One foot high. Pkt. 10c; oz. 25c.

FOUR O'CLOCKS. A.

Also called Mirabilis and Marvel of Peru. Well known free flowering favorite. Does well everywhere. Give each plant 12 to 15 inches of room. Will grow splendidly along the fence, requiring no care, and blooming freely. Flowers are closed in the daytime, but will open towards evening or on cloudy days.

F1012. DWARF MIXED. Many colors in a good mixture. Pkt. 10c.

F1014. SWEET SCENTED. The flowers of this variety are white and very fragrant. Pkt. 10c.

F1016. STRIPED LEAVED. Very ornamental foliage. Blooms continuously. Mixed. Pkt. 10c.

Coleus Rococco. Page 104.

Dianthus or Grass Pinks.

GAILLARDIA. P.

Undoubtedly one of the choicest of the hardy perennials. Flowers very large, very numerous and fine for cutting.

F1018. FINEST MIXED. Brilliant shades of orange, crimson, scarlet and vermillion. Pkt. 10c.

F1020. DOUBLE ANNUAL. The large double flowers are round as a ball, in the most varied colors. Nice for bouquets. Pkt. 10c.

HELIOTROPE. P.

Flowers very pretty and of delightful fragrance. A splendid bedding plant as well as suitable for house culture. Seed sown in February or March produce large flowering plants in the summer.

F1025. ROSALINDE. This beautiful new Heliotrope is sure to be a favorite with all lovers of flowers. The plants are of dwarf habit, filled with large flower umbels which are of a violet red, tending to pink and are very sweet scented. Pkt. 25c.

F1026. FINEST MIXED. Bloom the first summer. Pkt. 15c.

GODETIA. A.

F1022. Of easiest culture. The flowers are of handsome shape, brilliant in color and are produced in marvelous profusion. Tall mixed. Pkt. 10c.

Gaillardia.

GYPSOPHILA. P.

F1024. Also called Angel's Breath and Baby's Breath. Thrives everywhere and furnishes the loveliest material for all kinds of bouquets. Pkt. 10c.

ICE PLANT. A.

F1044. Will do best on dry, sandy soil. The plant is of dwarf habit; flowers are white, wax-like and frosted. Suitable for rock work and hanging baskets. Pkt. 10c.

HOLLYHOCK. P.

One of the most majestic of the hardy plants. For planting among shrubbery or forming backgrounds it is without an equal.

F1028. CHATER'S EXTRA DOUBLE. Flowers large and very double. Finest strain obtainable. Pkt. 10c; 1/8 oz. 20c.

F1030. DOUBLE MIXED. Mixture of double sorts. Pkt. 10c; 1/4 oz. 30c.

F1032. COLLECTION OF FOLLOWING FIVE SEPARATE COLORS. One pkt. of each for 35c.

F1034. DOUBLE WHITE. Pkt. 10c.

F1036. DOUBLE PINK. Salmon color. Pkt. 10c.

F1038. DOUBLE ROSE. Pkt. 10c.

F1040. DOUBLE CRIMSON. Pkt. 10c.

F1042. DOUBLE YELLOW. Pkt. 10c.

KENILWORTH IVY. P.

F1046. LINARIA. Charming little plant for baskets, vases, etc. Flowers in shades of purple and lavender. Pkt. 10c.

LANTANA. P.

F1048. Desirable bedding plant, constantly in bloom. Verbena-like heads. Also suitable for pot culture, hanging baskets and vases. Mixed. Pkt. 10c.

LINUM. A.

F1050. SCARLET FLAX. An effective and showy bedding plant, 12 inches high. Foliage is finely cut and flowers are brilliant scarlet. Pkt. 10c.

F1052. PERENNE. P. Beautiful hardy perennial, producing bright blue flowers the entire summer, 18 inches high. Pkt. 10c.

LOBELIA. A.

Popular and beautiful flowering plants, suitable for edging, hanging baskets and pot culture. Bloom June to November.

F1054. CRYSTAL PALACE. Flowers rich, deep blue, dark foliage; best for bedding. Pkt. 10c; 1/8 oz. 25c.

F1056. CARINALIS. P. Three feet high with large spikes of brilliant scarlet flowers. Pkt. 10c.

LUPINS. A.

Ornamental free flowering plants for borders and beds, with long spikes of richly colored flowers.

F1058. DWARF MIXED. Annual varieties. Pkt. 10c, oz. 30c.

F1060. PERENNIAL LARKSPUR FLOWERED. P. Extra long spikes of pretty flowers in blue and lilac shades; 2 to 3 feet high. Pkt. 10c; 1/2 oz. 35c.

LYCHNIS. P.

Hardy perennial plants for beds and borders. Bloom year after year without protection.

F1062. CHALCEDONICA. Plants grow 1 foot high and bloom first year from seed. Flowers a brilliant scarlet, star shaped. Pkt. 10c.

MATRICARIA OR FEVERFEW. A.

F1070. EXIMIA. The plant has numerous and freely branching flower stems which are literally covered with very double, pure white flowers, one inch in diameter. Pkt. 10c.

MARIGOLD. A.

Free flowering old favorites of easy culture. Well adapted for large beds and borders.

F1064. TALL AFRICAN. 2 1/2 feet high. Large double flowers in glowing colors. Mixed. Pkt. 10c.

F1066. DWARF FRENCH. Each plant bears hundreds of bright flowers, 1 foot high. Double mixed. Pkt. 10c; 1/2 oz. 25c.

F1068. CROSS OF HONOR. 9 inches tall and blooms until late fall. Flowers single, rich, golden yellow with a large spot of velvety brown. Pkt. 10c; 1/4 oz. 15c.

Rosalinde Heliotrope.

MIMOSA. A.

F1078. (Sensitive Plant.) Curious and interesting plants. Leaves close and droop when touched or shaken. The flowers are red. 1½ feet high. Pkt. 10c.

CLIMBING NASTURTIUMS. A.

Elegant and luxurious climbers for verandas, trellises, etc. May be used to cover unsightly railings and to trail over rough ground with fine effect.

F1080. TALL CHAMELEON. Produces various colored flowers on one and the same plant. Pkt. 5c; oz. 20c.

F1082. LOBB'S CLIMBING. A grand free flowering variety. Very showy and rich colored flowers. Finest mixed. Pkt. 5c; oz. 20c; ¼ lb. 50c.

F1084. TALL MIXED. Nice mixture. Pkt. 5c; oz. 20c; ¼ lb. 40c.

DWARF NASTURTIUMS. A.

May be classed among our most beautiful and showy annuals. They are of easy culture and make a continuous show of bloom.

F1086. DWARF CHAMELEON. Bears flowers of various colors on one and the same plant. Pkt. 5c; oz. 15c; ¼ lb. 50c.

F1088. DWARF GOLDEN KING. Dark foliage, bright golden yellow flowers. Pkt. 5c; oz. 15c; ¼ lb. 45c.

F1090. KING OF THE TOM THUMBS. Deep scarlet flowers. Pkt. 5c; oz. 15c; ¼ lb. 45c.

F1092. DWARF KING THEODORE. Dark leaves and deep crimson flowers. Pkt. 5c; oz. 15c; ¼ lb. 40c.

F1094. DWARF MIXED. A special selection of all colors. Pkt. 5c; oz. 15c; ¼ lb. 35c.

MIGNONETTE. A.

A well known favorite. Also suitable for pot culture. Should be watered freely until plants are several inches high.

F1072. GIANT MACHET. Flowers are larger than those of other sorts, the spikes are very dense, its foliage is distinct, being crinkly, while its odor is strong and most delicious. The plants grow in handsome bush form and bloom until late fall. Pkt. 10c; ¼ oz. 25c.

F1074. SWEET SCENTED. The old sweet scented variety. Pkt. 10c; oz. 25c.

F1076. GOLDEN QUEEN. Flowers yellow, very sweet. Pkt. 10c; ¼ oz. 25c.

NICOTIANA. A. (Tobacco Plant)

F1100. AFFINIS. This plant grows to a height of 2½ feet, and produces an abundance of large, pure white flowers of delicious fragrance. Pkt. 10c; ¼ oz. 25c.

NEMESIA. A.

F1096. A very pretty bedding flower of easiest culture. The flowers are large, of rich color and produced in wonderful profusion. Pkt. 20c.

NIGELLA. A.

F1102. (Love in a Mist, or Devil in a Bush.) A compact, free-flowering plant, with finely cut foliage and curious looking flowers and seed pods. One foot high. Pkt. 10c; ¼ oz. 20c.

OENOTHERA. A.

F1104. EVENING PRIMROSE. Neat plants, with large saucer-shaped flowers, white or golden yellow; open at dusk, emit a delightful perfume. Pkt. 5c.

PERILLA. A.

F1136. An elegant foliage plant of easy culture. Dark purple leaves. Two feet high. Pkt. 10c; ¼ oz. 25c.

PORTULACA. A.

Also called Rose Moss or Sun Plant. One of the most popular hardy annuals of easy culture.

F1200. SINGLE MIXED. Fine mixture of colors. Pkt. 10c.

F1202. DOUBLE MIXED. Pkt. 10c.

F1204. DOUBLE WHITE. Pkt. 10c.

F1206. DOUBLE PINK. Pkt. 10c.

F1208. DOUBLE SCARLET. Pkt. 10c.

F1210. DOUBLE YELLOW. Pkt. 10c.

F1212. COLLECTION of four separate colors, 1 packet of each for 30c.

Mignonette.

Double Flowering Petunia

Dwarf Nasturtium

You sent me Red Cedar last year. I never had trees do better. No more exposed roots for me in buying Evergreens.

W. T. Collings, Beaver City, Nebr.

PANSIES. P.

For best results you must start a good strain of seed. The finest pansies are, as a rule, shy seeders, which accounts for the difference in prices of the various mixtures offered below. The plants thrive best in a cool, moist, but well drained and enriched soil. Sow seeds in April or early May and cover lightly. The soil should be kept moist until plants are up.

F1106. MASTERPIECE OR GERMANIA. The petals are crimped and curled in such a fashion that the flowers appear double. The flowers are often 3 inches across and the color variations and combinations are odd and striking, the rich, dark velvety shades predominating. Pkt. 20c.

F1108. GIANT TRIM-ARDEAU. Flowers extra large, stand well above foliage. Each flower marked with three blotches. Strong growers. Pkt. 15c; $\frac{1}{8}$ oz. 45c.

F1110. BUGNOT'S MAMMOTH. The petals are of great substance and velvety appearance, each one bearing a large, deeply colored blotch that runs out in delicate veins to the edge; the shadings comprise tints of red, bronze and brown. Pkt. 15c.

F1112. SONDEREGGER'S IMPERIAL. Elegant, richly colored flowers of large size and perfect shape. The finest mixture of giant flowered pansies Pkt. 15c; $\frac{1}{4}$ oz. \$1.25.

F1114. ENGLISH TUFTED PANSY, or Pansy Violet. Elegant free blooming plants for partly shaded beds and borders. They are more hardy than regular pansies. Large flowering varieties mixed. Pkt. 15c.

F1116. ORCHID FLOWERING. Shows the most surprising novel, unique and beautiful color combinations, entirely new among pansies. The upper petals are upright and plaited, resembling orchids. The ground color of nearly all the flowers is light. Pkt. 20c.

F1118. PHENOMENAL OR MADAME FERRET. Giant flowered with frilled edge. Colors are rich wine shades and red with white margin. Pkt. 15c.

F1120. LIGHT BLUE. A delicate shade. Pkt. 15c.

F1122. CARDINAL. The finest bright red pansy. Pkt. 15c.

F1124. KING OF BLACKS. Of a beautiful velvety black color; the darkest pansy known. Pkt. 10c.

F1126. SNOWFLAKE. Large, satiny, pure white. Pkt. 10c.

F1128. YELLOW. Golden yellow with dark eye. Pkt. 10c.

F1130. EXTRA FINE MIXED. I make up this mixture from the finest varieties of English German, French and Belgian Pansies. Pkt. 15c; $\frac{1}{4}$ oz. 75c.

F1132. GOOD MIXED. Many varieties. Pkt. 10c; $\frac{1}{4}$ oz. 45c.

PETUNIA. A.

For bedding, edging or house culture, few plants equal them in effectiveness and bright colors. Easily cultivated and bloom all season.

F1138. DOUBLE MIXED. Beautiful large flowering varieties. Pkt. 25c.

F1140. GIANTS OF CALIFORNIA. Flowers, single, large in great variety of colors. Pkt. 20c.

F1142. LITTLE GEM. Bushy little plants, 8 inches high. Flowers show a five pointed star; all colors. In bloom all the time. Pkt. 15c.

F1144. STRIPED AND BLOTCHED. Fine for bedding and borders. Pkt. 10c.

F1146. ALBA. Pure white. Desirable for cemetery planting, or where large masses of white are wanted. 12 inches high. Pkt. 10c.

F1148. COUNTESS ELLESMERE. Flowers beautiful pink. Pkt. 10c.

F1150. KERMESINA. Flowers bright, glowing crimson. Pkt. 10c.

Sonderégger's Imperial.

F1152. VENOSA. Beautifully veined flowers, many shades. Pkt. 10c.

F1153. GIANT RUFFLED. Flowers large with ruffled edges and of many colors. Pkt. 15c; 2 for 25c.

F1154. GOOD MIXED. Many colors mixed. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

Gentlemen:

Enclosed please find order for garden and flower seeds. Your seeds are the only seeds ever planted with the satisfaction that they would grow with half a chance, and not get a pumpkin when I expected a squash. I have bought trees and plants of you for ten years now and as your record will show, 6,109 trees in all, and they done well (lost 86 trees). If you want to use this in your next catalog, put the following name under it in large type.

Respectfully,

Chas. A. Gick, Fowler, Ind.

Giant Ruffled.

POPPIES. A.

Probably no class of plants enjoy greater popularity and are more widely grown than the Poppies. Their wonderful range of color of their delicate, gracefully borne flowers is well known to all lovers of flowers. The Poppies are quite hardy and the seed should be sown as early in the spring as possible, where the plants are to remain.

F1174. TULIP FLOWERED. The perfect beautiful flowers resemble the Tulip. Intense, fiery scarlet; single. Pkt. 10c; ½ oz. 30c.

F1176. SHIRLEY. Silk or Ghost Poppies. Handsome single flowers of glowing colors. Mixed. Pkt. 10c; ½ oz. 20c.

F1178. DOUBLE PAEONY FLOWERED. MIXED. Flowers large as Paeonies and very double. Finest mixture. Pkt. 5c; ½ oz. 25c.

I can also supply the following solid colors:

F1180. DOUBLE PAEONY FLOWERED. White. Pkt. 10c; ½ oz. 30c.

F1182. DOUBLE PAEONY FLOWERED. Rose. Pkt. 10c; ½ oz. 30c.

Single Portulaca. (Page 107.)

Double Paeony Flowering Poppy.

F1170. DWARF MIXED. Of dwarf, compact habit. Fine for pot culture, for bedding and edging; 6 to 8 inches high. Very profuse bloomer. Pkt. 10c; ½ oz. 45c.

F1172. PERENNIAL MIXED. Hardy, flowering sorts in splendid mixture of colors. Pkt. 20c.

PRIMULA. A.

F1214. CHINESE PRIMROSE. One of my most important pot plants, in bloom almost all winter. Mixed. Pkt. 15c.

F1216. PRIMULA OBCONICA. Everblooming Primrose. Splendid for pot culture and also for the open border in summer. Flowers single, in shades of lavender, pink and red. Pkt. 15c.

F1218. PRIMULA AURICULA. Garden Primrose. A well known favorite. Sweet scented. Pkt. 15c.

SALVIA SPLENDENS. P.

F1232. SCARLET SAGE. Blooms first year from seed. Pkt. 10c; ½ oz. 30c.

PYRETHRUM. P.

Handsome Herbaceous Plants of Easy Culture.

F1220. GOLDEN FEATHER. Beautiful golden-leaved foliage plant for borders and ribbon beds. Six inches high, half hardy perennial. Pkt. 10c.

F1222. HYBRIDUM. Beautiful perennials blooming in May and June. Large Aster-like flowers in many shades. Single and double mixed. Pkt. 10c.

RICINUS OR CASTOR BEAN. A.

Strong growing plants for ornamental foliage, adapted as center plants for Canna or Dahlia beds and single specimens.

F1224. SANGUINEUS. Brownish red foliage; 6 ft. Pkt. 10c; oz. 20c.

F1226. ZANZIBARIENSIS. 12 to 15 feet. Enormous leaves 2½ feet across, and are beautifully lobed. Pkt. 10c; oz. 20c.

F1228. MIXED. Many kinds mixed. Pkt. 5c; oz. 15c.

F1184. DOUBLE PAEONY FLOWERED. Scarlet. Pkt. 10c; ½ oz. 30c.

F1186. DOUBLE PAEONY FLOWERED. Purple. Pkt. 10c; ½ oz. 30c.

F1188. COLLECTION of one packet each of the above four solid colors for 30c.

F1190. DOUBLE CARNATION FLOWERED. Flowers of large size and varied colors. Very popular. Pkt. 10c; ½ oz. 30c.

F1192. DOUBLE AND SINGLE MIXED. Finest mixed. Pkt. 10c; ½ oz. 35c.

PERENNIAL POPPIES.

F1194. ICELAND POPPY. P. Will produce flowers the first year from seed. The colors range from pure white to orange scarlet and flowers are slightly fragrant. Nice for vases. Finest mixed. Pkt. 10c.

F1196. PERENNIAL MIXED. P. Nice assortment of many hardy perennial poppies. Pkt. 10c; ½ oz. 40c.

F1198. ORIENTAL POPPY. P. The flowers are very large, often measuring four inches in diameter. They come in the most brilliant shades of red and increase in size from year to year. Pkt. 10c.

PHLOX DRUMMONDI GRANDIFLORA. A.

Of all the summer flowering annuals the varieties of large flowering Phlox are one of the most brilliant and satisfactory. From June until October they maintain an endless display of varied colored flowers.

F1156. ALBA. Extra large white flowers. Pkt. 10c; ¼ oz. 55c.

F1158. ROSE. Pleasing shade of rose pink. Pkt. 10c; ¼ oz. 55c.

F1160. SCARLET. Intense, glowing scarlet. Pkt. 10c; ¼ oz. 55c.

F1162. YELLOW. Of lemon yellow color. Pkt. 10c; ¼ oz. 55c.

F1164. COLLECTION of one packet each of the above four colors for 30c.

F1166. EXTRA CHOICE MIXED. Best sorts. Pkt. 10c; ¼ oz. 45c.

F1168. STARRED AND FRINGED. Very pretty star-shaped flowers. Dwarf growth. Mixed colors. Pkt. 10c; ½ oz. 30c.

Lantana. (Page 106.)

Scabiosa.

Sonderegger's New Cactus Zinnia.
See description page 112.

New Mammoth Verbena.

SALPIGLOSSIS. A.

F1230. Of easy culture, blooming from early summer until late fall. Flowers orchid-like. Large flowered mixed. Pkt. 10c.

SCABIOSA. A.

Mourning Bride or Egyptian Rose. Exceedingly pretty border plants. Splendid cut flowers. Blooms during the summer and autumn; 2 feet high.

F1234. SNOWBALL. Flowers large, pure white, very double Pkt. 10c; ¼ oz. 25c.

F1236. DOUBLE MIXED. Large flowering varieties. Pkt. 10c. ½ oz. 35c.

SCHIZANTHUS. A.

F1238. Butterfly Flower or Poor Man's Orchid. The gay, butterfly-like blossoms are carefully marked and spotted, resembling some species of fine orchids. Fine cut flowers. Mixed. Pkt. 10c. ¼ oz. 25c.

STOKESIA CYANEA. P.

F1260. CORNFLOWER ASTER. Rare and hardy perennial, 2 feet high, bearing from 20 to 30 lavender blue flowers from July until frost. Pkt. 10c.

STOCKS DWARF TEN WEEKS. A.

Stocks are among the finest annuals. The plants commence to bloom about ten weeks from time of germination and continue until frost. Flowers of brilliant color and fragrant. Fine for pot culture

F1240. DOUBLE FANCY MIXED. Assortment of large flowering sorts. Pkt. 10c.

SEPARATE COLORS.

F1242. PURE WHITE. Pkt. 10c.

F1244. CRIMSON. Pkt. 10c.

F1246. PURPLE. Pkt. 10c.

F1248. BLUE. Pkt. 10c.

F1250. YELLOW. Pkt. 10c.

F1252. COLLECTION of one packet each of above five separate colors for 35c.

F1254. DRESDEN EVERBLOOMING. Cut and Come Again Stock. Flowers are very large, double and fragrant. Plant grows 24 inches high and branches freely. Seed sown in April will make blooming plants by July, which continue in flower until frost. Mixed colors. Pkt. 10c.

F1256. BROMPTON OR WINTER. A new flowering variety, producing long spikes of large, double, fragrant flowers. Pkt. 10c.

F1258. NIGHT SCENTED STOCK. (Mathiola.) Begins to bloom in June. Flowers lilac pink, very sweet scented after sundown. Height 15 inches. Pkt. 10c.

SUMMER CYPRESS. A.

F1262. KOCHIA. Forms regular pyramids from 2 to 3 feet high, having a cypress-like appearance. The leaves are slender and of a light pea green until September, when they change to a carmine blood red. Pkt. 10c; ¼ oz. 20c.

SUNFLOWER. A.

(Helianthus.)

Remarkable for the stately growth and brilliancy of their flowers, making a splendid effect among shrubbery and for screens.

F1264. CUT AND COME AGAIN. Miniature Sunflower. Plants form pyramidal bushes 2 to 3 feet high. Flowers single. Blooms till frost. Pkt. 10c; ¼ oz. 20c.

F1266. STAR FLOWERED. New, dwarf growth, covered with pretty star-shaped flowers. Pkt. 10c; ½ oz. 30c.

F1268. SILVER LEAF. Silver foliage; flowers yellow with black Pkt. 10c; ½ oz. 20c.

F1270. DOUBLE DWARF. Grows 4 feet high. Flowers double very large, of golden yellow color. Pkt. 10c; ½ oz. 25c.

SWEET SULTAN. A.

F1318. Elegant garden flower of easy culture and fine for cut flower purposes. The beautiful sweet-scented flowers are borne on long, strong stems four feet high. Giant flowered mixed. Pkt. 10c; ¼ oz. 25c.

SWEET WILLIAM. P.

Attractive, free flowering, hardy perennials producing a splendid effect in beds and borders with rich, varied flowers. Blooms June to September. 1½ feet high.

F1320. DOUBLE MIXED. Flowers are borne on long trusses. Pkt. 10c.

F1322. SINGLE MIXED. A mixture of single varieties. Pkt. 10c.

Received the Canna bulbs and they are nice ones. The best ones I ever got from your house and want to thank you for sending them to replace the ones that were not good
Mrs. A. C. Fees, Whiting, Kans

Spencer Hybrids.

SWEET PEAS. A.

Everybody likes Sweet Peas, and they are grown with as little care, and bloom so profusely that the smallest garden should contain a good supply.

F1272. DOROTHY ECKFORD. Elegant, very large, massive pure white flowers.

F1274. EARLIEST OF ALL. Standard bright pink with white wings.

F1276. LADY MARIE CURRIE. Beautiful deep orange pink.

F1278. APPLE BLOSSOM. Lovely bright rose pink.

F1280. EARLY BLANCHE FERRY. Very early. Flowers bright pink and white.

F1282. PRINCE OF WALES. Large size and perfect form, bright rose color.

F1284. SALOPIAN. Rich, deep crimson red, large and fine shell shaped flowers.

F1286. KING EDWARD VII. A glowing, bright scarlet.

F1288. PRIMROSE. Beautiful primrose yellow.

F1290. BLACK KNIGHT. Rich, glossy, blackish maroon.

F1292. COUNTESS RADNOR. Delicate lavender.

F1294. NAVY BLUE. Deep violet blue. Wings violet and blue.

All of the above varieties at the uniform price of 7c per pkt., or any six pkts. for 35c; 20c per oz.; 70c per ¼ lb.

F1296. IMPERIAL MIXED. Fifty different large flowering varieties, including the newest kinds. Best mixed obtainable. Pkt. 10c; oz. 20c; ¼ lb. 50c postpaid.

F1298. GOOD MIXED. Many varieties and colors. Pkt. 7c; oz. 15c; ¼ lb. 40c.

F1300 CUPID SWEET PEAS. Compact, dwarf plants 7 inches high. Fine for bedding and as a border, or for pot culture. In full bloom from June to late summer. Pkt. 10c; oz. 20c.

SPENCER VARIETIES.

F1302. BEATRICE SPENCER. Flowers large, ground white, tinted and buff. Pkt. 10c; oz. 25c.

F1304. KING OF WHITE SPENCERS. Best pure white varieties. Large flowers. Pkt. 10c; oz. 25c.

F1306. CAPTAIN OF THE BLUES SPENCER. Standard purple with blue wings. Pkt. 10c; oz. 30c.

F1308. COUNTESS SPENCER. True pale pink with a darker edge. Fine bloomer. Pkt. 10c; oz. 30c.

F1310. KING EDWARD SPENCER. The best of the rich, red sorts. Pkt. 10c; oz. 30c.

F1312. MASTERPIECE SPENCER. Lavender, one of the finest. Immense large flowers, almost always borne in fours. Pkt. 10c; oz. 30c.

F1314. OTHELLO SPENCER. Beautiful dark brown chocolate red color. Pkt. 10c; oz. 25c.

F1316. SPENCER HYBRIDS. Very large flowering strain, with long stems. Mixture. Pkt. 10c; oz. 25c; ¼ lb. 60c.

VERBENA. A.

Many people prefer Verbena to Phlox, Pansies or Asters for bedding purposes. Constant bloomer; brilliant flowers. Start seed in February or March, transplant in May or June.

F1324. NEW MAMMOTH. Individual flowers are larger than a silver quarter. Unsurpassed for profusion of bloom. Fancy mixed. Pkt. 10c; ¼ oz. 50c.

F1326. MIXED HYBRIDS. Many sorts and colors. Mixed. Pkt. 10c; ¼ oz. 35c.

F1328. LEMON SCENTED. Fragrant plants. Leaves when dried retain fragrance for years. Seed scarce. Pkt. 10c.

F1330. MOSS VERBENA. Produces a mass of moss-like foliage, above which are heads of purple-blue flowers. Blooms from June until frost. Pkt. 10c.

F1332. MOSS VERBENA, WHITE. Same as above, but flowers are pure white. Pkt. 10c.

F1334. VENOSA. (Hardy Garden Verbena.) One foot high. Covered with purplish heliotrope flowers from early summer till late fall. Pkt. 10c.

VINCA. P.

F1336. MADAGASCAR PERIWINKLE. Blooms from seed the first season, continuing until frost. May be potted in fall for winter blooming. Flowers single, pink and white. Height 12 to 15 in. Pkt. 10c; ¼ oz. 40c.

VIOLET. P.

F1338. SWEET VIOLET. Well known, old fashioned hardy garden violets; prized for their fragrance and pretty blue and white flowers. Pkt. 10c. Price of plants: 15c each; 10 for \$1.30.

Dear Sir: I am sending you another seed order and know from past that I shall have a good garden. I lost all the roses I have ordered from you in the past on account of dry summer. Can't order any more this year but I am sure going to try your Thousand Beauty climber again when we raise crops. Our small orchard from you bore some fruit last year, although it was so dry I lost the roses, so you see your trees can't be beat at any price. You can use this to print if you like, for people all over this part of the country brag about our trees and they are all from your Nurseries.

Mrs. R. J. Carr.

P. S.—The trees that bore were Wauneta plum and Compass Cherry plum and this was only their third year.

Lupins. See page 106.

New Giant Flowered Zinnia, raised in my garden.

F1348. DOUBLE POMPON. A very fine strain containing many rich colors and shades. Plants grow about 2 feet high. Pkt. 10c ¼ oz. 20c.

F1350. TALL DOUBLE. Tall varieties in splendid mixture. Pkt. 10c; ½ oz. 25c.

F1352. NEW GIANT FLOWERED. Three feet high and very profuse bloomers. Flowers extremely double and very brilliant in color. Finest mixed. Pkt. 10c; ¼ oz. 35c.

F1354. DOUBLE LILIPUT OR FAIRY. 15 inches high, fairly loaded with tiny, short stemmed, double flowers. Mixed colors. Pkt. 10c; ¼ oz. 30c.

EVERLASTINGS OR IMMORTElLES.

This class of annuals is of easy culture, producing their straw-like flowers abundantly all summer and fall. Suitable for winter bouquets.

F1370. ACROLINEUM. Grows 15 inches high, bearing lovely white or rose-pink flowers. In bloom from June to October. Mixed. Pkt. 10c; ¼ oz. 25c.

F1372. AMMOBIUM OR WINGED EVERLASTING. Large, handsome double white flowers with yellow disk. Plants 2½ feet high. Pkt. 10c; ¼ oz. 20c.

F1374. GOMPHRENA, or Globe Amaranth. Showy plants with brilliant colored globe shaped flowers. 1½ feet high. Mixed. Pkt. 10c; ¼ oz. 20c.

ORNAMENTAL GRASSES.

The ornamental grasses are indispensable for the mixed flower bed and for the border, making these more attractive during the summer, while in the dried state they are valuable for winter bouquets. For large beds or groups on lawns nothing gives a finer effect, and are largely used in many of the finest public parks, etc.

Helichrysum Everlasting.

WALLFLOWER. P.

Well known, deliciously fragrant half-hardy perennial with large spikes of beautiful flowers. A fine pot plant.

F1340. FINEST DOUBLE. Large spikes of brilliantly colored flowers. Pkt. 20c.

F1342. SINGLE MIXED. Nice colors. Pkt. 10c.

F1344. EARLY PARISIAN OR ANNUAL. Beautiful flowers of light brown color. Height 1½ feet. Pkt. 10c.

ZEA JAPONICA. A.

F1346. This is a four-colored Japanese maize in green, white, pink and rose. It is exceedingly effective and graceful as a foliage plant, either for centers or backgrounds. Pkt. 10c.

ZINNIA. A.

Deserves a prominent place in every garden. Plant forms handsome bushes which produce hundreds of double flowers all summer and fall. Succeeds everywhere.

F1347. SONDEREGGER'S NEW CACTUS ZINNIA. The cactus shaped, orange colored flowers are produced in great profusion on a dwarf, compact growing bush which makes a beautiful show from June till October. Wherever this Zinnia is used, if dispersed on borders or groups or cut flower for vases, everywhere it will be effective and imposing. Pkt. 20c postpaid. See photo, page 110.

F1356. MEXICAN HYBRIDS. Produce flowers of the size of a daisy. They are single, semi-double and double. The colors are unique and pleasing. Pkt. 10c; ¼ oz. 35c.

F1358. COLLECTION of one pkt. each of the following five colors of Giant Zinnias for 35c:

F1360. GIANT WHITE. Pkt. 10c.

F1362. GIANT CRIMSON. Pkt. 10c.

F1364. GIANT BLACK KNIGHT. Pkt. 10c.

F1366. GIANT VIOLET. Pkt. 10c.

F1368. GIANT YELLOW. Pkt. 10c.

F1376. HELICHRYSUM. Mammoth flowered. Pretty and effective flowers. Blooming season from July to October. Two feet high. Mixed colors Pkt. 10c; ¼ oz. 25c.

F1378. RHODANTHE. Beautiful for garden or in pots in the house. Flowers are white rose or crimson and show a darker disk. One foot high. Pkt. 10c; ¼ oz. 25c.

F1380. XERANTHEMUM. Profuse blooming hardy annuals. Flowers very double and long stemmed. White and deep purple. Plants grow 12 to 15 inches high. Blooms from July until September. Mixed. Pkt. 10c; ¼ oz. 20c.

F1382. SPECIAL MIXED. All the above sorts and many other varieties mixed. Pkt. 10c; ¼ oz. 20c.

F1384. COIX LACHRYMAE. A. (Job's Tear.) Broad, corn-like leaves and hard, shining, pearly seeds. 3 feet high. Pkt. 10c; oz. 20c.

F1386. EULALIA ZEBRINA. P. (Zebra Grass.) Leaves light green, crossed with creamy white stripes; 3½ to 4 ft. high. Pkt. 10c.

F1388. GYNERIUM ARGENTEUM. P. (Pampas Grass.) Bears large, white silvery plumes; 10 feet high. Pkt. 10c.

F1390. PENNISETUM RUEPPELLIANUM. P. (Purple Fountain Grass.) Beautiful large spikes of purple color. Foliage is long, slender deep green in color; 3 feet high. Pkt. 10c. Price of plants, see page 65.

F1392. STIPA PENNATA. P. (Feather Grass.) Beautiful, delicate white, feathery heads; 2 feet high. Pkt. 10c.

F1394. MIXED VARIETIES. Many kinds. Pkt. 10c.

FLOWERS FOR BOUQUETS.

F1396. Mixture of annuals producing flowers suitable for bouquets and decorating, having long stems. Pkt. 10c.

WILD FLOWER GARDEN.

F1398. This mixture contains several hundred varieties of beautiful flowers, suitable to be planted together. They will form a mass of bright colored flowers and pretty foliage. For borders along fences and bare spots in the garden, nothing more effective could be desired. Pkt. 10c; ½ oz. 35c.

Please send your catalogue to A. G. Fehr, East Main and Carlyle, Belleville, Illinois. He is a florist—he would like to get some fruit trees, so I referred him to you, for we are very well satisfied with all that we ever got from you. Mr. Wm. Klotz, whom I referred to you, had some trees sent and thought they were the finest he ever got.

Arthur Knobloch, Belleville, Ill., R. F. D. No. 6.

SELECTED CLIMBING PLANTS

F1400. AMPELOPSIS. P. Boston Ivy. Will climb any wall without support. In fall leaves turn a rich orange and red. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

F1402. BALLOON VINE. A. A rapid growing climber, succeeding best on light soil. Flowers white; seed pods like small balloons. Pkt. 10c; oz. 20c.

F1404. BALSAM APPLE AND PEAR MIXED. A. Very curious, rapid and dense growing climbers, with ornamental foliage and pretty fruit, which opens when ripe, showing seed and blood red inside. Grows 10 feet high. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

F1406. CANARY BIRD VINE. A. Graceful, rapid growing climber, with pretty little canary-yellow flowers. 15 feet high. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

F1407. CARDINAL CLIMBER. A. A new annual climber of rapid growth, often attaining a height of 20 to 30 feet in a single season. The leaves are deeply notched, which, with the many bright cardinal red flowers, give the vine a beautiful effect. Pkt. 15c; 2 pkts. 25c.

F1408. COBOEA SCANDENS. A. Beautiful climber, growing 20 to 30 feet in one season. Large, bell shaped blue flowers. In sowing, place seeds edgewise, cover with light soil. Pkt. 10c.

F1416. DOLICHOS. A. Hyacinth Bean. Very pretty, bean-like flowers in erect racemes, followed by ornamental pods. 10 feet high. Pkt. 10c; oz. 35c.

F1418. EVENING GLORY. A. Quick growing climber with violet-blue flowers. Fragrant in the evening. Pkt. 10c; $\frac{1}{4}$ oz. 20c.

F1420. JAPANESE KUDZU VINE. P. (Jack and the Bean Stalk Vine). Of wonderfully quick growth, climbing to a height of 50 feet. The large, bold leaves are of dark green color and make a dense shade. Pkt. 10c.

F1422. LATHEYBUS. P. (Hardy Sweet Pea.) Perennial climber with white, pink and crimson pea-shaped flower clusters. 6 feet high. Blooms July to September. Fine cut flowers. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

F1424. MEXICAN MINA VINE. A. The leaves resemble oak leaves, and the flowers are borne in large clusters. Blood red, yellow throat. Grows 20 to 25 feet high. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

F1426. MOONFLOWER, NEW MAMMOTH WHITE. This is the most beautiful Moonflower I have ever seen. The flowers open about sunset and close the next morning. The effect particularly on moonlit nights is very beautiful. If grown on well enriched soil in a warm sunny location and given plenty of water while making growth, the vine will attain a height of from 50 to 60 feet in one season and be covered with green heart-shaped leaves, and will be filled from July until frost with immense saucer-shaped flowers, 4 to 5 inches across and as glistening white as disks of white satin. Pkt. 10c; 3 pkts. 25c.

F1428. MOON FLOWER, LILAC BLUE. Similar to above. Produces lovely, large flowers of lilac-blue. Pkt. 10c.

F1434. PASSION FLOWER. P. Tender perennial climber for the summer garden, for window boxes and pot culture. Flowers beautiful white and blue; large, wax-like. Pkt. 10c.

F1346. SMILAX. P. A fine pot plant for winter. Lovely, glossy green foliage, which is greatly prized for bouquets and decorating. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

MORNING GLORIES. A.

Well-known climbers with beautiful, showy flowers in many colors. For covering walls, trellises, arbors, stumps of trees, etc. Succeeds anywhere.

F1429. DOUBLE MIXED. This vine has the same habit of growth as other morning glories, only the flowers are double. Mixed colors. Pkt. 12c.

F1430. IMPERIAL JAPANESE. This is a large flowering Japanese strain, with beautiful blossoms in the most varied colors and shades. Pkt. 10c; oz. 20c.

F1431. SINGLE FRINGED. A new strain of the large flowering varieties. The flowers have fringed edges and are of many colors. Pkt. 12c.

F1432. MIXED. Old fashioned varieties. Pkt. 5c; oz. 15c.

CYPRESS VINE. A.

For trellises the Cypress Vine cannot be excelled. It has a profusion of pretty star-shaped blossoms and fine leaves. Feathery foliage. Will grow 15 to 20 feet high.

F1410. SCARLET. Flowers bright, glowing scarlet. Pkt. 10c.

F1412. WHITE. Clear white in color. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

F1414. MIXED. Mixture of all kinds. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

ORNAMENTAL GOURDS. A.

Desirable, pretty climbers for many places where a large amount of vines are wanted quickly. The blossoms of some are striking and handsome.

F1440. CALABASH OR PIPE GOURD. A native of South Africa. Odd-shaped fruit which is used to good advantage in making pipes. Pkt. 10c; oz. 25c.

F1442. DIPPER. Fruit makes excellent dippers. Pkt. 10c.

F1444. HERCULES CLUB. Fruits green, 3 to 4 feet long. Pkt. 10c; oz. 25c.

F1446. LUFFA OR DISH CLOTH. Many ladies prefer a dish-cloth made of this gourd to anything else. Pkt. 10c.

F1448. NEST EGG. In color, shape and size like hen's eggs. Pkt. 10c; oz. 25c.

F1450. ORANGE SHAPED. Known as mock orange. Pkt. 10c; oz. 25c.

F1452. SUGAR TROUGH. The fruits have thick shells, very light but durable. Holds 6 to 8 quarts. Pkt. 10c; oz. 25c.

F1454. ORNAMENTAL MIXED. Many varieties mixed. Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 25c.

Cardinal Climber.

Ampelopsis.

Sirs: Am sending a club-order of \$21.96. Please send to me for reward of the order one Golden Winesap apple, 4-5 foot, well branched, two-yr., ninety cents. If any more is due me, please send of your own selection. I have always had good luck with your trees and seed. I enclose cheque for \$21.96. Thanks for past favors. I remain, yours

Phillip Higgins, Middletown, Iowa. R. F. D. 1.

FARM SEED DEPARTMENT

My farm seeds are grown from carefully selected stock for seed purposes, and every effort is made to keep them pure and free from weed seeds. All varieties which I offer have been well tried and found to be of superior merit. We have a new law in Nebraska compelling seed houses to sell seeds with purity and germination according to schedule, which is part of the law. Any seed that is not up to the standard must be labeled as such. I will, after this, sell farm seeds, including all grasses, clovers, alfalfa, oats, etc. only **NEBRASKA STANDARD**; that is, seeds that will come up to the germination and purity required by our laws. In comparing my prices with those of other seed houses, please bear this in mind. Our laws are very strict and I live up to them as nearly as possible for me to do so. At the prices quoted I furnish burlap sacks free of charge, but would advise to have all heavier seeds shipped in new grain bags,

for which I make an extra charge of 40c each. **Please notice that seeds cannot be packed together with trees and plants**, as the latter are packed in damp moss, whereas seeds must be kept dry. If your shipping point is a "prepay station" be sure to send a sufficient amount extra to cover freight charges. In all cases where this is not done, I ship to nearest point which is not a prepay station. I do not ship C. O. D. unless one-third the amount of order is sent me with order. My prices per pound and three pounds are postpaid by parcel post. Larger quantities are shipped at buyer's expense.

AS THIS CATALOG GOES TO PRESS EARLY IN THE SEASON, MY PRICES ARE SUBJECT TO CHANGE.

WHEN FIELD SEEDS ARE ORDERED BY PARCEL POST AND NO POSTAGE ALLOWED, SEEDS WILL BE SENT C. O. D. FOR POSTAGE.

FANCY NORTHERN SEED POTATOES

Red River Irish Cobblers.

My seed potatoes are guaranteed strictly northern grown; I get them grown on contract by potato specialists in the extreme northern section of Red River Valley, Minnesota. It is essential to change your seed potatoes every few years if you wish to secure the largest yield, combined with the best quality. My prices on Red River seed potatoes may seem a little high but the reason for this is the growers had only about 50% of a crop the past season, which makes Red River stock rather scarce. Price by the pound includes postage; large quantities to go at buyer's expense.

I WOULD ADVISE all my customers who have a good cellar for keeping potatoes to order them in the fall. I can make shipments of new stock, Minnesota grown potatoes, about Oct. 15th to 20th. By ordering in the fall you do not have to wait in the spring, but can plant whenever weather permits. Kindly ask for special prices for Fall Delivery.

F1650. RED RIVER BLISS EXTRA EARLY TRIUMPH. This is considered the earliest of all potatoes and is the leading early potato of all southern states. We are all familiar with it as sold at the grocery stores, when the first **NEW POTATOES** are shipped in. It is at least a week earlier than the Early Rose and the Early Ohio. The tubers are of a very handsome appearance, being almost round and most uniform in shape and size, with

slightly depressed eyes, which are mostly on the seed end. The skin is of a pretty light red color, while the flesh is of the purest white, both raw and when cooked. Its beautiful appearance, wonderful productiveness and superior table qualities make this potato a favorite for the early market, wherever introduced. It produces at least from 12 to 15 tubers per hill, all of marketable size. My Red River grown Triumphs cannot be excelled. **Price:** 3 lbs. 30c postpaid. By freight, not prepaid, pk. 60c; bu. \$1.70; 5 bu. \$8.00, bags included. Per bbl. (11 pecks) \$5.00.

F1652. RED RIVER EXTRA EARLY OHIO. This is without doubt the most popular early potato in the country. I have more calls for it than for any other early. Everyone knows what it is and knows that it can be relied upon for an early market variety in almost every locality. They grow stronger and more vigorous, maturing the crop in shorter time and yielding much more than home seed, so that there is the utmost satisfaction in planting them. Potato growers in the South will have their crop ready for market ten days to two weeks earlier if my Red River Ohios are planted. **Price:** 3 lbs. 40c postpaid. By freight, pk. 50c; bu. \$1.55; 5 bu. \$7.50, bags included. Per bbl. (11 pecks) \$4.50.

F1656. RED RIVER IRISH COBBLER. An excellent extra early variety, maturing good sized tubers 7 weeks from the time of planting. It has also the remarkable characteristic of producing very few, if any, small potatoes, all the tubers being of marketable size. The vines are short, of upright growth, so that the hills, may be only a short distance apart. Skin is clean and smooth, flesh is pure white and of excellent quality, always cooking dry and mealy. The Irish Cobbler enjoys the distinction of being the only variety that is planted more extensively on Long Island (New York) than any other potato. In this locality I find they do better than any other variety I have ever tried out. **Price:** 3 lbs. 40c postpaid. By freight, pk. 55; bu. \$1.55; 5 bu. \$7.50. Per bbl. \$4.75.

F1658. RED RIVER RURAL NEW YORKER. Well known the country over, and very largely planted for a profitable crop. "Dusty Rurals" always bring the top price in Chicago markets. When Rurals first made their appearance in 1889, an entirely distinct class of potatoes was introduced unknown up to that time. The class is characterized by a long, rather spindling vine, with dark colored stalks, dark green leaves and purple blossoms, tubers nearly round, flattened, with a very smooth, pure white skin, uniform in size, numerous in hill, very attractive and of excellent flavor. **Price:** 3 lbs. 50c postpaid. By freight, pk. 50; bu. \$1.50; 5 bu. \$7.25 sacks included. Per bbl. (11 pecks) \$4.50.

POTATO SEED

F382. Growing new sorts from the seed-ball seed is a very interesting employment for old and young. There is the widest range of difference in color, shape and general characteristics between the different seedlings; every one is more or less unlike all the others. It is from this seed that new varieties are originated. The result is often extremely profitable. Directions for planting, cultivating, etc., on each packet. Pkt. 15c; 4 for 50c.

SELECTED SEED CORN

Iowa Silver Mine.

The greatest care is used in selecting and harvesting my seed corn. Every ear is examined, and if found true to type of that variety, it is then tipped and butted by hand; afterward shelled and run over my large corn grader and cleaning mill, and not only fanned, but also graded. Seed corn prepared in this manner is well worth the price I ask for it.

Corn in this locality made a good yield this season and is of fine quality. The germination qualities were not damaged by frost. I guarantee all seed corn I send out to comply with the Pure Seed Law of Nebraska, which requires a germination test of 90 per cent.

F1575. SONDEREGGER'S WHITE PRIZE. After many years of very careful selecting I have produced a new type of corn which has proven very satisfactory wherever tried. The stalks are large and strong with heavy foliage which helps to make large ears. The ears are quite large, averaging 9 to 11 inches in length. They will average 24 to 32 rows to the ear. The grains are narrow but very deep and as you will note in photograph the butts and tips of each ear are well filled. This alone with 4 to 6 extra rows on each ear will make several bushels per acre extra. I have made many tests of this corn and find it takes 65 to 80 ears to weigh 70 pounds on the ear, which will shell out 60 pounds corn. The cobs are naturally quite large but have a very large pith which dries out quickly, leaving the ears hollow. This is another advantage as it helps the large ears to mature very rapidly. The past two seasons this corn yielded 75 bushels per acre. Matures in 100 to 110 days. **Price:** 3 lbs. 45c postpaid. Kindly write for prices in larger amounts.

F1576. EARLY MURDOCK or 90 Day. This fine Yellow Dent Corn, on account of its extreme earliness, is well adapted to Minnesota and the Dakotas. Ears are well filled to the tips. 14 to 16 rows, very large for so early a corn. Stalks are of medium height, stout and stocky. The best extra early Yellow Dent Corn for all sections. **Price:** 3 lbs. 40c postpaid. By freight, not prepaid, peck 85c; bushel \$3.00.

F1580. NEBRASKA YELLOW DENT. After years of selecting for a special type, I have developed NEBRASKA YELLOW DENT, which is much superior to the original Reeds. The ears are larger, averaging 9 to 11 inches and they are well filled, both butt and tip, with deep, broad kernels which are not so wedge shaped as the old Reeds. The cobs are very small, which when filled with a deep kernel mature early and shell out a very large per cent corn. This season my corn is of extra good quality, as we have had ideal weather for ripening seed. Matures in 100 days.

I can highly recommend this variety to all my customers who are looking for a good yellow corn. Sample free on request. **Price:** 3 lbs. 40c postpaid. By freight, not prepaid, peck 80c; bu. \$2.90; 5 bu. \$14.25. Bags included.

F1578. REED'S YELLOW DENT. This corn is light golden in color. The ears are 9 to 11 inches long, 18 to 20 rows of kernels. The ears are cylindrical from butt to tip. The cob is completely covered with solid corn, shelling 88 per cent grain and often better. The kernels are moderately rough, rather narrow, medium in thickness, wedge shape, setting very close together, with no lost space between the rows. It has an abundance of foliage. Ripens in 100 days. Splendid sort for the western states in general, but not recommended for the North. **Price:** 3 lbs. 40c postpaid. By freight, not prepaid, peck 80c; bu. \$2.90; 5 bu. \$14.25, sacks included.

F1582. IOWA SILVER MINE. An early variety of White Dent Corn, which is remarkable for its large yields. It is the largest eared White Dent Corn, ripening in 95 to 100 days. The ears are very uniform in size and shape, with 16 to 20 rows of pure white kernels set on a small white cob, and are well filled out over the tip; 70 lbs. of corn in the ear will make 62 lbs. shelled. It is hardy and a great drought resister. **Price:** 3 lbs. 40c postpaid. By freight, not prepaid, peck 80c; bu. \$2.90; 5 bu. \$14.25.

F1584. SANFORD WHITE

FLINT. The most productive White Flint Corn, yielding a large crop of corn and fodder at the same time. The ears are very long, measuring from 12 to 15 inches, and are of a very handsome appearance, with large kernels of transparent white color. **Price:** 3 lbs. 45c postpaid. By freight, not prepaid, peck 90c; bu. \$3.15.

F1586. EARLY YELLOW FLINT. An 8-rowed flint variety, with ears 10 to 15 inches long, 1½ to 2½ inches in diameter, and are well filled out to the extreme end of the cob. The cob is small and the kernels large and broad, ripens in 75 to 85 days. This corn is adapted to the Northwest. **Price:** 3 lbs. 45c postpaid. By freight, not prepaid, peck, 90c; bu. \$3.15.

Gentlemen:

I wish to acknowledge receipt of the two trees that you shipped on the 12th instant. They arrived in good shape and are fine trees. I am more than pleased with them and I want to thank you very much for the nice way that you have handled this matter for me. I assure you that I will speak a good word for Carl Sonderegger and his trees whenever I have the opportunity. Thanking you again, I am

Yours respectfully,

Cornelius Ukena, Golden City, Mo. Box No 372

Gentlemen:

The duplicate shipment of trees and grape vines arrived the 14th, in the best of order. I certainly thank you. Six of the plum trees were for a neighbor. They were well pleased. The two extra trees and grape vines were highly appreciated. They were so much larger and nicer trees than I expected to get for the money.

Respectfully,

H. P. Harding, Hosterman, W. Va.

Nebraska Yellow Dent

CLOVER AND GRASS SEEDS.

Timothy.

Kentucky Blue

BROMUS INERMIS

Red Top.

Orchard.

MY PRICES on Clover and Grass Seeds are based on the market values prevailing at the time this catalog goes to press. I reserve the right to fill orders according to the price based on market changes when your order reaches me. I guarantee to give full value for money received and will hold to my catalog prices as long as my supply of seeds will last. For new grain bags to ship clover seed in, I make an extra charge of 40c for each bag. Sample packets mailed on application. All seed put out under my name of NEBRASKA STANDARD, are the best and finest obtainable and will pass under our new state law. Kindly figure all amounts of 50 lbs. or over at the 100 lb. rate; less than 50 lbs. at the 10 lb. rate. All prices are subject to change.

F1588. ALFALFA OR LUCERNE. Probably no plant has added so much to the value of land in the middle western states as alfalfa. The U. S. Department of Agriculture says: "In addition to the hay crop, alfalfa in two years adds \$100 to the value of every acre on which it grows; it is a good drought resister and gets plant food where other plants would fail; it produces from 3 to 6 tons of hay. In a good season we can cut four crops in Nebraska. The seed may be sown early in the spring as soon as the frost is out of the ground in order to catch the spring rains as it needs moisture to germinate. Sow the seed broadcast, 15 to 25 lbs. to the acre. Sow with a hand seeder, going over the field crossways and using half the quantity of seed each way, may also be sown in the fall. The seed bed should be well prepared and the ground well pulverized. My seed is of the best quality and free from adulteration. I furnish Nebraska upland grown seed, which should not be confounded with seed grown under irrigation, as the latter is practically worthless, unless it be grown under irrigation again. My alfalfa seed is all fresh, clean and of high germination; all is Nebraska upland grown, no bottom land or seed grown under irrigation. Nebraska upland alfalfa seed is considered the best of all. **Price, Nebraska Standard Grade:** lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, 10 lbs. \$2.80.

F1600. ALSYKE OR SWEDISH CLOVER. The advantages which the Alsylke has over Red Clover and other varieties are its hardiness and true perennial character. It adapts itself to a great variety of soils, growing on the edge of a stream and in swamp or low land, and also flourishes on dry and stubborn stiff clay and upland soils, thus being capable of resisting the extremes of drought and wet alike. It is well liked by all stock, either green in the pasture or when cured for hay. Sow 6 to 9 pounds per acre. **Price, Nebraska Standard Grade Seed:** lb. 40c; 3 lbs. \$1.10 postpaid. By freight, not prepaid, 10 lbs. \$2.75; Grain bags, 40c each. Write for special prices on larger lots.

F1594. MEDIUM RED CLOVER. (June Clover.) Regarded the most important of all clovers, not only for forage, but also as a soil fertilizer. When sown for forage use 10 to 15 lbs. per acre. Enriches the soil, furnishes an immense amount of grazing, large crops of excellent hay and is a profitable seed crop. It can be sown with wheat or oats early in the spring but will do equally well when sown in the fall. My clover seed is grown on clean land, and I clean all seed with the latest improved machines. My customers can rely upon receiving only the best seed. **Price: Nebraska Standard Grade Seed,** per lb. 35c; 3 lbs. \$1.00 postpaid. Not prepaid, 10 lbs. \$2.90. Write for prices on larger lots.

F1596. MAMMOTH RED CLOVER. (Pea Vine Clover.) This is well known for its enormous yields and for reclaiming exhausted land. It is extremely hardy and will flourish on soil which is too low and heavy for the common Red Clover. The hay is of choice quality and is greedily eaten by all kinds of stock. Sow 10 to 12 lbs. per acre. Can be sown either in the spring or fall. I furnish the true Mammoth clover, seed of which is usually difficult to procure. **Price: Nebraska Grade Seed,** same is medium Red Clover.

F1598. SWEET CLOVER BOKHARA OR BEE CLOVER. (Melilotus Alba.) White flowering. Will grow on any soil and is invaluable for bee food. It is greatly relished by the bees, and makes superior honey. Of great value as a fertilizer. Sweet Clover will furnish the soil with bacteria for the successful growing of Alfalfa. It grows well on all kinds of soil and will make sandy soils fertile. Sweet Clover makes excellent pasture and should be sown more. The pasture on my farm has a large draw running through it and both banks are mostly gumbo and clay. I have tried all kinds of grass on these hillsides, but with no success. Sweet Clover will not bloat stock. Sow 12 to 18 lbs. per acre. All seed which I send out has been hulled and sacrificed, which improves the germination about 50 per cent. Every farmer should read my book on Sweet Clover, price 25c postpaid, or sent free with every order for Sweet Clover of 50 lbs. or more. **Price: Nebraska Standard Seed,** sacrificed and hulled, lb. 30c; 3 lbs. 80c postpaid. Not prepaid, 10 lbs. \$2.00; bags 50c each extra. Write for prices on larger amounts.

F1592. WHITE CLOVER. This is of particular value for mixtures for pastures and lawns, and will grow on almost any kind of soil, excepting wet or very moist ground. Being very hardy and of creeping habit. It will also prevent the ground from being washed away by heavy rains. Sow 5 to 6 lbs. per acre. Seed is very scarce. Write for prices on larger quantities. **Price: Nebraska Standard Grade Seed,** per lb. 85c; 3 lbs. \$2.25 postpaid. Not prepaid 1 lb. 75c; 5 lbs. \$3.50.

F1604. CRIMSON CLOVER. (German Mammoth or Giant Incarnate Clover.) In this state and north of here this clover is treated as an annual plant and sown in the spring. In the South any time from July to end of September. The only clover that yields a heavy and full crop the first season. It grows about 2 feet high. Will grow on nearly all soils, and succeeds well on sandy soil. There is hardly a better crop than Crimson Clover for cutting green. It makes excellent feed for milch cows, and for other kinds of stock. It makes superior hay and is of great value as a fertilizer. Worn out soils can be cheaply reclaimed by growing this clover. Sow in spring, 12 to 15 pounds per acre. Sow 5 to 6 lbs. with spring grain for fertilizing purposes. **Price: Nebraska Standard Grade,** lb. 40c; 3 lbs. \$1.10, postpaid, 10 lbs. \$2.75; 100 lbs. \$26.00.

Dear Sir: I sent to you for Watermelon seed. I got them all right. They looked so good I made up my mind that I would put in a bigger patch, so I am sending for more seed.

R. M. Stewart, Pawnee City, Nebr.

Dear Sirs: Received trees in fine shape. Thanking you for your promptness, I am, respectfully,
John S. Long, Kingman, Kans.

GRASS SEEDS—(Continued.)

Medium Red Clover.
(Page 116.)

F1606. FANCY KENTUCKY BLUE GRASS. The most widely known of all the natural grasses, which does well everywhere and can be found in almost every part of our broad country. It is grown more for pasture than for hay, as it starts to grow unusually early in spring and provides good feed in May and June in our northern states, and produces a good growth until the ground freezes. This grass is very hardy and neither injured by the cold nor by dry weather, hot sun, the tramping of hoofs or close mowing. It is suited to any variety of soil, but seems to succeed best on moist, rich land. It requires about two years to become well established and for this reason should be used where permanent pastures are wanted. Used extensively for lawns. We handle only the best

grade, weighing 21 to 24 pounds to the measured bushel. Crop very short. **Price:** lb. 45c; 3 lbs. \$1.25; postpaid. Not prepaid, 10 lbs. \$3.25. Write for prices on larger lots.

F1610. TALL MEADOW OAT GRASS. The earliest of all grasses, and one that has naturalized itself all through the western state. It is the first grass to show itself in the spring, and grows rapidly in good soil, showing a height of 4 feet by June. It will furnish two or three cuttings per year and is invaluable for early and late pasturage. It seems to keep green both summer and winter, longer than any other grass, and for this reason is also known as Evergreen Grass. Farmers in sections where timothy does not succeed make no mistake by sowing this grass liberally. I recommend a mixture of about 10 lbs. each of Meadow Oat Grass, Bromus Inermis and Meadow Fescue, to which Clover Seed may be added. Sow 20 to 25 lbs. per acre when sown alone. **Nebraska standard Grade,** per lb. 60c; 3 lbs. \$1.70 postpaid. By freight, not prepaid, 10 lbs. \$4.75; 50 lbs. \$23.75.

F1612. ORCHARD GRASS. A valuable grass for pasture or hay land, and on account of its earliness, very valuable for permanent pastures. It furnishes the first green bite in the spring, and the last in the fall, and is quick to recover from close cropping. It is well suited to shady places, such as orchards and groves. It is good practice to sow Red Clover with Orchard Grass, either for hay or pasture. According to chemical analysis, Orchard Grass is equal, if not superior to Timothy. Orchard Grass is of great value for early and late pasture and in the South can be pastured nearly the entire year. Does well in our western states. It is also quite valuable for binding soils. Sow 20 to 30 lbs. per acre. **Price:** **Nebraska Standard Grade,** per lb. 35c; 3 lbs. \$1.00, postpaid. By freight, 10 lbs. \$2.25; 50 lbs. \$10.50; 100 lbs. \$20.00.

F1614. BROMUS INERMIS. (Hungarian Brome Grass.) This pre-eminent drought resisting grass stands at the head of all, and is destined to lead as the most satisfactory and valuable forage grass in all localities where arid soils demand a plant with ability to withstand drought. Stands intense cold equally as well. It will produce a big crop of hay on land that is too poor for clover or timothy. May be sown in autumn with winter wheat or in early spring. In the southern states sow in February or March, preparing the land as for other grasses. For hog pasture a mixture of Bromus Inermis and Alfalfa is recommended by Prof. Ten Eyck, of Kansas State Agricultural Experiment Station, and he also suggests for large pastures for cattle a mixture of the following per acre: Bromus Inermis, 10 lbs. Orchard Grass 6 lbs., Meadow Fescue, 8 lbs., Red Clover, 1 to 2 lbs., added to this mixture. For worn-out pastures he advises to disc early in the spring, following with a harrow and sow Bromus Inermis. Sow 20 to 30 lbs. per acre if sown alone. **Price:** **Nebraska Standard Grade,** lb. 35c; 3 lbs. 95c postpaid. By freight, 10 lbs. \$2.40; 100 lbs. \$23.00.

F1616. PERENNIAL RYE GRASS. (English Rye Grass.) A nutritious permanent grass for meadows and pastures, or for mixing with other grasses for lawns. It is also well adapted for permanent meadows and yields large quantities of very nutritious hay. It makes a quicker, leafier growth than most other grasses, succeeds in the shade as well as in the open, and may be sown with good results in orchards or woodland pastures. Sow in my Nebraska Standard in spring and fall at the rate of 20 to 30 lbs. per acre. **Price:** **Nebraska Standard Grade,** lb. 30c; 3 lbs. 80c, postpaid. By freight, 10 lbs. \$2.10; 50 lbs. \$10.25; 100 lbs. \$20.00, not prepaid. Sacks included.

F1618 ITALIAN RYE GRASS. A quick growing annual grass. Will grow on almost any soil, but thrives best on rich, moist land, where large crops can be produced. Valuable for hay and pasture. It is well adapted for pastures on account of its early growth in spring and its quick and successive after growth when closely cropped. For this reason it is very valuable to sow as a catch crop in clover fields where the clover has dried or winter killed. When mixed with Crimson Clover and sown on these bare spots in spring, a full crop can be counted on from these fields. Grows 2 to 3 feet high. Sow 20 to 25 lbs. per acre. **Price:** **Nebraska Standard Grade,** lb. 30c; 3 lbs. 80c, postpaid. Not prepaid, 10 lbs. \$2.00; 50 lbs. \$9.75; 100 lbs., \$19.00, sacks included.

F1620. BERMUDA GRASS. For the southern states particularly, this grass is best adapted and of great value. It is the chief reliance for pasture and hay, furnishing rich and green pasture during nine months of the year. On good land it will cut 2 to 4 tons of nice hay per acre. Grows wherever corn and cotton grow. Grows luxuriantly during driest weather and withstands winters as far north as central Kansas. Sow in spring, 5 lbs. per acre. **Price:** lb. 50c by mail, postpaid. Not prepaid, 5 lbs. \$2.00.

F1622. TIMOTHY. Unsurpassed for hay and greatly liked by all stock. Best suited to moist, rich and loamy soils. Timothy hay always commands the highest market price. An excellent meadow can be made by sowing 3 lbs. of clean Red Top and 1 or 2 lbs. of Red Clover with about 5 lbs. of Timothy per acre; 10 to 12 pounds are required when sown alone. My seed is home grown, of extra nice quality and free from weed seed. Please write for prices on larger quantities. **Price:** **Nebraska Standard Grade,** per lb. 25c; 3 lbs. 65c postpaid. Not prepaid, 10 lbs. \$1.20; 50 lbs. \$5.75; 100 lbs. \$11.00. Grain bags, 40c extra.

F1626. RED TOP. Valuable for most soils. Good permanent grass. Stands our climate well; is adapted to our pastures. Has succeeded on alkali soil when other grasses failed. Fancy clean or hulled seed; sow 5 to 10 lbs. per acre. **Price:** **Nebraska Standard Grade,** per lb. 40c; 3 lbs. \$1.10 postpaid. By freight, 10 lbs. \$3.00; 50 lbs. \$14.15; 100 lbs. \$28.00. Sacks included.

F1608. MEADOW FESCUE, or English Blue Grass. Succeeds well in almost all soils, from high, dry land to moist, standing the summer heat excellently. It is valuable as a pasture grass, being one of the earliest in the spring and latest in the fall. It is highly recommended as a large yielding, nutritious pasture and hay grass for all sections of the country as far south as Tennessee, and west into Central Kansas. In Central Kansas in particular, where timothy does not succeed, it is perhaps the best grass that could be grown. Sow either in spring or fall. Sow 20 to 30 lbs. per acre. **Price:** **Nebraska Standard Grade,** lb. 25c; 3 lbs. 65c; postpaid. By freight 10 lbs. \$1.70; 50 lbs. \$8.00; 100 lbs. \$15.00.

"HUBAM"—The Annual Sweet Clover.

F1627. Hubam, the much talked of annual Sweet Clover, has proven its value in a very short time. It is superior to the biennial sweet clover as it is of much quicker growth and will produce a crop of hay, pasture or fertilizer in one season, while the biennial requires two seasons to produce a seed crop. The seed is very scarce and the prices remain high, but much lower than last season. **Price:** 1/4 lb. 20c; 1/2 lb. 35c; 1 lb. 50c, postpaid. Write for prices on larger amounts.

Kind Friends: I received all the trees, plants and seeds I ordered from you all O. K. and want to thank you very much, for I am well pleased with them. Thanking you for your prompt attention. Yours,
Geo. Buchner, Granite City, Ills., R. F. D. No. 1.

Dear Sir: I received your garden seed O. K. and was well pleased with them and will be planting some of them soon, as green grass is coming fast.
Yours with best wishes and a successful year.
Arthur Mansfield, Hopsonville, Mont.

GRASS SEEDS.—(Continued)**SUDAN GRASS.**

F1628. This new grass was introduced into the U. S. in 1909. It has been thoroughly tested out by the U. S. Dept. of Agriculture, and they report that Sudan Grass will be of the greatest value in the central states and especially in parts of the states that are deficient in rainfall. Sudan Grass has all the good qualities of Johnson Grass, and yet it does not have the objectionable feature of Johnson Grass; that is, the root stalks by means of which Johnson Grass spreads out from year to year and becomes a pest. Sudan Grass is strictly annual and dies each year like Millet, and must be reseeded again each spring. It grows very tall, reaching a height of 6 to 8 feet. The stalks are very small and rarely thicker than a lead pencil. It can be cut two to four times a season and making enormous yields. For feeding, the hay is equal to timothy hay. Last summer I grew a field of Sudan Grass for seed, planting it in rows 2 feet apart and cultivated it twice. The weather was very dry, little rain falling from spring until August; also it was unusually hot already in June. Yet, by August 1st, it was from 4 to 5 feet high, a very thick stand and was maturing a good crop of seed, and later making 1½ tons of hay per acre. In a dry year I find Sudan Grass way ahead of Alfalfa for a hay crop. It seems to me that every farmer should plant a few acres of Sudan Grass every year, to make sure to at least have some hay in a very dry season. It will pay him big—much better than cane or millet. Sow in spring as soon as ground has become warm and danger of frost is past, in drills, 2 to 6 lbs. per acre. Seed is much more plentiful this season and the prices are much lower than last year. Northern grown seed, free from Johnson grass, lb. 20c; 5 lbs. 85c; postpaid. By express or freight, 10 lbs. \$1.10; 50 lbs. \$4.50; 100 lbs. \$8.25, not prepaid.

TREE SEEDS

(For Full Description See Pages 27 to 34.)

The seed comes quickest and best when planted in rich, sandy loam. Plants should be naturally or artificially sheltered from heavy east and northeast winds.

F1660. ASH. (White.) *Fraxinus Americana*. Soak the seed for 24 hours. Seed must be sown in fall. Write for prices.

F1662. BOX ELDER. *Acer Negundo*. Culture, same as Ash. Seed must be sown in fall. Write for prices.

F1664. CATALPA SPECIOSA. (Hardy Catalpa.) Sow seed in spring when ground has become warm, and cover two inches. Pkt. 5c; ¼ lb. 40c; lb. \$1.25.

F1666. HACKBERRY. *Celtis*. Sow early in spring, covering about 2 in. Pkt. 10c; ¼ lb. 40c; lb. \$1.50.

F1672. MULBERRY, RUSSIAN. *Morus Nigra*. Sow in spring when ground has become warm, covering ½ inch. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; lb. \$3.00 postpaid.

F1676. PERSIMMON. *Diospyros*. Sow seed in spring and cover 2 or 3 inches. Oz. 10c; ¼ lb. 25c; lb. 65c.

F1668. HONEY LOCUST. *Gleditschia Triacanthos*. Pour warm water (120 deg.) over seed, stir well ten minutes and let seed remain in water 24 hours. Then sow, cover 3 inches. Seeding time—spring. Pkt. 7c; ¼ lb. 20c; lb. 75c postpaid; 10 lbs. \$6.25, not prepaid.

F1670. LOCUST, BLACK OR YELLOW. *Robinia Pseudacacia*. Soak seed for 24 hours in warm water before sowing. Cover 2 inches. Sow in spring. Pkt. 7c; ½ lb. 25c; lb. 75c postpaid; 10 lbs. \$6.75 not prepaid.

F1674. OSAGE ORANGE. (Hedge Plant.) *Maclura Aurantiaca*. Before planting soak the seed in water for 6 or 7 days, changing the water every day. Cover 3 inches. Seeding time—spring. Pkt. 10c; ¼ lb. 40c; lb. \$1.50 postpaid.

F1678. RUSSIAN OLIVE. *Elaeagnus*. Sow seed in spring after soaking same in lukewarm water for several hours; cover about 2 inches. Pkt. 7c; ¼ lb. 25c; lb. 75c postpaid.

NOTICE: I prepay freight charges on orders for trees of \$10.00 or more, but this does not apply to orders for grass and field seeds.

LAWN GRASS SEED

F1630. This is a mixture of the best varieties of grass seeds suited for growing together, and make a beautiful, soft, velvety lawn and keep green from early spring all through the hot, dry summer weather until late in the fall. It comes up quickly, and after once up it soon spreads to cover the ground and is ready for the lawn mower in six to eight weeks. It is permanent, maintaining its beauty for many years. This mixture I make myself from new crop, re-cleaned pure seeds of the best varieties. One pound will cover about 300 square feet. **Price:** lb. 60c; 3 lbs \$1.50 postpaid. By freight or express not prepaid, 10 lbs. \$4.50, sacks included.

SPECIAL CLOVER GRASS MIXTURES**FOR PERMANENT PASTURES AND MEADOW.**

By sowing these Grass Mixtures a much larger yield per acre can be obtained than if only one or two varieties are sown. A pasture containing a variety of grasses and clover is again as productive and can be pastured earlier and longer than if but one kind of grass is used. Write me, giving full particulars as to soils, etc. In making up these grass mixtures I use my Nebraska Standard Grade seed only, and my prices rule accordingly. Please bear this in mind when comparing prices. **Price:** 3 lbs. \$1.25, postpaid by freight, 10 lbs. \$3.00.

SMALL QUANTITIES BY MAIL. Any of the mixtures below:**Mixtures for Permanent Pastures.**

20 lbs. per acre or 10 lbs. for top seeding

No. 1. For medium soils.**No. 2.** For high, sandy and dry soils.**No. 3.** For high, dry land, heavy or clay.**No. 4.** For low, wet ground.**WRITE FOR PRICES.****Mixtures for Permanent Meadow.**

20 lbs. per acre or 10 lbs. for top seeding

No. 5. For medium soils.**No. 6.** For high, light and dry soils.**No. 7.** For high, dry land, heavy or clay.**No. 8.** For moist, rich soil, or land subject to overflow**WRITE FOR PRICES.****FIELD SEEDS.****OATS**

F1500. NEBRASKA 21 OATS. This oats was introduced a few years ago by the Nebraska Dept. of Agriculture. This seed is a special selection from the old, well-known variety of Kherson. It has all the good characteristics of Kherson, being extra early, has short, stiff straw, rust resisting, free from barley and is a much heavier yielder. I have grown it the past two years and find it superior to other varieties. My yield this season was 55 bushel per acre. My seed was grown from certified stock. **Price:** 3 lbs. 30c postpaid. By freight, not prepaid, 10 lbs.

35c; 100 lbs. \$3.15. 500 lbs. \$15.00. Write for prices on larger lots.

F1503. TEXAS RED. I find this to be one of the best varieties for Nebraska and Kansas. It is about 10 days later than Kherson. The straw grows 2 to 2½ feet high, is rather stiff and does not lodge easily. The kernels are large and of a reddish brown color. In this locality it is one of the best yielders. **Price:** 3 lbs. 30c postpaid; by freight not postpaid. 10 lbs. 35c; 100 lbs. \$3.15; 500 lbs. \$15.00. Write for prices on larger lots.

SN

Sudan Grass.

FIELD SEEDS.—(Continued.)**SPELTZ OR EMMER.**

F1504. The grain is considered as good as oats for stock and better than barley for hogs. It makes excellent pasture and good hay if cut at proper season. Produces from 50 to 100 bushels of seed per acre, and yields well in dry years. It is claimed that it will make a crop where the annual rainfall is only 10 inches. Can be sown very early, as plants are not injured by frost or snow. Drill 80 lbs. or if sown broadcast, 120 lbs. per acre. **Price:** 3 lbs. 35c postpaid. By freight, not prepaid, 10 lbs. 70c; 25 lbs. \$1.60; 100 lbs. \$6.00, not prepaid.

BARLEY.

F1506. WHITE HULLESS. No beards or hulls. The grain looks like wheat. Equal to wheat in feeding value and will yield nearly twice as much. It is early, thus making a splendid nurse crop seeding with clover; is entirely beardless, with soft straw, splendid for feed. Many farmers cut it for hay crop. Sow in spring 1½ bushels per acre. Specially fine for poultry and for grinding for hogs. **Price:** 3 lbs. 40c postpaid. By freight, 10 lbs. \$1.00. Kindly write for prices on larger amounts.

F1508. MANSCHURI. This is an extra early six rowed variety, with long straw, bearing long, well filled heads of plump grain. It is a good variety to grow, either for feed or market; its malting qualities are unsurpassed. **Price:** 3 lbs. 30c postpaid. By freight, 10 lbs. 35c; 100 lbs. \$3.00.

F1510. CHAMPION BEARDLESS. A fine, beardless Barley, that has been planted largely for so many years. The kernels are large, plump and heavy. It is earlier than any bearded barley, will yield more and will not discolor as easily as other barley. In regard to soil it is not particular. A first-class barley for malting. **Price:** 3 lbs. 35c postpaid. Kindly write for price in larger lots.

WINTER RYE.

This Rye was introduced by the Agricultural Department of Wisconsin, and it has proven to be much superior in yield and quality over the old varieties. It will yield 5 to 20 bushels more seed per acre than any other variety.

F1514. ROSEN. Rye is a sure crop—failures being almost unknown. It is usually sown in the fall, and as it grows very vigorous, will furnish pasture until late in the fall, and also early in the spring it makes an abundant pasture, but then makes no crop. 3 lbs. 25c postpaid. New crop ready for shipment in August. Write for prices.

SPRING RYE.

F1516. Invaluable as a catch crop. Can be sown later than any other spring rye, but usually yields well. The seed we offer is home grown. **Price:** 3 lbs. 25c postpaid. By freight, not prepaid, 10 lbs. 40c. Kindly write for prices on larger amounts.

NOTICE—Did you read last paragraph on page 72? If not, please do it now.

BROOM CORN.

One of the most paying crops and is adapted to any soil that will grow corn. It will make a crop with very little rain. One acre will yield 1 to 1½ tons of cured brush and up to 40 bushels of seed which is nearly equal to oats in feeding value. Plant in drills 3½ feet apart, and in rows about 3 inches apart, and cultivate the same as corn. About 5 to 8 lbs. of seed will sow an acre. If planted the 1st of June, it will be ready to cut September 15th. **Prices subject to change.**

F1542. IMPROVED EVERGREEN. This variety grows about 8 to 10 feet high, stands up well, and is entirely free from crooked brush. **Price:** 3 lbs. 35c postpaid. By freight 10 lbs. 50c; 25 lbs. \$1.15; 100 lbs. \$4.00, sacks included.

F1544. OKLAHOMA DWARF. Most valuable grain grown in Oklahoma and the Southwest. Very early and is a drought resister. Averages 5 feet in height. Is a great yielder. **Price:** 3 lbs. 35c postpaid. By freight, not prepaid, 10 lbs. 50c; 25 lbs. \$1.15; 100 lbs. \$4.00, sacks included.

SAND VETCH OR WINTER VETCH.

F1532. The true Winter Vetch or Hairy Vetch. A forage plant which has proved of highest value. It succeeds and produces good crops on poor, sandy soils, and grows to a height of 4 to 5 feet. It is exceedingly nutritious, is eaten with relish and may be fed with safety to all kinds of stock. It is the earliest crop for cutting, and a full crop may be taken off the land in time for spring crops. It serves equally well as a cover crop, for pasturage, hay, or as a soil renovator. In far north sow in early spring; in moderate climates sow from July to November, broadcast or in drills at rate of one bushel per acre, with 1½ to 1 bushel of rye, wheat, oats or barley. Cut when vetches are in full bloom. **Price:** 1b. 25c; 3 lbs. 65c postpaid. By freight, not prepaid, 10 lbs. \$2.00. Write for prices on larger lots.

BUCKWHEAT

F1524. JAPANESE. An early and very prolific variety, with kernels about double the size of ordinary sorts. The best for the western states, as it withstands drought well. 35 lbs. per acre. **Price:** 3 lbs. 30c postpaid. By freight, not prepaid, 10 lbs. 60c; 25 lbs. \$1.25. Write for prices on larger lots.

F1526. SILVER HULL. Well known standard variety. Sow 50 lbs. per acre. **Price:** 3 lbs. 30c postpaid. By freight, not prepaid, 10 lbs. 60c; 25 lbs. \$1.25. Kindly write for special prices on larger lots.

COW PEAS.

Largely grown in southern states as a hay crop or fertilizer. May be sown in corn at time of last cultivation or after a crop of early potatoes. Sow broadcast at the rate of 1½ bushels per acre, or plant in rows about 3 ft. apart with a corn planter, requiring only ½ bushel per acre. **Prices subject to change.**

F1534. NEW ERA. The earliest variety and the best sort for the North and West. **Price:** 3 lbs. 50c postpaid. By freight, not prepaid, pk. \$1.10. Write for prices on larger lots.

F1536. WHIPPOORWILL. A favorite in Oklahoma, Texas and the South. **Price:** 3 lbs. 55c postpaid. By freight, not prepaid, pk. \$1.10. Write for prices on larger lots.

Japanese Buckwheat. (See page 119.)

Nebraska No. 21. (See page 118.)

FIELD SEEDS.—(Continued.)

New Era Cow Peas.

killed by frost. It never falls down nor lodges, and the heads never droop, nor are there any crook-neck heads. Cinch bugs do not bother it as they do milo. Seed never shatters, no matter how long it stands in field. The seed is readily eaten by anything that will eat kaffir. It makes fine, leafy hay when sown broadcast, or drilled and grows just a nice height to be handled with wheat binder (or pitchfork if cut with mower.) Height $3\frac{1}{2}$ to 4 feet. The seeds should be sown in rows 3 feet apart. Three pounds of seed is sufficient to plant an acre. Broadcast 50 lbs. per acre. **Price:** 3 lbs. 45c postpaid. Not prepaid 10 lbs. 90c; 100 lbs. \$7.00, sacks included.

DWARF ESSEX RAPE

F1530. The easiest cultivated and most profitable plant for sheep, hogs or cattle known. It can be sown in early spring along with oats or rye, and eaten off by sheep within a week or so after harvest. It can also be sown on wheat, oats or rye stubble, or on any vacant land up to the end of July, and will yield an immense crop of green fodder in six to eight weeks from time of sowing—nothing like it for sheep feed. Rape should be sown in drills at the rate of 3 lbs. per acre or broadcast, using 5 to 6 lbs. per acre. **Price** for true Dwarf Essex Rape, first quality seed, 3 lbs. 50c, postpaid. By freight, not prepaid, 5 lbs. 60c; 10 lbs. \$1.10; 25 lbs. \$2.60. Grain sacks, 50c.

SOJA OR SOY BEANS

F1541. IMPROVED YELLOW. Splendid soiling and hay crop preferred by many to cow peas as they stand up better and are easier to harvest. Of great value from the fact that they fertilize the soil like clover. Ground beans are equal to linseed oil meal in feeding value; as hay for silo it is equal to or better than clover. Will mature in all parts of the corn belt and in the middle states has been grown over 3 feet high, heavily podded with seed, producing 8 tons of feed per acre. **Price:** 3 lbs. 35c postpaid; 10 lbs. 60c. Kindly write for prices on larger lots.

FIELD PEAS

Valuable for fattening stock. Can also be grown to best advantage for soiling purposes. Of great nutritive value for fodder, either when the matured peas are fed as ground feed or when the vines are cured for hay. Can be sown alone or with oats, 1 bushel of peas and $1\frac{1}{2}$ bushels of oats.

F1538. CANADA YELLOW OR GOLDEN VINE. Ripens early and is a good yielder. **Price:** 3 lbs. 50c postpaid. By freight, 10 lbs. \$1.00; 25 lbs. \$2.25. Kindly write for prices on larger lots.

F1540. GREEN CANADA. Very hardy, extra early, and a good yielder. **Price:** 3 lbs. 55c postpaid. By freight, not prepaid, 10 lbs. \$1.20; 25 lbs. \$2.50. Kindly write for prices on larger lots.

YELLOW MILO MAIZE OR BRANCHING SORGHUM

F1552. Highly valued because of its certainty to produce good crops on poor, dry soil. Grows 9 to 10 feet tall and branches freely. The seed heads produce a large quantity of grain, which is superior food for fowls. Plant in drills 3 to 4 feet apart, using 5 to 6 lbs. per acre. **Price:** 3 lbs. 30c, postpaid. By freight, 10 lbs. 50c; 50 lbs. \$2.00, sacks included. **Prices are subject to change.** Kindly write for special prices on larger lots.

WHITE KAFFIR CORN

F1556. An excellent fodder plant, yielding two crops of fodder during the season. The stalks keep green and juicy, making excellent fodder, either green or dried, which is highly relished by stock. The seed crop is heavy. Sow in rows 3 feet apart 4 to 5 lbs. per acre. For fodder sow 25 to 50 lbs. either broadcast or in drills. **Price:** 3 lbs. 25c postpaid. By freight 10 lbs. 45c; 100 lbs. \$4.00 **Prices subject to change.**

RED KAFFIR CORN

F1558. Similar to the white, except the seed is of red color. Ripens a little earlier and is said to withstand drought even better than the white. **Price:** By mail, postpaid, 3 lbs. 40c. By freight, not prepaid, 10 lbs. 50c; 100 lbs. \$4.00. **All prices subject to change.**

FETERITA

F1546. A new non-sacharine from Sudan. It is an early maturing, drought resisting sorghum of considerable value, both for fodder and grain. It has rather slender stems, varying in height from 4 to 7 feet, with locality and season. The stems are juicy and slightly sweet before ripening. Suckers are produced freely when moisture is sufficient. It is a little earlier than dwarf and yields about the same. Sow in hills 40 to 44 inches apart, and not before the ground is warm; about 2 weeks after Indian Corn, as it is still more liable to rot in cold ground. 3 to 5 lbs. will sow one acre. **Price:** 3 lbs. 40c, postpaid. By freight, 10 lbs. 50c; 100 lbs. \$4.50.

KAFFIR-SORGHUM

F1554. NEW Forage Plant—This is one of the greatest new introductions of recent years in the Sorghum line. When planted thin, one plant will often shoot two, sometimes four or five stools, each of which will make a good head. It does better if not planted too thickly. Seed planted in April, 1914, was fully hard and matured August 5. It resembles kaffir in waiting for rain the leaves rolling up in daytime. Leaves stay green always until

Dwarf Essex Rape for Hogs and Sheep.

FIELD SEEDS.—(Continued)

MARQUIS SPRING WHEAT

F1513. This wheat was introduced by the Canadian Department of Agriculture, Ottawa, Canada. It is a cross between an early ripening Indian wheat, hard red Calcutta and Red Fife. At the Canadian Experimental station it outyielded Red Fife from 13.5 to 33.1 per cent and was the highest yielding wheat there. It is very early, 3 or 4 days earlier than most of the Fife varieties, and therefore often escapes the drought of dry years, the rust in a wet season, and in the far North also the early fall frosts. Tests made in Iowa and South Dakota showed a greater yield of Marquis wheat than any other spring wheat planted there. The same result was obtained with tests in Nebraska. The Marquis is a beardless wheat, a better yielder as well as better milling wheat. It will pay my customers to try this wheat. Of course in all localities where winter wheat can be grown, it outyields all spring wheats, including the Marquis. All the Marquis wheat I offer was raised in northern Nebraska near the Dakota line. Price: 3 lbs. 30c postpaid. Write for prices on larger quantities.

FLAXSEED

F1523. Flax is one of the most profitable crops, especially on new land. It makes a quick crop, being sown in April and harvested in June. I offer good, clean seed. Sow 15 lbs. per acre. Price: 3 lbs. 45c postpaid. By freight not prepaid 10 lbs. \$1.10; 25 lbs. \$2.50.

RUSSIAN SUNFLOWER

F1522. The largest Sunflower. One of the best paying crops to raise. Seeds are the best of feed for poultry, and much cheaper to raise than corn; 3 to 4 lbs. per acre. Price: 10 lbs. 15c; 3 lbs. 45c postpaid. By freight not prepaid 10 lbs. \$1.10; 25 lbs. \$2.50.

SORGHUM OR SUGAR CANE

Dairy farmers say that Sugar Cane is the most valuable fodder plant in existence for their use. Can be grown anywhere on any soil that will grow corn. It is of the best quality, being sweet, tender, nutritious and greedily eaten by horses, cattle and hogs. It is claimed that as high as ten tons of green fodder have been grown per acre. Sow 100 pounds per acre. It is a profitable crop also to grow for seed. When grown for seed, sow in drills three feet apart, using 4 to 5 lbs. of seed per acre. Prices subject to change.

EARLY AMBER. Popular and well known. Succeeds well from Texas to Minnesota.

F1560. Selected Seed for Sorghum. 3 lbs. 45c postpaid. Not prepaid 10 lbs. \$1.10; 25 lbs. \$2.50.

F1562. For Fodder. 3 lbs. 45c postpaid. Not prepaid 10 lbs. 60c; 50 lbs. \$2.00; 100 lbs. \$3.75. Write for special prices on larger lots.

EARLY ORANGE. Ten to fifteen days later than Early Amber. Well adapted to the South and West.

F1564. Selected Seed for Sorghum. 3 lbs. 45c postpaid. Not prepaid 10 lbs. \$1.10; 25 lbs. \$2.50.

F1566. For Fodder. 3 lbs. 45c postpaid. Not prepaid 10 lbs. 60c; 50 lbs. \$2.00; 100 lbs. \$3.75. Write for prices on larger lots.

F1565. SONDEREGGER'S IMPROVED SORGHUM CANE. After several years of experimenting I have found a cane that is much superior to all other varieties which I have ever tried for making sorghum or molasses. The stalks grow 8 to 10 feet high and average 1½ to 2 in. in diameter with many stalks which are much larger. The large thick stalks produce much more, richer and sweeter juice than any other variety I have ever tested out. The past season I had wonderful success with this variety. I planted 4½ acres in rows about 4 feet apart and cultivated it the same as corn. From this small patch I got 700 gals. of the finest kind of molasses. It was much lighter in color and much sweeter than any of the molasses from the Orange Amber or Ribbon Cane, made by the Beatrice Sorghum Mills. Henry Lang, of the Beatrice Sorghum Mills, stated that my new sorghum made several gallons more per load of stalks than any other lot he received. He also states that the quality is much better. Anyone growing cane for sorghum should try a small amount of this variety. I would not advise planting it much north of here, as it is not quite as early as Amber or Orange. For best success plant in rows like corn and thin out plants to about 10 or 12 inches in the row. In this way the stalks will get larger and mature earlier. This cane makes excellent feed for stock when sown broadcast at the rate of 2 bushels per acre. My stock seed tests 90 per cent this season. Price: 10 lbs. 15c; 3 lbs. 45c postpaid. Not prepaid 10 lbs. 60c; 50 lbs. \$2.00.

Soy or Soy Beans.

F1567. RIBBON CANE. This new variety of cane which has been tried throughout the southern states and found to be much superior to all other varieties both for fodder and especially for making sorghum or molasses. The stalks grow much like Amber only they are somewhat taller and thicker. The past season I grew both varieties for sorghum and found the ribbon cane to be much the best. It outyielded the Amber both in quantity and quality. Price: 10 lbs. 15c; 3 lbs. 45c postpaid. Not prepaid 10 lbs. 60c.

We are highly pleased with what we ordered from you this spring and last spring. We know where to get good trees and shrubs now.

Mrs. F. Devereaux Atwell, Kansas.

And now I must tell you about our fruit and roses. You sent me a *Chryseum Rambler* rose some three years ago and last summer it was a thing of beauty. One branch shot out about mid-way from the top to root and was a little over a foot long and I counted forty of those beautiful double little crimson roses on that one branch. It was a bouquet all by itself and we had a hard drought here too. Our last order of fruit trees (some four years ago I think) began bearing last season a little cherry tree was just loaded. Also young *Compass* cherry plants and a *Sage* plum. The young peach trees had a few blossoms on but did not bear. Your trees all live and are so healthy and strong from the start.

Respectfully,

Mrs. F. W. Banker, Dalhart, Texas.

Yellow Milk Maine. See Page 120.

FIELD SEEDS.—(Continued)

MILLET

A paying crop for the stock raiser and dairy farmer, because it is of the greatest feeding value and milk producing quality. It will yield much more good hay per acre than timothy and clover. When spring is so unfavorable and wet that other crops fail to grow, Millet can be put in as late as June 15th; and can be depended upon to make a good crop. On account of the unsettled market condition at the time this catalogue went to press, I kindly ask my customers to write me for special prices on larger lots.

F1570. GOLDEN MILLET. This variety matures about two weeks later than common Millet. It grows from 4 to 5 feet high, yielding an abundance of leaves; heads closely condensed; spikes very numerous; seeds round, golden yellow in rough sheaths. Sow 50 lbs. per acre, or for seed 25 lbs. **Price:** 3 lbs. 35c postpaid. By freight, not prepaid, 10 lbs. 50c; ask for prices on larger lots.

F1572. NEW SIBERIAN. Is earlier than all other kinds and wonderfully productive. Makes fine hay and is rust proof. Withstands drought well and is extremely hardy. Will yield 50 to 75 bushels of seed per acre. Seed is of reddish color. Sow 25 to 35 lbs. per acre. **Price:** 3 lbs. 35c postpaid. By freight, 10 lbs. 50c.

F1574. JAPANESE MILLET. Also called "Billion Dollar Grass." Especially valuable in the northern states. It yields an enormous crop of foliage, which is greatly relished by stock. When cured it makes an excellent hay. Can be sown until the end of July. Sow the seed broadcast at the rate of 50 lbs. per acre, or in drills 40 lbs. per acre. **Price:** 3 lbs. 40c postpaid. By freight, 10 lbs. 60c. Write for special prices on larger lots.

F1575. NEW WHITE WONDER. The most striking feature of White Wonder Millet is the size of the heads, which will run from eight to fifteen inches and a single head will have as many as 15,000 seeds. The yield of White Wonder is extremely heavy, being fully half again as heavy as that of golden millet. Some growers of White Wonder Millet claim that it will out-yield other millets three to one. Another desirable feature is its earliness. This variety is much earlier than Golden Millet. The foliage is very heavy, the leaves broad and therefore it produces an immense amount of excellent fodder which cures very rapidly. We believe that on account of its earliness, the immense yield of both grain and fodder, and the vigorous growth which leaves the ground clean, White Wonder Millet will soon take first place among the Millets. **Price:** 3 lbs. 40c postpaid. By freight, 10 lbs. 50c.

Millet seed should be shipped in strong grain bags to insure safe transit. I make an extra charge of 50c each for new grain bags.

Feterita

Garden Tools, Sprayers, Etc.

HUDSON JUNIOR SPRAYER

The Hudson Junior is a high pressure compressed air sprayer. It is designed especially for the farmer, gardener, physician, clerk, storekeeper, or any one having a few fruit trees, ornamental shrubs, rose bushes, or a vegetable garden, which requires spraying. It will do the work just as thoroughly as any larger power outfit, as it has all the necessary features to produce the best results. Tank is heavy gauge galvanized sheets. Side seams are riveted and soldered. Pump is seamless brass tubing which seals into the tank by a half turn of the D handle and is easily removed for filling, cleaning, etc. It is equipped with special spray hose, built to withstand high pressure, and our "Perfection" automatic shut-off nozzle. An extension may be used with it if desired. Capacity about 2½ gallons. Shipping weight, 8 lbs. No. 140-G. Junior with galvanized tank. See illustration, page 123. **Price:** Each, \$5.00.

ROCHESTER "KANT-KLOG" NOZZLE

Throws Nine Different Sizes of Round Spray, Flat Spray and Solid Streams.

Three of each and all of different sizes, volume and fineness. A greater variety of sizes and shapes than any nozzle ever made. Satisfies the most exacting customer. Another important feature is the device for removing any obstructions resulting from not having properly mixed or strained solution. This is accomplished by simply pressing the end of the nozzle against a limb, the cleaning pin and current doing the work without loss of time or patience. Notice there are no projecting parts to catch on limbs of trees. When spraying field crops, the cleaning is done by pressing the rim of the nozzle with the thumb. Made of polished brass with 4 inch cut threads. **Price:** "Kant-Klog" Nozzle, \$1.00 each, postpaid. Shut-off as shown in picture, \$1.00; nozzle and shut-off combined, \$1.75 postpaid.

RAIN KING LAWN SPRINKLER

I have found the Rain King to be the best lawn or garden sprinkler on the market. The two nozzles are adjustable. They can be made to throw a good spray with a low water pressure. By tightening the thumb screw in center of cross arms it makes a stationary sprinkler for use on street parkings and other narrow places. They are well made and will last a lifetime. **Price:** \$3.75 prepaid, not prepaid, \$3.50.

THE FINNEY DUSTER

This new dust gun, which has just been put on the market, has filled the wants of many gardeners. I have tried it out the past season and it did the work so thorough that I am glad to recommend it to all my customers. The dust gun is about 12 inches long and is worked with a piston the same as the small hand sprayers. I especially recommend it for fighting the green aphids and striped cucumber bugs, with Nico Dust No. 10. With this dust gun you have no trouble getting the dust underneath the leaves, where most of the insects stay. **Price:** \$1.00 each, postpaid.

Golden or German Millet.

Rain King Lawn Sprinkler.

CONTINUOUS HAND SPRAYER

I consider this the best small hand sprayer made. It sprays a fine mist, up, down, straight ahead or at any angle. This makes it very practical for spraying underneath the leaves, where the plant lice often gather. It sprays continuously, the forward stroke of the plunger storing sufficient pressure to make spray continuous on return stroke. This sprayer has two spray caps, the tank is made of heavy brass, which holds one quart. It is a little higher in price than the tin can sprayers, but will last much longer. The spraying materials will not eat out the brass like they do the tin. **Price:** Each, brass cans, \$1.20, postpaid; galvanized cans, 90c postpaid.

Continuous Hand Sprayer

ROCHESTER BARREL SPRAYER

This Barrel Sprayer is intended for orchard or field spraying, and can be mounted on either the end or side of an ordinary barrel, or on a tank. When desired, two lengths of hose and two or four nozzles can be used by attaching a large Y to the screw spout of pump so enabling you to spray from both sides of the wagon at the same time. This pump has a large air chamber and possesses great power and force. The churn dash agitator attached to piston thoroughly mixes the solution at every stroke of the pump handle. I do not furnish barrels, as suitable ones on which pump is easily mounted can be secured in all localities. At prices quoted below each pump is fitted with five feet of hose, five feet of extension pipe and one "Kant-Klog" nozzle, making a splendid outfit fully guaranteed, at a very low cost. I have used one of these sprayers for many years for spraying my barns, cellars, orchards and trees in my nursery. You can make no mistake by buying one of these sprayers. With ordinary care they will last almost a lifetime.

No. 8, with all brass plunger, brass valve and valve seat.....\$18.50

When desired, I furnish a three-quarter inch shut-off cock for.... 1.00

Large Y for attaching 2 hose to spout, 80c; additional hose, 18c per foot.

Rochester Barrel Sprayer

ROCHESTER "KANT-KLOG" SPRAYER

On the "KANT-KLOG" nozzle described above, the item of labor alone is **three times what the nozzle can be furnished for.** Hose is high grade—supported by coiled spring to prevent breakage, coupling solid brass with standard cut threads. Air pump of heavy brass tubing two inches in diameter. The sprayer body is made of heavy polished brass. A few seconds working of the air pump charges the sprayer with compressed air, a powerful and elastic force which discharges the liquid in the form of either fine sprays or solid streams as desired. Each sprayer is fitted without extra charge, with "KANT-KLOG" nozzle for making two round and one flat sprays, two solid streams, thumb pressure spring hose cock, carrier strap and safety valve. This is the best spray on the market for spraying chicken coops, barns, hog sheds, garden truck and small fruit trees. The can holds 4 gallons, two or three pumpings will spray out the entire contents. **Price:** with polished brass body, \$8.50; galvanized body, \$6.50 18-inch brace extension rods, 50c each, postpaid.

ROCHESTER SPRAY AND FORCE PUMP

We do away entirely with the objectionable foot-rest, clamps, leather suction, packing, etc. This pump requires no fastening of any kind, holds itself down and works anywhere and everywhere. All the operator need do is to press the plunger down. It rises of itself, the upward stroke being made by a brass spring forcing the cylinders apart. The all brass suction working with a brass cylinder with all brass valves, does away entirely with all leather, rubber or other packing. It is practically impossible for any part to get out of order. Everything except handle and hose is solid brass. It is the easiest working and will do more different kinds of work than any other pump ever made. Will pump from a pail, barrel, tank, spring or creek. Without fastenings of any kind, it stands firmly wherever placed. Weighs only four lbs. and is ready for instant use everywhere. Farmers with an ordinary amount of spraying put a barrel on their wagons, set the pump in and spray their trees as effectively as their neighbor who uses an outfit weighing and costing five times as much. Will throw two solid, continuous streams, one flat spray and one fine round spray. Has automatic mixer to keep solution stirred. Pleases everybody and will last a lifetime. **Price:** Of pump complete as shown in cut, \$4.00, not prepaid.

kind, it stands firmly wherever placed. Weighs only four lbs. and is ready for instant use everywhere. Farmers with an ordinary amount of spraying put a barrel on their wagons, set the pump in and spray their trees as effectively as their neighbor who uses an outfit weighing and costing five times as much. Will throw two solid, continuous streams, one flat spray and one fine round spray. Has automatic mixer to keep solution stirred. Pleases everybody and will last a lifetime. **Price:** Of pump complete as shown in cut, \$4.00, not prepaid.

Dear Mr. Sonderegger:

I am proud of the shipment of fruit trees I received the 12th of March. You surely sent it in a hurry, also have to state that your trees have the finest, largest undamaged roots I ever saw. It is a pleasure to plant such trees. I was so often disappointed in ordering trees of any kind that I haven't planted a fruit tree in ten years. Got so I tell my wife I won't order any more. I thank you for the fine trees, also have to state you put in some extras. Thanks. You are going to get a bigger order next fall. Wishing the best of success (which you can't help but have as such trees talk and advertise themselves.)

Very truly yours,

G. Besemer, Green Hedge Farm, Chattanooga, Okla.

Rochester
Spray and

Action.

SPRAYING MATERIAL

Insecticides cannot be sent by mail. The prices quoted are net. Purchaser must pay all express or freight charges. For prices on larger quantities than quoted, write. Any information desired in relation to insecticides or fungicides will be given as far as data at hand will permit.

HAMMOND'S SLUG SHOT

A combination of the most potent insecticides and soluble plant foods. It destroys all insects injurious to house or garden plants, shrubs, trees, vines, potatoes, melons, cabbage, currants and vegetables and fruits of all kinds. This preparation, though poisonous to insects does not injure the foliage. **Price:** Not prepaid, 5 lbs. 60c; 10 lbs. \$1.00. By mail, 7c per lb. extra. I also have Slug Shot in 1-lb. cartons, with perforated top, ready for use. **Price:** 1-lb. cartons, 25c each. Postpaid, 30c each.

Bug Death Sifter

BORDEAUX MIXTURE

Regular Bordeaux Mixture can only be used against fungus and scales, while the Bordeaux Mixture I offer here has enough poison mixed in to kill all chewing insects, such as eat leaves, and can be used wherever Arsenic of Lead, Paris Green and London Purple are used. This is the finest and best article of its kind made in America. Ready for immediate use. Works freely without clogging in any spraying machine. To be diluted 25 to 50 times with water and sprayed. This article is so well made that it covers a very large leaf surface; the even distribution in minute mass is what does the protective work. It sticks effectively. **Price:** 1-lb. can, 60c postpaid. Not prepaid, 5 lbs. can \$2.50.

BLACK LEAF 40." Sulphate of Nicotine

This is one of the best all around spraying materials. It is especially recommended for killing the green aphid or lice which usually appear on sweet peas, cucumbers and other vines. When using "Black Leaf 40" care should be taken to follow directions. For green aphid or louse add 1000 parts water to one part "Black Leaf 40." It can be used for spraying all kinds of plants. It is also very valuable when used as a dip for cattle and sheep. A 10-lb. can of "Black Leaf 40" will produce 960 gallons of dipping solution, which still has the required strength as specified by the U. S. government. "Black Leaf 40" cannot be sent by mail. Price by express or freight only. 1-oz. bottle, 35c; 8-oz. tins, \$1.35; 2-lb. tins, \$3.75; 10-lb. tins, \$15.50. Not prepaid.

SULPHO TOBACCO SOAP

It quickly exterminates all insect life on plants and flowers in and out of doors. Destroys squash, melon and potato bugs. Makes a good wash for dogs and all animals. Prevents poultry lice. **Price:** 3-oz. cake (for 1½ gallons) 10c; or postpaid, 15c; 8 oz. cake (for 4 gallons) 20c; or 28c postpaid.

BUG DEATH

This preparation I highly recommend. It is sure death to the potato bug and all other vegetable pests and besides, it acts as a fertilizer. I feel much confidence in offering this to any of my customers who want a quick acting, non-poisonous bug killer. It can be used on all vegetables and fruit crops with excellent results. **Price:** 1-lb. pkg. 25c; 3-lb. pkg. 55c; 5-lb. pkg. 75c. By mail, 7c per lb. extra.

BUG DEATH ALPHA

Bug Death Alpha is very much like Bug Death. only it is made more for destroying insects such as the striped cucumber bugs, squash bugs and green plant lice which suck the sap from the plants. 12-oz. pkgs. 30c postpaid. 22c by express, not prepaid.

TOBACCO DUST

Destroys rose bugs, lice, vine bugs, tomato worms, currant worms, cabbage lice and worms and parasites of all descriptions. Should be applied when foliage is wet. Will not burn or injure the plants. **Price:** 1-lb. 10c; 5 lbs. 45c; 7c per lb. extra if sent by mail. Not prepaid, 10 lbs. 85c; 100 lbs. \$8.00; 1-lb. pkgs., with sifter top, 20c postpaid.

NICO DUST NO. 10

I find this to be one of the best powder insecticides. It is made for the more resistant insects, such as the Sweet Pea Aphid, Garden Beetle, Striped Cucumber Bug, Cucumber and Melon Aphid, and many other insects of similar nature. Put up in 5-lb. pkgs. only. **Price:** \$2.75 per pkg., postpaid.

GENERAL DIRECTIONS FOR APPLYING

Do not wait until the pests become abundant because by that time great damage has been done. Get a good dusting machine and dust the plants thoroughly. Apply direct to infected portions of the plants. "Nico-Dust" products are most powerful in warm, bright sunshine and should be applied when the air is still or disturbed only by a slight breeze. Dusting in the early morning gives best results.

"NICO GARDEN DUST"

Is made for the home gardens where small fruit trees, roses and other decorative flowers and plants are grown. It will eradicate in one application both the insect and mildew, leaf cutting insects, red spider, slug, snails, and in fact the majority of the commonest pests found in the family garden. It is put up in half-pound, self-blowing cartons, or 2 and 5-lb. containers. **Price:** 8-oz. cartons 45c, postpaid; 2-lb. container, \$1.35 postpaid; 5-lb. container \$2.75, postpaid.

DICKEY BUG DEATH DUSTER.

This duster is one of the handiest things in the garden for applying Bug Death, Slug Shot, Tobacco Dust or any other insect poison in the powder form. **Price:** 75c postpaid; 65c not prepaid.

BUG DEATH SIFTER

For applying Bug Death, Slug Shot, Paris Green mixed with lime or land plaster to potato vines, cotton, tobacco, egg plants, tomatoes, cabbage, rose and currant bushes and all other plants and vines requiring a top application. Will cover instantly and perfectly a plant 3 inches or 3 feet in diameter as fast as a man can walk. Weighs 2 pounds. By express or freight not prepaid, 90c; by parcel post, prepaid, \$1.00.

SONDEREGGER'S IMPROVED TREE WAX.

After years of experimenting I find this tree wax to be superior to all other varieties which I have ever tried out. This wax can be used for budding or grafting trees, also in pruning them. **Price:** ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c, postpaid.

I have never mentioned anything to you about my orchard of 76 trees, which were bought of your nursery, four and five years ago and the shrubbery also. They are a pleasure to look at and anybody who sees them thinks the same. They have made a real good growth. Of course, I have given them extra good care, especially the first three years, by hoeing and cultivating them.

E. F. Yindrick, David City, Nebr., R. F. D. No. 2.

An Alfalfa Root showing the nodules after using Nitragin.

GROW LARGER CROPS BY USING NITRAGIN

Everyone should use Nitragin on all lagume plants, such as garden beans, peas, sweet peas, cow peas, soy beans, alfalfa, clovers, vetches, and peanuts. It insures better stands, larger crops and improves the soil.

Nitragin now comes in bushel sizes instead of acre sizes. This means that it costs you less per acre than inferior inoculators. If you sow 12 lbs. seed per acre it will cost you 20c for your Nitragin. Since put up in this way I find it to be the best and cheapest inoculator on the market.

WHEN ORDERING DO NOT FAIL TO STATE THE KIND OF SEED YOU WISH TO INOCULATE. I can supply inoculator for the following lagumes: Alfalfa, all Sweet Clovers (including Hubam), Mammoth, Alsike, Crimson, White and Medium, Red Clover, Garden Peas, Field Peas, Vetches, Sweet and Perennial Peas, Garden Beans, Cow Peas, Lima Beans, Japan Clover, Peanuts and Soy Beans. **Price:** ¼ bushel, 40c; ½ bushel, 60c; 1 bu. \$1.00; 5 bu. \$4.75 3-in-1 inoculator for Beans, Peas or Sweet Peas, enough for 10 lbs., 20c postpaid.

SONDEREGGER'S ELASTIC PRUNING PAINT

Saves girdled trees, heals cuts and wounds, prevents decay, stops bleeding in pruning and kills the borer. A positive and effectual remedy for the treatment of fruit and shade trees. It is a positive and healthy stimulant to the growth of wood and bark. It is not poisonous, but no insect can abide it. It is applied like varnish. **After application it never cracks and is wholly impervious to air or water, and will keep for years without change or impairment.** Its qualities are known and proved. A tree may be almost completely girdled,

and if, within a short time thereafter, the girdled surface be covered with Elastic Pruning Paint, the tree will suffer no substantial loss of growth, a new bark will form by degrees upon the girdled surface. It is an effectual enemy of insects and vermin that attack trees and shrubs in the body, especially the "borer." This troublesome insect deposits its egg in the bark near the ground in June, after being hatched, the larva saws its way into the tree, perforating it in all directions, sometimes completely girdling it. Elastic Pruning Paint is the only remedy that will absolutely destroy them in their burrow, as well as prevent a deposit of eggs, if applied for that purpose. It is the result of long experiment. Apply this paint same as house paint, using a stub or half-worn paint brush and wood paddle. In cold weather, warm it up good. I can recommend this paint. I find this paint excellent for all wounds of trees and I use it in my own orchard and garden. **Price:** one pt. can 55c; one qt. can, 90c postpaid. By freight or express, one pt. can, 40c; one qt. can, 60c; one gal. can, \$2.00, not prepaid.

Tree Protectors.

WALKER'S EXCELSIOR PLANT FOOD

A soluble food for house plants, containing all the elements necessary to nourish and make beautiful flowers and plants, and prolongs the period of blooming. Large box sufficient for 25 plants for one year, 30c postpaid, 45c. Small package, 15c; postpaid, 25c.

NITRATE OF SODA

This is one of the best and cheapest fertilizers for garden truck of all kinds, especially cabbage, lettuce, tomatoes, endive, celery cabbage. It should be used at the rate of 100 pounds per acre or one teaspoonful mixed into the ground at transplanting time and the same amount twice more during the season at intervals of 3 or 4 weeks. **Price:** Lb. 20c; 2 lbs. 35c postpaid. Not prepaid, 1 lb. 15c; 2 lbs. 25c; 100 lbs. \$9.25

FRUIT PICKER

The superiority of this fruit picker can be seen at a glance. Picking can be done from any angle by a gentle push or pull. Bag is 8 inches deep and 6 inches in diameter. Circle and ferrule are made of 16-gauge steel, strong and durable. Its price is so low that even those who have but little fruit to gather can well afford to use one. Owners of large orchards will greatly increase the efficiency of their help by supplying each person with one of these pickers. **Price:** Complete, as shown in cut, without pole, each 75c. postpaid.

THE RENKEN SURE CATCH GOPHER TRAP.

The trap is easy to set. All you have to do is to open the gopher hole to the main runway (no digging or covering up the trap) put the trap half length into the hole, then set the trap, and when it is set, the mouth of the trap is a little larger than the ordinary gopher hole, but if the ground is not too hard, the trap is easily set. If, however, the ground is very hard and dry, enlarge the hole a little. One trap is sufficient to catch all the gophers on an ordinary sized farm, but for two reasons you ought to have two or more traps: First, if your meadow is any distance from your home, it saves you time walking to and from setting traps; and second, often when you open the gopher hole you get into the main runway, then you have two holes and you don't know which hole the gopher will set in, to close first, but if you can put one in each hole and be sure of getting the gopher. I have sent out thousands of these traps and have received many testimonials from my satisfied customers. I still have my first complaint to receive on them. Guaranteed to do the work if properly set, or money refunded. **Price:** each, 80c or two for \$1.50 by paid parcel post; 70c each, not prepaid.

Fruit Picker.

Renken Sure Catch Gopher Trap.

The Renken Gopher trap I got of you last year sure cleaned up the gophers. They were on the job and if I could not get them cheaper, would pay \$5.00 apiece. More than paid for themselves last year and are as good as ever for this year.

Chas. O. Whitney,
Oak Creek, Colo.

APPLE CUTTER

A simple, durable tool for general household use, especially adapted to preparing apples for baking. Will cut potatoes for French fries. It is the only tool which will gracefully slice the apple into eight equal parts and dig out the core at the same time. **Price:** 75c postpaid.

KEES CALF WEANER

Weaners that fasten with split keys or buckles are hard to put on unless the calf holds very still, which it very seldom does. With this one all you have to do is to open it up and close it on the calf's nostrils. One arm is riveted solid to the plate. The other can be turned back to open. A small brass spring holds this arm in place. It's light—it won't catch on things—the balls are perfectly smooth—there's nothing about it to injure the calf's nose. Won't break, made entirely of stamped steel, galvanized.

MADE IN TWO SIZES.

Price: Small, size of plate, 3 inches by 4 3/4 inches, 30c each, by paid parcel post. **Large,** size of plate 3 3/4 by 5 inches, 35c each, by paid parcel post.

MASTER PLANT SETTER

Every farmer, truck grower and gardener should have one or more. Any man with very little practice can set 12,000 plants each day. One man will set, water if desired, fertilize more plants than three men can set by hand—and every plant is securely rooted by absorption, nature's way, so that it has a chance to grow. Two barrels of water with one of these setters will insure a perfect stand of plants on one acre, **rain or no rain.** The Setter is durably constructed, the invention of a practical man, sold on honor—your satisfaction guaranteed. Price is reasonable. There is **no stooping when using.** Sets all kinds of plants, such as cabbage, tobacco, tomatoes, cauliflower, strawberries, sweet potatoes, sugar beets, etc., and the plants are set in water and covered at one operation. **Price:** each, \$6.00.

TREE PROTECTORS

My Improved Tree Protectors are made from wood veneer, 10 inches wide by 20 inches long, are soaked at the lower end in creosote, which preserves the wood coming in contact with the ground. Their advantages are: The prevention of injury from rabbits and mice; from borers, insect pests, hot blistering sun and winter blasts; from injury against the wiffle-tree when cultivating the orchard; against sun scalds. Trees thus protected will not become hide-bound; it will prevent the bark from bursting open on young trees in extreme cold weather. I will furnish this protector for 2 1/2c each, \$2.00 per 100, not prepaid. Tree protectors absolutely cannot be sent by parcel post.

CYCLONE BROADCAST HAND SEEDER

Warranted to give satisfaction. The Cyclone has a national reputation as a high-grade seed sower. It is built, not for cheapness, but for durability and accurate work. It is made with a shaped bottom, which makes a nice, even feed and there is no danger of it clogging up. It also has a shut off that can be opened or closed without changing the feed. This alone saves much trouble in getting the feed set exactly the same again after the shut-off has been closed. It always opens back exactly to the same place. It weighs less than 4 lbs., yet is strong and durable, and so simple that a boy can operate it. Just the thing for sowing all kinds of clover, alfalfa and grass seed, millet, rape and even larger grains, also fertilizer. **Price:** \$2.25 prepaid. Not prepaid, \$2.00.

GARDEN TROWELS

An indispensable tool to everyone who has a vegetable or flower garden to look after. These trowels are strong and durable. Six-inch trowels, 20c each. Narrow, six-inch trowels, 20c each. Postage, 5c extra for each trowel.

PRUNING KNIVES

NO. 4. A very good combination knife, used extensively in nurseries, parks and by fruit growers; 3 1/2-inch handle. Contains pruning blade, jack-knife blade and budding blade so that it combines all the cutting tools needed in orchard or garden. The blades are made of the very best steel. It is the best all around pruning knife I have ever used. **Price** of No. 4, \$1.50 each, by paid parcel post.

No. 3 Pruning and Budding Blade.....\$1.25
No. 2 Pruning Blade only 1.00

IDEAL HAND WEEDER.

This is the best hand weeder for all purposes, and a first class labor saver. I use a large number of weeders in my nursery and find them to give perfect satisfaction. Each, 25c; 6 for \$1.25. Postpaid, 30c each.

EXCELSIOR WEEDER

This is one of the best all around garden weeders and can be used to great advantage in any garden. **Price:** 20c each. Postpaid, 25c.

ROSS HAND SPRINKLER

Everyone who has a garden hose should have a Ross Sprinkler. I have tried out many kinds of sprinklers and find this to be the best on the market. This sprinkler throws a gentle spray just like rain. It does not splash nor tear holes in the ground, under high pressure, like all other hand sprayers. Made in one size only. **Price:** \$1.00, postpaid. See illustration, page 127.

Excelsior Weeder.

CULTIVATOR HOE No. 33

Everyone who has a garden should have a cultivator hoe to make their work more easy. With this cultivator hoe you can go over your garden in just half the time required with the old-style hoe. It has three adjustable shovels and prongs made of strong steel and a good, four-foot handle. The midget cultivator is made just the same, only it is much smaller. Just the thing for scratching in your garden. **Price** Cultivator Hoe No. 33, 85c, not prepaid; Midget Cultivator Hoe No. 11, 60c postpaid. Cannot be sent by parcel post.

ACME POTATO PLANTER

This planter enables one man going over the field but once, to plant two or more acres in a day, and this almost as easy as he could walk the same distance in the same time. It makes the holes, drops and covers at the same time. It is important in planting that they be dropped in moist soil and covered before the soil dries out. This Acme Planter does perfectly. **Weight**, 2½ pounds. **Price**: \$1.25, not prepaid.

Cultivator Hoe No. 33.

Midget Weeder No. 11.

GOOD FARM AND GARDEN BOOKS

HOME FLORICULTURE. By Eben A. Rexford. A practical guide to the treatment of flowering and other ornamental plants in the house and garden, intended exclusively for amateur floriculturists by one of the most successful floriculturists in America. Illustrated. 300 pages, 5x7 inches. Cloth.....\$1.75

THE PRACTICAL FRUIT GROWER. By S. T. Maynard. Just what the beginner needs and the successful fruit man practices. Illustrated. 128 pages, 5x7 inch. Cloth.....\$1.00

TOMATO CULTURE. By Will W. Tracy. The most complete account of tomato culture in all its phases that has ever been gotten together. No gardener or farmer can afford to be without the book. Whether growing for home use or commercial purposes, the reader has here suggestions and information nowhere else available. Illustrated 150 pages, 5x7 inches. Cloth.....\$1.00

POPULAR FRUIT GROWING. By S. B. Green, Professor of Horticulture and Forestry in the University of Minnesota. This book gives full information in regard to planting and taking care of all kinds of fruit trees, also a complete spraying calendar with necessary recipes. 328 pages. **Price**: Well bound, cloth cover.....\$1.50

SWEET CLOVER. White Flowering. By C. M. Carroll. Not a weed, but a valuable crop. Practical experiences of farmers, who are growing and feeding Sweet Clover. A book which every farmer should have. 64 pages of practical information on the agricultural value of Sweet Clover. Illustrated. 6x9 inches. Paper cover.....\$0.25

VEGETABLE GARDENING. By S. B. Green. A manual on the growing of vegetables for home use and marketing. Illustrated. 252 pages. Well bound. Cloth cover.....\$1.50

STRAWBERRY CULTURIST. By Andrew S. Fuller. Containing all information necessary to enable everybody to raise their own strawberries. Fully illustrated. 5x7 inches. Flexible cloth.....\$0.35

CULTIVATION OF THE MUSHROOM. Everyone growing mushrooms should have one of these books in order to get the best results. This is a 24-page book with paper cover, and it gives full instructions about growing mushrooms. **Price**: Postpaid.....\$0.25

MEIN GARTENBUCH. Printed in German only. This book I import from Germany to take the place of the Hans Bushbauer book which is no longer published. It is 9x5½ inches and has over 300 pages. It gives full information in regard to gardening of all kinds. **Price**: Prepaid.....\$1.50

HAMPERS GARTENBUCH. (Printed in German only.) This is the best German garden book printed. It gives full instructions for growing vegetables and flowers of all kinds, both for greenhouse and garden, in fact, anything you want to know about plants. Has 500 pages and is also well illustrated. This book is also imported from Germany. **Price**, \$2.50 each, postpaid.
